A time-accurate numerical method for chemically reacting flows at all Mach numbers p 500 N94-13198
Topics on spatially high-order accurate methods and pre-conditioning for the Navier-Stokes equations with finite-rate chemistry p 633 N94-13572
Hypersonic overview p 505 N94-14154
Computation of nonequilibrium flows using PNS equations p 641 N94-14610
Simulation of hypersonic, reacting flow around reentry bodies: Comparisons of numerical and experimental results
[MBB-LME-211-S-PUB-507] p 509 N94-14710
Studying Turbulence Using Numerical Simulation Databases. 4: Proceedings of the 1992 Summer Program
[NASA-CR-194556] p 643 N94-14745
DNS and modeling of the interaction between turbulent premixed flames and walls p 646 N94-14763
The evolution equation for the flame surface density in turbulent premixed combustion p 567 N94-14764
Effect of finite-rate chemistry and unequal Schmidt numbers on turbulent non-premixed flames modeled with single-step chemistry p 567 N94-14766
Stochastic modeling of turbulent reacting flows p 647 N94-14768
REACTION KINETICS
Molecular solvent-dynamical effects on activated electron-transfer kinetics: How important is solvent friction?
[AD-A265886] p 779 N94-12894
Modeling ignition chemistry
[DE93-012340] p 561 N94-12910
Conversion of light hydrocarbon gases to metal carbides for production of liquid fuels and chemicals
[DE93-014962] p 583 N94-13002
Infrared absorption spectroscopy and chemical kinetics of free radicals
[DE93-015078] p 562 N94-13004
Fifteenth Combustion Research Conference
[DE93-015758] p 562 N94-13045
A coherent flame model of premixed turbulent combustion in a counterflow geometry
[CUED/A-THERMO/TR.60] p 562 N94-13085
Research on chemical vapor deposition processes for advanced ceramic coatings
[NASA-CR-193613] p 577 N94-13089
Absorption and damage thresholds of low defect density hafnia deposited with activated oxygen
[DE93-013853] p 655 N94-13243
Low temperature metal-organic chemical vapor deposition growth processes for high efficiency solar cells
[DE92-010562] p 702 N94-13386
Application of synchrotron radiation in chemical dynamics
[DE93-015040] p 563 N94-13411
Chemical reactions in scramjet engines: Reduced kinetic models for ignition, combustion and nozzle flow
[NAL-TR-1184] p 563 N94-13458
Reduction of Pu(6) with hydrogen peroxide: Effects of plutonium, peroxide, and iron concentrations and of reaction time
[DE93-013598] p 564 N94-13487
Chemistry and transport in a multi-dimensional model
[NASA-CR-194425] p 716 N94-13969
Hypersonic overview p 505 N94-14154
Hydrogen peroxide safety issues
[DE93-013895] p 565 N94-14346
Modeling surface area to volume effects on borosilicate glass dissolution
[DE93-011891] p 581 N94-14432
Numerical simulation of velocity-coupled combustion response of solid rocket propellants p 585 N94-14490
Numerical simulations of turbulent premixed H2/O2/N2 flames with complex chemistry p 567 N94-14765
Study of chemical reactions under the influence of ultrasound
[DE93-016458] p 778 N94-14867
Comparative ignition of hexane and octane isomers in a shock tube
[DE93-016535] p 566 N94-14869
REACTION TIME
Reduction of Pu(6) with hydrogen peroxide: Effects of plutonium, peroxide, and iron concentrations and of reaction time
[DE93-013598] p 564 N94-13487
REACTION WHEELS
Low cost attitude control system reaction wheel development
[NASA-CR-191332] p 540 N94-13140
REACTIVITY
Applications of surface science to solid lubricants
[SMC-TR-93-24] p 579 N94-13903
Metastability of yttrium-oxides
[DE93-016548] p 813 N94-14440
REACTOR CORES
Heavy section steel irradiation experiment
[DE93-015517] p 573 N94-14537
REACTOR MATERIALS
A data base for aging of structural materials
[DE93-009714] p 824 N94-13915
Estimation of strain in 1-kW primary containment vessels by microstructural examination
[DE93-013053] p 573 N94-14316
Investigations of low-temperature neutron embrittlement of ferritic steels
[DE93-015460] p 573 N94-14700
REACTOR SAFETY
Preliminary nuclear safety assessment of the NEPST (Topaz 2) space reactor program
[DE93-012853] p 551 N94-13514
A data base for aging of structural materials
[DE93-009714] p 824 N94-13915
SHEAN (Simplified Human Error Analysis code) and automated THERP
[DE93-014904] p 738 N94-14451
REACTOR TECHNOLOGY
Test apparatus for ITER blanket cooling water distribution design
[DE93-753157] p 795 N94-12944
READERS
Development of an automated film-reading system for ballistic ranges
[NASA-CR-194398] p 650 N94-13815
REAGENTS
Unexpectedly rapid hydrosilation polymerization of the diallyl derivative of bisphenol A and 2,6-diallylphenol
[AD-A265832] p 577 N94-12986
REAL TIME OPERATION
Laser-induced fluorescence over optical fibers for real time in situ measurement of petroleum hydrocarbons in seawater
[AD-A265106] p 790 N94-12863
Real time radiography of Titan 4 booster
[DE93-012450] p 548 N94-12911
Development of a portable multispectral thermal infrared camera
[NASA-CR-191340] p 648 N94-13176
Thermal Expert System (TEXSYS): Systems automony demonstration project, volume 1. Overview
[NASA-TM-102877] p 538 N94-13201
Error analysis of real time and post processed or bit determination of GFO using GPS tracking
[NASA-CR-193646] p 512 N94-13238
The silent step in time
[CWI-CS-R9221] p 768 N94-13496
Weather forecasting support for AASE-2
[NASA-CR-194342] p 721 N94-13675
Communications and control for electric power systems: Power flow classification for static security assessment
[NASA-CR-194512] p 624 N94-13948
Portable acoustic wave sensor systems for real-time monitoring of volatile organic compounds
[DE93-013753] p 582 N94-14511
Real-time dynamic simulation of the Cassini spacecraft using DARTS. Part 2: Parallel/vectorized real-time implementation p 680 N94-14639
Design and control of a macro-micro robot for precise force applications p 682 N94-14651
Identification of continuous-time dynamical systems: Neural network based algorithms and parallel implementation
[DE93-014427] p 766 N94-14737
Mathematic methods and algorithms for real-time applications
[AD-A266776] p 771 N94-14789
RECEIVERS
Adaptive Signal Processing Testbed
[DSIS-93-00258] p 604 N94-13869
Calibration of the receiver channel for the GOPEX precursor experiments p 610 N94-14387
RECONNAISSANCE AIRCRAFT
Design and pilot evaluation of the RAH-66 Comanche Core AFCS p 525 N94-13321
Design and pilot evaluation of the RAH-66 Comanche selectable control modes p 525 N94-13322
An analysis of helicopter attrition using a low level combat simulation
[DSIS-93-00282] p 515 N94-13839
RECORDS MANAGEMENT
Making the connection between information modeling and implementation
[DE93-011588] p 820 N94-12907
RECOVERABLE LAUNCH VEHICLES
HOPE conceptual design in FY 1991
[NASDA-CNT-930017] p 535 N94-13600
Conceptual design on H-2 Orbiting Plane (HOPE)
[NASDA-CNT-930018] p 535 N94-13656
The concept study of the space transportation system HOPE in FY 1991
[NASDA-CNT-930016] p 536 N94-14100
RECTANGLES
Fully developed turbulent flow in rectangular interrupted-plate ducts
[ISBN-0-315-63594-0] p 632 N94-13474
RECTANGULAR PLATES
Measuring methods for CFRP laminates' bending and torsion rigidities characteristics p 529 N94-13272
RECTIFICATION
Plasma-etching science meets technology in the MDL
[DE93-012086] p 800 N94-13908
RECURSIVE FUNCTIONS
Spatially-varying IIR filter banks for image coding
[NASA-CR-193727] p 619 N94-12897
Recursive time-varying filter banks for subband image coding
[NASA-CR-193726] p 598 N94-12920

RECYCLING
Evaluation for membrane components of water recycling system
[NAL-TM-646] p 737 N94-13388
Survey and study on Environmental Control and Life Support (ECLS) technologies, part 2
[NASDA-CNT-930012-PT-2] p 737 N94-13472
Recycling in space
[NASA-TM-109307] p 737 N94-13615
Effect of stabilization on the recycling of polyolefins in blow moulding
[IMI-93RT-42400-1477-G] p 596 N94-13684
Fourteenth National Industrial Energy Technology Conference: Proceedings
[DE93-016698] p 710 N94-14516

RED SHIFT
Redshift distortions of galaxy correlation functions
[DE93-014007] p 834 N94-12980
A photometric and morphological study of compact groups of galaxies and their environments
[ISBN-0-315-59601-5] p 829 N94-13370
The flight performance of the Galileo orbiter USO
p 611 N94-14398
A long-term space astrophysics research program: The evolution of the quasar continuum
[NASA-CR-193714] p 839 N94-14404
Brillouin scattering from fluctuations produced by stimulated Raman scattering
[DE93-016531] p 792 N94-14438

REDUCED ORDER FILTERS
Failure modes of reduced-order orbit determination filters and their remedies p 532 N94-14373
A component modes projection and assembly model reduction methodology for articulated, multi-flexible body structures p 677 N94-14622

REDUNDANCY
Exploiting the cannibalistic traits of Reed-Solomon codes p 609 N94-14378

REDUNDANT COMPONENTS
Generalized impedance control of a redundant manipulator p 661 N94-13575

REED-SOLOMON CODES
Exploiting the cannibalistic traits of Reed-Solomon codes p 609 N94-14378
Enhanced decoding for the Galileo S-band mission
p 609 N94-14380

REELS
An experimental study of tether reel system: A laboratory model
[NAL-TR-1176T] p 539 N94-12943

REENTRY VEHICLES
High temperature electromagnetic characterization of thermal protection system tile materials
[NASA-CR-189687] p 578 N94-13431
Simulation of hypersonic, reacting flow around reentry bodies: Comparisons of numerical and experimental results
[MBB-LME-211-S-PUB-507] p 509 N94-14710

REFERENCE STARS
Optical propagation through atmospheric turbulence. Model analysis of anisoplanatism and application to adaptive optics
[ONERA-P-1992-4] p 716 N94-14192

REFILLING
Studies on equatorial shock formation during plasmaspheric refilling
[NASA-CR-194392] p 715 N94-13954

REFLECTANCE
Reflective coatings for solar applications
[DE93-010026] p 702 N94-13381
Optimization of transparent and reflecting electrodes for amorphous silicon solar cells
[DE93-010009] p 704 N94-14110
Determination of the surface cleanliness of metals by FT-IR spectroscopy
[DE93-013252] p 565 N94-14525
Shielded open-circuited sample holders for dielectric and magnetic measurements of liquids and powders
[PB93-198851] p 652 N94-14687

REFLECTION
The 24 GHz measurements of 2.2 lambda conical horn antennas illuminating a conducting sheet
[NASA-TM-109002] p 598 N94-12811

REFLECTOR ANTENNAS
An initial study of using the 34-m antenna for lunar mission support p 611 N94-14396
Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas
[NASA-CR-194491] p 612 N94-14501

REFLECTORS
Analysis of samples of reflector materials which are multicoated and metal samples with oxide coatings which have been exposed the space environment in LDEF testing
[NASA-CR-193647] p 575 N94-12789
Fundamentals and techniques of nonimaging optics
[DE93-013145] p 791 N94-13015
Research on inflatable structure for space use
p 530 N94-13275
Reflective coatings for solar applications
[DE93-010026] p 702 N94-13381

REFRACTION
Optimization study of x ray laser coherence in Ni-like Ta
[DE93-016419] p 660 N94-14888

REFRACTIVITY
The optical constants and spectral specular reflectivity of Highly Oriented Pyrolytic Graphite (HOPG)
[DE93-011894] p 790 N94-12865
Optical properties of CO2 ice and CO2 snow in the ultraviolet, visible, and infrared
[NASA-CR-194110] p 686 N94-14081
Manufacturing and examination of integrated optical waveguide components in silicon
[ETN-93-94393] p 793 N94-14704

REFRACTORIES
How to read a phase equilibrium diagram for high-temperature ceramics material as main object
[DE93-512333] p 582 N94-14513

REFRACTORY COATINGS
Research on chemical vapor deposition processes for advanced ceramic coatings
[NASA-CR-193613] p 577 N94-13089

REFRACTORY MATERIALS
High-temperature corrosion and protection of materials
[DE93-011072] p 568 N94-12998
How to read a phase equilibrium diagram for high-temperature ceramics material as main object
[DE93-512333] p 582 N94-14513

REFRACTORY METAL ALLOYS
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-006] p 558 N94-14573

REFRIGERANTS
ARTI Refrigerant Database
[DE93-014774] p 595 N94-13021
Miscibility of lubricants with refrigerants, phase 1
[DE93-014766-PHASE-1] p 596 N94-13407
Compatibility of refrigerants and lubricants with motor materials
[DE93-014768] p 583 N94-14801

REFRIGERATING
ARTI Refrigerant Database
[DE93-014774] p 595 N94-13021
Double inlet pulse tube cryocooler theory
[AD-A266832] p 597 N94-14877

REFRIGERATORS
Three-stage linear, split-Stirling cryocooler for 1 to 2K magnetic cold stage
[NASA-CR-4538] p 776 N94-13897
A recuperative superfluid Stirling refrigerator
[DE93-016521] p 597 N94-14592
Double inlet pulse tube cryocooler theory
[AD-A266832] p 597 N94-14877

REGENERATION (ENGINEERING)
Destruction of problematic airborne contaminants by hydrogen reduction using a Catalytically Active, Regenerable Sorbent (CARS)
[NASA-CR-194354] p 709 N94-14103

REGENERATION (PHYSIOLOGY)
Validated environmental and physiological data from the CELSS Breadboard Projects Biomass Production Chamber. BWT931 (Wheat cv. Yecora Rojo)
[NASA-TM-109272] p 738 N94-13979

REGENERATIVE COOLING
Recent testing of 30 kW hydrogen arcjet thrusters
[NASA-TM-106214] p 551 N94-13430

REGENERATIVE FUEL CELLS
Primary and secondary electrical space power based on advanced PEM systems
[DE93-012643] p 553 N94-14689

REGIONAL PLANNING
Obtaining digital regional planning information from aerial pictures
[REPT-228] p 700 N94-14810

REGOLITH
Workshop on the Space Environment: The Effects on the Optical Properties of Airless Bodies
[NASA-CR-194417] p 842 N94-14298
Impact melting and vaporization in planetary regoliths
p 843 N94-14299
Extrapolation of space weathering processes to other small solar system bodies p 843 N94-14300
Laboratory simulations of lunar darkening processes
p 843 N94-14301
Deposition of impact-generated vapors in the lunar regolith p 843 N94-14302
The state of Fe in the lunar regolith and its relationship to the spectral reflectance properties of the moon
p 843 N94-14303

REGRESSION ANALYSIS
Exploratory data analysis: Past, present and future
[AD-A266775] p 774 N94-14788
Generalized smooth models
[DE93-013045] p 756 N94-14864

REGULATIONS
Environmental awareness
[DE93-014192] p 707 N94-13218
Fourteenth National Industrial Energy Technology Conference: Proceedings
[DE93-016698] p 710 N94-14516

REINFORCING FIBERS
Characterization of composite materials for aerospace structures
[ESA-TT-1260] p 557 N94-13804
Thermal shock resistance of ceramic matrix composites
[NASA-CR-189136] p 557 N94-13920

RELATIVISTIC ELECTRON BEAMS
Excitation of coupled waves in plasma periodic structures by relativistic electron beam and acceleration of charged particles
[DE93-621657] p 794 N94-12853
Stripping efficiencies for 277 MeV/amu gold beam on copper foils
[DE93-014306] p 569 N94-13221

RELATIVISTIC PARTICLES
Investigation of plasma instabilities in the Polar cusp
[NASA-CR-194283] p 796 N94-13084
The theory of relativistic heavy ion collisions
[DE93-015934] p 784 N94-13952

RELATIVISTIC THEORY
The electric field of a current-carrying conductor
[DE93-626637] p 617 N94-14892

RELAXATION (MECHANICS)
Muon spin relaxation studies of heavy fermion superconductors
[DE93-014576] p 815 N94-14773
Thermal history effects on electrical relaxation and conductivity for potassium silicate glass with low alkali concentrations
[NASA-TM-106324] p 583 N94-14845

RELAXATION METHOD (MATHEMATICS)
Theory for iterative solution of large dynamical systems using parallel computation
[TKK-MAT-A304] p 760 N94-14187

RELIABILITY
Computational problems with the binomial failure rate model and incomplete common cause failure reliability data
[DE93-014346] p 669 N94-14143

RELIABILITY ANALYSIS
Chip-level testability requirements guidelines
[AD-A262583] p 619 N94-12967
Switchover software reliability estimate for Paducah freezer/sublimer computer systems
[DE93-013844] p 756 N94-14696
Verification of critical software by statistical testing
[LAAS-93006] p 756 N94-14714

RELIABILITY ENGINEERING
Defining the performance gap: Conducting a self-assessment p 666 N94-13155
On the end-to-end communication problem in unreliable networks
[ITN-93-85188] p 598 N94-13195
Study of the intermateability of Cannon and Souriau subminiature connectors
[CNES-NT-132] p 624 N94-13951
Computational problems with the binomial failure rate model and incomplete common cause failure reliability data
[DE93-014346] p 669 N94-14143
An improved approach for flight readiness certification: Probabilistic models for flaw propagation and turbine blade failure. Volume 1: Methodology and applications
[NASA-CR-194496] p 519 N94-14841
An improved approach for flight readiness certification: Probabilistic models for flaw propagation and turbine blade failure. Volume 2: Software documentation
[NASA-CR-194497] p 519 N94-14842

REMOTE CONTROL
Heavy section steel irradiation experiment
[DE93-015517] p 573 N94-14537

REMOTE MANIPULATOR SYSTEM
Application of intelligently adaptable structure and robot to large space structure p 530 N94-13277
Space Station Common Berthing Mechanism, a multi-body simulation application p 544 N94-14640

REMOTE SENSING
Knowledge-based oceanographic image compression
[AD-A265752] p 821 N94-13041
Linkage of anthropogenic aerosol to clouds and climate
[DE93-016434] p 719 N94-13080
Novel Co:MgF2 lidar for aerosol profiler
[NASA-CR-191525] p 654 N94-13091

Development of a portable multispectral thermal infrared camera
[NASA-CR-191340] p 648 N94-13176
Design of partially supervised classifiers for multispectral image data
[NASA-CR-194299] p 823 N94-13192
Dendrometric variables estimation in homogeneous forests using LANDSAT TM data
[INPE-5455-TDI/497] p 684 N94-13331
Spectral reflectance of soils from Sao Paulo State
[INPE-5424-PRP/172] p 684 N94-13377
Remote sensing of aquatic system
[INPE-5271-PRP/159] p 684 N94-13426
Net radiation mapping of mountainous terrain using Landsat-5 thematic mapper imagery and digital terrain data
[ISBN-0-315-57755-X] p 685 N94-13475
Remote identification of rain and hail with a polarization diversity radar
[ISBN-0-315-55623-4] p 720 N94-13516
A knowledge-based model for the integration of remote sensing into a mineral exploration program
[ISBN-0-315-58982-5] p 685 N94-13523
Analytical framework for modeling scale-related variabilities in remote sensing p 685 N94-13592
A review and analysis of neural networks for classification of remotely sensed multispectral imagery
[NASA-CR-194291] p 763 N94-13603
Operational test of the airborne data acquisition system: SADA, the Bara Bonita experiment
[INPE-5451-NTC/305] p 685 N94-13610
Estimations of temperature and humidity of the canopy in Amazon Forest using microwave data from SMMR sensor of Nimbus-7 satellite
[INPE-5444-TDI/490] p 720 N94-13614
Study on TRMM data utilization for meteorology
[NASDA-CNT-930007] p 721 N94-13643
Advanced solid-state array spectroradiometer data collection during HAPEX-2 Sahel
[NASA-CR-194144] p 808 N94-13875
Wind erosion in semiarid landscapes: Predictive models and remote sensing methods for the influence of vegetation
[NASA-CR-194029] p 715 N94-13956
Activities report of the Netherlands Remote Sensing Board
[ETN-93-93880] p 686 N94-14073
Intelligent environment for interpretation tasks of remotely sensed images
[INPE-5466-PRE/1774] p 687 N94-14082
Volume 14: The first SeaWiFS intercalibration round-robin experiment, SIRREX-1, July 1992
[NASA-TM-104566] p 725 N94-14090
Minutes of the Sixth CEOS Plenary Meeting
[NASA-TM-108252] p 542 N94-14112
Integration of remotely sensed data and cadastral ownership boundaries for land inventory purposes
[BCRS-92-16] p 687 N94-14127
Multisensor remote sensing data and GIS techniques for monitoring preservation areas: A case study
[INPE-5317-PRE/1714] p 688 N94-14131
An algorithm for the remote sensing of fog using satellite-data and additional information
[DLR-FB-92-23] p 688 N94-14135
Water-vapour, total water and rainrate from passive microwave satellite data over ocean
[DLR-FB-92-37] p 723 N94-14189
Asia-Pacific ISY Conference, volume 2
[NASDA-CM-199-VOL-2] p 688 N94-14209
Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR p 688 N94-14212
High performance multi-mode radar altimeter for future spaceborne application p 548 N94-14214
IMG: Interferometric monitor for greenhouse gases p 689 N94-14217
Spectroscopic method and data reduction algorithm for laser long-path absorption measurements using RIS p 689 N94-14218
Image processing and analysis of airborne POLDER data p 689 N94-14219
Overview of the ILAS operational data processing system p 690 N94-14220
TRMM system overview and status in the United States p 690 N94-14221
TRMM Project in Japan: Overview and status p 690 N94-14222
Clouds and the Earth's Radiant Energy System (CERES) on the Tropical Rainfall Measuring Mission (TRMM) p 690 N94-14223
TRMM precipitation radar algorithm p 690 N94-14224
Estimate of sampling errors of TRMM rainfall observation by using radar-AMeDAS composite data p 690 N94-14225
Space measurements for determining the Earth's energy and water cycles p 690 N94-14227
Future TRMM follow-on mission p 691 N94-14228
Remote sensing of low level cloud optical characteristics p 691 N94-14229
The effects of anthropogenic aerosols on optical thickness and particle size of clouds. Part 1: Retrieval algorithm p 691 N94-14230
Climate products from NOAA operational satellites p 691 N94-14231
Seasonal change of the land-surface temperature over Asian Continent derived from GAC data on NOAA-11 AVHRR p 691 N94-14232
Earth radiation budget, cloud, and aerosol parameters derived from AVHRR and TOVS measurements p 691 N94-14233
Some potentials of the Indonesian region for Earth observation p 692 N94-14237
Application of satellite remote sensing technology in disaster mitigation: A case study of Bangladesh p 692 N94-14238
Integration of remote sensing and mathematical modelling in disaster mitigation p 692 N94-14239
Soil erosion mapping using remote sensing and GIS techniques p 692 N94-14240
Detecting land cover changes in Chiang-Mai area in Thailand p 693 N94-14241
Land evaluation for agricultural productivity in North-East Thailand using LANDSAT TM data and geographic information p 693 N94-14242
Effects of typhoon on TOMS data p 693 N94-14243
Satellite remote sensing for disaster mitigation p 693 N94-14244
A concept for the world environment and disaster observation system p 693 N94-14245
Study of the consequences of the Chernobyl accident and technogenic activity in the Republic Belarus using aerospace methods p 693 N94-14246
A tentative plan on China and Asian-Pacific satellite system for disaster reduction p 693 N94-14247
Earth observation from low-inclination orbit as a necessary complement to polar missions p 694 N94-14248
Development of a remote sensing geographic information system for land cover changes and assessment of risk due to natural and man made hazards covering the area of the inner delta of the Yellow River p 694 N94-14249
The role of the dynamics for the deviation of the total ozone from the long-term mean at the edge of the polar vortex p 694 N94-14250
The European Arctic ozone experiment: An investigation of Northern Hemisphere ozone depletion p 694 N94-14251
Space-based activities: SAM 2 and SAGE 2 p 694 N94-14252
New evidences supported the Wei hypothesis about the formation of the Antarctic ozone hole p 694 N94-14253
Multi-source national forest inventory of Finland p 694 N94-14254
Global assessment of human activities p 695 N94-14255
The Swedish ISY contribution p 695 N94-14256
Vegetation mapping of Indo-China Peninsula using MOS-1 MESSR and NOAA AVHRR p 695 N94-14257
Remote sensing for monitoring tropical moist forests in the Indo-Chinese region p 695 N94-14258
Estimation of vegetation damage due to ash fall in Mt. Pinatubo area using MOS-1 data p 695 N94-14259
Mangrove afforestation monitoring using remote sensing p 695 N94-14260
Outline of ISY sea surface temperature data sets p 696 N94-14261
Integration of SST data sets using MOS-1 satellite data: For validation and monitoring p 696 N94-14262
Geophysical validation of ATSR sea surface temperatures p 696 N94-14263
Accuracy validation test of estimated sea surface temperature by satellite data p 696 N94-14264
Sea surface effect on the sea surface temperature estimation by satellite data p 696 N94-14265
On the sea truth data of the Kuroshio meander and cold eddy movement p 696 N94-14266
Tracking of change of a warm-core ring structure p 696 N94-14267
Outline of ISY Kuroshio observation experiment p 697 N94-14268
A method for estimation of partial cloud cover within a pixel and its effect p 697 N94-14269
Warm streamers extended from Warm Core Rings (WCR's) and their role on fish migration and fishing ground formation p 697 N94-14270
Atmospheric correction for sea surface temperature by application of microwave dual-channel technique to VTIR data p 697 N94-14271
Some thoughts on the space programs in the Asia Pacific regions p 697 N94-14272
China's devotion to space science and applications p 532 N94-14273
Survey of subsurface geophysical exploration technologies adaptable to an airborne platform
[DE93-015080] p 717 N94-14294
Workshop on the Space Environment: The Effects on the Optical Properties of Airless Bodies
[NASA-CR-194417] p 842 N94-14298
ERS-1 system
[ESA-SP-1146] p 699 N94-14353
Supervised classification of remotely sensed images
[DLR-FB-92-07] p 700 N94-14428
Educational module for the Higher Agricultural Education. Part 2: Eutrophication observed by remote sensing: An educational approach to water quality monitoring
[BCRS-92-11B] p 818 N94-14462
Determination of the surface cleanliness of metals by FT-IR spectroscopy
[DE93-013252] p 565 N94-14525
The National Remote Sensing Program (NRSP-2 1991 - 2000): The 1992 annual plan of the Netherlands Remote Sensing Board
[BCRS-92-22] p 700 N94-14544
Computer vision and sensor fusion for detecting buried objects
[DE93-012605] p 700 N94-14566
Educational module for the higher agricultural education. Part 1: Land use classification using satellite pictures
[BCRS-92-11A] p 819 N94-14809
Obtaining digital regional planning information from aerial pictures
[REPT-228] p 700 N94-14810
Signal and reference wavelengths for the elimination of SO2 cross sensitivity in remote measurements of tropospheric ozone with lidar
[GKSS/92/E/24] p 617 N94-14819

REMOTE SENSORS

Buoy experiments to obtain the sea-truth data for OCTS/NSCAT, part 1
[NASDA-CNT-930005-PT-1] p 725 N94-13653
Microgravity acceleration measurement environment characterization p 590 N94-13755
Evaluation of the Shuttle remote manipulator
[NASA-CR-194351] p 662 N94-13800
Earth Observation Center Annual Report on Research and Development, Fiscal Year 1992
[EOC-92-01-0007] p 687 N94-14091
Calibration and in-house validation results of JERS-1 data p 687 N94-14092
Earth observation experiment data analysis p 687 N94-14093
ADEOS project p 687 N94-14094
Asia-Pacific ISY Conference, volume 2
[NASDA-CM-199-VOL-2] p 688 N94-14209
Results from ERS-1 and JERS-1 SAR calibration experiments and data analysis p 688 N94-14210
Geologic application of JERS-1 SAR data p 688 N94-14211
High performance multi-mode radar altimeter for future spaceborne application p 548 N94-14214
Sensor operation of Advanced Earth Observing Satellite (ADEOS) p 689 N94-14215
Methods for calibration/validation of AVNIR p 689 N94-14216
Overview of the ILAS operational data processing system p 690 N94-14220
Clouds and the Earth's Radiant Energy System (CERES) on the Tropical Rainfall Measuring Mission (TRMM) p 690 N94-14223
Multiparameter airborne rain radar development for TRMM validation and TRMM-follow-on study p 690 N94-14226
Hardware design for the Autonomous Visibility Monitoring (AVM) observatory p 533 N94-14394

RENAL FUNCTION

Renal function alterations during skeletal muscle disuse in simulated microgravity
[NASA-CR-194258] p 733 N94-13824

RENORMALIZATION GROUP METHODS

Development of a recursion RNG-based turbulence model
[NASA-CR-191511] p 636 N94-13718

REPLACING

On-line upgrade of program modules using AdaPT
[NASA-CR-194331] p 754 N94-14472

REPORTS

NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 34: Users and uses of DOD technical reports: A report from the field
[NASA-TM-109327] p 825 N94-14485

RESEARCH AIRCRAFT
Preliminary design features of the RASCAL: A NASA /Army rotorcraft in-flight simulator p 526 N94-13325
Performance evaluation tests of the GPS/DGPS navigation system installed in the NAL Dornier 228: Preliminary ground test results
[NAL-TM-649] p 513 N94-13346
Position error determination for the speedometer and altimeter of the NAL QSTOL experimental aircraft ASKA
[NAL-TR-1144] p 517 N94-13451
Theoretical support for the Airborne Antarctic Ozone Experiment
[NASA-CR-193669] p 713 N94-13465
Flight validation of a pulsed smoke flow visualization system
[NASA-CR-186026] p 516 N94-14106
RESEARCH AND DEVELOPMENT
National atmospheric sciences program, fiscal years 1987-1990
[NSF-92-16] p 711 N94-12794
Here's the beef: A case study in organizational transformation p 667 N94-13163
JPRS report: Science and technology. Central Eurasia: Space
[JPRS-USP-93-003] p 828 N94-13182
Publications of the Jet Propulsion Laboratory: 1990 and 1991
[NASA-CR-193287] p 823 N94-13461
Artificial intelligence in Canada: A description by the members of the ACAI
[NRC-31789] p 763 N94-13517
Highlights, 1981
[NASA-TM-109305] p 850 N94-13612
Artificial intelligence in Canada: A description by the members of the ACAI
[CNR-31790] p 764 N94-13820
Research and technologhy highlights, 1992
[NASA-TM-4452] p 850 N94-13962
Selected data on academic science and engineering R and D expenditures: Fiscal Year 1991

Cray Y-MP
[NASA-TM-109303] p 741 N94-13609
A future view of computational science in aircraft
[NASA-TM-109284] p 504 N94-13621
A history of the Defence Research Establishment, Ottawa
[CTN-93-60737] p 850 N94-14060
DCIEM: The first fifty years, 1939-1989
[CTN-93-60767] p 733 N94-14141
Uniform user and group IDs on a large network
[DE93-013047] p 760 N94-14315
Current titles --- National Center for Electron Microscopy
[DE93-015859] p 851 N94-14587
A guide to the DRA 13 ft x 9 ft Low Speed Wind Tunnel Facility
[AD-A267739] p 528 N94-14876
RESEARCH MANAGEMENT
Selected data on academic science and engineering R and D expenditures: Fiscal Year 1991
[NSF-92-329] p 819 N94-13982
The National Remote Sensing Program (NRSP-2 1991 - 2000): The 1992 annual plan of the Netherlands Remote Sensing Board
[BCRS-92-22] p 700 N94-14544
RESERVOIRS
BOAST 2 for the IBM 3090 and RISC 6000
[DE93-000138] p 638 N94-14351
RESIDUAL STRENGTH
Fatigue and residual strength characteristics of fiber metal laminates subjected to incidental damage
[LR-708] p 674 N94-13803
The development of inspection and repair methods for the C-17 aft cargo door
[LR-704] p 499 N94-13904
RESIDUAL STRESS
Measurement of residual strain in composites by means of time-of-flight neutron diffraction
[DE93-012939] p 555 N94-13248
Residual contact restraints in cryogenics
[ETN-93-94375] p 671 N94-13501
Thermal gradient-induced deflection of a thick-walled cylinder with bending residual stresses
[AD-A266347] p 673 N94-13777
Hierarchical nonlinear behavior of hot composite structures
[NASA-TM-106229] p 676 N94-14041
Optimal synthesis of hot composite laminates with interphase layers
[NASA-TM-106326] p 557 N94-14042
RESIDUES
Promotion of geothermal energy development in 1991
[DE93-799058] p 701 N94-13215
RESIN BONDING
Polymer infiltration studies
[NASA-CR-194521] p 582 N94-14539
RESIN TRANSFER MOLDING
Resin transfer molding of textile composites
[NASA-CR-191505] p 554 N94-12833
RESINS
Polymer infiltration studies
[NASA-CR-194521] p 582 N94-14539
RESISTANCE HEATING
Ohmic heating of composite candidate graphite-fiber/coating combinations
[NASA-TM-4491] p 554 N94-12871
Instability heating of the HDZP
[DE93-012641] p 798 N94-13513
RESONANCE
Stability of subharmonics and escape phenomena in the twin-well potential duffing system p 775 N94-13235
Resonances in the Sigma NN system
[DE93-014353] p 785 N94-14144
Measuring parity violation using the neutron capture reaction
[DE93-016629] p 786 N94-14514
RESONANCE SCATTERING
Resonant x ray Raman scattering from atoms and molecules
[DE93-015158] p 784 N94-13896
RESONANT FREQUENCIES
Predicting the vibrations of a spinning inflated membrane
[DE93-010690] p 676 N94-14456
Applications of computer algebra to distributed parameter systems p 677 N94-14623
RESONANT VIBRATION
Adiabatic and non adiabatic effects in Free Electron Laser (FEL) non linear interactions
[ITN-93-85224] p 659 N94-14547
RESONATORS
Measurement electronics of industrial microwave resonator sensors
[TKK-S-RAD-S194] p 625 N94-14096
H2S data reduction
[NASA-CR-193389] p 617 N94-14743
RESOURCE ALLOCATION
PC4CAST: A tool for DSN load forecasting and capacity planning p 610 N94-14384
RESOURCES MANAGEMENT
Hot Dry Rock energy
[DE93-014452] p 702 N94-13403
Quality assurance for environmental chemistry, 1991, volume 1
[DE93-011791] p 709 N94-14020
An evaluation of ZIM and entity-relational models in managing databases for decision support systems
[ERB-1034] p 824 N94-14202
Sequestering carbon dioxide in industrial polymers: Building materials for the 21st century
[DE93-016087] p 580 N94-14297
Fourteenth National Industrial Energy Technology Conference: Proceedings
[DE93-016698] p 710 N94-14516
Pattern and Process in Landscape Ecology: Eighth Annual US Landscape Ecology Symposium
[DE93-014032] p 711 N94-14859
RESPONSE TIME (COMPUTERS)
Analysis and effects of the number of nests of DO loops during vector supercomputing
[NAL-TR-1146] p 748 N94-13453
A design methodology for portable software on parallel computers
[NASA-CR-194181] p 752 N94-14139
RESTORATION
Integrated, flexible, and rapid geophysical surveying
[DE93-009989] p 712 N94-12906
RETURN TO EARTH SPACE FLIGHT
HOPE real time flight operations analyses for return to earth phase, part B
[NASDA-CNT-930011] p 535 N94-13599
HOPE real time flight operations analyses for return to earth phase, part A
[NASDA-CNT-930010-PT-A] p 535 N94-13645
REUSABLE HEAT SHIELDING
High temperature electromagnetic characterization of thermal protection system tile materials
[NASA-CR-189687] p 578 N94-13431
REUSABLE LAUNCH VEHICLES
HOPE conceptual design in FY 1991
[NASDA-CNT-930017] p 535 N94-13600
Conceptual design on H-2 Orbiting Plane (HOPE)
[NASDA-CNT-930018] p 535 N94-13656
The concept study of the space transportation system HOPE in FY 1991
[NASDA-CNT-930016] p 536 N94-14100
Research and development of space transportation systems in ISAS p 537 N94-14277
Contributions of winged re-entry vehicle to space activities p 537 N94-14278
REUSABLE ROCKET ENGINES
The conceptual study on future space transportation systems. Part A: Conceptual study of flyback booster
[NASDA-CNT-930013] p 536 N94-14099
REUSABLE SPACECRAFT
The concept study of the space transportation system HOPE in FY 1991
[NASDA-CNT-930016] p 536 N94-14100
REVERSE ENGINEERING
Integrating interface slicing into software engineering processes
[NASA-CR-192761] p 754 N94-14368
REVERSE FIELD PINCH
Theory of field-reversed configurations
[DE93-015611] p 794 N94-12862
REVERSE OSMOSIS
Evaluation for membrane components of water recycling system
[NAL-TM-646] p 737 N94-13388
REYNOLDS NUMBER
A solution algorithm for the prediction of compressible laminar and turbulent shear flows p 634 N94-13635
Boundary-layer transition p 507 N94-14171
The structure of laminar flow in a three-dimensional driven cavity p 640 N94-14601
The structure of intense vorticity in homogeneous isotropic turbulence p 643 N94-14747
REYNOLDS STRESS
Sub-grid scale modeling for large eddy simulations in analysis of shock-turbulence interactions
[DE93-013425] p 631 N94-13250
Development of a recursion RNG-based turbulence model
[NASA-CR-191511] p 636 N94-13718
Vortex-induced disturbance field in a compressible shear layer p 645 N94-14760
RHEOLOGY
Workshop on Formation of Supermolecular Structures in Composite Fluid: Phase Rule and Dynamics
[DE93-782887] p 581 N94-14421
RHYTHM (BIOLOGY)
Gordon Research Conference on Chronobiology, 1991
[AD-A266354] p 728 N94-13698
RIBBONS
Polymer infiltration studies
[NASA-CR-194521] p 582 N94-14539
RIBONUCLEIC ACIDS
Evolution of catalytic RNA in the laboratory
[NASA-CR-194124] p 727 N94-13210
Analysis of the V antigen lcrGVH-yopBD operon of Yersinia pseudotuberculosis: Evidence for a regulatory role of LcrH and LcrV
[FOA-B-40417-4.4] p 729 N94-14129
The first steps of chlorophyll synthesis: RNA involvement and regulation
[DE93-014398] p 730 N94-14509
RICCATI EQUATION
Kalman filter input estimation
[NAL-TR-1182] p 649 N94-13456
On the geometry of external spectral factors and the Riccati inequality
[CWI-BS-R9227] p 770 N94-14002
RIEMANN MANIFOLD
Scalar curvature and spherical-type Riemannian manifolds
[DE93-622852] p 767 N94-12895
Heat flows and harmonic maps with a free boundary
[DE93-622856] p 632 N94-13509

A hydrogen atom in the curved space: Orthogonality of radial wave functions with respect to the critical momentum
[DE93-626623] p 788 N94-14891

RIEMANN WAVES
Full Riemann solution of the one- and two-dimensional Euler equations
[DLR-FB-92-34] p 638 N94-14188

RIGID STRUCTURES
Determination of position and orientation of rigid bodies from image segments
[FFI-92-4005] p 752 N94-14039
Predicting the vibrations of a spinning inflated membrane
[DE93-010690] p 676 N94-14456
Animation of multi-flexible body systems and its use in control system design p 678 N94-14629
Nonrecursive formulations of multibody dynamics and concurrent multiprocessing p 679 N94-14632
Parallel O(log n) algorithms for open- and closed-chain rigid multibody systems based on a new mass matrix factorization technique p 679 N94-14636
Real-time dynamics simulation of the Cassini spacecraft using DARTS. Part 1: Functional capabilities and the spatial algebra algorithm p 680 N94-14638
Computational Control Workstation: Users' perspectives p 681 N94-14648

RING CURRENTS
The interplanetary origins and the main-phase development of moderate geomagnetic storms (1978 - 1979)
[INPE-5445-TDI/491] p 835 N94-13174
Stormtime transport of ring current and radiation belt ions
[NASA-CR-194416] p 714 N94-13793
Energetic neutral atoms: Imaging the magnetospheric ring current
[NASA-CR-194339] p 715 N94-13826
Terrestrial magnetospheric imaging: Numerical modeling of low energy neutral atoms
[DE93-014561] p 717 N94-14328

RING LASERS
Performance evaluation of the honeywell GG1308 miniature ring laser gyroscope
[AD-A266694] p 653 N94-14782

ROADS
Stochastic performance modeling and evaluation of obstacle detectability with imaging range sensors
[NASA-CR-194510] p 605 N94-13946

ROBOT ARMS
Roller-gear drives for robotic manipulators design, fabrication and test
[NASA-CR-194248] p 660 N94-12802
Control algorithm implementation for a redundant degree of freedom manipulator
[NASA-CR-191339] p 762 N94-13131
Modelling robotic systems with DADS
p 678 N94-14625

ROBOT CONTROL
Roller-gear drives for robotic manipulators design, fabrication and test
[NASA-CR-194248] p 660 N94-12802
Application of intelligently adaptable structure and robot to large space structure p 530 N94-13277
Robot programming, natural computation and conceptual graphs
[ITN-93-85193] p 748 N94-13539
Robot-task compliance: The energy criterion
[ITN-93-85196] p 763 N94-13568
Goddard Space Flight Center robotics demo
[NASA-TM-109302] p 662 N94-13604
A capaciflector-based robotic system
[NASA-CR-193783] p 833 N94-14359
Inverse dynamics: Simultaneous trajectory tracking and vibration reduction with distributed actuators
p 678 N94-14624
A neural-network approach to robotic control
p 679 N94-14634
Design and control of a macro-micro robot for precise force applications p 682 N94-14651

ROBOT DYNAMICS
Dynamics and design of nonholonomic robotic mechanical systems
[ISBN-0-315-72009-3] p 662 N94-13597
Inverse dynamics: Simultaneous trajectory tracking and vibration reduction with distributed actuators
p 678 N94-14624
Modelling robotic systems with DADS
p 678 N94-14625
A neural-network approach to robotic control
p 679 N94-14634
Parallel methods for dynamic simulation of multiple manipulator systems p 680 N94-14637
Design and control of a macro-micro robot for precise force applications p 682 N94-14651

ROBOT SENSORS
A capaciflector-based robotic system
[NASA-CR-193783] p 833 N94-14359

ROBOTICS
Roller-gear drives for robotic manipulators design, fabrication and test
[NASA-CR-194248] p 660 N94-12802
Advancing automation and robotics technology for the Space Station Freedom and for the U.S. economy
[NASA-TM-104024] p 739 N94-12838
Flex-gear electrical power transmission
[NASA-CR-194422] p 661 N94-13445
Robot programming, natural computation and conceptual graphs
[ITN-93-85193] p 748 N94-13539
Dynamics and design of nonholonomic robotic mechanical systems
[ISBN-0-315-72009-3] p 662 N94-13597
Goddard Space Flight Center robotics demo
[NASA-TM-109302] p 662 N94-13604
New prosthetic devices
[NASA-TM-109304] p 737 N94-13611
Development of a tactile and vision integrated system, and object identification techniques for SPDM applications
[DSIS-93-00153] p 764 N94-13842
Activities of Institute for Information Technology
[CNR-35024] p 824 N94-14069
Knowledge based systems: From process control to policy analysis
[DE93-014582] p 765 N94-14117
A capaciflector-based robotic system
[NASA-CR-193783] p 833 N94-14359
Large space structures and systems in the space station era: A bibliography with indexes (supplement 05)
[NASA-SP-7085(05)] p 543 N94-14411
Proceedings of the Fifth NASA/NSF/DOD Workshop on Aerospace Computational Control
[NASA-CR-194515] p 677 N94-14618
Modelling robotic systems with DADS
p 678 N94-14625
Spatial operator algebra for flexible multibody dynamics p 679 N94-14631
A neural-network approach to robotic control
p 679 N94-14634
Design and control of a macro-micro robot for precise force applications p 682 N94-14651
The further development and refinement of an expert-systems approach to the creative design of mechanisms and mechanical systems
[AD-A266812] p 665 N94-14901

ROBOTS
Application of intelligently adaptable structure and robot to large space structure p 530 N94-13277
Robot-task compliance: The energy criterion
[ITN-93-85196] p 763 N94-13568
The BIRIS server: Integration of a three-dimensional range sensor into a harmony-based realtime architecture
[ERB-1036] p 765 N94-14201
Design and control of a macro-micro robot for precise force applications p 682 N94-14651

ROBUSTNESS (MATHEMATICS)
A robust multilevel simultaneous eigenvalue solver
[NASA-CR-191491] p 767 N94-13202
Robust stability of diamond families of polynomials with complex coefficients
[NASA-CR-194132] p 768 N94-13421
Robust synthesis of discrete-time multivariable control systems with induced delays p 662 N94-13642
Exploiting structure: Introduction and motivation
[NASA-CR-194199] p 750 N94-13828
A review of robust detection
[DSIS-93-00400] p 603 N94-13829
Robust estimators and tests in one-sample location problem with particular consideration on modified maximum likelihood process
[ETN-93-94391] p 774 N94-14703

ROCKET ENGINE DESIGN
The conceptual study on future space transportation systems. Part A: Conceptual study of flyback booster
[NASDA-CNT-930013] p 536 N94-14099

ROCKET ENGINES
Low thrust space propulsion
[NASA-TM-109286] p 552 N94-13625
Nuclear thermal propulsion engine based on particle bed reactor using light water steam as a propellant
[DE93-014336] p 552 N94-14111
The problem of traveling in outer space: The rocket motor
[NASA-TT-10002] p 552 N94-14463

ROCKET EXHAUST
Analysis of reacting flowfields in low-thrust rocket engines and plumes p 552 N94-14491
Investigation of the feasibility of optical diagnostic measurements at the exit of the SSME
[NASA-CR-193832] p 553 N94-14682
Low altitude plume impingement handbook
[NASA-CR-194193] p 643 N94-14741

ROCKET NOSE CONES
Arc-heating tests of thermal protection system materials for the H-2 rocket fairing
[NAL-TR-1181] p 551 N94-13455

ROCKET NOZZLES
Qualification test of the Ross Double Planetary Mixer
[NASA-CR-192600] p 652 N94-14497

ROCKET OXIDIZERS
STS-55 pad abort: Engine 2011 oxidizer preburner augmented spark igniter check valve leak
[NASA-CR-193830] p 533 N94-12806
Effects of hydrogen addition on combustion performance of a LOX/kerosene rocket
[NAL-TR-1177] p 548 N94-12945

ROCKET-BORNE INSTRUMENTS
A rocket-borne lidar for studies of the middle atmosphere
[FFI/RAPPORT-92/7034] p 715 N94-13949

ROCKETS
The problem of traveling in outer space: The rocket motor
[NASA-TT-10002] p 552 N94-14463

ROCKS
Hot Dry Rock energy
[DE93-014452] p 702 N94-13403
BOAST 2 for the IBM 3090 and RISC 6000
[DE93-000138] p 638 N94-14351

ROLL
Investigation of the effects of bandwidth and time delay on helicopter roll-axis handling qualities
p 522 N94-13300

ROLLER BEARINGS
The effect of TiN coatings on the rolling contact fatique behavior of M50 bearing steel
[ARL-TR-40] p 662 N94-13794
Computer program for analysis of high speed, single row, angular contact, spherical roller bearing, SASHBEAN. Volume 1: User's guide
[NASA-CR-191183] p 663 N94-14445
Computer program for analysis of high speed, single row, angular contact, spherical roller bearing, SASHBEAN. Volume 2: Mathematical formulation and analysis
[NASA-CR-191182] p 664 N94-14446

ROLLERS
Roller-gear drives for robotic manipulators design, fabrication and test
[NASA-CR-194248] p 660 N94-12802
Modelling of the temperature distribution in a copper roll for the design of a system of cooled rolls adapted to vertical strip casting
[IMI-93RT-21200-1436-G] p 557 N94-13866

ROLLING CONTACT LOADS
The effect of TiN coatings on the rolling contact fatique behavior of M50 bearing steel
[ARL-TR-40] p 662 N94-13794

ROLLING MOMENTS
Rolling moment control in the NAL 10 cm x 10 cm magnetic suspension and balance system
[NAL-TR-1164] p 526 N94-13347

ROOM TEMPERATURE
Room temperature degradation of YBa2Cu3O(7-x) superconductors in varying relative humidity environments
[NASA-TP-3368] p 813 N94-14409

ROSAT MISSION
ROSAT: X ray survey of compact groups
[NASA-CR-193297] p 829 N94-13181
X ray observations of late-type stars using the ROSAT all-sky survey
[NASA-CR-193716] p 832 N94-14146

ROTARY WING AIRCRAFT
MIL-H-8501B: Application to shipboard terminal operations p 521 N94-13296
A perspective on the FAA approval process: Integrating rotorcraft displays, controls and workload
p 521 N94-13298
Some lessons learned in three years with ADS-33C --- rotorcraft handling qualities specification
p 521 N94-13299
A model for rotorcraft flying qualities studies
p 523 N94-13308
Visual cueing aids for rotorcraft landings
p 524 N94-13313
Effects of simulator motion and visual characteristics on rotorcraft handling qualities evaluations
p 524 N94-13317
Flight testing and frequency domain analysis for rotorcraft handling qualities characteristics
p 526 N94-13324
Preliminary design features of the RASCAL: A NASA /Army rotorcraft in-flight simulator p 526 N94-13325

ROTARY WINGS
Free-wake computation of helicopter rotor flowfield for general flight regimes
[AD-A266692] p 509 N94-14781
A new treatment of periodic systems with applications to helicopter rotor blade dynamics
[AD-A266770] p 510 N94-14784
Center of excellence in rotary wing technology
[AD-A266655] p 510 N94-14799
ROTATING BODIES
On curve veering and flutter of rotating blades
[NASA-TM-106282] p 670 N94-12872
Flex-gear electrical power transmission
[NASA-CR-194422] p 661 N94-13445
ROTATING CYLINDERS
The three-dimensional flow past a rapidly rotating circular cylinder
[NASA-CR-191512] p 630 N94-13075
The general gravitational potential field of a homogeneous cylinder rotating about its axis
[DE93-622853] p 775 N94-13508
ROTATING SPHERES
On the motion through a viscous fluid of a spherical particle touching a plane wall: Slip boundary conditions
[DE93-012540] p 628 N94-12961
ROTATION
On the motion through a viscous fluid of a spherical particle touching a plane wall: Slip boundary conditions
[DE93-012540] p 628 N94-12961
ROTOR AERODYNAMICS
On the use of the method of matched asymptotic expansions in propeller aerodynamics and acoustics
[NLR-TP-91307-U] p 503 N94-13528
New vortex dynamics methods for rotor free wake analysis
[AD-A266656] p 509 N94-14774
Free-wake computation of helicopter rotor flowfield for general flight regimes
[AD-A266692] p 509 N94-14781
ROTOR BLADES (TURBOMACHINERY)
Development of a high-speed mechanical drive system for oscillating an annular blade row in the bending mode
[NAL-TR-1170] p 502 N94-13342
ROTOR BODY INTERACTIONS
An analytic modeling and system identification study of rotor/fuselage dynamics at hover p 524 N94-13312
ROTOR DYNAMICS
Cryogenic fluid film bearing tester development study
[NASA-CR-192586] p 660 N94-12791
Rotordynamic and leakage characteristics of a 4-stage brush seal
[AD-A266012] p 660 N94-12988
An analytic modeling and system identification study of rotor/fuselage dynamics at hover p 524 N94-13312
A new treatment of periodic systems with applications to helicopter rotor blade dynamics
[AD-A266770] p 510 N94-14784
ROTORS
Rotor stator CGI
[NASA-TM-109313] p 518 N94-13608
ROVING VEHICLES
Exploring Mars
[NASA-TM-109306] p 842 N94-13613
ROWLAND CIRCLES
Vacuum ultraviolet instrumentation for solar irradiance and thermospheric airglow
[NASA-CR-194525] p 652 N94-14684
RULES
An expert system class library for Audition
[IME-MET-TR-008] p 824 N94-14196
Generating knight's tours without backtracking from errors
[AD-A266807] p 772 N94-14900
RUNGE-KUTTA METHOD
Analysis of reacting flowfields in low-thrust rocket engines and plumes p 552 N94-14491
A vertex-based finite-volume algorithm for the Navier-Stokes equations p 639 N94-14599
Navier-Stokes simulation of transonic vortex flow over a delta wing p 640 N94-14606
A new treatment of periodic systems with applications to helicopter rotor blade dynamics
[AD-A266770] p 510 N94-14784
RUNWAYS
Evaluation of infrared sensors for autonomous landing guidance
[AD-A266450] p 513 N94-13703
RUPTURING
Residual contact restraints in cryogenics
[ETN-93-94375] p 671 N94-13501
RURAL LAND USE
Educational module for the higher agricultural education. Part 1: Land use classification using satellite pictures
[BCRS-92-11A] p 819 N94-14809
Obtaining digital regional planning information from aerial pictures
[REPT-228] p 700 N94-14810
RUSSIAN FEDERATION
JPRS report: Science and technology. Central Eurasia: Space
[JPRS-USP-93-003] p 828 N94-13182
Computational Russian morphological generation on Prolog: Noun, pronoun, and adjective p 747 N94-13436
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 37: The impact of political control on technical communications: A comparative study of Russian and US aerospace engineers and scientists
[NASA-TM-109329] p 826 N94-14488
RUTHENIUM
The structure and mechanical properties of Ru-Cu and Ru-Ti nanolayer composites
[DE93-014453] p 558 N94-14469
RUTILE
Prism-film coupling in anisotropic planar waveguides of epitaxial (101) rutile thin films
[DE93-012912] p 811 N94-14304

S

S MATRIX THEORY
Recent developments in multiple-scattering calculations of XAFS and XANES
[DE93-010999] p 563 N94-13477
S-3 AIRCRAFT
Work/rest schedules and performance of S-3 aviators during fleet exercise
[AD-A265807] p 734 N94-12975
SAFETY
Hydrogen peroxide safety issues
[DE93-013895] p 565 N94-14346
SAFETY FACTORS
Structural design/margin assessment
[NASA-TP-3410] p 669 N94-12831
Effects of radiobiological uncertainty on vehicle and habitat shield design for missions to the moon and Mars
[NASA-TP-3312] p 846 N94-12875
Design, qualification and operation of nuclear rockets for safe Mars missions
[DE93-010792] p 549 N94-12996
Early detection of insulation failure in electric motors
[PB93-198208] p 626 N94-14686
SAGE SATELLITE
Present status of SAGE
[DE93-014350] p 781 N94-13205
SAGNAC EFFECT
Polarization effects in optical fiber current sensors based on Sagnac interferometers with 3 by 3 couplers
[DE93-012665] p 792 N94-14367
SALINITY
Preliminary results on the hydrological measurements in the Aegean Sea off Crete: Cruise, Georgia, 1989
[PREPRINT-736] p 725 N94-13500
Phase aligner for the Electronically Scanned Thinned Array Radiometer (ESTAR) instrument
[NASA-TM-4518] p 623 N94-13878
SAMPLERS
Maximum likelihood estimation for constrained or missing data models
[AD-A266563] p 773 N94-13585
SAMPLING
Sampling of globular clusters and the distance to the galactic center
[INPE-5446-TDI/492] p 837 N94-13449
SANDS
Soil erosion rates caused by wind and saltating sand stresses in a wind tunnel
[DE93-009154] p 706 N94-12905
SANDWICH STRUCTURES
System integration and demonstration of adhesive bonded high temperature aluminum alloys for aerospace structure, phase 2
[NASA-CR-191459] p 575 N94-12792
Structural investigation of a damaged GRP/foam sandwich composite using x ray computed tomography p 669 N94-13857
SATELLITE ALTIMETRY
On the space-time ocean current variability and its effects on the length-of-day
[ISBN-0-315-59510-8] p 726 N94-14205
SATELLITE ANTENNAS
The Second Workshop on Deployment and Assembly Experiment of Large Space Structure on Orbit
[NASDA-CON-930003] p 529 N94-13268
Structural design of hexa-link truss deployable antenna p 529 N94-13269
Thermal distortion measurement of TETRUS type thermal test model of large deployable antenna for mobile communications satellite p 529 N94-13270
Development of modular cable mesh deployable antenna p 530 N94-13274
Trial manufacture model and in-space verification method of deployable antenna p 530 N94-13278
SATELLITE ATTITUDE CONTROL
Low cost attitude control system reaction wheel development
[NASA-CR-191332] p 540 N94-13140
Transmission zeros of spacecraft attitude control system
[NAL-TR-1166] p 540 N94-13339
SATELLITE COMMUNICATION
Destination-directed, packet-switched architecture for a geostationary communications satellite network
[NASA-TP-3379] p 538 N94-13111
Fine time uplink synchronization for frequency-hopped spread spectrum satellite communication system
[ISBN-0-315-54370-1] p 600 N94-13488
Trellis coding with Continuous Phase Modulation (CPM) for satellite-based land-mobile communications
[NASA-CR-191325] p 604 N94-13909
SCAILET: An intelligent assistant for satellite ground terminal operations
[NASA-TM-105879] p 538 N94-13918
Simulation of downlink synchronization for a frequency-hopped satellite communication system
[DSIS-93-00477] p 605 N94-13941
ALFIS: Astronomical Low Frequency Interferometry Satellites. A feasibility study
[LR-699] p 542 N94-13988
Multiple-symbol differential detection of DPSK with frequency offset
[DREO-TN-92-5] p 606 N94-14063
Asia-Pacific ISY Conference, volume 2
[NASDA-CM-199-VOL-2] p 688 N94-14209
The developments of satellite communications of China p 618 N94-14282
The current situation, trends, international cooperation of space communication technological development in the Republic of Korea p 699 N94-14283
Joint experiments using ETS-5 p 618 N94-14284
Space communications technology research in CRL p 618 N94-14285
NTT's activities in satellite communications technology development p 618 N94-14286
Future outlook on international satellite communications in Asia Pacific region p 618 N94-14287
Technological development for broadcasting satellites in NHK Laboratories p 618 N94-14288
New challenges in propagation research in the US p 612 N94-14656
User needs for propagation data p 613 N94-14657
Statistical results from the Virginia Tech propagation experiment using the Olympus 12, 20, and 30 GHz satellite beacons p 613 N94-14658
Results from a study of scintillation behavior at 12, 20, and 30 GHz using the results from the Virginia Tech Olympus receivers p 613 N94-14659
Large-scale rainfall diversity for ACTS p 613 N94-14662
Contribution towards a draft revision of recommendations 681: Propagation data required for the design of Earth-space land mobile telecommunications systems p 614 N94-14666
Propagation issues for emerging mobile and portable communications: A systems perspective p 614 N94-14667
Characterisation of the LMS propagation channel at L- and S-bands: Narrowband experimental data and channel modelling p 615 N94-14669
Results of multiband (L, S, Ku band) propagation measurements and model for high elevation angle land mobile satellite channel p 615 N94-14670
Effects of the equatorial ionosphere on L-band Earth-space transmissions p 615 N94-14671
Tree attenuation at 20 GHz: Foliage effects p 615 N94-14672
Preprocessing data collected with the ACTS propagation terminal p 616 N94-14676
ACTS data center p 616 N94-14677
NASA images 8
[NASA-TM-109416] p 544 N94-14783
The 1991 research and technology report, Goddard Space Flight Center
[NASA-TM-108738] p 851 N94-14791
SATELLITE CONFIGURATIONS
ALFIS: Astronomical Low Frequency Interferometry Satellites. A feasibility study
[LR-699] p 542 N94-13988
SATELLITE DESIGN
Earth Observation Center Annual Report on Research and Development, Fiscal Year 1992
[EOC-92-01-0007] p 687 N94-14091
ADEOS project p 687 N94-14094
Propagation considerations in the American Mobile Satellite system design p 614 N94-14668

SATELLITE IMAGERY
The application of VAS satellite imagery to thunderstorm forecasting at Cape Canaveral
[NASA-CR-193563] p 718 N94-12839
Knowledge-based oceanographic image compression
[AD-A265752] p 821 N94-13041
EOS workstation
[NASA-CR-191326] p 736 N94-13132
Dendrometric variables estimation in homogeneous forests using LANDSAT TM data
[INPE-5455-TDI/497] p 684 N94-13331
Net radiation mapping of mountainous terrain using Landsat-5 thematic mapper imagery and digital terrain data
[ISBN-0-315-57755-X] p 685 N94-13475
Satellite imagery and exogenous data integration by neural network in automation land-cover classification
[INPE-5480-PRE/1778] p 686 N94-13729
Nonlinear aspects of data integration for land-cover classification in a neural network environment
[INPE-5479-PRE/1778] p 686 N94-13789
Integration of remotely sensed data and cadastral ownership boundaries for land inventory purposes
[BCRS-92-16] p 687 N94-14127
Asia-Pacific ISY Conference, volume 2
[NASDA-CM-199-VOL-2] p 688 N94-14209
Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR
p 688 N94-14212
Seasonal change of the land-surface temperature over Asian Continent derived from GAC data on NOAA-11 AVHRR p 691 N94-14232
Detecting land cover changes in Chiang-Mai area in Thailand p 693 N94-14241
Land evaluation for agricultural productivity in North-East Thailand using LANDSAT TM data and geographic information p 693 N94-14242
Effects of typhoon on TOMS data
p 693 N94-14243
Multi-source national forest inventory of Finland
p 694 N94-14254
Global assessment of human activities
p 695 N94-14255
Remote sensing for monitoring tropical moist forests in the Indo-Chinese region p 695 N94-14258
Estimation of vegetation damage due to ash fall in Mt. Pinatubo area using MOS-1 data p 695 N94-14259
Outline of ISY sea surface temperature data sets
p 696 N94-14261
Integration of SST data sets using MOS-1 satellite data: For validation and monitoring p 696 N94-14262
Geophysical validation of ATSR sea surface temperatures p 696 N94-14263
Accuracy validation test of estimated sea surface temperature by satellite data p 696 N94-14264
Tracking of change of a warm-core ring structure
p 696 N94-14267
A method for estimation of partial cloud cover within a pixel and its effect p 697 N94-14269
Warm streamers extended from Warm Core Rings (WCR's) and their role on fish migration and fishing ground formation p 697 N94-14270
Atmospheric correction for sea surface temperature by application of microwave dual-channel technique to VTIR data p 697 N94-14271
Meteorological data, new series A monographs. Volume 6, no. 3: Estimation of influence of high clouds in the radiation field and the climat by analysis of NOAA AVHRR data
[ETN-93-94170] p 723 N94-14707
NASA images 8
[NASA-TM-109416] p 544 N94-14783

SATELLITE INSTRUMENTS
NASA airborne satellite instrumentation calibrator (NASIC) technical reference
[NASA-RP-1315] p 545 N94-13713
ALFIS: Astronomical Low Frequency Interferometry Satellites. A feasibility study
[LR-699] p 542 N94-13988
ECS: Eighth year in orbit
[ESA-BR-82] p 543 N94-14352

SATELLITE NETWORKS
The 1991 research and technology report, Goddard Space Flight Center
[NASA-TM-108738] p 851 N94-14791

SATELLITE OBSERVATION
Circulation model experiments of the Gulf Stream using satellite-derived fields
[AD-A266067] p 725 N94-12990
Degradation of the visible and near-infrared channels of the advanced very high resolution radiometer on the NOAA-9 spacecraft: Assessment and recommendations for corrections
[NOAA-TR-NESDIS-70] p 544 N94-13029
Study on TRMM data utilization for meteorology
[NASDA-CNT-930007] p 721 N94-13643
Activities report of the Netherlands Remote Sensing Board
[ETN-93-93880] p 686 N94-14073
Calibration and in-house validation results of JERS-1 data p 687 N94-14092
Earth observation experiment data analysis
p 687 N94-14093
Asia-Pacific ISY conference, volume 1
[NASDA-CM-199-1] p 532 N94-14098
Asia-Pacific ISY Conference, volume 2
[NASDA-CM-199-VOL-2] p 688 N94-14209
Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR
p 688 N94-14212
IMG: Interferometric monitor for greenhouse gases
p 689 N94-14217
Spectroscopic method and data reduction algorithm for laser long-path absorption measurements using RIS
p 689 N94-14218
TRMM system overview and status in the United States p 690 N94-14221
TRMM Project in Japan: Overview and status
p 690 N94-14222
Clouds and the Earth's Radiant Energy System (CERES) on the Tropical Rainfall Measuring Mission (TRMM)
p 690 N94-14223
TRMM precipitation radar algorithm
p 690 N94-14224
Estimate of sampling errors of TRMM rainfall observation by using radar-AMeDAS composite data
p 690 N94-14225
Space measurements for determining the Earth's energy and water cycles p 690 N94-14227
Future TRMM follow-on mission p 691 N94-14228
The effects of anthropogenic aerosols on optical thickness and particle size of clouds. Part 1: Retrieval algorithm p 691 N94-14230
Climate products from NOAA operational satellites
p 691 N94-14231
Seasonal change of the land-surface temperature over Asian Continent derived from GAC data on NOAA-11 AVHRR p 691 N94-14232
Earth radiation budget, cloud, and aerosol parameters derived from AVHRR and TOVS measurements
p 691 N94-14233
The development and implementation of an interactive retrieval/analysis/forecast algorithm
p 692 N94-14234
Satellite technology for environmental monitoring in developing countries p 692 N94-14236
Some potentials of the Indonesian region for Earth observation p 692 N94-14237
Application of satellite remote sensing technology in disaster mitigation: A case study of Bangladesh
p 692 N94-14238
Integration of remote sensing and mathematical modelling in disaster mitigation p 692 N94-14239
Soil erosion mapping using remote sensing and GIS techniques p 692 N94-14240
Detecting land cover changes in Chiang-Mai area in Thailand p 693 N94-14241
Land evaluation for agricultural productivity in North-East Thailand using LANDSAT TM data and geographic information p 693 N94-14242
Effects of typhoon on TOMS data
p 693 N94-14243
Satellite remote sensing for disaster mitigation
p 693 N94-14244
A concept for the world environment and disaster observation system p 693 N94-14245
Study of the consequences of the Chernobyl accident and technogenic activity in the Republic Belarus using aerospace methods p 693 N94-14246
A tentative plan on China and Asian-Pacific satellite system for disaster reduction p 693 N94-14247
Earth observation from low-inclination orbit as a necessary complement to polar missions
p 694 N94-14248
Development of a remote sensing geographic information system for land cover changes and assessment of risk due to natural and man made hazards covering the area of the inner delta of the Yellow River
p 694 N94-14249
The role of the dynamics for the deviation of the total ozone from the long-term mean at the edge of the polar vortex p 694 N94-14250
The European Arctic ozone experiment: An investigation of Northern Hemisphere ozone depletion
p 694 N94-14251
Space-based activities: SAM 2 and SAGE 2
p 694 N94-14252
New evidences supported the Wei hypothesis about the formation of the Antarctic ozone hole
p 694 N94-14253
Multi-source national forest inventory of Finland
p 694 N94-14254
Global assessment of human activities
p 695 N94-14255
The Swedish ISY contribution p 695 N94-14256
Vegetation mapping of Indo-China Peninsula using MOS-1 MESSR and NOAA AVHRR p 695 N94-14257
Remote sensing for monitoring tropical moist forests in the Indo-Chinese region p 695 N94-14258
Estimation of vegetation damage due to ash fall in Mt. Pinatubo area using MOS-1 data p 695 N94-14259
Mangrove afforestation monitoring using remote sensing p 695 N94-14260
Outline of ISY sea surface temperature data sets
p 696 N94-14261
Integration of SST data sets using MOS-1 satellite data: For validation and monitoring p 696 N94-14262
Geophysical validation of ATSR sea surface temperatures p 696 N94-14263
Accuracy validation test of estimated sea surface temperature by satellite data p 696 N94-14264
Tracking of change of a warm-core ring structure
p 696 N94-14267
Outline of ISY Kuroshio observation experiment
p 697 N94-14268
A method for estimation of partial cloud cover within a pixel and its effect p 697 N94-14269
Warm streamers extended from Warm Core Rings (WCR's) and their role on fish migration and fishing ground formation p 697 N94-14270
Atmospheric correction for sea surface temperature by application of microwave dual-channel technique to VTIR data p 697 N94-14271
Some thoughts on the space programs in the Asia Pacific regions p 697 N94-14272
Summary of the NOAA/NESDIS Workshop on Development of a Global Satellite/In Situ Environmental Database
[NOAA-TR-NESDIS-72] p 826 N94-14498
Educational module for the higher agricultural education. Part 1: Land use classification using satellite pictures
[BCRS-92-11A] p 819 N94-14809

SATELLITE ORBITS
Orbit determination error analysis based on the requirements of ADEOS mission
[NASDA-CNT-930008] p 532 N94-13644

SATELLITE ORIENTATION
Self-tuning control techniques for multivariable systems
[INPE-5449-TDI/495] p 765 N94-14084

SATELLITE POWER TRANSMISSION
Small scale adaptive optics experiment systems engineering
[NASA-CR-194419] p 793 N94-14548

SATELLITE SOUNDING
The application of VAS satellite imagery to thunderstorm forecasting at Cape Canaveral
[NASA-CR-193563] p 718 N94-12839

SATELLITE TRACKING
NASA images 8
[NASA-TM-109416] p 544 N94-14783

SATELLITE TRANSMISSION
The developments of satellite communications of China p 618 N94-14282
The current situation, trends, international cooperation of space communication technological development in the Republic of Korea p 699 N94-14283
Joint experiments using ETS-5 p 618 N94-14284
Space communications technology research in CRL
p 618 N94-14285
NTT's activities in satellite communications technology development p 618 N94-14286
Future outlook on international satellite communications in Asia Pacific region p 618 N94-14287
Technological development for broadcasting satellites in NHK Laboratories p 618 N94-14288
Effects of the equatorial ionosphere on L-band Earth-space transmissions p 615 N94-14671

SATELLITE-BORNE INSTRUMENTS
NASA airborne satellite instrumentation calibrator (NASIC) technical reference
[NASA-RP-1315] p 545 N94-13713
Methods for calibration/validation of AVNIR
p 689 N94-14216
IMG: Interferometric monitor for greenhouse gases
p 689 N94-14217
Spectroscopic method and data reduction algorithm for laser long-path absorption measurements using RIS
p 689 N94-14218
Overview of the ILAS operational data processing system p 690 N94-14220
Multiparameter airborne rain radar development for TRMM validation and TRMM-follow-on study
p 690 N94-14226
Wavefront sensing, control, and pointing
p 546 N94-14833

SATELLITE-BORNE PHOTOGRAPHY
Mangrove afforestation monitoring using remote sensing p 695 N94-14260
SATELLITE-BORNE RADAR
A calibration procedure for radiation budget radiometers and its influence on interpretation of measured values [MITT-82] p 651 N94-14149
An exact processing algorithm for wide beam spaceborne SAR data p 689 N94-14213
High performance multi-mode radar altimeter for future spaceborne application p 548 N94-14214
SCALARS
Scalar curvature and spherical-type Riemannian manifolds [DE93-622852] p 767 N94-12895
A search for scalar leptoquarks in D0 [DE93-012780] p 779 N94-12954
On a nonminimal gauge interaction of a scalar field in D=2+1 Chern-Simons-Maxwell theory [DE93-621380] p 621 N94-13224
SCALE (RATIO)
Analytical framework for modeling scale-related variabilities in remote sensing p 685 N94-13592
SCALE HEIGHT
Determining the solar-flare photospheric scale height from SMM gamma-ray measurements [NASA-CR-194084] p 844 N94-13671
SCALE MODELS
Results of experimental investigations to determine external tank protuberance loads using a 0.03-scale model of the Space Shuttle launch configuration (model 47-OTS) in the NASA/ARC unitary plan wind tunnel, volume 1 [NASA-CR-167690] p 534 N94-12810
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot transonic wind tunnel, volume 2 [NASA-CR-185697] p 534 N94-12965
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot Transonic wind tunnel (IA613A), volume 1 [NASA-CR-185696] p 534 N94-13191
Surfactant studies for bench-scale operation [NASA-CR-194511] p 564 N94-13947
Results of experimental investigations to determine external tank protuberance loads using a 0.03-scale model of the Space Shuttle launch configuration (Model 47-OTS) in the NASA/ARC unitary plan wind tunnel, volume 2 [NASA-CR-167691] p 536 N94-14047
Design and evaluation of single and dual flow thrust vector nozzles with post exit vanes [NASA-CR-193393] p 638 N94-14086
Simulating the daylight performance of fenestration systems and spaces of arbitrary complexity: The IDC method [DE93-015177] p 704 N94-14333
Effect of size, shape, and end condition of test specimen on compressive strength of high-strength concrete [DE93-500412] p 682 N94-14653
SCALING LAWS
Thermal gravitational modelling and scaling of two-phase heat transport systems: Similarity considerations and useful equations predictions versus experimental results [NLR-TP-91477-U] p 632 N94-13533
Anomalous ion transport and feedback control [DE93-018324] p 803 N94-14874
SCANNING ELECTRON MICROSCOPY
Crystallographic phase identification in the scanning electron microscope: Backscattered electron Kikuchi patterns [DE93-011574] p 804 N94-12813
Procedures for analysis of debris relative to Space Shuttle systems [NASA-TM-109190] p 534 N94-12900
High-resolution Z-contrast imaging and hole concentration mapping of YBCO thin films [DE93-015803] p 808 N94-13930
Room temperature degradation of YBa2Cu3O(7-x) superconductors in varying relative humidity environments [NASA-TP-3368] p 813 N94-14409
SCANNING TUNNELING MICROSCOPY
Scanning tunneling microscopy studies of diamond films and optoelectronic materials [NASA-CR-194363] p 578 N94-13246
Ploughing on gold using a Scanning Tunneling Microscope [DE93-012632] p 812 N94-14365
Laser lithography by photon scanning tunneling microscopy [DE93-015962] p 660 N94-14863
SCATTER PROPAGATION
Meteor forward scatter studies [DSIS-93-00382] p 602 N94-13801
A study of meteor scatter communications [DSIS-93-00151] p 603 N94-13841
SCATTERING
Grain-boundary electronic states by multiple-scattering theory [DE93-013198] p 805 N94-13010
ADP study of gamma-ray bursts [NASA-CR-194311] p 848 N94-13708
Theoretical molecular studies of astrophysical interest [NASA-CR-193300] p 838 N94-13781
Dynamics of pion-nucleus systems [DE93-014449] p 785 N94-14468
SCATTERING AMPLITUDE
The E2 N(yields)(Delta) transition from polarized Compton scattering [DE93-012522] p 785 N94-14363
Scattering calculations and confining interactions [NASA-CR-194242] p 786 N94-14549
Relativistic proton-nucleus scattering and one-boson-exchange models p 786 N94-14550
SCATTERING CROSS SECTIONS
Calculation of electron-lithium scattering using the coupled-channel optical method [DE93-623049] p 806 N94-13226
Recent developments in multiple-scattering calculations of XAFS and XANES [DE93-010999] p 563 N94-13477
Measurement of the Fe-56(n,p)Mn-56, Al-27(n,p)Mg-27 and Al-27(n,alpha)Na-24 cross sections at 16.0, 17.0 and 18.3 MeV [NPL-RSA(EXT)-38] p 783 N94-13883
SCATTEROMETERS
Earth Observation Center Annual Report on Research and Development, Fiscal Year 1992 [EOC-92-01-0007] p 687 N94-14091
ADEOS project p 687 N94-14094
SCENE ANALYSIS
Determination of position and orientation of rigid bodies from image segments [FFI-92-4005] p 752 N94-14039
Passive recovery of scene geometry for an unmanned ground vehicle [AD-A266670] p 766 N94-14777
SCHEDULES
Work/rest schedules and performance of S-3 aviators during fleet exercise [AD-A265807] p 734 N94-12975
Work/rest schedules and performance of F/A-18 aviators during Fleet Exercise 1992 [AD-A265826] p 735 N94-12982
SCHEDULING
Present status of JEM utilization projects p 530 N94-13273
Three, four, five, six or the complexity of scheduling with communication delays [CWI-BS-R9229] p 751 N94-14004
Stochastic scheduling games with Markov decision arrival processes [CWI-BS-R9231] p 773 N94-14005
An experimental analysis of bottleneck-centered opportunistic scheduling [AD-A266643] p 820 N94-14796
SCHLIEREN PHOTOGRAPHY
Fundamental study of shock wave/turbulent boundary layer interactions with passive control in transonic flows [ESA-TT-1278] p 630 N94-13117
Images constructed from computed flow fields [NASA-CR-194397] p 650 N94-13814
Advanced ballistic range technology [NASA-CR-194396] p 532 N94-14068
Advanced ballistic range technology [NASA-CR-194530] p 533 N94-14540
SCHMIDT TELESCOPES
Hardware design for the Autonomous Visibility Monitoring (AVM) observatory p 533 N94-14394
SCHOOLS
Workshop for coordinating South Carolina's pre-college systemic initiatives in science and mathematics [DE93-012263] p 818 N94-13216
SCHOTTKY DIODES
Annealing study of main electron irradiation-induced defects (H4 and H5) in P-InP using DLTS technique [DE93-623204] p 806 N94-13213
SCHROEDINGER EQUATION
Grain-boundary electronic states by multiple-scattering theory [DE93-013198] p 805 N94-13010
Multiple Schroedinger cats from multilevel atoms [DE93-013412] p 786 N94-14526
Soliton equations and self-dual gauge fields [DE93-626620] p 818 N94-14887
SCHUMANN-RUNGE BANDS
Determination of spectroscopic properties of atmospheric molecules from high resolution vacuum ultraviolet cross section and wavelength measurements [NASA-CR-194024] p 712 N94-13092
SCIENCE
Selected data on academic science and engineering R and D expenditures: Fiscal Year 1991 [NSF-92-329] p 819 N94-13982
Science, technology, and the federal government: National goals for a new era p 827 N94-14115
SCIENTIFIC VISUALIZATION
ULTRA 2 user's manual for ULTRA 2 revision 3.0 [DE93-015970] p 744 N94-13120
SCORE user's manual [DE93-015987] p 822 N94-13121
Charged-particle evaluation methodology at Lawrence Livermore National Laboratory [DE93-013429] p 781 N94-13251
A perspective on AVS in an engineering sciences environment [DE93-015011] p 596 N94-13889
Visualization techniques to aid in the analysis of multi-spectral astrophysical data sets [NASA-CR-194489] p 840 N94-14482
Earth science and application [NASA-CR-184381] p 683 N94-14484
An overview of parallel scientific visualization [DE93-017105] p 755 N94-14521
SCIENTISTS
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 18: A comparison of the technical communication practices of aerospace engineers and scientists in India and the United States [NASA-TM-109006] p 821 N94-13057
Generic results of the space physics community survey [NASA-CR-194538] p 818 N94-13984
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 34: Users and uses of DOD technical reports: A report from the field [NASA-TM-109327] p 825 N94-14485
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 36: Technical uncertainty as a correlate of information use by US industry-affiliated aerospace engineers and scientists [NASA-TM-109328] p 825 N94-14486
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 39: The role of computer networks in aerospace engineering [NASA-TM-109331] p 825 N94-14487
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 37: The impact of political control on technical communications: A comparative study of Russian and US aerospace engineers and scientists [NASA-TM-109329] p 826 N94-14488
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 38: Computer Mediated Communication (CMC) and the communication of technical information in aerospace [NASA-TM-109330] p 826 N94-14489
Scientists, engineers, and technicians in nonmanufacturing industries: 1990. Detailed statistical tables [NSF-92-334] p 820 N94-14499
SCINTILLATING FIBERS
Gamma-insensitive optical focal plane array [DE93-013100] p 792 N94-14317
SCINTILLATION
Barium fluoride research and development at Lawrence Livermore National Laboratory [DE93-014682] p 807 N94-13405
Gamma-insensitive optical focal plane array [DE93-013100] p 792 N94-14317
Results from a study of scintillation behavior at 12, 20, and 30 GHz using the results from the Virginia Tech Olympus receivers p 613 N94-14659
Effects of the equatorial ionosphere on L-band Earth-space transmissions p 615 N94-14671
SCINTILLATION COUNTERS
Measurements of optical properties of waveshifting optical fiber for liquid scintillator hadron calorimetry [DE93-012606] p 791 N94-13482
Cosmic and solar gamma ray and neutron experiments [NASA-CR-193359] p 849 N94-13965
Absolute detection efficiency of a micro-channel plate detector to x rays in the 1-100 KeV energy range [DE93-012592] p 789 N94-14460
Results from a water-Cerenkov array [DE93-012715] p 849 N94-14461
SCORING
Generalized smooth models [DE93-013045] p 756 N94-14864
SCOUT LAUNCH VEHICLE
Scout: The unsung hero of space [NASA-TM-109289] p 540 N94-13628
SCOUT PROJECT
Scout: The unsung hero of space [NASA-TM-109289] p 540 N94-13628

SEA LEVEL
The 1990 Western Pacific Geophysics meeting
[NASA-CR-193456] p 712 N94-13334
SEA STATES
Buoy experiments to obtain the sea-truth data for OCTS/NSCAT, part 1
[NASDA-CNT-930005-PT-1] p 725 N94-13653
Sea surface effect on the sea surface temperature estimation by satellite data p 696 N94-14265
SEA SURFACE TEMPERATURE
Outline of ISY sea surface temperature data sets p 696 N94-14261
Integration of SST data sets using MOS-1 satellite data: For validation and monitoring p 696 N94-14262
Geophysical validation of ATSR sea surface temperatures p 696 N94-14263
Accuracy validation test of estimated sea surface temperature by satellite data p 696 N94-14264
Sea surface effect on the sea surface temperature estimation by satellite data p 696 N94-14265
On the sea truth data of the Kuroshio meander and cold eddy movement p 696 N94-14266
A method for estimation of partial cloud cover within a pixel and its effect p 697 N94-14269
Atmospheric correction for sea surface temperature by application of microwave dual-channel technique to VTIR data p 697 N94-14271
Sea surface temperature forcing and phase locking of Nordeste precipitation
[DE93-011873] p 723 N94-14426
SEA TRUTH
Buoy experiments to obtain the sea-truth data for OCTS/NSCAT, part 1
[NASDA-CNT-930005-PT-1] p 725 N94-13653
Sea surface effect on the sea surface temperature estimation by satellite data p 696 N94-14265
On the sea truth data of the Kuroshio meander and cold eddy movement p 696 N94-14266
SEA WATER
Laser-induced fluorescence over optical fibers for real time in situ measurement of petroleum hydrocarbons in seawater
[AD-A265106] p 790 N94-12863
Preliminary results on the hydrological measurements in the Aegean Sea off Crete: Cruise, Georgia, 1989
[PREPRINT-736] p 725 N94-13500
Open boundary conditions for incompletely parabolic systems
[FFI/RAPPORT-92/7029] p 770 N94-13971
SEALS (STOPPERS)
Compatibility testing of vacuum seal materials
[DE93-014366] p 663 N94-14113
A hot dynamic seal rig for measuring hypersonic engine seal durability and flow performance
[NASA-TM-106294] p 664 N94-14727
SEARCHING
Extremal polygon containment problems and other issues in parametric searching
[ITN-93-85214] p 771 N94-14506
SEASONS
Royal Belgium observatory calendar: 156th year
[ETN-93-94221] p 833 N94-14811
SEATS
Analysis of differences between seating positions in simulators and orbiters
[NASA-TM-104776] p 737 N94-13399
SECONDARY EMISSION
Measurements of scattering processes in negative ion-atom collisions
[DE93-013863] p 779 N94-12940
SECONDARY RADAR
Activities report of the Federal Administration for Flight Safety (Germany)
[ETN-93-94208] p 511 N94-14008
SEDIMENT TRANSPORT
Coastal scour problems and methods for prediction of maximum scour
[AD-A266658] p 726 N94-14775
SEDIMENTS
Martian sedimentary deposits
[NASA-CR-193266] p 842 N94-13855
Overview: Gas hydrate geology and geography
[DE93-014043] p 688 N94-14151
Coastal scour problems and methods for prediction of maximum scour
[AD-A266658] p 726 N94-14775
SEISMIC WAVES
The 1990 Western Pacific Geophysics meeting
[NASA-CR-193456] p 712 N94-13334
SELENIUM
Selenium x ray laser line profile measurements
[DE93-012580] p 658 N94-14175
Experimental measurements of selenium x-ray laser spectral line profiles
[DE93-016543] p 659 N94-14595
SELF CONSISTENT FIELDS
To the theory of triplet pairing in Fermi-liquid model
[DE93-621770] p 816 N94-12855
SELF FOCUSING
Kinetic simulations of ultra-intense laser plasma interactions
[DE93-014419] p 802 N94-14564
SELF LUBRICATING MATERIALS
Canadian Target Assembly (CTA) to Airborne Support Equipment (ASE) vibration test report
[IME-AMT-TR-001] p 663 N94-14195
SELF ORGANIZING SYSTEMS
Communications and control for electric power systems: Power flow classification for static security assessment
[NASA-CR-194512] p 624 N94-13948
Self organized criticality
[DE93-013182] p 773 N94-14320
SELF TESTS
Design automation tools for testable VLSI circuits
[ISBN-0-315-61461-7] p 621 N94-13333
SEMANTICS
The silent step in time
[CWI-CS-R9221] p 768 N94-13496
On the foundations of final semantics: Non-standard sets, metric spaces, partial orders
[CWI-CS-R9241] p 768 N94-13526
The 8th Workshop on the Mathematical Foundations of Programming Semantics
[AD-A266436] p 749 N94-13700
Programming languages made in Italy
[REPT-93-002] p 750 N94-13805
SEMICONDUCTOR DEVICES
Proceedings of the Workshop on Applications of Synchrotron Radiation to Trace Impurity Analysis for Advanced Silicon Processing
[DE93-013389] p 805 N94-13020
Surfaces and interfaces of ceramics and metals
[DE93-014959] p 578 N94-13408
Growth of Si spherical crystals and the surface oxidation (M-9) p 587 N94-13741
Single Event Upset (SEU) testing of semiconductor components at the McMaster Accelerator Laboratory
[DSIS-93-00071] p 623 N94-13834
Activities of Institute for Microstructural Sciences
[NRC-32815] p 810 N94-14198
Activities of Institute for Microstructural Sciences
[CNR-32815] p 810 N94-14199
NASA Space Engineering Research Center for VLSI systems design
[NASA-CR-194035] p 625 N94-14325
SEMICONDUCTOR LASERS
Gathering and exchange information on atmospheric chemistry and polluted atmospheres
[DE93-009940] p 705 N94-12869
Non-scanned LADAR imaging and applications
[DE93-013772] p 655 N94-13261
Characteristics of semiconductor lasers with optical feedback
[ISBN-0-315-55435-5] p 656 N94-13522
Horizontal-cavity surface-emitting lasers, superluminescent LEDs, and amplifiers, and parabolic gain unstable resonator semiconductor lasers p 656 N94-13573
Microchannel cooled heatsinks for high average power laser diode arrays
[DE93-016533] p 658 N94-14442
AlGaAs diode laser blue shift resulting from fast neutron irradiation
[AD-A266642] p 659 N94-14681
SEMICONDUCTORS (MATERIALS)
Liquid phase epitaxy of gallium arsenide: A review
[DE93-622212] p 804 N94-12893
Metal-semiconductor, composite radiation detectors
[DE93-013313] p 619 N94-12994
Nonlinear laser spectroscopy studies of semiconductor heterostructures
[AD-A265728] p 805 N94-13037
Crystallographic and metallurgical characterization of radiation detector grade cadmium telluride materials
[DE93-014335] p 806 N94-13150
Comment of parameter excitation of Alfven and Heliicon waves in a magnetoactive compensated semiconductor by microwave radiation
[DE93-623203] p 806 N94-13228
Surfaces and interfaces of ceramics and metals
[DE93-014959] p 578 N94-13408
Crystal growth of ZnSe and related ternary compound semiconductors by physical vapor transport
[NASA-CR-193834] p 807 N94-13444
Spacelab J experiment descriptions
[NASA-TM-4517] p 586 N94-13732
Growth experiment of narrow band-gap semiconductor PbSnTe single crystals in space (M-1) p 586 N94-13733
Growth of PbSnTe single crystal by traveling-zone method in low gravity (M-2) p 586 N94-13734
Growth of semiconductor compound single crystal InSb by floating zone method (M-3) p 586 N94-13735
Crystal growth of compound semiconductors in a low-gravity environment (InGaAs crystals) (M-22) p 590 N94-13754
Activities of the Basic Sciences Branch
[DE93-010012] p 851 N94-14455
A sum-rule of luminescence spectrum
[ITN-93-85223] p 814 N94-14559
Dynamic Jahn-Teller effect: Calculation of fine structure spectrum, isotope shift and Zeeman behavior at deep center Ni2+ in CdS
[ETN-93-94394] p 815 N94-14705
SENSITIVITY
Regional climatology sensitivity studies
[DE93-010712] p 722 N94-14057
Decentralized control of uncertain systems via sensitivity models
[DE93-012963] p 766 N94-14568
Differential Sensitivity Theory applied to the MESA code for high pressure interactions
[DE93-016460] p 676 N94-14591
SEPARATED FLOW
A solution algorithm for the prediction of compressible laminar and turbulent shear flows p 634 N94-13635
Numerical studies of spray combustion in liquid-fueled engines p 564 N94-13685
Development of a recursion RNG-based turbulence model
[NASA-CR-191511] p 636 N94-13718
Measurements of wing and fin buffeting on the standard dynamics model
[IAR-AN-76] p 526 N94-13859
Numerical simulation of dynamic stall of NACA0012 airfoil oscillating near static stall angle using the Navier-Stokes equations
[DE93-767970] p 505 N94-14061
SEQUENCING
Cellular mechanism of turnover of the stress induced protein HSP 70
[AD-A265723] p 732 N94-13061
SEQUENTIAL COMPUTERS
A design methodology for portable software on parallel computers
[NASA-CR-194181] p 752 N94-14139
SERIES EXPANSION
Medium energy hadron-nucleus scattering in the 1/N expansion formalism
[DE93-622957] p 778 N94-12848
Magnetic interactions and disorder - phase transitions in dilute spin-glasses and high temperature superconductors
[ITN-93-85217] p 815 N94-14825
SERVICE LIFE
Battery testing at Argonne National Laboratory
[DE93-011761] p 624 N94-14012
Inflow characteristics associated with high-blade-loading events in a wind farm
[DE93-010042] p 704 N94-14423
Derated ion thruster development status
[NASA-TM-106292] p 553 N94-14726
SET THEORY
On the foundations of final semantics: Non-standard sets, metric spaces, partial orders
[CWI-CS-R9241] p 768 N94-13526
SEX FACTOR
Gender differences in endocrine responses to posture and 7 days of 6 deg head down bed rest
[NASA-TM-103991] p 731 N94-12972
SEYFERT GALAXIES
Polarization and variability of active galaxies and quasars p 837 N94-13550
Ultraviolet observations of NGC 4395, the least luminous and nearest known Seyfert 1 nucleus
[NASA-CR-194304] p 831 N94-13679
Was 49: Mirror for a hidden Seyfert 1 galaxy
[NASA-CR-194537] p 840 N94-14685
SHADOWGRAPH PHOTOGRAPHY
Images constructed from computed flow fields
[NASA-CR-194397] p 650 N94-13814
Development of an automated film-reading system for ballistic ranges
[NASA-CR-194398] p 650 N94-13815
Advanced ballistic range technology
[NASA-CR-194396] p 532 N94-14068
Advanced ballistic range technology
[NASA-CR-194530] p 533 N94-14540
SHADOWS
Field of solar collectors: Effect of shadowing on the optimal field design
[ITN-93-85197] p 702 N94-13570
SHAFTS (MACHINE ELEMENTS)
Rotordynamic and leakage characteristics of a 4-stage brush seal
[AD-A266012] p 660 N94-12988

SHALES
Overview: Gas hydrate geology and geography
[DE93-014043] p 688 N94-14151
SHALLOW WATER
Nonlinear wave forces on large ocean structures
[AD-A266820] p 683 N94-14902
SHAPE FUNCTIONS
Boundary formulations for nonlinear design sensitivity analysis p 672 N94-13669
SHAPED CHARGES
The motion of a conical shaped liner driven by explosive load
[ITN-93-85215] p 585 N94-14507
SHAPES
Effect of size, shape, and end condition of test specimen on compressive strength of high-strength concrete
[DE93-500412] p 682 N94-14653
SHEAR FLOW
Studies of turbulent shear flows and their control
[NASA-CR-194114] p 635 N94-13676
Turbulent diffusion in homogeneous shear flow with stable density stratification
[DLR-FB-92-26] p 639 N94-14443
Search for subgrid scale parameterization by projection pursuit regression p 643 N94-14749
A study of the fine scale motions of incompressible time-developing mixing layers p 644 N94-14751
Direct simulation of polymer drag reduction in free shear flows and vortex dipoles p 644 N94-14755
Investigation of the dilatational dissipation in compressible homogeneous shear flow p 645 N94-14758
SHEAR LAYERS
Turbulence modeling of free shear layers for high-performance aircraft
[NASA-CR-193659] p 520 N94-12799
Linear instability of curved free shear layers
[NASA-TM-106290] p 642 N94-14729
A study of the fine scale motions of incompressible time-developing mixing layers p 644 N94-14751
Vortex-induced disturbance field in a compressible shear layer p 645 N94-14760
SHEAR PROPERTIES
Shear buckling of fiber metal laminates: Comparison between orthotropic and anisotropic plate models using finite element method
[LTR-ST-1934] p 671 N94-13565
Studies of momentum and energy transfer across wavy gas-liquid interfaces
[AD-A266432] p 635 N94-13699
An experimental study on the effect of die geometry on swell and sag in the parison extrusion stage
[IMI-93RT-42400-1476-G] p 597 N94-14070
Machining and grinding: High rate deformation in practice
[DE93-010718] p 664 N94-14457
Structures and shear response of lipid monolayers
[DE93-015076] p 730 N94-14802
SHEAR STRAIN
Nonlinear vibrations of thick composite plates: Higher-order shear deformation plate theory p 556 N94-13558
Computer program for analysis of high speed, single row, angular contact, spherical roller bearing, SASHBEAN. Volume 1: User's guide
[NASA-CR-191183] p 663 N94-14445
SHEAR STRENGTH
System integration and demonstration of adhesive bonded high temperature aluminum alloys for aerospace structure, phase 2
[NASA-CR-191459] p 575 N94-12792
SHEAR STRESS
Colorimetric qualification of shear sensitive liquid crystal coatings
[NASA-CR-194126] p 806 N94-13291
Finite element analysis of composite plates by use of modified complementary energy principle p 672 N94-13596
Non-uniqueness in dynamic rate-independent non-associated plasticity
[AD-A266342] p 769 N94-13731
Shock compression and quasielastic release in tantalum
[DE93-014566] p 811 N94-14329
Computer program for analysis of high speed, single row, angular contact, spherical roller bearing, SASHBEAN. Volume 2: Mathematical formulation and analysis
[NASA-CR-191182] p 664 N94-14446
Vortex-induced disturbance field in a compressible shear layer p 645 N94-14760
SHEARING
A stochastic model for behavior analysis of fiber-reinforced quasi-brittle materials p 672 N94-13594
SHELL STABILITY
A survey of crack path stability criteria and their application to crack flapping phenomena in stiffened structures
[LR-681] p 675 N94-13929
The effect of initial imperfections on shell stability: An updated review
[LR-695] p 682 N94-14692
SHELL STARS
Physical properties of gas disks around shell stars with and without dust
[NASA-CR-193655] p 835 N94-13239
SHELLS (STRUCTURAL FORMS)
Probabilistic micromechanics for high-temperature composites
[NASA-CR-191150] p 676 N94-14408
SHOCK FRONTS
Numerical simulations and experiments on physics of high Mach number shockwave: Turbulent flow interactions
[DE93-013424] p 631 N94-13249
Shock compression and quasielastic release in tantalum
[DE93-014566] p 811 N94-14329
Evolution of the shock front and turbulence structures in the shock/turbulence interaction p 645 N94-14761
SHOCK HEATING
X ray emission from dynamical shock models in hot-star winds
[NASA-CR-194093] p 847 N94-13288
SHOCK LOADS
Micromechanical strength effects in shock compression of solids
[DE93-014425] p 670 N94-12887
Shock compression and quasielastic release in tantalum
[DE93-014566] p 811 N94-14329
Nonlinear wave predictions in ceramics
[DE93-016516] p 582 N94-14436
SHOCK RESISTANCE
Thermal shock resistance of ceramic matrix composites
[NASA-CR-189136] p 557 N94-13920
SHOCK SPECTRA
Development of test techniques to simulate high-frequency mechanical shock on weapon components
[KCP-613-4998] p 675 N94-13907
SHOCK TESTS
Shock-free accele·ation of laser driven targets
[DE93-008050] p 655 N94-13387
Development of test techniques to simulate high-frequency mechanical shock on weapon components
[KCP-613-4998] p 675 N94-13907
Thermal shock resistance of ceramic matrix composites
[NASA-CR-189136] p 557 N94-13920
SHOCK TUBES
A multiphase model for shock-induced flow in low density foam
[DE93-013767] p 632 N94-13397
Experimental investigation of the effects of blowing ratio parameter on heat transfer to a film-cooled flat plate
[AD-A266599] p 636 N94-13780
Comparative ignition of hexane and octane isomers in a shock tube
[DE93-016535] p 566 N94-14869
SHOCK TUNNELS
Numerical simulation of hypersonic flow for the design of the H-2 orbiting plane (HOPE), part 3
[NAL-TR-1168-PT-3] p 499 N94-12948
Aerodynamic and aerothermal facilities 2. Part 1: Short-duration, high-enthalpy facilities p 506 N94-14159
SHOCK WAVE INTERACTION
Fundamental study of shock wave/turbulent boundary layer interactions with passive control in transonic flows
[ESA-TT-1278] p 630 N94-13117
Sub-grid scale modeling for large eddy simulations in analysis of shock-turbulence interactions
[DE93-013425] p 631 N94-13250
Shock/boundary-layer/shock interactions p 507 N94-14172
Multi-dimensional high order essentially non-oscillatory finite difference methods in generalized coordinates
[NASA-CR-194031] p 770 N94-14429
Evolution of the shock front and turbulence structures in the shock/turbulence interaction p 645 N94-14761
Interaction of two glancing, crossing shock waves with a turbulent boundary-layer at various Mach numbers
[NASA-TM-103740] p 509 N94-14780
SHOCK WAVE PROPAGATION
Modeling the impact behavior of AD85 ceramic under multi-axial loading
[AD-A265877] p 576 N94-12932
MHD shocks in coronal mass ejections
[NASA-CR-193418] p 828 N94-12970
Studies on equatorial shock formation during plasmaspheric refilling
[NASA-CR-194392] p 715 N94-13954
SHOCK WAVES
Recovery of materials impacted at high velocity
[DE93-014150] p 576 N94-12885
Micromechanical strength effects in shock compression of solids
[DE93-014425] p 670 N94-12887
The 3-D massively parallel impact simulations using PCTH
[DE93-011593] p 670 N94-12908
MHD shocks in coronal mass ejections
[NASA-CR-193418] p 828 N94-12970
Fundamental study of shock wave/turbulent boundary layer interactions with passive control in transonic flows
[ESA-TT-1278] p 630 N94-13117
Numerical simulations and experiments on physics of high Mach number shockwave: Turbulent flow interactions
[DE93-013424] p 631 N94-13249
Sub-grid scale modeling for large eddy simulations in analysis of shock-turbulence interactions
[DE93-013425] p 631 N94-13250
A multiphase model for shock-induced flow in low density foam
[DE93-013767] p 632 N94-13397
Measuring opacity of shock generated argon plasmas
[DE93-013038] p 801 N94-14312
Nonlinear wave predictions in ceramics
[DE93-016516] p 582 N94-14436
Atmospheric acoustic modeling
[DE93-016727] p 718 N94-14518
Comparative ignition of hexane and octane isomers in a shock tube
[DE93-016535] p 566 N94-14869
SHORT CRACKS
Finite element calculation of stress-intensity factors for thumb-nail cracks in DEN specimens
[LTR-ST-1929] p 850 N94-13548
Finite element calculation of stress-intensity factors for thru-thickness cracks in DEN specimens
[LTR-ST-1905] p 675 N94-14035
The growth of short fatigue cracks in an aluminium alloy
[RAE-TR-92063] p 574 N94-14828
SHORT TAKEOFF AIRCRAFT
Position error determination for the speedometer and altimeter of the NAL QSTOL experimental aircraft ASKA
[NAL-TR-1144] p 517 N94-13451
Flight path control for the approach and landing of the quiet STOL experimental aircraft ASKA
[NAL-TR-1183] p 513 N94-13457
SHROUDED PROPELLERS
Noise levels from a model turbofan engine with simulated noise control measures applied
[NASA-TM-106318] p 518 N94-14036
SHROUDS
Cammatic: An approach to improve DSS 13 antenna gravity-loading performance p 608 N94-14374
SHUTTLE MISSION SIMULATOR
Analysis of differences between seating positions in simulators and orbiters
[NASA-TM-104776] p 737 N94-13399
SIGNAL ANALYSIS
A new formulation of longitudinal coherent instabilities
[DE93-014288] p 789 N94-13220
The DREO Elint Browser Utility (DEBU) reference manual
[DSIS-92-03900] p 603 N94-13837
Advanced Communications ESM System (ACES) testbed: Integration study
[DSIS-93-00345] p 604 N94-13939
Envelope and instantaneous frequency estimation of narrowband modulated signals
[DREO-TN-92-3] p 605 N94-14033
Deconvolution for positive signals
[DE93-013044] p 773 N94-14314
Utilization of boundary element method for extraction of frequency dependent conductivity parameters of lossy intra-chip transmission lines
[ETN-93-94385] p 771 N94-14807
Optimization of a subband coding for high definition television with motion controlled three dimensional frequency band decomposition
[ETN-93-94396] p 617 N94-14817
SIGNAL ANALYZERS
Adaptive Signal Processing Testbed
[DSIS-93-00258] p 604 N94-13869
SIGNAL DETECTION
Signal design for data communication through rapidly varying linear channels
[ITN-93-85195] p 601 N94-13567

A review of robust detection
[DSIS-93-00400] p 603 N94-13829
Trellis coding with Continuous Phase Modulation (CPM) for satellite-based land-mobile communications
[NASA-CR-191325] p 604 N94-13909
Advanced Communications ESM System (ACES) testbed: Integration study
[DSIS-93-00345] p 604 N94-13939
Determining neural network connectivity using evolutionary programming
[AD-A266853] p 766 N94-14882

SIGNAL DETECTORS
Portable acoustic wave sensor systems for real-time monitoring of volatile organic compounds
[DE93-013753] p 582 N94-14511

SIGNAL ENCODING
Recursive time-varying filter banks for subband image coding
[NASA-CR-193726] p 598 N94-12920
Digital sound: The selection of critical programme material and preparation of recordings for CCIR tests on low bit-rate codecs
[BBC-RD-1993/1] p 598 N94-12925
Digital sound: Subjective tests on commentary-quality codecs
[BBC-RD-1993/2] p 598 N94-12926
Exact reconstruction analysis/synthesis filter banks with time-varying filters
[NASA-CR-193725] p 600 N94-13466
Speaker independent recognition of isolated words using vector quantization and neural networks
[ETN-93-94390] p 616 N94-14724
Optimization of a subband coding for high definition television with motion controlled three dimensional frequency band decomposition
[ETN-93-94396] p 617 N94-14817

SIGNAL FADING
Long duration measurements of fading on a low elevation angle, 11-GHz satellite path p 613 N94-14661
Large-scale rainfall diversity for ACTS p 613 N94-14662
Rain rate duration statistics derived from the Mid-Atlantic coast rain gauge network p 614 N94-14663
Contribution towards a draft revision of recommendations 681: Propagation data required for the design of Earth-space land mobile telecommunications systems p 614 N94-14666
Characterisation of the LMS propagation channel at L- and S-bands: Narrowband experimental data and channel modelling p 615 N94-14669
Results of multiband (L, S, Ku band) propagation measurements and model for high elevation angle land mobile satellite channel p 615 N94-14670
Tree attenuation at 20 GHz: Foliage effects p 615 N94-14672

SIGNAL GENERATORS
Performance results of a digital test signal generator p 609 N94-14382
The flight performance of the Galileo orbiter USO p 611 N94-14398

SIGNAL MEASUREMENT
Measurement of wave propagation for VHF/UHF and a comparison between measured and predicted values
[FFI/RAPPORT-92/7024] p 605 N94-13968

SIGNAL PROCESSING
Ocean acoustic processing: A model-based approach
[DE93-011902] p 725 N94-12876
Digital sound: The selection of critical programme material and preparation of recordings for CCIR tests on low bit-rate codecs
[BBC-RD-1993/1] p 598 N94-12925
Digital sound: Subjective tests on commentary-quality codecs
[BBC-RD-1993/2] p 598 N94-12926
An experimental study of tether reel system: A laboratory model
[NAL-TR-1176T] p 539 N94-12943
HYMOSS signal processing for pushbroom spectral imaging
[NASA-CR-191341] p 620 N94-13125
Exact reconstruction analysis/synthesis filter banks with time-varying filters
[NASA-CR-193725] p 600 N94-13466
Signal design for data communication through rapidly varying linear channels
[ITN-93-85195] p 601 N94-13567
Kalman filter based architectures for interference excision
[DSIS-93-00034] p 603 N94-13818
Acousto-optical post-processor time-integrating correlator updates
[DSIS-93-00314] p 777 N94-13831
Digital quadrature demodulation for radar ESM applications
[DREO-TN-92-10] p 603 N94-13838
VMEC30 programming library: Reference manual
[DSIS-93-00350] p 750 N94-13858
Adaptive Signal Processing Testbed
[DSIS-93-00258] p 604 N94-13869
Adaptive Signal Processing Testbed: Software design specification
[DSIS-93-00259] p 604 N94-13870
Advanced Communications ESM System (ACES) testbed: Integration study
[DSIS-93-00345] p 604 N94-13939
VMEC30 software development: Tutorial manual
[DSIS-93-00351] p 750 N94-13944
A rocket-borne lidar for studies of the middle atmosphere
[FFI/RAPPORT-92/7034] p 715 N94-13949
Demonstration and acceptance test plan for real-time excision software on the Adaptive Signal Processing Testbed
[DSIS-93-00275] p 751 N94-13990
ASPT software source code: SUN driver package
[DSIS-93-00262] p 751 N94-14014
Adaptive Signal Processing Testbed: VME-based DSP board market survey
[DSIS-93-00274] p 605 N94-14015
ASPT software source code: Development system package, VME-C30 component
[DSIS-93-00276] p 751 N94-14016
Adaptive Signal Processing Testbed signal excision software: User's manual
[DSIS-93-00260] p 606 N94-14037
Adaptive Signal Processing Testbed application software: User's manual
[DSIS-93-00261] p 606 N94-14038
VMEC30 SUN software development utilities: User's manual
[DSIS-93-00348] p 752 N94-14051
VMEC30 SUN device drivers: User's manual
[DSIS-93-00349] p 752 N94-14052
Testing various time-frequency distribution techniques
[DREO-TN-92-17] p 606 N94-14062
I/Q demodulation of radar signals with calibration and filtering
[DREO-RN-1119] p 606 N94-14064
EWTEST signal excision testbed: System evaluation
[DSIS-93-00346] p 607 N94-14065
DSP software development environments for the Adaptive Signal Processing Testbed
[DSIS-93-00347] p 607 N94-14066
ASPT software source code: Host development system package
[DSIS-93-00277] p 753 N94-14197
An exact processing algorithm for wide beam spaceborne SAR data p 689 N94-14213
Deconvolution for positive signals
[DE93-013044] p 773 N94-14314
FLATDAN beamformer enhancements and testing
[DSIS-93-00287] p 777 N94-14360
Stability measurements of the radio science system at the 34-m high-efficiency antennas p 609 N94-14381
Preliminary design and implementation of the baseline digital baseband architecture for advanced deep space transponders p 611 N94-14393
Determining neural network connectivity using evolutionary programming
[AD-A266853] p 766 N94-14882

SIGNAL RECEPTION
Calibration of the receiver channel for the GOPEX precursor experiments p 610 N94-14387

SIGNAL TO NOISE RATIOS
Lower bounds on time of arrival estimation of pulse compression waveforms
[ITN-93-85189] p 599 N94-13196
Performance results of a digital test signal generator p 609 N94-14382

SIGNAL TRANSMISSION
Ocean acoustic processing: A model-based approach
[DE93-011902] p 725 N94-12876
Digital sound: The selection of critical programme material and preparation of recordings for CCIR tests on low bit-rate codecs
[BBC-RD-1993/1] p 598 N94-12925
Trellis coding with Continuous Phase Modulation (CPM) for satellite-based land-mobile communications
[NASA-CR-191325] p 604 N94-13909
Calibration of the receiver channel for the GOPEX precursor experiments p 610 N94-14387
GOPEX laser transmission and monitoring systems p 611 N94-14391

SIGNATURES
Effects of typhoon on TOMS data p 693 N94-14243

SIGNS AND SYMPTOMS
Autogenic feedback training experiment: A preventative method for space motion sickness p 595 N94-13774

SILICA GLASS
Thermal history effects on electrical relaxation and conductivity for potassium silicate glass with low alkali concentrations
[NASA-TM-106324] p 583 N94-14845

SILICATES
Deposition of impact-generated vapors in the lunar regolith p 843 N94-14302

SILICIDES
Fracture behavior of vanadium/vanadium silicide in-situ composites
[DE93-013422] p 556 N94-13389

SILICON
Metal-semiconductor, composite radiation detectors
[DE93-013313] p 619 N94-12994
Lattice site of helium implanted in Si and diamond
[DE93-015365] p 805 N94-13012
Fracture behavior of vanadium/vanadium silicide in-situ composites
[DE93-013422] p 556 N94-13389
Computational diagnostics for detecting phase transitions during nanoindentation
[DE93-016536] p 813 N94-14439
Quantum state resolved desorption of CO from solid surfaces
[DE93-016876] p 814 N94-14597
A high voltage dielectrically isolated smart power technology based on silicon direct bonding
[LAAS-92492] p 626 N94-14698
Manufacturing and examination of integrated optical waveguide components in silicon
[ETN-93-94393] p 793 N94-14704
Multicrystalline silicon solar cells: Gettering optimization and characterization
[DE93-015001] p 705 N94-14861

SILICON ALLOYS
The 1.00 MeV proton radiation resistance studies of amorphous silicon-based alloy solar cells p 703 N94-13639
The influence of a microgravity environment on the dendritic morphology during directional solidification of hypoeutectic Al-Si alloys
[NASA-CR-194139] p 571 N94-13891
Evolving surface cusps during strained-layer epitaxy
[DE93-015430] p 813 N94-14478

SILICON CARBIDES
Micromechanical modeling of laminated composites with interfaces and woven composites using the boundary element method
[NASA-TM-106280] p 670 N94-13053
Processing and mechanical properties of silicon carbide platelet reinforced alumina composites p 556 N94-13557
Problems and opportunities in microwave joining of ceramics
[DE93-014998] p 579 N94-13888
Dynamic mechanical deformation of a SiC(sub p)/Al-Li (8090) composite
[DE93-014586] p 558 N94-14121

SILICON DIOXIDE
1/f noise and oxide traps in MOSFETs
[DE93-007581] p 619 N94-12942
Linear and nonlinear spectroscopic probing of solute interactions with chemically modified silica surface
[DE93-014648] p 562 N94-13001
Theory of the electronic and structural properties of solid state oxides
[DE93-016051] p 811 N94-14296
Molecular simulator: A basic tool for submicron MOS processes development
[LAAS-92484] p 814 N94-14697
Reactor studies of metal ions associated with chromatographic silica
[AD-A266675] p 573 N94-14779
Fine-powder Al2O3 and SiO2 for preparation of multielement standards for rare-earth elements analysis
[DE93-625118] p 567 N94-14884

SILICON FILMS
Ion assisted sputter deposition of Mo-Si multilayers
[DE93-013830] p 583 N94-14693

SILICON ISOTOPES
Office of Naval Research/DARPA publications: Composite materials with improved properties in compression
[AD-A265509] p 560 N94-14794

SILICON NITRIDES
Quantitative mapping of pore fraction variations in silicon nitride using an ultrasonic contact scan technique
[NASA-TP-3377] p 665 N94-13056
Processing and testing of high toughness silicon nitride ceramics
[NASA-CR-191190] p 582 N94-14543

SILICON OXIDES
Multicrystalline silicon solar cells: Gettering optimization and characterization
[DE93-015001] p 705 N94-14861

Electrochemical planarization for microelectronic circuits
[DE93-017214] p 627 N94-14870

SILICON RADIATION DETECTORS
Metal-semiconductor, composite radiation detectors
[DE93-013313] p 619 N94-12994
Proceedings of the Workshop on Applications of Synchrotron Radiation to Trace Impurity Analysis for Advanced Silicon Processing
[DE93-013389] p 805 N94-13020

SILICONES
Qualification test of the Ross Double Planetary Mixer
[NASA-CR-192600] p 652 N94-14497

SILOXANES
Unexpectedly rapid hydrosilation polymerization of the diallyl derivative of bisphenol A and 2,6-diallylphenol
[AD-A265832] p 577 N94-12986

SIMD (COMPUTERS)
Efficient, massively parallel eigenvalue computation
[NASA-CR-194289] p 760 N94-13921
An overview of parallel scientific visualization
[DE93-017105] p 755 N94-14521
Identification of continuous-time dynamical systems: Neural network based algorithms and parallel implementation
[DE93-014427] p 766 N94-14737

SIMPLIFICATION
Simplification-driven automated partial evaluation
[DE93-012890] p 768 N94-13391

SIMULATED ANNEALING
Simulated annealing for the problem of multiresource location on graph
[REPT-93-033] p 770 N94-13809

SIMULATION
Simulation studies for surfaces and materials strength
[NASA-CR-193305] p 671 N94-13179
Lightning simulation and determination of expected striking points
[ITN-93-85202] p 719 N94-13188
Event-driven simulation in SELMON: An overview of EDSE
[NASA-CR-194505] p 749 N94-13784
Development of test techniques to simulate high-frequency mechanical shock on weapon components
[KCP-613-4998] p 675 N94-13907
Laboratory simulations of lunar darkening processes p 843 N94-14301
Modeling surface area to volume effects on borosilicate glass dissolution
[DE93-011891] p 581 N94-14432
Computational diagnostics for detecting phase transitions during nanoindentation
[DE93-016536] p 813 N94-14439

SIMULATORS
Propulsion simulator for magnetically-suspended wind tunnel models
[NASA-CR-189560] p 527 N94-13127
Event-driven simulation in SELMON: An overview of EDSE
[NASA-CR-194505] p 749 N94-13784
Simulator for heterogeneous dataflow architectures
[NASA-CR-191545] p 622 N94-13797

SINGLE CRYSTALS
Determination of channeling perspectives for complex crystal structures
[DE93-012872] p 805 N94-13009
Lattice site of helium implanted in Si and diamond
[DE93-015365] p 805 N94-13012
Spacelab J experiment descriptions
[NASA-TM-4517] p 586 N94-13732
Growth experiment of narrow band-gap semiconductor PbSnTe single crystals in space (M-1) p 586 N94-13733
Growth of PbSnTe single crystal by traveling-zone method in low gravity (M-2) p 586 N94-13734
Growth of semiconductor compound single crystal InSb by floating zone method (M-3) p 586 N94-13735
Growth of Si spherical crystals and the surface oxidation (M-9) p 587 N94-13741
Growth of samarskite crystal under microgravity conditions (M-20) p 590 N94-13752
Growth experiment of organic metal crystal in low gravity (M-21) p 590 N94-13753
Crystal growth of enzymes in low gravity (L-5) p 592 N94-13762
Emitter Wrap-Through solar cell
[DE93-014996] p 703 N94-13886
Measurement of penetration depth lambda(T) in YBa2Cu3O(7-delta) thin film
[DE93-014587] p 810 N94-14122
Prism-film coupling in anisotropic planar waveguides of epitaxial (101) rutile thin films
[DE93-012912] p 811 N94-14304
Small polaron conduction in Y2Ti2O7
[ITN-93-85221] p 814 N94-14557

SINGLE EVENT UPSETS
Single event effects and laser simulation studies
[NASA-CR-194506] p 657 N94-13812
Single Event Upset (SEU) testing of semiconductor components at the McMaster Accelerator Laboratory
[DSIS-93-00071] p 623 N94-13834
Test report for single event effects of the 80386DX microprocessor
[NASA-CR-194509] p 741 N94-13943

SINGLE SIDEBAND TRANSMISSION
Envelope and instantaneous frequency estimation of narrowband modulated signals
[DREO-TN-92-3] p 605 N94-14033

SINGLE STAGE TO ORBIT VEHICLES
Hypersonic aerodynamic characteristics of SSTO-type aerospace planes. Part 1: The NAL 0-th configuration
[NAL-TR-1186] p 514 N94-13459
Multidisciplinary design techniques applied to conceptual aerospace vehicle design
[NASA-CR-194409] p 515 N94-13618
Spaceplane program at NAL: System concept and related technology issues p 537 N94-14281

SINTERING
Microwave hybrid heating of alumina filaments
[DE93-012642] p 581 N94-14327
Microwave sintering of large alumina bodies
[DE93-012752] p 581 N94-14340
How to read a phase equilibrium diagram for high-temperature ceramics material as main object
[DE93-512333] p 582 N94-14513
Processing and testing of high toughness silicon nitride ceramics
[NASA-CR-191190] p 582 N94-14543

SIS (SUPERCONDUCTORS)
Measurements on two-dimensional arrays of mesoscopic Josephson junctions
[AD-A265129] p 807 N94-13359
Theoretical SIS mixer research
[AD-A266323] p 807 N94-13580

SISO (CONTROL SYSTEMS)
Kalman filter input estimation
[NAL-TR-1182] p 649 N94-13456

SITTING POSITION
Clinical physiology of bed rest
[NASA-TM-104010] p 727 N94-13447

SIZE DETERMINATION
Adaptively resizing populations: Algorithm, analysis, and first results
[NASA-CR-194277] p 742 N94-12808
Emission line variability in active galactic nuclei
[ITN-93-85209] p 849 N94-14553

SIZE DISTRIBUTION
Experimental determination of droplets local mean diameter of a sprag from impinging jets
[INPE-5469-TDI/500] p 631 N94-13365
Pore-size-distribution of cationic polyacrylamide hydrogels
[DE93-015218] p 581 N94-14400

SKEWNESS
Evolution of the shock front and turbulence structures in the shock/turbulence interaction p 645 N94-14761

SKIN FRICTION
A technique for direct measurement of skin friction in supersonic combustion flow p 503 N94-13555
High freestream turbulence effects on the transport of heat and momentum p 633 N94-13559

SKIN TEMPERATURE (NON-BIOLOGICAL)
The development and implementation of an interactive retrieval/analysis/forecast algorithm p 692 N94-14234

SKY SURVEYS (ASTRONOMY)
Archiving of HEAO-1 data products and the creation of a general user's guide to the archive
[NASA-CR-193415] p 822 N94-13062
Search for extraterrestrial intelligence/high resolution microwave survey team member
[NASA-CR-194177] p 739 N94-13086
ROSAT guest investigator program (AO-1). On a search for coronal x ray emissions from white dwarfs
[NASA-CR-193654] p 835 N94-13171
A survey of compact planetary nebulae at radio wavelengths
[ISBN-0-315-61950-3] p 829 N94-13371
A near-infrared faint galaxy survey: Evolution and the cosmological geometry from K band photometry p 830 N94-13591
Sites of fine-scale electron density turbulence in the interstellar medium
[NASA-CR-193708] p 839 N94-13864
X ray observations of late-type stars using the ROSAT all-sky survey
[NASA-CR-193716] p 832 N94-14146
HRMS sky survey wideband feed system design for DSS 24 beam waveguide antenna p 611 N94-14397

SLEEP
Work/rest schedules and performance of S-3 aviators during fleet exercise
[AD-A265807] p 734 N94-12975
Work/rest schedules and performance of F/A-18 aviators during Fleet Exercise 1992
[AD-A265826] p 735 N94-12982

SLEEP DEPRIVATION
Work/rest schedules and performance of S-3 aviators during fleet exercise
[AD-A265807] p 734 N94-12975
Work/rest schedules and performance of F/A-18 aviators during Fleet Exercise 1992
[AD-A265826] p 735 N94-12982

SLENDER WINGS
A grid generation package for high aspect ratio wings p 510 N94-14608

SLICING
Integrating interface slicing into software engineering processes
[NASA-CR-192761] p 754 N94-14368

SLIDING
Wear-mechanism modelling
[DE93-012311] p 579 N94-13974

SLIDING FRICTION
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-005] p 559 N94-14575

SLURRIES
Reverse micelle synthesis of nanoscale metal containing catalysts
[DE93-012869] p 572 N94-14184

SMART STRUCTURES
Feasibility study of an orbiting laboratory for testing CSI technology
[NASA-CR-191524] p 540 N94-13016
Smart skin technology development for measuring ice accretion, stall, and high AOA aircraft performance. Part 1: Capacitive ice detector development
[NASA-CR-194252] p 511 N94-13424
Smart materials/structures technical analysis
[AD-A266771] p 766 N94-14785

SMOKE
Estimation of the concentration versus the time profile of zinc chloride particles in smoke clouds generated by the Raufoss A/S instantaneous smoke RA-90 and DM-45 HC smoke generator
[FFI-93/6001] p 708 N94-13821
Flight validation of a pulsed smoke flow visualization system
[NASA-CR-186026] p 516 N94-14106

SMOOTHING
Shock-free acceleration of laser driven targets
[DE93-008050] p 655 N94-13387

SNOW
Optical properties of CO2 ice and CO2 snow in the ultraviolet, visible, and infrared
[NASA-CR-194110] p 686 N94-14081

SNOW COVER
Snow cover models in operational watershed forecasting
[DE93-778332] p 718 N94-12837

SODIUM
Multiplicity spectrometry on neutron filtered beams
[DE93-617529] p 790 N94-14843

SOFTENING
On the hardening and softening of nanocrystalline materials
[DE93-012901] p 810 N94-14185

SOFTWARE ENGINEERING
Generic software architecture based redesign p 745 N94-13290
Software synthesis using generic architectures
[NASA-CR-194201] p 745 N94-13355
Architecture-driven reuse of code in KASE
[NASA-CR-194200] p 745 N94-13356
The KASE approach to domain-specific software systems p 745 N94-13357
Creating a strategic plan for configuration management using computer aided software engineering (CASE) tools
[DE93-013663] p 746 N94-13394
A measurement and evaluation process model applied to software engineering environments
[INPE-5345-PUD/048] p 746 N94-13428
Software design by reusing architectures
[NASA-CR-194151] p 747 N94-13443
Mass market computers for software development
[ERB-1035] p 741 N94-13547
Space and Earth sciences, computer systems, and scientific data analysis support, volume 1
[NASA-CR-194535] p 741 N94-13788
Parameter identification of a model of the process of software development
[REPT-93-008] p 750 N94-13807

Hypertext Compiling Tools (HCT): Developing model based applications with standard hypertext systems
[REPT-92-049] p 750 N94-13822
Activities of Institute for Information Technology
[CNR-35024] p 824 N94-14069
Guide to the software architectural design phase
[ESA-PSS-05-04-ISSUE-1] p 753 N94-14190
Guide to the software detailed design and production phase
[ESA-PSS-05-05-ISSUE-1] p 753 N94-14191
PC viruses: How do they do that?
[DE93-012581] p 753 N94-14289
AXAF FITS standard for ray trace interchange
[NASA-CR-194025] p 832 N94-14305
Integrating interface slicing into software engineering processes
[NASA-CR-192761] p 754 N94-14368
Formal functional test designs with a test representation language p 609 N94-14383
PC4CAST: A tool for DSN load forecasting and capacity planning p 610 N94-14384
Visualization techniques to aid in the analysis of multi-spectral astrophysical data sets
[NASA-CR-194489] p 840 N94-14482
A database for propagation models p 614 N94-14665
Verification of critical software by statistical testing
[LAAS-93006] p 756 N94-14714
Determining neural network connectivity using evolutionary programming
[AD-A266853] p 766 N94-14882

SOFTWARE RELIABILITY
Diskless supercomputers: Scalable, reliable I/O for the Tera-Op technology base
[NASA-CR-194089] p 740 N94-13363
Switchover software reliability estimate for Paducah freezer/sublimer computer systems
[DE93-013844] p 756 N94-14696
Verification of critical software by statistical testing
[LAAS-93006] p 756 N94-14714

SOFTWARE REUSE
Software synthesis using generic architectures
[NASA-CR-194201] p 745 N94-13355
Architecture-driven reuse of code in KASE
[NASA-CR-194200] p 745 N94-13356
Software design by reusing architectures
[NASA-CR-194151] p 747 N94-13443
Integrating interface slicing into software engineering processes
[NASA-CR-192761] p 754 N94-14368

SOFTWARE TOOLS
Artificial intelligence support for scientific model-building
[NASA-TM-109252] p 761 N94-12890
Parachute system design, analysis, and simulation tool
[DE93-013755] p 501 N94-13260
Architecture-driven reuse of code in KASE
[NASA-CR-194200] p 745 N94-13356
The KASE approach to domain-specific software systems p 745 N94-13357
Creating a strategic plan for configuration management using computer aided software engineering (CASE) tools
[DE93-013663] p 746 N94-13394
Designing and generating a GUI module using GUI p 747 N94-13437
Software design by reusing architectures
[NASA-CR-194151] p 747 N94-13443
Rapid intelligent inspection process definition for dimensional measurement in advanced manufacturing
[DE93-011271] p 748 N94-13480
Some computational tools for the analysis of through cracks in stiffened fuselage shells
[LR-701] p 673 N94-13726
Hypertext Compiling Tools (HCT): Developing model based applications with standard hypertext systems
[REPT-92-049] p 750 N94-13822
VMEC30 programming library: Reference manual
[DSIS-93-00350] p 750 N94-13858
VMEC30 software development: Tutorial manual
[DSIS-93-00351] p 750 N94-13944
A widget based operations simulator for a planetary camera: A model for the high resolution stereo camera on Mars 94
[DLR-FB-92-30] p 651 N94-14044
VMEC30 SUN software development utilities: User's manual
[DSIS-93-00348] p 752 N94-14051
DSP software development environments for the Adaptive Signal Processing Testbed
[DSIS-93-00347] p 607 N94-14066
EVES: An overview
[DSIS-93-00238] p 752 N94-14088
Guide to the software architectural design phase
[ESA-PSS-05-04-ISSUE-1] p 753 N94-14190
Guide to the software detailed design and production phase
[ESA-PSS-05-05-ISSUE-1] p 753 N94-14191
PC4CAST: A tool for DSN load forecasting and capacity planning p 610 N94-14384
Computational Controls Workstation: Algorithms and hardware p 678 N94-14626
Caesy: A software tool for computer-aided engineering p 678 N94-14627
ASTEC and MODEL: Controls software development at Goddard Space Flight Center p 678 N94-14628
An application of the IMC software to controller design for the JPL LSCL Experiment Facility p 681 N94-14645

SOIL EROSION
Soil erosion rates caused by wind and saltating sand stresses in a wind tunnel
[DE93-009154] p 706 N94-12905
Soil erosion mapping using remote sensing and GIS techniques p 692 N94-14240

SOIL MAPPING
Spectral reflectance of soils from Sao Paulo State
[INPE-5424-PRP/172] p 684 N94-13377
Soil erosion mapping using remote sensing and GIS techniques p 692 N94-14240
Land evaluation for agricultural productivity in North-East Thailand using LANDSAT TM data and geographic information p 693 N94-14242

SOIL MECHANICS
Dynamic soil pressures on rigid cylindrical vaults
[DE93-013930] p 676 N94-14585

SOIL MOISTURE
Measuring surface fluxes in CAPE
[NASA-CR-193664] p 711 N94-12788
Phase aligner for the Electronically Scanned Thinned Array Radiometer (ESTAR) instrument
[NASA-TM-4518] p 623 N94-13878
Circulation and rainfall climatology of a 10-year (1979 - 1988) integration with the Goddard Laboratory for atmospheres general circulation model
[NASA-TM-104591] p 723 N94-14074

SOIL SCIENCE
Applications of the Advanced Light Source to problems in the earth, soil, and environmental sciences
[DE93-015258] p 710 N94-14477

SOILS
Measuring surface fluxes in CAPE
[NASA-CR-193664] p 711 N94-12788
Spectral reflectance of soils from Sao Paulo State
[INPE-5424-PRP/172] p 684 N94-13377
Land evaluation for agricultural productivity in North-East Thailand using LANDSAT TM data and geographic information p 693 N94-14242
Survey of subsurface geophysical exploration technologies adaptable to an airborne platform
[DE93-015080] p 717 N94-14294
Dynamic soil pressures on rigid cylindrical vaults
[DE93-013930] p 676 N94-14585
Coastal scour problems and methods for prediction of maximum scour
[AD-A266658] p 726 N94-14775

SOL-GEL PROCESSES
Amorphous sol-gel insulating films
[DE93-012859] p 576 N94-12866
Solution chemistry optimization of sol-gel processed PZT thin films
[DE93-013776] p 814 N94-14695
Charge storage and switching phenomena with molecular assemblies of metal complexes
[AD-A266673] p 787 N94-14778

SOLAR ACTIVITY
Variations common to the interplanetary magnetic field, the zonal atmospheric circulation and the Earth's rotation
[COMMUNICATIONS-SER-B-157] p 837 N94-13504

SOLAR ACTIVITY EFFECTS
Determining the solar-flare photospheric scale height from SMM gamma-ray measurements
[NASA-CR-194084] p 844 N94-13671

SOLAR ARRAYS
Screening of solar cells
[NASA-TM-106298] p 620 N94-13134
A photovoltaic catenary-tent array for the Martian surface
[NASA-TM-106306] p 621 N94-13194
Solar radiation on Mars: Stationary photovoltaic array
[NASA-TM-106321] p 626 N94-14730

SOLAR CELLS
The 1992 JSEE/JWEA Joint Conference
[DE93-793955] p 700 N94-12822
Photovoltaic Subcontract Program
[DE93-000092] p 700 N94-12868
Photovoltaics: Contract lists, fiscal year 1992
[DE93-000093] p 701 N94-12902
Photovoltaics: Program overview, fiscal year 1992
[DE93-000055] p 701 N94-12914
Screening of solar cells
[NASA-TM-106298] p 620 N94-13134
Low temperature metal-organic chemical vapor deposition growth processes for high efficiency solar cells
[DE92-010562] p 702 N94-13386
The 1.00 MeV proton radiation resistance studies of amorphous silicon-based alloy solar cells p 703 N94-13639
Emitter Wrap-Through solar cell
[DE93-014996] p 703 N94-13886
The Large Area Pulsed Solar Simulator (LAPSS)
[NASA-CR-194507] p 703 N94-13940
Numerical simulation and analysis of electrical and optical properties of Al(x)Ga(1-x)As / GaAs
[ETN-93-94387] p 703 N94-13997
Structural and electronic studies of a-SiGe:H alloys
[DE93-010021] p 809 N94-14085
Continuous roll-to-roll a-Si photovoltaic manufacturing technology
[DE93-010006] p 704 N94-14109
Optimization of transparent and reflecting electrodes for amorphous silicon solar cells
[DE93-010009] p 704 N94-14110
Study of novel conductive paints for solar cell electromagnetic fields
[DE93-015088] p 581 N94-14337
Photovoltaic advanced research and development project: Solar radiation research
[DE92-016430] p 704 N94-14350
Activities of the Basic Sciences Branch
[DE93-010012] p 851 N94-14455
Solar radiation on Mars: Stationary photovoltaic array
[NASA-TM-106321] p 626 N94-14730
Multicrystalline silicon solar cells: Gettering optimization and characterization
[DE93-015001] p 705 N94-14861

SOLAR COLLECTORS
The 1992 JSEE/JWEA Joint Conference
[DE93-793955] p 700 N94-12822
High-flux testing of heat pipes for point-focus solar collector systems
[DE93-011581] p 628 N94-12884
Reflective coatings for solar applications
[DE93-010026] p 702 N94-13381
Field of solar collectors: Effect of shadowing on the optimal field design
[ITN-93-85197] p 702 N94-13570
Colorado State University program for developing, testing, evaluating, and optimizing solar heating and cooling systems
[DE93-016018] p 705 N94-14504

SOLAR COOLING
Colorado State University program for developing, testing, evaluating, and optimizing solar heating and cooling systems
[DE93-016018] p 705 N94-14504

SOLAR CORONA
Basic research in solar physics
[NASA-CR-193632] p 844 N94-13234
Evolution of the interplanetary magnetic field
[DE93-012631] p 836 N94-13262
Measurements of the spatial structure and directivity of 100 KeV photon sources in solar flares using PVO and ISEE-3 spacecraft
[NASA-CR-194080] p 845 N94-14492

SOLAR DYNAMIC POWER SYSTEMS
Solar dynamic power system development for Space Station Freedom
[NASA-RP-1310] p 548 N94-12807

SOLAR ELECTRIC PROPULSION
TROPIX: A solar electric propulsion flight experiment
[NASA-TM-106297] p 534 N94-13028

SOLAR ELECTRONS
Measurements of the spatial structure and directivity of 100 KeV photon sources in solar flares using PVO and ISEE-3 spacecraft
[NASA-CR-194080] p 845 N94-14492

SOLAR ENERGY
Solar dynamic power system development for Space Station Freedom
[NASA-RP-1310] p 548 N94-12807
Photovoltaic Subcontract Program
[DE93-000092] p 700 N94-12868
Reflective coatings for solar applications
[DE93-010026] p 702 N94-13381
Nimbus-7 Earth radiation budget calibration history. Part 1: The solar channels
[NASA-RP-1316] p 844 N94-13963
Solar radiation on Mars: Stationary photovoltaic array
[NASA-TM-106321] p 626 N94-14730

SOLAR ENERGY CONVERSION
The 1992 JSEE/JWEA Joint Conference
[DE93-793955] p 700 N94-12822

Field of solar collectors: Effect of shadowing on the optimal field design
[ITN-93-85197] p 702 N94-13570
Colorado State University program for developing, testing, evaluating, and optimizing solar heating and cooling systems
[DE93-016018] p 705 N94-14504

SOLAR FLARES
Determining the solar-flare photospheric scale height from SMM gamma-ray measurements
[NASA-CR-194084] p 844 N94-13671
Hard x ray/microwave spectroscopy of solar flares
[NASA-CR-194399] p 844 N94-13958
Measurements of the spatial structure and directivity of 100 KeV photon sources in solar flares using PVO and ISEE-3 spacecraft
[NASA-CR-194080] p 845 N94-14492
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for March, February 1993, and late data
[PB93-198323] p 845 N94-14560
Comparative study of x ray and microwave emissions during solar flares
[NASA-CR-194532] p 845 N94-14577

SOLAR FLUX
Present status of SAGE
[DE93-014350] p 781 N94-13205

SOLAR GENERATORS
Field of solar collectors: Effect of shadowing on the optimal field design
[ITN-93-85197] p 702 N94-13570

SOLAR HEATING
Colorado State University program for developing, testing, evaluating, and optimizing solar heating and cooling systems
[DE93-016018] p 705 N94-14504

SOLAR INSTRUMENTS
Vacuum ultraviolet instrumentation for solar irradiance and thermospheric airglow
[NASA-CR-194525] p 652 N94-14684

SOLAR MAGNETIC FIELD
Basic research in solar physics
[NASA-CR-193632] p 844 N94-13234
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for March, February 1993, and late data
[PB93-198323] p 845 N94-14560
Comparative study of x ray and microwave emissions during solar flares
[NASA-CR-194532] p 845 N94-14577

SOLAR MAXIMUM MISSION
Ultraviolet Spectrometer and Polarimeter (UVSP) catalog of observations. Volume 3: Experiments 63058-99771 (February 1988 - November 1989)
[NASA-CR-4529] p 844 N94-13146
Determining the solar-flare photospheric scale height from SMM gamma-ray measurements
[NASA-CR-194084] p 844 N94-13671

SOLAR NEUTRINOS
Present status of SAGE
[DE93-014350] p 781 N94-13205

SOLAR NEUTRONS
Cosmic and solar gamma ray and neutron experiments
[NASA-CR-193359] p 849 N94-13965

SOLAR OSCILLATIONS
Interactions among convection, magnetic fields and p-mode oscillations in the sun
[NASA-CR-194477] p 845 N94-14479

SOLAR PHYSICS
Present status of SAGE
[DE93-014350] p 781 N94-13205
Basic research in solar physics
[NASA-CR-193632] p 844 N94-13234
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for March, February 1993, and late data
[PB93-198323] p 845 N94-14560
Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992 and miscellaneous
[PB93-198331] p 845 N94-14561

SOLAR POWER SATELLITES
Large space structures and systems in the space station era: A bibliography with indexes (supplement 05)
[NASA-SP-7085(05)] p 543 N94-14411

SOLAR RADIATION
Photocatalysis for the treatment of waste water: Applications involving the removal of metals
[DE93-011669] p 561 N94-12841
Basic research in solar physics
[NASA-CR-193632] p 844 N94-13234
Net radiation mapping of mountainous terrain using Landsat-5 thematic mapper imagery and digital terrain data
[ISBN-0-315-57755-X] p 685 N94-13475
Nimbus-7 Earth radiation budget calibration history. Part 1: The solar channels
[NASA-RP-1316] p 844 N94-13963
Photovoltaic advanced research and development project: Solar radiation research
[DE92-016430] p 704 N94-14350
NREL solar radiation resource assessment project: Status and outlook
[DE93-010034] p 704 N94-14422
Vacuum ultraviolet instrumentation for solar irradiance and thermospheric airglow
[NASA-CR-194525] p 652 N94-14684

SOLAR RADIO BURSTS
Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992 and miscellaneous
[PB93-198331] p 845 N94-14561

SOLAR RADIO EMISSION
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for March, February 1993, and late data
[PB93-198323] p 845 N94-14560

SOLAR REFLECTORS
Continuous roll-to-roll a-Si photovoltaic manufacturing technology
[DE93-010006] p 704 N94-14109

SOLAR SIMULATORS
The Large Area Pulsed Solar Simulator (LAPSS)
[NASA-CR-194507] p 703 N94-13940

SOLAR SPECTRA
The infrared solar spectrum
[COMMUNICATIONS-SER-B-159] p 844 N94-13502
Vacuum ultraviolet instrumentation for solar irradiance and thermospheric airglow
[NASA-CR-194525] p 652 N94-14684

SOLAR SYSTEM
Discovery management workshop
[NASA-TM-108244] p 531 N94-14080
The problem of traveling in outer space: The rocket motor
[NASA-TT-10002] p 552 N94-14463

SOLAR TERRESTRIAL INTERACTIONS
The interplanetary origins and the main-phase development of moderate geomagnetic storms (1978 - 1979)
[INPE-5445-TDI/491] p 835 N94-13174
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for March, February 1993, and late data
[PB93-198323] p 845 N94-14560

SOLAR WIND
ICE/ISEE plasma wave data analysis
[NASA-CR-194375] p 796 N94-13081
The interplanetary origins and the main-phase development of moderate geomagnetic storms (1978 - 1979)
[INPE-5445-TDI/491] p 835 N94-13174
Basic research in solar physics
[NASA-CR-193632] p 844 N94-13234
Evolution of the interplanetary magnetic field
[DE93-012631] p 836 N94-13262

SOLAR X-RAYS
Measurements of the spatial structure and directivity of 100 KeV photon sources in solar flares using PVO and ISEE-3 spacecraft
[NASA-CR-194080] p 845 N94-14492
Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992 and miscellaneous
[PB93-198331] p 845 N94-14561

SOLDERED JOINTS
Microstructural influences on the mechanical properties of solder
[DE93-015044] p 573 N94-14474

SOLDERING
Solderability of surface mount devices
[AD-A265751] p 620 N94-13040

SOLID ELECTROLYTES
Study of multicomponent diffusion and transport phenomena
[DE93-015095] p 804 N94-13005
Electrocatalysis issues in polymer electrolyte fuel cells
[DE93-014450] p 702 N94-13402
Combustion synthesis and engineering of nanoparticles for electronic, structural, and superconductor applications
[DE93-016286] p 809 N94-13981
Status of SOFC development in USA
[DE93-015568] p 704 N94-14355

SOLID LUBRICANTS
Dry film lubricant evaluation
[DE93-013114] p 578 N94-13118
Applications of surface science to solid lubricants
[SMC-TR-93-24] p 579 N94-13903

SOLID MECHANICS
Thermal gradient-induced deflection of a thick-walled cylinder with bending residual stresses
[AD-A266347] p 673 N94-13777
Variational approach to probabilistic finite elements
[NASA-CR-187179] p 674 N94-13873
Elastic-plastic mixed-iterative finite element analysis: Implementation and performance assessment
[NASA-TM-106164] p 675 N94-13919
JPRS report: Science and technology. Central Eurasia: Engineering and equipment
[JPRS-UEQ-93-006] p 776 N94-14431

SOLID PHASES
Crystallographic phase identification in the scanning electron microscope: Backscattered electron Kikuchi patterns
[DE93-011574] p 804 N94-12813
Multiphase equation of state for iron
[DE93-013956] p 568 N94-12977
Automated crack identification for cement paste
[AD-A265753] p 665 N94-13042
Thermodiffusion in heterogeneous elastic solids and homogenization
[REPT-14/1993] p 578 N94-13468

SOLID PROPELLANT COMBUSTION
Combustion-induced crack/debond propagation in solid propellants p 584 N94-13560
Numerical simulation of velocity-coupled combustion response of solid rocket propellants p 585 N94-14490

SOLID PROPELLANT ROCKET ENGINES
Combustion-induced crack/debond propagation in solid propellants p 584 N94-13560
Test/analysis correlation and model updating of the STARS 1 and 2 missile systems
[DE93-013774] p 748 N94-13578
Numerical simulation of velocity-coupled combustion response of solid rocket propellants p 585 N94-14490
Qualification test of the Ross Double Planetary Mixer
[NASA-CR-192600] p 652 N94-14497
Technical Evaluation Motor No. 10 (TEM-10)
[NASA-CR-193846] p 554 N94-14907

SOLID PROPELLANTS
Flamespreading in granular solid propellant: Design of an experiment
[AD-A266009] p 583 N94-12987
Closed-chamber analysis of M5 propellant lot RAD-64597
[AD-A266321] p 585 N94-14145

SOLID ROCKET PROPELLANTS
Numerical simulation of velocity-coupled combustion response of solid rocket propellants p 585 N94-14490

SOLID SOLUTIONS
Effect of microstructure on passive film formation and breakdown on Al alloys
[AD-A265339] p 569 N94-13050
First-principles studies of phase stability and the structural and dynamical properties of hydrogen-metal systems
[DE93-016129] p 570 N94-13374
Ionic conductivity of alkali halides and their mixtures near liquid-solid phase transition
[ITN-93-85222] p 566 N94-14558
Statics and kinetics of phase transformations in bcc Fe-Cr
[DE93-013839] p 574 N94-14793

SOLID STATE
Characterization of 1:1 random copolymers obtained from 6-, 7-, 11-, and 12-carbon amino acids
[AD-A265827] p 577 N94-12985
Theory of the electronic and structural properties of solid state oxides
[DE93-016051] p 811 N94-14296

SOLID STATE DEVICES
Metal-semiconductor, composite radiation detectors
[DE93-013313] p 619 N94-12994

SOLID STATE LASERS
Novel Co:MgF2 lidar for aerosol profiler
[NASA-CR-191525] p 654 N94-13091
Solid state laser systems for space application
[NASA-CR-194133] p 656 N94-13420
Design and performance of the terawatt Cr:LiSrAlF6 laser system
[DE93-014678] p 657 N94-13882
Impact of shorter wavelengths on optical quality for laws
[NASA-CR-193433] p 792 N94-14473
Independent adjustment of the higher order frequency dependent phase in chirped pulse amplification systems
[DE93-017106] p 625 N94-14522

SOLID STATE PHYSICS
Activities of Institute for Microstructural Sciences
[NRC-32815] p 810 N94-14198

Activities of Institute for Microstructural Sciences
[CNR-32815] p 810 N94-14199

SOLID SURFACES
Low energy neutral atom imaging techniques
[DE93-012744] p 779 N94-12950
Thermodynamic status of static and dynamic contact angles
[ISBN-0-315-73844-8] p 817 N94-13554
Construction and test of a facility for photon-stimulated field description using excimer laser and time of flight
[ETN-93-94386] p 657 N94-13996
Quantum state resolved desorption of CO from solid surfaces
[DE93-016876] p 814 N94-14597

SOLID WASTES
Integrated, flexible, and rapid geophysical surveying
[DE93-009989] p 712 N94-12906
Vendor information system for innovative treatment technologies. User manual (VISITT version 2.0). Number 2
[PB93-196640] p 821 N94-12936
Environmental awareness
[DE93-014192] p 707 N94-13218

SOLID-SOLID INTERFACES
Surfaces and interfaces of ceramics and metals
[DE93-014959] p 578 N94-13408

SOLIDIFICATION
Thermosolutal convection and macrosegregation in dendritic alloys
[NASA-CR-194039] p 567 N94-12825
Formation of deoxidization products in iron ingot by the addition of Al, Si, and/or Mn (M-5) p 587 N94-13737
Diffusion in liquid state and solidification of binary system (M-7) p 587 N94-13739
Study on solidification of immisible alloys (M-10) p 588 N94-13742
Study on the mechanism of liquid phase sintering (M-12) p 588 N94-13744
Solidification of eutectic system alloys in space (M-19) p 589 N94-13751
Crystal growth of compound semiconductors in a low-gravity environment (InGaAs crystals) (M-22) p 590 N94-13754
Containerless processing of undercooled melts
[NASA-CR-194350] p 572 N94-14123
Measurements of crystal growth kinetics at extreme deviations from equilibrium
[DE93-014526] p 815 N94-14798

SOLIDS
Micromechanical strength effects in shock compression of solids
[DE93-014425] p 670 N94-12887

SOLITARY WAVES
Solitons and 1/f noise in molecular chains
[DE93-622898] p 778 N94-12879
Soliton equations and self-dual gauge fields
[DE93-626620] p 818 N94-14887

SOLUBILITY
Breadboard activities for advanced protein crystal growth
[NASA-CR-193559] p 803 N94-12796
Miscibility of lubricants with refrigerants, phase 1
[DE93-014766-PHASE-1] p 596 N94-13407
Destruction of waste energetic materials using base hydrolysis
[DE93-012738] p 584 N94-13491
Study on solidification of immisible alloys (M-10) p 588 N94-13742
The Lindemann criterion of melting for pure and mixed ionic crystals
[ITN-93-85210] p 814 N94-14554

SOLUTES
The importance of hard core repulsion in models of activity coefficients in aqueous electrolyte solutions: Illustration in the case of hydration theory
[DE93-012476] p 561 N94-12881
Linear and nonlinear spectroscopic probing of solute interactions with chemically modified silica surface
[DE93-014648] p 562 N94-13001
Direct probing of chromatography columns by laser-induced fluorescence
[DE93-015208] p 654 N94-13022
Pore-size-distribution of cationic polyacrylamide hydrogels
[DE93-015218] p 581 N94-14400
Reactor studies of metal ions associated with chromatographic silica
[AD-A266675] p 573 N94-14779
Measurements of crystal growth kinetics at extreme deviations from equilibrium
[DE93-014526] p 815 N94-14798

SOLUTIONS
Solution chemistry optimization of sol-gel processed PZT thin films
[DE93-013776] p 814 N94-14695

SOLVATION
Ultrafast photoinduced electron transfer reactions in supramolecular arrays: Studies of electronic coupling and solvation
[DE93-012910] p 782 N94-13484

SOLVENT EXTRACTION
Synthesis of organic ligands for f-element separations
[DE93-012915] p 554 N94-14290
Theory, modeling, and simulation
[DE93-015607] p 755 N94-14571

SOLVENTS
Molecular solvent-dynamical effects on activated electron-transfer kinetics: How important is solvent friction?
[AD-A265886] p 779 N94-12894
Experimental and theoretical study of inhomogeneous electron transfer in betaine: Comparisons of measured and predicted spectral dynamics
[AD-A265703] p 780 N94-13051
Computer simulations for the adsorption of polymers onto surfaces
[DE93-016667] p 577 N94-13070
Synthesis and properties of novel cluster phases
[DE93-017056] p 577 N94-13072
Destruction of waste energetic materials using base hydrolysis
[DE93-012738] p 584 N94-13491
Synthesis of organic ligands for f-element separations
[DE93-012915] p 554 N94-14290
Workshop on Formation of Supermolecular Structures in Composite Fluid: Phase Rule and Dynamics
[DE93-782887] p 581 N94-14421
Solution chemistry optimization of sol-gel processed PZT thin films
[DE93-013776] p 814 N94-14695

SONIC BOOMS
The problem of the sonic boom for future high-speed transport aircraft
[ESA-TT-1286] p 776 N94-13692

SOOT
Dust production in the envelopes of carbon stars: R Coronae Borealis
[ETN-93-94389] p 839 N94-14075

SORPTION
Ocean uptake of carbon dioxide
[DE93-012967] p 707 N94-13384
Portable acoustic wave sensor systems for real-time monitoring of volatile organic compounds
[DE93-013753] p 582 N94-14511

SOUND FIELDS
Underwater hearing: A review
[ISVR-TR-212] p 777 N94-14130

SOUND PRESSURE
Active control of acoustic pressure fields using smart material technologies
[NASA-CR-191480] p 768 N94-13354
Study on the possibilities to apply spectrumindex
[VTT-PUBS-109] p 777 N94-14034

SOUND PROPAGATION
The problem of the sonic boom for future high-speed transport aircraft
[ESA-TT-1286] p 776 N94-13692

SOUND WAVES
Ocean acoustic processing: A model-based approach
[DE93-011902] p 725 N94-12876
Study of bubbie behavior in weightlessness (effects of thermal gradient and acoustic stationary wave) (M-16) p 589 N94-13748
Liquid metal drop ejection
[NASA-CR-193718] p 572 N94-14133
Portable acoustic wave sensor systems for real-time monitoring of volatile organic compounds
[DE93-013753] p 582 N94-14511
Atmospheric acoustic modeling
[DE93-016727] p 718 N94-14518
Investigation of the dilatational dissipation in compressible homogeneous shear flow p 645 N94-14758

SOURCE PROGRAMS
ASPT software source code: SUN driver package
[DSIS-93-00262] p 751 N94-14014
ASPT software source code: Development system package, VME-C30 component
[DSIS-93-00276] p 751 N94-14016
ASPT software source code: Host development system package
[DSIS-93-00277] p 753 N94-14197

SOUTH AMERICA
Cyclogenesis and cyclone over South America
[INPE-5400-TDI/479] p 719 N94-13175

SOUTH CAROLINA
Workshop for coordinating South Carolina's pre-college systemic initiatives in science and mathematics
[DE93-012263] p 818 N94-13216

SPACE BASED RADAR
Ionospheric effects on a wide-bandwidth, polarimetric, space-based, synthetic-aperture radar
[DE93-015084] p 612 N94-14512

SPACE CHARGE
Beam halo formation from space-charge dominated beams in uniform focusing channels
[DE93-014458] p 789 N94-13209
Beam halo in high-intensity beams
[DE93-014565] p 789 N94-13328
Wake-field and space charge effects on high brightness beams calculations and measured results for the laser driven photoelectrons at BNL-ATF
[DE93-015787] p 659 N94-14572

SPACE COMMERCIALIZATION
Technology Applications Team: Applications of aerospace technology
[NASA-CR-194362] p 828 N94-13104
Large space structures and systems in the space station era: A bibliography with indexes (supplement 05)
[NASA-SP-7085(05)] p 543 N94-14411

SPACE COMMUNICATION
Environmental projects. Volume 15: Environmental assessment: Proposed 1-megawatt radar transmitter at the Mars site
[NASA-CR-194098] p 598 N94-13090
A millimeter-wave tunneladder TWT
[NASA-CR-182183] p 620 N94-13106
The Telecommunications and Data Acquisition Report
[NASA-CR-194388] p 607 N94-14369
Layout and cabling considerations for a large communications antenna array p 611 N94-14395
ACTS propagation experiment discussion: Ka-band propagation measurements using the ACTS propagation terminal and the CSU-CHILL and Space Communications Technology Center Florida propagation program p 616 N94-14678

SPACE COOLING (BUILDINGS)
Transition of building energy consumption using multi-input, single-output dynamic model
[VTT-PUBS-116] p 597 N94-14055

SPACE DEBRIS
Procedures for analysis of debris relative to Space Shuttle systems
[NASA-TM-109190] p 534 N94-12900
Experimental technique to simulate orbital-debris impact on space shields at impact velocities over 10 km/s
[DE93-011619] p 539 N94-12909
Comparison of analytic Whipple bumper shield ballistic limits with CTH simulations
[DE93-015126] p 539 N94-13006
Simulation of orbital debris impacts on bumper shields
[DE93-013773] p 540 N94-13398
High velocity gas gun
[NASA-TM-109296] p 541 N94-13637
Interactions between spacecraft and their environments
[NASA-TM-106115] p 541 N94-13917
BALLIST: A computer program to empirically predict the bumper thickness required to prevent perforation of the Space Station by orbital debris
[NASA-CR-193825] p 543 N94-14120
Secondary impact hazard assessment
[NASA-CR-188261] p 543 N94-14483

SPACE ENVIRONMENT SIMULATION
Novel oxygen atom source for material degradation studies
[NASA-CR-191323] p 562 N94-13115
Laboratory simulation of spacecraft charging in the plasma wake region
[FFI-93-7007] p 542 N94-14107
Atomic research
[NASA-CR-193843] p 788 N94-14905

SPACE ERECTABLE STRUCTURES
The Second Workshop on Deployment and Assembly Experiment of Large Space Structure on Orbit
[NASDA-CON-930003] p 529 N94-13268
Structural design of hexa-link truss deployable antenna p 529 N94-13269
Thermal distortion measurement of TETRUS type thermal test model of large deployable antenna for mobile communications satellite p 529 N94-13270
Development of modular cable mesh deployable antenna p 530 N94-13274
Research on inflatable structure for space use p 530 N94-13275
Helical truss beam development for large space structure p 530 N94-13276
Trial manufacture model and in-space verification method of deployable antenna p 530 N94-13278
A concept on on-orbit experiments of deployable structures utilizing JEM/HOPE p 531 N94-13279
Movement of deployable truss p 531 N94-13280
Development and application of one dimensional deployable truss p 531 N94-13281

Study of a one-dimensional deployable structure employing telescopic members p 531 N94-13282
The study on large space structure assembly technology: The study on deployable truss structure, part 1
[NASDA-TMR-930002] p 541 N94-13658
The study on large space structure assembly technology: The study on deployable truss structure, part 2 and 3
[NASDA-TMR-930003-PT-2-3] p 541 N94-13659

SPACE EXPLORATION
Where no flag has gone before: Political and technical aspects of placing a flag on the Moon
[NASA-CR-188251] p 827 N94-12800
Effects of radiobiological uncertainty on vehicle and habitat shield design for missions to the moon and Mars
[NASA-TP-3312] p 846 N94-12875
MARS Mission research center
[NASA-CR-194034] p 841 N94-13088
A modular gas-cooled cermet reactor system for planetary base power
[DE93-013672] p 550 N94-13351
NASA images 11
[NASA-TM-109287] p 842 N94-13626
Discovery management workshop
[NASA-TM-108244] p 531 N94-14080
Asia-Pacific ISY conference, volume 1
[NASDA-CM-199-1] p 532 N94-14098
Space transportation systems and space activities in the 21st century p 537 N94-14274

SPACE FLIGHT
Countermeasure for reducing post-flight orthostatic intolerance: Lower Body Negative Pressure (LBNP) experiment E140 p 594 N94-13772
Psychophysiological investigations of the biomedical problems of manned spaceflight
[NASA-CR-194107] p 732 N94-13782
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples, volume 1
[NASA-CR-194498] p 542 N94-14076
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples. Volume 2: Software documentation
[NASA-CR-194499] p 542 N94-14077
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples. Volume 3: Structure and listing of programs
[NASA-CR-194500] p 542 N94-14078
Laboratory simulation of spacecraft charging in the plasma wake region
[FFI-93-7007] p 542 N94-14107

SPACE FLIGHT STRESS
Selection of behavioral tasks and development of software for evaluation of rhesus monkey behavior during spaceflight
[NASA-CR-194176] p 728 N94-13865

SPACE HABITATS
Effects of radiobiological uncertainty on vehicle and habitat shield design for missions to the moon and Mars
[NASA-TP-3312] p 846 N94-12875
Life support and habitability manual, volume 1
[ESA-PSS-03-406-ISSUE-1-VOL] p 737 N94-13901
Life support and habitability manual, volume 2
[ESA-PSS-03-406-ISSUE-1-VOL] p 738 N94-13902

SPACE HEATING (BUILDINGS)
Transition of building energy consumption using multi-input, single-output dynamic model
[VTT-PUBS-116] p 597 N94-14055

SPACE INFRARED TELESCOPE FACILITY
The four great observatories
[NASA-TM-109311] p 830 N94-13605

SPACE LABORATORIES
Present status of JEM utilization projects p 530 N94-13273
Study on improvement of flammability, odor and offgassing tests for materials
[NASDA-CNT-930009] p 563 N94-13471

SPACE LAW
Where no flag has gone before: Political and technical aspects of placing a flag on the Moon
[NASA-CR-188251] p 827 N94-12800

SPACE MANUFACTURING
The studies on lunar and planetary exploration and utilization: The study on lunar resources utilization
[NASDA-CNT-930014] p 842 N94-13655
Asia-Pacific ISY conference, volume 1
[NASDA-CM-199-1] p 532 N94-14098
China's devotion to space science and applications p 532 N94-14273

SPACE MISSIONS
Present status of JEM utilization projects p 530 N94-13273
Gas core nuclear thermal rocket engine research and development in the former USSR
[DE93-012165] p 552 N94-14013
Asia-Pacific ISY conference, volume 1
[NASDA-CM-199-1] p 532 N94-14098
Design and application of electromechanical actuators for deep space missions
[NASA-CR-194145] p 663 N94-14134
China's devotion to space science and applications p 532 N94-14273
Space transportation systems and space activities in the 21st century p 537 N94-14274

SPACE NAVIGATION
Proceedings of the 11th Space Surveillance Workshop, volume 1
[AD-A265120] p 531 N94-13358
The development and flight test of a deployable precision landing system for spacecraft recovery
[NASA-TM-4525] p 537 N94-14853

SPACE OBSERVATIONS (FROM EARTH)
Optical propagation through atmospheric turbulence. Model analysis of anisoplanatism and application to adaptive optics
[ONERA-P-1992-4] p 716 N94-14192

SPACE PLASMAS
The International Colloquium on Atomic Spectra and Oscillator Strengths for Astrophysical and Laboratory Plasmas
[NASA-TM-109255] p 849 N94-13376
The propagation characteristics and instability properties of low-frequency electromagnetic waves in the Io plasma torus p 601 N94-13650
The role of ionospheric plasma in the magnetosphere
[NASA-CR-194404] p 716 N94-13967
Terrestrial magnetospheric imaging: Numerical modeling of low energy neutral atoms
[DE93-014561] p 717 N94-14328

SPACE POWER REACTORS
A modular gas-cooled cermet reactor system for planetary base power
[DE93-013672] p 550 N94-13351
Preliminary nuclear safety assessment of the NEPST (Topaz 2) space reactor program
[DE93-012853] p 551 N94-13514
Space reactor fuel element testing in upgraded TREAT
[DE93-012524] p 554 N94-14806

SPACE PROBES
Real-time dynamics simulation of the Cassini spacecraft using DARTS. Part 1: Functional capabilities and the spatial algebra algorithm p 680 N94-14638

SPACE PROCESSING
Reduce fluid experiment system flight data from IML-1
[NASA-CR-193835] p 804 N94-12873
Marangoni effect induced convection in material processing under microgravity (M-18) p 589 N94-13750
Solidification of eutectic system alloys in space (M-19) p 589 N94-13751
Growth of samarskite crystal under microgravity conditions (M-20) p 590 N94-13752
Growth experiment of organic metal crystal in low gravity (M-21) p 590 N94-13753
Containerless processing of undercooled melts
[NASA-CR-194350] p 572 N94-14123
Two color holographic interferometry for microgravity application
[NASA-CR-194424] p 651 N94-14447

SPACE PROGRAMS
Asia-Pacific ISY conference, volume 1
[NASDA-CM-199-1] p 532 N94-14098
My experiences in manned space flight p 698 N94-14276

SPACE SHUTTLE ASCENT STAGE
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot transonic wind tunnel, volume 2
[NASA-CR-185697] p 534 N94-12965
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot Transonic wind tunnel (IA613A), volume 1
[NASA-CR-185696] p 534 N94-13191

SPACE SHUTTLE MAIN ENGINE
STS-55 pad abort: Engine 2011 oxidizer preburner augmented spark igniter check valve leak
[NASA-CR-193830] p 533 N94-12806
SSME testing at Stennis Space Center
[NASA-TM-109310] p 552 N94-13617
Identification and interpretation of patterns in rocket engine data
[NASA-CR-194534] p 552 N94-14309
An integrated knowledge system for the Space Shuttle hazardous gas detection system
[NASA-CR-194533] p 536 N94-14310
Investigation of the feasibility of optical diagnostic measurements at the exit of the SSME
[NASA-CR-193832] p 553 N94-14682
Simulation of preburner sprays, volume 1
[NASA-CR-193844] p 647 N94-14906

SPACE SHUTTLE MISSION 61-A
STS-30 Magellan IUS/EVA training in WETF
[NASA-TM-109300] p 737 N94-13601
STS-29 post-insertion/deorbit prep and crew bailout
[NASA-TM-109299] p 535 N94-13641

SPACE SHUTTLE MISSIONS
STS-55 pad abort: Engine 2011 oxidizer preburner augmented spark igniter check valve leak
[NASA-CR-193830] p 533 N94-12806
STS-32 mission highlights resource tape
[NASA-TM-109291] p 531 N94-13631
Launch, entry, and landing resource clip
[NASA-TM-109297] p 535 N94-13638

SPACE SHUTTLE ORBITERS
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot transonic wind tunnel, volume 2
[NASA-CR-185697] p 534 N94-12965
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot Transonic wind tunnel (IA613A), volume 1
[NASA-CR-185696] p 534 N94-13191
Analysis of differences between seating positions in simulators and orbiters
[NASA-TM-104776] p 737 N94-13399
Six degree of freedom
[NASA-TM-109295] p 749 N94-13636
Microgravity acceleration measurement environment characterization p 590 N94-13755
Strategic avionics technology definition studies. Subtask 3-1A: Electrical Actuation (ELA) systems
[NASA-CR-194393] p 536 N94-14323

SPACE SHUTTLE PAYLOADS
STS-30 Magellan IUS/EVA training in WETF
[NASA-TM-109300] p 737 N94-13601
Mid-deck experiments, STS-26
[NASA-TM-109308] p 570 N94-13616

SPACE SHUTTLES
Results of experimental investigations to determine external tank protuberance loads using a 0.03-scale model of the Space Shuttle launch configuration (model 47-OTS) in the NASA/ARC unitary plan wind tunnel, volume 1
[NASA-CR-167690] p 534 N94-12810
Procedures for analysis of debris relative to Space Shuttle systems
[NASA-TM-109190] p 534 N94-12900
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot Transonic wind tunnel (IA613A), volume 1
[NASA-CR-185696] p 534 N94-13191
Analysis of differences between seating positions in simulators and orbiters
[NASA-TM-104776] p 737 N94-13399
STS-53 Space Shuttle mission report
[NASA-CR-193101] p 535 N94-13934
STS-54 Space Shuttle mission report
[NASA-CR-194116] p 535 N94-13935
Results of experimental investigations to determine external tank protuberance loads using a 0.03-scale model of the Space Shuttle launch configuration (Model 47-OTS) in the NASA/ARC unitary plan wind tunnel, volume 2
[NASA-CR-167691] p 536 N94-14047
STS-33 launch and landing clip
[NASA-TM-109468] p 536 N94-14734

SPACE STATION FREEDOM
Solar dynamic power system development for Space Station Freedom
[NASA-RP-1310] p 548 N94-12807
Advancing automation and robotics technology for the Space Station Freedom and for the U.S. economy
[NASA-TM-104024] p 739 N94-12838
System identification for Space Station Freedom using observer/Kalman filter Markov parameters
[NASA-CR-191521] p 539 N94-12976
In-flight demonstration of the Space Station Freedom Health Maintenance Facility fluid therapy system (E300/E05) p 595 N94-13775
Space Station Common Berthing Mechanism, a multi-body simulation application p 544 N94-14640
Plasma contactor technology for Space Station Freedom
[NASA-TM-106291] p 553 N94-14725

SPACE STATION STRUCTURES
Secondary impact hazard assessment
[NASA-CR-188261] p 543 N94-14483

SPACE STATIONS
Transmission zeros of spacecraft attitude control system
[NAL-TR-1166] p 540 N94-13339
Asia-Pacific ISY conference, volume 1
[NASDA-CM-199-1] p 532 N94-14098

BALLIST: A computer program to empirically predict the bumper thickness required to prevent perforation of the Space Station by orbital debris
[NASA-CR-193825] p 543 N94-14120
Large space structures and systems in the space station era: A bibliography with indexes (supplement 05)
[NASA-SP-7085(05)] p 543 N94-14411
Computational Controls Workstation: Algorithms and hardware p 678 N94-14626

SPACE TECHNOLOGY EXPERIMENTS
Present status of JEM utilization projects p 530 N94-13273
Trial manufacture model and in-space verification method of deployable antenna p 530 N94-13278
Study on superconducting basic technology for space application, part 1
[NASDA-CNT-930015-PT-1] p 622 N94-13425

SPACE TRANSPORTATION
Space transportation systems within ESA programmes: Current status and perspectives p 537 N94-14275

SPACE TRANSPORTATION SYSTEM
STS-55 pad abort: Engine 2011 oxidizer preburner augmented spark igniter check valve leak
[NASA-CR-193830] p 533 N94-12806
STS-32 post-flight press conference
[NASA-TM-109294] p 541 N94-13634
Asia-Pacific ISY Conference, volume 2
[NASDA-CM-199-VOL-2] p 688 N94-14209
Space transportation systems and space activities in the 21st century p 537 N94-14274
Research and development of space transportation systems in ISAS p 537 N94-14277
Contributions of winged re-entry vehicle to space activities p 537 N94-14278
Mission scenario of HOPE p 537 N94-14279
The status of the HOPE concept study p 537 N94-14280
Spaceplane program at NAL: System concept and related technology issues p 537 N94-14281
STS-33 launch and landing clip
[NASA-TM-109468] p 536 N94-14734
STS-35 post-flight press conference
[NASA-TM-109490] p 537 N94-14736
STS-35 integrated sim in SMS and MOCR
[NASA-TM-109491] p 533 N94-14787

SPACE TRANSPORTATION SYSTEM FLIGHTS
STS-32 mission highlights resource tape
[NASA-TM-109291] p 531 N94-13631
STS-32 post-flight press conference
[NASA-TM-109294] p 541 N94-13634
STS-28 crew presentation clip
[NASA-TM-109298] p 531 N94-13640
STS-53 Space Shuttle mission report
[NASA-CR-193101] p 535 N94-13934
STS-54 Space Shuttle mission report
[NASA-CR-194116] p 535 N94-13935
STS-35 post-flight press conference
[NASA-TM-109490] p 537 N94-14736
STS-35 integrated sim in SMS and MOCR
[NASA-TM-109491] p 533 N94-14787

SPACE-TIME FUNCTIONS
Aspects of symmetry violation
[DE93-011003] p 779 N94-12997
The space-time and energy parameters of deuterium braking by the central collision with atoms
[DE93-624144] p 788 N94-14881

SPACEBORNE ASTRONOMY
Planetary system detection by POINTS
[NASA-CR-194361] p 545 N94-13067
Measurements of the spatial structure and directivity of 100 KeV photon sources in solar flares using PVO and ISEE-3 spacecraft
[NASA-CR-194080] p 845 N94-14492
Analysis of the IUE spectra of the strongly interacting binary beta Lyrae
[NASA-CR-194118] p 833 N94-14493

SPACEBORNE EXPERIMENTS
Reduce fluid experiment system flight data from IML-1
[NASA-CR-193835] p 804 N94-12873
Present status of JEM utilization projects p 530 N94-13273
Trial manufacture model and in-space verification method of deployable antenna p 530 N94-13278
A concept on on-orbit experiments of deployable structures utilizing JEM/HOPE p 531 N94-13279
Study on superconducting basic technology for space application, part 1
[NASDA-CNT-930015-PT-1] p 622 N94-13425
Mid-deck experiments, STS-26
[NASA-TM-109308] p 570 N94-13616
Preparation of particle-dispersion alloys (M-6) p 587 N94-13738
Study on solidification of immisible alloys (M-10) p 588 N94-13742
Microgravity acceleration measurement environment characterization p 590 N94-13755
Neurophysiological study on visuo-vestibular control of posture and movement in fish during adaptation to weightlessness p 591 N94-13759
Crystal growth of enzymes in low gravity (L-5) p 592 N94-13762
Studies on the effects of microgravity on the ultrastructure and functions of cultured mammalian cells (L-6) p 592 N94-13763
Effect of low gravity on calcium metabolism and bone formation (L-7) p 593 N94-13765
A circadian rhythm of conidiation in Neurospora crassa (L-12) p 593 N94-13769
Partial analysis of LDEF experiment A-0114
[NASA-CR-193826] p 564 N94-14025
Ethology in space, a unique opportunity for behavioural science
[ESA-STM-246] p 731 N94-14862

SPACEBORNE TELESCOPES
The four great observatories
[NASA-TM-109311] p 830 N94-13605
An overview of the Galileo Optical Experiment (GOPEX) p 610 N94-14386
Galileo Optical Experiment (GOPEX) optical train: Design and validation at the Table Mountain Facility p 610 N94-14390
Fabrication p 546 N94-14834
Laser power beaming system analyses
[NASA-CR-193840] p 660 N94-14904

SPACECRAFT ANTENNAS
Layout and cabling considerations for a large communications antenna array p 611 N94-14395

SPACECRAFT CHARGING
Interactions between spacecraft and their environments
[NASA-TM-106115] p 541 N94-13917
Laboratory simulation of spacecraft charging in the plasma wake region
[FFI-93-7007] p 542 N94-14107

SPACECRAFT COMMUNICATION
Sensor operation of Advanced Earth Observing Satellite (ADEOS) p 689 N94-14215
Transform coding for space applications
[NASA-TM-106362] p 612 N94-14542

SPACECRAFT COMPONENTS
The Second Workshop on Deployment and Assembly Experiment of Large Space Structure on Orbit
[NASDA-CON-930003] p 529 N94-13268
Research on inflatable structure for space use p 530 N94-13275
Helical truss beam development for large space structure p 530 N94-13276
Application of intelligently adaptable structure and robot to large space structure p 530 N94-13277
Trial manufacture model and in-space verification method of deployable antenna p 530 N94-13278
A concept on on-orbit experiments of deployable structures utilizing JEM/HOPE p 531 N94-13279
Movement of deployable truss p 531 N94-13280
Development and application of one dimensional deployable truss p 531 N94-13281
Study of a one-dimensional deployable structure employing telescopic members p 531 N94-13282
Study on improvement of flammability, odor and offgassing tests for materials
[NASDA-CNT-930009] p 563 N94-13471
The study on large space structure assembly technology: The study on deployable truss structure, part 1
[NASDA-TMR-930002] p 541 N94-13658
The study on large space structure assembly technology: The study on deployable truss structure, part 2 and 3
[NASDA-TMR-930003-PT-2-3] p 541 N94-13659
The study on test of docking mechanism system, part 1 and 2
[NASDA-TMR-930004-PT-1-2] p 541 N94-13660

SPACECRAFT CONSTRUCTION MATERIALS
The Second Workshop on Deployment and Assembly Experiment of Large Space Structure on Orbit
[NASDA-CON-930003] p 529 N94-13268
Research on radiation resistance properties of structural materials for space use p 529 N94-13271
Measuring methods for CFRP laminates' bending and torsion rigidities characteristics p 529 N94-13272
Arc-heating tests of thermal protection system materials for the H-2 rocket fairing
[NAL-TR-1181] p 551 N94-13455
Tensile properties of LE-7 engine material with welded joint
[NAL-TR-1188] p 570 N94-13460
The study on large space structure assembly technology: The study on deployable truss structure, part 1
[NASDA-TMR-930002] p 541 N94-13658
The study on large space structure assembly technology: The study on deployable truss structure, part 2 and 3
[NASDA-TMR-930003-PT-2-3] p 541 N94-13659
Materials/structures testing p 506 N94-14164

SPACECRAFT CONTAMINATION
Atomic research
[NASA-CR-193843] p 788 N94-14905

SPACECRAFT CONTROL
Low cost attitude control system reaction wheel development
[NASA-CR-191332] p 540 N94-13140
A superconducting large-angle magnetic suspension
[NASA-CR-189735] p 596 N94-13141
Application of intelligently adaptable structure and robot to large space structure p 530 N94-13277
Electrical Actuation Technology Bridging
[NASA-CP-3213] p 551 N94-13417
HOPE real time flight operations analyses for return to earth phase, part B
[NASDA-CNT-930011] p 535 N94-13599
HOPE real time flight operations analyses for return to earth phase, part A
[NASDA-CNT-930010-PT-A] p 535 N94-13645
Manual control in space research on perceptual-motor functions under zero gravity conditions (L-10) p 593 N94-13767
Mongoose ASIC microcontroller programming guide
[NASA-RP-1319] p 623 N94-13871
Strategic avionics technology definition studies. Subtask 3-1A: Electrical Actuation (ELA) systems
[NASA-CR-194393] p 536 N94-14323
Large space structures and systems in the space station era: A bibliography with indexes (supplement 05)
[NASA-SP-7085(05)] p 543 N94-14411
Real-time dynamics simulation of the Cassini spacecraft using DARTS. Part 1: Functional capabilities and the spatial algebra algorithm p 680 N94-14638
An application of the IMC software to controller design for the JPL LSCL Experiment Facility p 681 N94-14645
Control structural interaction testbed: A model for multiple flexible body verification p 544 N94-14649

SPACECRAFT DESIGN
Dynamics of adaptive structures: Design through simulations
[NASA-CR-193724] p 540 N94-13112
Spacecraft COst REduction Team (SCORE): TQM/CI on a massive scale p 667 N94-13160
Study of a one-dimensional deployable structure employing telescopic members p 531 N94-13282
HOPE conceptual design in FY 1991
[NASDA-CNT-930017] p 535 N94-13600
Exploring Mars
[NASA-TM-109306] p 842 N94-13613
Conceptual design on H-2 Orbiting Plane (HOPE)
[NASDA-CNT-930018] p 535 N94-13656
The study on large space structure assembly technology: The study on deployable truss structure, part 1
[NASDA-TMR-930002] p 541 N94-13658
The study on large space structure assembly technology: The study on deployable truss structure, part 2 and 3
[NASDA-TMR-930003-PT-2-3] p 541 N94-13659
The study on test of docking mechanism system, part 1 and 2
[NASDA-TMR-930004-PT-1-2] p 541 N94-13660
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples, volume 1
[NASA-CR-194498] p 542 N94-14076
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples. Volume 2: Software documentation
[NASA-CR-194499] p 542 N94-14077
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples. Volume 3: Structure and listing of programs
[NASA-CR-194500] p 542 N94-14078
The concept study of the space transportation system HOPE in FY 1991
[NASDA-CNT-930016] p 536 N94-14100
Research and development of space transportation systems in ISAS p 537 N94-14277
The status of the HOPE concept study p 537 N94-14280
Spaceplane program at NAL: System concept and related technology issues p 537 N94-14281
An improved approach for flight readiness certification: Probabilistic models for flaw propagation and turbine blade failure. Volume 1: Methodology and applications
[NASA-CR-194496] p 519 N94-14841
An improved approach for flight readiness certification: Probabilistic models for flaw propagation and turbine blade failure. Volume 2: Software documentation
[NASA-CR-194497] p 519 N94-14842
The development and flight test of a deployable precision landing system for spacecraft recovery
[NASA-TM-4525] p 537 N94-14853

SPACECRAFT DOCKING
Six degree of freedom
[NASA-TM-109295] p 749 N94-13636

The study on test of docking mechanism system, part 1 and 2
[NASDA-TMR-930004-PT-1-2] p 541 N94-13660
Space Station Common Berthing Mechanism, a multi-body simulation application p 544 N94-14640

SPACECRAFT ELECTRONIC EQUIPMENT
Study of the intermateability of Cannon and Souriau subminiature connectors
[CNES-NT-132] p 624 N94-13951

SPACECRAFT EQUIPMENT
An experimental study of tether reel system: A laboratory model
[NAL-TR-1176T] p 539 N94-12943
Structural design of hexa-link truss deployable antenna p 529 N94-13269
Thermal distortion measurement of TETRUS type thermal test model of large deployable antenna for mobile communications satellite p 529 N94-13270
Development of modular cable mesh deployable antenna p 530 N94-13274
Trial manufacture model and in-space verification method of deployable antenna p 530 N94-13278
Survey and study on Environmental Control and Life Support (ECLS) technologies, part 2
[NASDA-CNT-930012-PT-2] p 737 N94-13472
The study on test of docking mechanism system, part 1 and 2
[NASDA-TMR-930004-PT-1-2] p 541 N94-13660
Future TRMM follow-on mission p 691 N94-14228

SPACECRAFT GUIDANCE
HOPE real time flight operations analyses for return to earth phase, part B
[NASDA-CNT-930011] p 535 N94-13599
HOPE real time flight operations analyses for return to earth phase, part A
[NASDA-CNT-930010-PT-A] p 535 N94-13645
Guidance law development for aeroassisted transfer vehicles using matched asymptotic expansions
[NASA-CR-194523] p 508 N94-14538

SPACECRAFT INSTRUMENTS
Perspective on the National Aero-Space Plane Program instrumentation development
[NASA-TM-4505] p 516 N94-13256
Phase aligner for the Electronically Scanned Thinned Array Radiometer (ESTAR) instrument
[NASA-TM-4518] p 623 N94-13878
Development of an advanced spacecraft tandem mass spectrometer
[NASA-CR-194195] p 545 N94-13953
Future TRMM follow-on mission p 691 N94-14228

SPACECRAFT LANDING
Launch, entry, and landing resource clip
[NASA-TM-109297] p 535 N94-13638
STS-33 launch and landing clip
[NASA-TM-109468] p 536 N94-14734

SPACECRAFT LAUNCHING
Proceedings of the 11th Space Surveillance Workshop, volume 1
[AD-A265120] p 531 N94-13358
Preliminary nuclear safety assessment of the NEPST (Topaz 2) space reactor program
[DE93-012853] p 551 N94-13514
STS-32 mission highlights resource tape
[NASA-TM-109291] p 531 N94-13631
HL-20 personnel launch system
[NASA-TM-109292] p 504 N94-13632
Launch, entry, and landing resource clip
[NASA-TM-109297] p 535 N94-13638
STS-28 crew presentation clip
[NASA-TM-109298] p 531 N94-13640
STS-33 launch and landing clip
[NASA-TM-109468] p 536 N94-14734

SPACECRAFT MANEUVERS
Optimizing interplanetary trajectories with deep space maneuvers
[NASA-CR-4546] p 532 N94-14851

SPACECRAFT MODELS
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot transonic wind tunnel, volume 2
[NASA-CR-185697] p 534 N94-12965
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot Transonic wind tunnel (IA613A), volume 1
[NASA-CR-185696] p 534 N94-13191
HL-20 personnel launch system
[NASA-TM-109292] p 504 N94-13632
Failure modes of reduced-order orbit determination filters and their remedies p 532 N94-14373
Real-time dynamics simulation of the Cassini spacecraft using DARTS. Part 1: Functional capabilities and the spatial algebra algorithm p 680 N94-14638

SPACECRAFT MOTION
Sloshing dynamics on rotating helium dewar tank
[NASA-CR-194403] p 637 N94-13959

SPACECRAFT PERFORMANCE
ECS: Eighth year in orbit
[ESA-BR-82] p 543 N94-14352
The flight performance of the Galileo orbiter USO p 611 N94-14398

SPACECRAFT POWER SUPPLIES
An experimental study of tether reel system: A laboratory model
[NAL-TR-1176T] p 539 N94-12943
Spacecraft COst REduction Team (SCORE): TQM/CI on a massive scale p 667 N94-13160
A photovoltaic catenary-tent array for the Martian surface
[NASA-TM-106306] p 621 N94-13194
NASA handbook for nickel-hydrogen batteries
[NASA-RP-1314] p 550 N94-13265
Power converters for the 120 V bus supply control
[CNES-NT-134] p 622 N94-13552
Futurepath 2
[NASA-TM-109285] p 518 N94-13623
The Large Area Pulsed Solar Simulator (LAPSS)
[NASA-CR-194507] p 703 N94-13940
Large space structures and systems in the space station era: A bibliography with indexes (supplement 05)
[NASA-SP-7085(05)] p 543 N94-14411
Small scale adaptive optics experiment systems engineering
[NASA-CR-194419] p 793 N94-14548
Primary and secondary electrical space power based on advanced PEM systems
[DE93-012643] p 553 N94-14689

SPACECRAFT PROPULSION
Nuclear propulsion systems engineering
[DE93-010791] p 548 N94-12870
MCNP benchmark analyses of critical experiments for the Space Nuclear Thermal Propulsion program
[DE93-014046] p 548 N94-12981
Design, qualification and operation of nuclear rockets for safe Mars missions
[DE93-010792] p 549 N94-12996
Generation of neutronic thermal data in support of space nuclear propulsion
[DE93-013148] p 549 N94-13034
Two temperature modeling and experimental measurements of laser sustained hydrogen plasmas
[AD-A265750] p 796 N94-13039
Mirror fusion propulsion system: A performance comparison with alternate propulsion systems for the manned Mars Mission
[NASA-TM-109248] p 550 N94-13147
Electrical Actuation Technology Bridging
[NASA-CP-3213] p 551 N94-13417
Low thrust space propulsion
[NASA-TM-109286] p 552 N94-13625
The Large Area Pulsed Solar Simulator (LAPSS)
[NASA-CR-194507] p 703 N94-13940
Gas core nuclear thermal rocket engine research and development in the former USSR
[DE93-012165] p 552 N94-14013
Aeropropulsion facilities p 506 N94-14161
Large space structures and systems in the space station era: A bibliography with indexes (supplement 05)
[NASA-SP-7085(05)] p 543 N94-14411
Space reactor fuel element testing in upgraded TREAT
[DE93-012524] p 554 N94-14806

SPACECRAFT RADIATORS
An analytical investigation of transient effects on rewetting of heated thin flat plates
[NASA-TM-106120] p 628 N94-12968

SPACECRAFT RECOVERY
STS-32 mission highlights resource tape
[NASA-TM-109291] p 531 N94-13631
The development and flight test of a deployable precision landing system for spacecraft recovery
[NASA-TM-4525] p 537 N94-14853

SPACECRAFT REENTRY
HOPE real time flight operations analyses for return to earth phase, part B
[NASDA-CNT-930011] p 535 N94-13599
Launch, entry, and landing resource clip
[NASA-TM-109297] p 535 N94-13638
HOPE real time flight operations analyses for return to earth phase, part A
[NASDA-CNT-930010-PT-A] p 535 N94-13645

SPACECRAFT SHIELDING
Simulation of orbital debris impacts on bumper shields
[DE93-013773] p 540 N94-13398
High temperature electromagnetic characterization of thermal protection system tile materials
[NASA-CR-189687] p 578 N94-13431
CRRES to blaze new trails in orbit
[NASA-TM-109314] p 713 N94-13620

SPACECRAFT STRUCTURES
Experimental technique to simulate orbital-debris impact on space shields at impact velocities over 10 km/s
[DE93-011619] p 539 N94-12909
Methods for evaluating the predictive accuracy of structural dynamic models
[NASA-CR-191337] p 671 N94-13124
The Second Workshop on Deployment and Assembly Experiment of Large Space Structure on Orbit
[NASDA-CON-930003] p 529 N94-13268
Research on inflatable structure for space use p 530 N94-13275
Application of intelligently adaptable structure and robot to large space structure p 530 N94-13277
Movement of deployable truss p 531 N94-13280
Study of a one-dimensional deployable structure employing telescopic members p 531 N94-13282
The study on test of docking mechanism system, part 1 and 2
[NASDA-TMR-930004-PT-1-2] p 541 N94-13660
Characterization of composite materials for aerospace structures
[ESA-TT-1260] p 557 N94-13804
Control structural interaction testbed: A model for multiple flexible body verification p 544 N94-14649

SPACECRAFT TRACKING
Sequential ranging: How it works
[NASA-CR-194508] p 532 N94-13796
The Telecommunications and Data Acquisition Report
[NASA-CR-194388] p 607 N94-14369

SPACECREWS
STS-29 post-insertion/deorbit prep and crew bailout
[NASA-TM-109299] p 535 N94-13641
STS-35 crew trash compactor briefing
[NASA-TM-109487] p 533 N94-14735
STS-35 EVA payload training in WETF
[NASA-TM-109492] p 739 N94-14790

SPACELAB
Reduce fluid experiment system flight data from IML-1
[NASA-CR-193835] p 804 N94-12873
Spacelab J experiment descriptions
[NASA-TM-4517] p 586 N94-13732
Study on the biological effect of cosmic radiation and the development of radiation protection technology (L-11) p 593 N94-13768

SPARE PARTS
Spare parts analysis of the MK.32B-751 AAR pod
[DSIS-93-00737] p 774 N94-13549

SPARK GAPS
Evolution of high-repetition-rate induction accelerators through advancements in switching
[DE93-012599] p 654 N94-12963
Development of UHF spark-switched L-C Oscillators
[DE93-015019] p 623 N94-13892

SPATIAL DISTRIBUTION
Spatial and temporal variability of precipitation and chemistry: Case studies from the frontal boundary study
[DE93-007883] p 708 N94-13910
Chemistry and transport in a multi-dimensional model
[NASA-CR-194425] p 716 N94-13969
Potential evapotranspiration in Belgium: Spatial and temporal variability
[PUBL-SER-A-130] p 686 N94-13994
The role of the dynamics for the deviation of the total ozone from the long-term mean at the edge of the polar vortex p 694 N94-14250
The European Arctic ozone experiment: An investigation of Northern Hemisphere ozone depletion p 694 N94-14251
Space-based activities: SAM 2 and SAGE 2 p 694 N94-14252
New evidences supported the Wei hypothesis about the formation of the Antarctic ozone hole p 694 N94-14253
Measurements of the spatial structure and directivity of 100 KeV photon sources in solar flares using PVO and ISEE-3 spacecraft
[NASA-CR-194080] p 845 N94-14492
Quantitative luminescence imaging system
[DE93-015691] p 793 N94-14702

SPATIAL FILTERING
Estimation of the vortex length scale and intensity from two-dimensional samples p 645 N94-14756
Optimization of a subband coding for high definition television with motion controlled three dimensional frequency band decomposition
[ETN-93-94396] p 617 N94-14817

SPATIAL RESOLUTION
Confocal profilometer with nanometric vertical resolution
[DE93-622698] p 653 N94-12857
High spatial resolution x ray microanalysis: Comparison of experiment and incoherent scattering calculations
[DE93-011685] p 648 N94-13044

Optical propagation through atmospheric turbulence. Model analysis of anisoplanatism and application to adaptive optics
[ONERA-P-1992-4] p 716 N94-14192
Imaging Fourier transform spectrometer
[DE93-017193] p 651 N94-14416

SPECIFIC HEAT
Gas atomized Er3Ni powder for cryocooler applications
[DE93-011564] p 568 N94-13000
Optical and physical properties of the LiSrAlF6:Cr laser crystal
[DE93-014657] p 808 N94-13881

SPECIFIC IMPULSE
Electromagnetic propulsion for spacecraft
[NASA-CR-191186] p 551 N94-13416

SPECIFICATIONS
Design, qualification and operation of nuclear rockets for safe Mars missions
[DE93-010792] p 549 N94-12996
The design of chain links and slings
[NPL-DMM(A)-94] p 662 N94-13808
Security clauses in the writing and analysis of standards
[NPL-DITC-216-93] p 824 N94-13879

SPECKLE INTERFEROMETRY
Strain sensing technology for high temperature applications
[NASA-TM-4498] p 648 N94-12874

SPECKLE PATTERNS
Study of speckle reduction when using a CO2 waveguide laser close to its threshold state
[DSIS-93-00250] p 657 N94-14067

SPECTRA
Inclusive single muons at DO
[DE93-012779] p 783 N94-13494
A sum-rule of luminescence spectrum
[ITN-93-85223] p 814 N94-14559

SPECTRAL BANDS
New challenges in propagation research in the US p 612 N94-14656

SPECTRAL CORRELATION
Nonlinear damping model for flexible structures
[NASA-CR-193711] p 539 N94-12790

SPECTRAL EMISSION
Measurements of optical properties of waveshifting optical fiber for liquid scintillator hadron calorimetry
[DE93-012606] p 791 N94-13482
A calibration procedure for radiation budget radiometers and its influence on interpretation of measured values
[MITT-82] p 651 N94-14149

SPECTRAL ENERGY DISTRIBUTION
The 1 to 5 micron imaging of deeply embedded young stellar objects p 831 N94-13657
A long-term space astrophysics research program: The evolution of the quasar continuum
[NASA-CR-193714] p 839 N94-14404

SPECTRAL LINE WIDTH
Selenium x ray laser line profile measurements
[DE93-012580] p 658 N94-14175
Experimental measurements of selenium x-ray laser spectral line profiles
[DE93-016543] p 659 N94-14595

SPECTRAL METHODS
The Chebyshev-Legendre method: Implementing Legendre methods on Chebyshev points
[NASA-CR-191497] p 769 N94-13725
On the geometry of external spectral factors and the Riccati inequality
[CWI-BS-R9227] p 770 N94-14002
The spectral viscosity method applied to simulation of waves in a stratified atmosphere
[FFI-92/7047] p 637 N94-14040

SPECTRAL REFLECTANCE
The optical constants and spectral specular reflectivity of Highly Oriented Pyrolytic Graphite (HOPG)
[DE93-011894] p 790 N94-12865
Quantitative mapping of pore fraction variations in silicon nitride using an ultrasonic contact scan technique
[NASA-TP-3377] p 665 N94-13056
Spectral reflectance of soils from Sao Paulo State
[INPE-5424-PRP/172] p 684 N94-13377
Analytical framework for modeling scale-related variabilities in remote sensing p 685 N94-13592
Operational test of the airborne data acquisition system: SADA, the Bara Bonita experiment
[INPE-5451-NTC/305] p 685 N94-13610
The state of Fe in the lunar regolith and its relationship to the spectral reflectance properties of the moon p 843 N94-14303

SPECTRAL SENSITIVITY
Imaging Fourier transform spectrometer
[DE93-017193] p 651 N94-14416

SPECTROGRAPHS
Vacuum ultraviolet instrumentation for solar irradiance and thermospheric airglow
[NASA-CR-194525] p 652 N94-14684

SPECTROMETERS
Modis-N airborne simulator
[NASA-CR-194364] p 792 N94-13719
E789 and P865: High-rate fixed-target studies of charm and beauty
[DE93-017223] p 788 N94-14898

SPECTROPHOTOMETERS
Vacuum ultraviolet instrumentation for solar irradiance and thermospheric airglow
[NASA-CR-194525] p 652 N94-14684

SPECTRORADIOMETERS
Colorimetric qualification of shear sensitive liquid crystal coatings
[NASA-CR-194126] p 806 N94-13291
Spectral reflectance of soils from Sao Paulo State
[INPE-5424-PRP/172] p 684 N94-13377
Operational test of the airborne data acquisition system: SADA, the Bara Bonita experiment
[INPE-5451-NTC/305] p 685 N94-13610
Advanced solid-state array spectroradiometer data collection during HAPEX-2 Sahel
[NASA-CR-194144] p 808 N94-13875

SPECTROSCOPIC ANALYSIS
Procedures for analysis of debris relative to Space Shuttle systems
[NASA-TM-109190] p 534 N94-12900
The evidence for clumpy accretion in the Herbig Ae star HR 5999
[NASA-TM-108257] p 828 N94-12915
Determination of trace elements in triglycine sulfate solutions
[NASA-CR-193481] p 562 N94-13048
Quantitative mapping of pore fraction variations in silicon nitride using an ultrasonic contact scan technique
[NASA-TP-3377] p 665 N94-13056
Determination of spectroscopic properties of atmospheric molecules from high resolution vacuum ultraviolet cross section and wavelength measurements
[NASA-CR-194024] p 712 N94-13092
Scanning tunneling microscopy studies of diamond films and optoelectronic materials
[NASA-CR-194363] p 578 N94-13246
Colorimetric qualification of shear sensitive liquid crystal coatings
[NASA-CR-194126] p 806 N94-13291
The International Colloquium on Atomic Spectra and Oscillator Strengths for Astrophysical and Laboratory Plasmas
[NASA-TM-109255] p 849 N94-13376
Hard x ray/microwave spectroscopy of solar flares
[NASA-CR-194399] p 844 N94-13958
E789 and P865: High-rate fixed-target studies of charm and beauty
[DE93-017223] p 788 N94-14898

SPECTROSCOPY
Development of nondestructive evaluation methods and prediction of effects of flaws on the fracture behavior of structural ceramics
[DE93-012942] p 577 N94-13032
Fifteenth Combustion Research Conference
[DE93-015758] p 562 N94-13045
A search for strong-field direct two electron ionization using coincidence spectroscopy
[DE93-013435] p 781 N94-13241
Early baryon and meson spectroscopy culminating in the discovery of the Omega minus SU(3) and quarks
[DE93-014321] p 787 N94-14580
Multiplicity spectrometry on neutron filtered beams
[DE93-617529] p 790 N94-14843

SPECTRUM ANALYSIS
Spectral analysis for automated exploration and sample acquisition
[NASA-CR-194095] p 545 N94-13189
Basic research in solar physics
[NASA-CR-193632] p 844 N94-13234
Dendrometric variables estimation in homogeneous forests using LANDSAT TM data
[INPE-5455-TDI/497] p 684 N94-13331
The onset of galactic winds in early-type galaxies
[NASA-CR-193640] p 836 N94-13446
Bounds on time delay estimation given unknown signal spectral parameters
[ITN-93-85194] p 601 N94-13566
Spectra of late type dwarf stars of known abundance for stellar population models
[NASA-CR-194301] p 831 N94-13681
Maximum entropy spectral analysis of the geological time series of the oxygen isotope record from deep-sea cores
[INPE-5465-PRE/1773] p 725 N94-13728
Analysis of microstrip patch antennas with nonzero surface resistance
[NASA-TP-3362] p 604 N94-13916
Testing various time-frequency distribution techniques
[DREO-TN-92-17] p 606 N94-14062
An exact processing algorithm for wide beam spaceborne SAR data p 689 N94-14213
Spectroscopic method and data reduction algorithm for laser long-path absorption measurements using RIS p 689 N94-14218
Analysis of the IUE spectra of the strongly interacting binary beta Lyrae
[NASA-CR-194118] p 833 N94-14493
H2S data reduction
[NASA-CR-193389] p 617 N94-14743

SPEECH
Analysis of fundamental frequency pattern in speech p 618 N94-13440

SPEECH RECOGNITION
Speaker independent recognition of isolated words using vector quantization and neural networks
[ETN-93-94390] p 616 N94-14724

SPEED INDICATORS
Position error determination for the speedometer and altimeter of the NAL QSTOL experimental aircraft ASKA
[NAL-TR-1144] p 517 N94-13451

SPENT FUELS
Development and application of the automated Monte Carlo biasing procedure in SAS4
[DE93-015205] p 774 N94-14334

SPHERES
Force-free magnetic fields, curl eigenfunctions, and the sphere in transform space, with applications to fluid dynamics and electromagnetic theory
[AD-A265805] p 834 N94-12971
Theoretical investigation of scattering by homogeneous or coated dielectric spheres illuminated with a steady state or pulsed laser beam p 657 N94-13624

SPHERICAL HARMONICS
Project proposal for partial computational physics support for Survivability of Coatings program
[DE93-013788] p 576 N94-12939
Spherical anharmonic oscillator in self-similar approximation
[DE93-626622] p 772 N94-14890

SPHERICAL SHELLS
The fractional quantum Hall effect and the spherical shell model
[DE93-014553] p 818 N94-14740

SPIN DECOUPLING
The de Haas-van Alphen studies and Fermi surface properties of organic superconductors (ET)2X
[DE93-015157] p 623 N94-13925

SPIN GLASS
Retrieval properties of neural networks with infinitely many marked patterns
[PREPRINT-729] p 766 N94-14718
Magnetic interactions and disorder - phase transitions in dilute spin-glasses and high temperature superconductors
[ITN-93-85217] p 815 N94-14825

SPIN RESONANCE
The evolution of tensor polarization
[DE93-017209] p 790 N94-14897

SPIRAL ANTENNAS
A hybrid finite element-boundary integral for the analysis of cavity-backed antennas of arbitrary shape
[NASA-CR-193719] p 599 N94-13236

SPIRAL GALAXIES
Abundance markers in H II regions of late spiral galaxies
[ISBN-0-315-62457-4] p 836 N94-13372
Ultraviolet observations of NGC 4395, the least luminous and nearest known Seyfert 1 nucleus
[NASA-CR-194304] p 831 N94-13679

SPLINE FUNCTIONS
Growth curve analysis for plasma profiles using smoothing splines
[DE93-015741] p 795 N94-12984
Evaluation of beta-spline interpolation in digital terrain models
[INPE-5475-TDI/506] p 684 N94-13364

SPLINES
Splines, contours and SVD subroutines
[DE93-016088] p 757 N94-14866

SPRAY CHARACTERISTICS
Simulation of preburner sprays, volume 1
[NASA-CR-193844] p 647 N94-14906

SPRAY NOZZLES
Widebody cabin water spray optimization tests
[DOT/FAA/CT-TN93/29] p 511 N94-14186
Simulation of preburner sprays, volume 1
[NASA-CR-193844] p 647 N94-14906

SPRAYERS
A computer model for liquid jet atomization in rocket thrust chambers
[NASA-CR-194194] p 627 N94-12803
Widebody cabin water spray optimization tests
[DOT/FAA/CT-TN93/29] p 511 N94-14186
Simulation of preburner sprays, volume 1
[NASA-CR-193844] p 647 N94-14906
SPREAD SPECTRUM TRANSMISSION
Fine time uplink synchronization for frequency-hopped spread spectrum satellite communication system
[ISBN-0-315-54370-1] p 600 N94-13488
Kalman filter based architectures for interference excision
[DSIS-93-00034] p 603 N94-13818
Adaptive Signal Processing Testbed
[DSIS-93-00258] p 604 N94-13869
Adaptive Signal Processing Testbed: Software design specification
[DSIS-93-00259] p 604 N94-13870
Simulation of downlink synchronization for a frequency-hopped satellite communication system
[DSIS-93-00477] p 605 N94-13941
Adaptive Signal Processing Testbed signal excision software: User's manual
[DSIS-93-00260] p 606 N94-14037
A comparison of recursive least squares and Kalman filtering excisors for swept tone interference
[DSIS-93-00362] p 606 N94-14054
SPRINGS (ELASTIC)
Miniature mechanism assembly
[DE93-015595] p 624 N94-13928
SPRINGS (WATER)
Promotion of geothermal energy development in 1991
[DE93-799058] p 701 N94-13215
SPUTTERING
Metastability of yttrium-oxides
[DE93-016548] p 813 N94-14440
Multicrystalline silicon solar cells: Gettering optimization and characterization
[DE93-015001] p 705 N94-14861
STABILITY
Effect of pressure on order and stability in alloys: The case of Al-Ge
[DE93-013842] p 567 N94-12899
A new formulation of longitudinal coherent instabilities
[DE93-014288] p 789 N94-13220
Stability of reference masses 1: Evidence for posiible variations in the mass of reference kilograms arising from mercury contamination
[NPL-DMM(A)-86] p 708 N94-13667
Exploiting structure: Introduction and motivation
[NASA-CR-194199] p 750 N94-13828
STABILITY TESTS
Functional differential equations with piecewise continuous argument
[AD-A266660] p 772 N94-14840
STAGNATION POINT
Evolution of disturbances in stagnation point flow
[NASA-CR-191516] p 636 N94-13724
STAINLESS STEELS
BAKEOUT: A computer program for predicting diffusive outgassing from stainless steel
[DE93-012613] p 573 N94-14364
Welding technologies as applied to nuclear manufacturing
[DE93-010924] p 664 N94-14565
STANDARDS
VIEWCACHE: An incremental pointer-base access method for distributed databases. Part 1: The universal index system design document. Part 2: The universal index system low-level design document. Part 3: User's guide. Part 4: Reference manual. Part 5: UIMS test suite
[NASA-CR-191788] p 822 N94-13126
Specimen files in VAMAS standard data transfer format (EXAMPLE 1.TXT to EXAMPLE 4.TXT)
[NPL-DMM(A)-90] p 749 N94-13688
The design of chain links and slings
[NPL-DMM(A)-94] p 662 N94-13808
STANDING WAVES
Multi-bunch beam-break-up studies for a SWFEL/TBA
[DE93-016973] p 658 N94-14414
The standing wave FEL/TBA: Realistic cavity geometry and energy extraction
[DE93-016972] p 659 N94-14520
STAR FORMATION
Analysis of interstellar cloud structure based on IRAS images
[NASA-CR-194341] p 836 N94-13332
Search for x ray emitting young stars outside of massive molecular clouds
[NASA-CR-193609] p 830 N94-13462
Millimeter and infrared studies of young stellar objects in dark cloud L1641 p 838 N94-13648
The origin of the far-infrared emission from galactic molecular clouds p 848 N94-13654
STAR TRACKERS
Time series photometry of faint cataclysmic variables with a CCD p 831 N94-13646
STARK EFFECT
Equilibrium reconstruction of the q-profile in tokamaks from motional Stark effect data
[DE93-015815] p 796 N94-13046
STATE ESTIMATION
Calculation of the required sensor accuracy to obtain a specified state estimation accuracy
[NAL-TR-1173] p 649 N94-13343
Attitude determination of stratospheric balloons using Kalman filters
[INPE-5498-TDI/513] p 649 N94-13366
STATE VECTORS
A rational interpolation method to compute frequency response p 681 N94-14644
STATIC PRESSURE
A wall interference assessment/correction system
[NASA-CR-194174] p 500 N94-13076
Exploratory study of in-plane streamline curvature effects on a turbulent boundary layer at a Mach number of 3
[NASA-CR-193673] p 501 N94-13292
STATIC STABILITY
Test and evaluation methods p 506 N94-14163
STATIC TESTS
Technical Evaluation Motor No. 10 (TEM-10)
[NASA-CR-193846] p 554 N94-14907
STATICS
Statics and kinetics of phase transformations in bcc Fe-Cr
[DE93-013839] p 574 N94-14793
STATISTICAL ANALYSIS
Feature extraction and classification algorithms for high dimensional data
[NASA-CR-194298] p 743 N94-13023
Degradation of the visible and near-infrared channels of the advanced very high resolution radiometer on the NOAA-9 spacecraft: Assessment and recommendations for corrections
[NOAA-TR-NESDIS-70] p 544 N94-13029
Object-oriented productivity metrics p 667 N94-13161
Spatial variability of throughfall chemistry in a tropical rainforest (Central Amazonia, Brazil)
[INPE-5431-PRE/1765] p 720 N94-13429
Trellis coding with Continuous Phase Modulation (CPM) for satellite-based land-mobile communications
[NASA-CR-191325] p 604 N94-13909
Stochastic performance modeling and evaluation of obstacle detectability with imaging range sensors
[NASA-CR-194510] p 605 N94-13946
Generic results of the space physics community survey
[NASA-CR-194538] p 818 N94-13984
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples, volume 1
[NASA-CR-194498] p 542 N94-14076
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples. Volume 2: Software documentation
[NASA-CR-194499] p 542 N94-14077
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples. Volume 3: Structure and listing of programs
[NASA-CR-194500] p 542 N94-14078
A method for estimation of partial cloud cover within a pixel and its effect p 697 N94-14269
Atmospheric correction for sea surface temperature by application of microwave dual-channel technique to VTIR data p 697 N94-14271
Statistical results from the Virginia Tech propagation experiment using the Olympus 12, 20, and 30 GHz satellite beacons p 613 N94-14658
Results of multiband (L, S, Ku band) propagation measurements and model for high elevation angle land mobile satellite channel p 615 N94-14670
An improved approach for flight readiness certification: Probabilistic models for flaw propagation and turbine blade failure. Volume 1: Methodology and applications
[NASA-CR-194496] p 519 N94-14841
An improved approach for flight readiness certification: Probabilistic models for flaw propagation and turbine blade failure. Volume 2: Software documentation
[NASA-CR-194497] p 519 N94-14842
On the statistical theory of the even-even nucleons levels' density
[DE93-623990] p 788 N94-14875
STATISTICAL CORRELATION
Statistical analysis of the m rankings problem: Kendall's prototype and the grouping estimate method based on normal scores
[DSIS-93-00139] p 773 N94-13848
STATISTICAL DISTRIBUTIONS
An analog clustering network from a biological model
[AD-A265637] p 762 N94-12969
STATISTICAL MECHANICS
Discussion of stress tensor nonuniqueness with application to nonuniform, particulate systems
[DE93-014352] p 816 N94-13206
Statistical mechanical theory of liquid entropy
[DE93-016524] p 817 N94-14593
Retrieval properties of neural networks with infinitely many marked patterns
[PREPRINT-729] p 766 N94-14718
STATISTICAL TESTS
Robust estimators and tests in one-sample location problem with particular consideration on modified maximum likelihood process
[ETN-93-94391] p 774 N94-14703
STATISTICS
Selected data on academic science and engineering R and D expenditures: Fiscal Year 1991
[NSF-92-329] p 819 N94-13982
STATORS
Rotor stator CGI
[NASA-TM-109313] p 518 N94-13608
STEADY FLOW
Averaging techniques for steady and unsteady calculations of a transonic fan stage
[NASA-TM-106231] p 499 N94-13108
Canonical forms of multidimensional steady inviscid flows
[NASA-CR-191488] p 769 N94-13722
The structure of laminar flow in a three-dimensional driven cavity p 640 N94-14601
A new Lagrangian method for three-dimensional steady supersonic flows
[NASA-TM-106068] p 510 N94-14847
STEADY STATE
Preconditioning and the limit to the incompressible flow equations
[NASA-CR-191500] p 769 N94-13717
STEAM
Nuclear thermal propulsion engine based on particle bed reactor using light water steam as a propellant
[DE93-014336] p 552 N94-14111
STEELS
Applications of surface science to solid lubricants
[SMC-TR-93-24] p 579 N94-13903
Heavy section steel irradiation experiment
[DE93-015517] p 573 N94-14537
A study of hydrogen effects on fracture behavior of radioactive waste storage tanks
[DE93-018171] p 574 N94-14873
STELLAR ACTIVITY
Ultraviolet observations of NGC 4395, the least luminous and nearest known Seyfert 1 nucleus
[NASA-CR-194304] p 831 N94-13679
STELLAR COLOR
Polarization and variability of active galaxies and quasars p 837 N94-13550
STELLAR COMPOSITION
Abundance markers in H II regions of late spiral galaxies
[ISBN-0-315-62457-4] p 836 N94-13372
STELLAR CORES
Millimeter and infrared studies of young stellar objects in dark cloud L1641 p 838 N94-13648
STELLAR CORONAS
Studies of gas in cooling flow clusters
[NASA-CR-193597] p 628 N94-12959
ROSAT guest investigator program (AO-1). On a search for coronal x ray emissions from white dwarfs
[NASA-CR-193654] p 835 N94-13171
STELLAR EVOLUTION
Analysis of interstellar cloud structure based on IRAS images
[NASA-CR-194341] p 836 N94-13332
The physical and chemical evolution of protostellar disks. The growth of protostellar disks: Progress to date
[NASA-CR-194111] p 836 N94-13423
The spectroscopic evolution of novae in the bulge of M31 and a search for their possible origin in the M31 globular cluster system p 831 N94-13668
Charge-exchange reactions and weak interaction rates for Type 2 supernovae
[DE93-015104] p 783 N94-13893
Wind mass and energy deposition
[DE93-013345] p 839 N94-14341
ROSAT observations of clusters with wide-angle tailed radio sources
[NASA-CR-193784] p 833 N94-14405
STELLAR LUMINOSITY
Time series photometry of faint cataclysmic variables with a CCD p 831 N94-13646

STELLAR MAGNITUDE
Search for x ray emitting young stars outside of massive molecular clouds
[NASA-CR-193609] p 830 N94-13462
Photometry and spectroscopy in the open cluster Alpha Persei, 2
[NASA-CR-193397] p 833 N94-14358
STELLAR MASS EJECTION
MHD shocks in coronal mass ejections
[NASA-CR-193418] p 828 N94-12970
ICE/ISEE plasma wave data analysis
[NASA-CR-194375] p 796 N94-13081
The interplanetary origins and the main-phase development of moderate geomagnetic storms (1978 - 1979)
[INPE-5445-TDI/491] p 835 N94-13174
Evolution of the interplanetary magnetic field
[DE93-012631] p 836 N94-13262
Solar-geophysical data number 584, April 1993. Part 2: (Comprehensive reports). Data for October 1992 and miscellaneous
[PB93-198331] p 845 N94-14561
STELLAR MODELS
Analysis of interstellar cloud structure based on IRAS images
[NASA-CR-194341] p 836 N94-13332
Spectra of late type dwarf stars of known abundance for stellar population models
[NASA-CR-194301] p 831 N94-13681
STELLAR RADIATION
Search for ultra-high energy emission from Geminga and five unidentified EGRET sources
[DE93-012717] p 846 N94-12816
The soft x ray transient Cen X-4 in quiescence
[NASA-CR-194033] p 833 N94-14406
STELLAR ROTATION
Photometry and spectroscopy in the open cluster Alpha Persei, 2
[NASA-CR-193397] p 833 N94-14358
STELLAR SPECTRA
Physical properties of gas disks around shell stars with and without dust
[NASA-CR-193655] p 835 N94-13239
The spectroscopic evolution of novae in the bulge of M31 and a search for their possible origin in the M31 globular cluster system p 831 N94-13668
Spectra of late type dwarf stars of known abundance for stellar population models
[NASA-CR-194301] p 831 N94-13681
A long-term space astrophysics research program: The evolution of the quasar continuum
[NASA-CR-193714] p 839 N94-14404
Analysis of the IUE spectra of the strongly interacting binary beta Lyrae
[NASA-CR-194118] p 833 N94-14493
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for March, February 1993, and late data
[PB93-198323] p 845 N94-14560
STELLAR SPECTROPHOTOMETRY
Abundance markers in H II regions of late spiral galaxies
[ISBN-0-315-62457-4] p 836 N94-13372
Time series photometry of faint cataclysmic variables with a CCD p 831 N94-13646
The spectroscopic evolution of novae in the bulge of M31 and a search for their possible origin in the M31 globular cluster system p 831 N94-13668
STELLAR WINDS
The onset of galactic winds in early-type galaxies
[NASA-CR-193640] p 836 N94-13446
Wind mass and energy deposition
[DE93-013345] p 839 N94-14341
STELLARATORS
Ion cyclotron heating experiments and plans for the Advanced Toroidal Facility (ATF)
[DE93-012965] p 795 N94-13033
Interferometric investigation methods of plasma spatial characteristics on stellarators and tokamaks in submillimeter region
[DE93-621606] p 798 N94-13507
STEPPES
Evolution of the lower planetary boundary layer over strcngly contrasting surfaces
[DE93-010667] p 717 N94-14424
STEREOPHOTOGRAPHY
A widget based operations simulator for a planetary camera: A model for the high resolution stereo camera on Mars 94
[DLR-FB-92-30] p 651 N94-14044
STEREOSCOPIC VISION
Close range 3-D position sensing using stereo vision and point-of-correspondance through mathematical morphology
[ISBN-0-315-61012-3] p 763 N94-13515
Stochastic performance modeling and evaluation of obstacle detectability with imaging range sensors
[NASA-CR-194510] p 605 N94-13946
Depths from focusing and defocusing
[AD-A266644] p 735 N94-14797
STEREOSCOPY
EOS workstation
[NASA-CR-191326] p 736 N94-13132
Measurements of the spatial structure and directivity of 100 KeV photon sources in solar flares using PVO and ISEE-3 spacecraft
[NASA-CR-194080] p 845 N94-14492
STEROIDS
Phase-shifting effect of light and exercise on the human circadian clock
[AD-A265732] p 732 N94-13038
STIFFENING
Geometric stiffening in multibody dynamics formulations p 677 N94-14619
STIFFNESS
Measuring methods for CFRP laminates' bending and torsion rigidities characteristics p 529 N94-13272
Some frequency and damping measurements of laminated beryllium beams
[DE93-015909] p 676 N94-14530
STIRLING CYCLE
Three-stage linear, split-Stirling cryocooler for 1 to 2K magnetic cold stage
[NASA-CR-4538] p 776 N94-13897
A recuperative superfluid Stirling refrigerator
[DE93-016521] p 597 N94-14592
STIRLING ENGINES
Futurepath 2
[NASA-TM-109285] p 518 N94-13623
Insoluble coatings for Stirling engine heat pipe condenser surfaces
[NASA-CR-191188] p 554 N94-14771
STOCHASTIC PROCESSES
Ocean acoustic processing: A model-based approach
[DE93-011902] p 725 N94-12876
Stochastic dynamics: Crossover from 1/f(sup 3) to flicker noise
[DE93-622862] p 772 N94-12896
Investigation for improving Global Positioning System (GPS) orbits using a discrete sequential estimator and stochastic models of selected physical processes
[NASA-CR-194167] p 512 N94-13082
A stochastic model for behavior analysis of fiber-reinforced quasi-brittle materials
p 672 N94-13594
Robust synthesis of discrete-time multivariable control systems with induced delays p 662 N94-13642
Stochastic realization of finite-valued processes and primes in the positive matrices
[CWI-BS-R9222] p 773 N94-13677
Observation of the coalescing of beam into an asymmetric RF bucket by stochastic cooling
[DE93-015133] p 783 N94-13895
Stochastic performance modeling and evaluation of obstacle detectability with imaging range sensors
[NASA-CR-194510] p 605 N94-13946
On the geometry of external spectral factors and the Riccati inequality
[CWI-BS-R9227] p 770 N94-14002
Stochastic scheduling games with Markov decision arrival processes
[CWI-BS-R9231] p 773 N94-14005
Tuning of Gaussian stochastic control systems
[CWI-BS-R9223] p 765 N94-14018
Hybrid S(sub N)/Monte Carlo research and results
[DE93-012677] p 773 N94-14178
Stochastic bounds for a polling system
[CWI-BS-R9230] p 765 N94-14361
Inflow characteristics associated with high-blade-loading events in a wind farm
[DE93-010042] p 704 N94-14423
Investigations of transitions from order to chaos in dynamical systems
[DE93-014438] p 818 N94-14738
Stochastic modeling of turbulent reacting flows
p 647 N94-14768
Functional differential equations with piecewise continuous argument
[AD-A266660] p 772 N94-14840
Determining neural network connectivity using evolutionary programming
[AD-A266853] p 766 N94-14882
STOICHIOMETRY
Unexpectedly rapid hydrosilation polymerization of the diallyl derivative of bisphenol A and 2,6-diallylphenol
[AD-A265832] p 577 N94-12986
Gas atomized Er3Ni powder for cryocooler applications
[DE93-011564] p 568 N94-13000
STORAGE BATTERIES
Primary and secondary electrical space power based on advanced PEM systems
[DE93-012643] p 553 N94-14689
STORAGE RINGS (PARTICLE ACCELERATORS)
Recent study of beam stability in the PSR
[DE93-014473] p 780 N94-13173
Construction of the Courant-Snyder invariants for the non-linear equations of motion under presence of the linear coupling
[DE93-017565] p 788 N94-14872
STORAGE STABILITY
A study of hydrogen effects on fracture behavior of radioactive waste storage tanks
[DE93-018171] p 574 N94-14873
STORAGE TANKS
The feasibility of producing aluminum-lithium structures for cryogenic tankage applications by laser beam welding
[NASA-CR-191527] p 595 N94-14026
A study of hydrogen effects on fracture behavior of radioactive waste storage tanks
[DE93-018171] p 574 N94-14873
STORMS (METEOROLOGY)
Storm prediction through barometric field analysis
[PUBL-SER-A-129] p 720 N94-13587
STOVL AIRCRAFT
Design criteria for integrated flight/propulsion control systems for STOVL fighter aircraft p 521 N94-13297
STRAIN DISTRIBUTION
Estimation of strain in 1-kW primary containment vessels by microstructural examination
[DE93-013053] p 573 N94-14316
STRAIN ENERGY METHODS
Geometric stiffening in multibody dynamics formulations p 677 N94-14619
STRAIN GAGES
Strain sensing technology for high temperature applications
[NASA-TM-4498] p 648 N94-12874
The ASCOR test: A simple automated method for stress corrosion testing of aluminium alloys
[NLR-TP-91438-U] p 570 N94-13532
A technique for direct measurement of skin friction in supersonic combustion flow p 503 N94-13555
STRAIN MEASUREMENT
Strain sensing technology for high temperature applications
[NASA-TM-4498] p 648 N94-12874
Correlations of the growth, structure, and stress with the adhesion of diamond films on tungsten
[DE93-012855] p 576 N94-12912
Measurement of residual strain in composites by means of time-of-flight neutron diffraction
[DE93-012939] p 555 N94-13248
Measurement of strain in individual phases of composites before, during, and after mechanical loading
[DE93-014585] p 558 N94-14119
Cammatic: An approach to improve DSS 13 antenna gravity-loading performance p 608 N94-14374
STRAIN RATE
A stochastic model for behavior analysis of fiber-reinforced quasi-brittle materials
p 672 N94-13594
Non-uniqueness in dynamic rate-independent non-associated plasticity
[AD-A266342] p 769 N94-13731
Dynamic mechanical deformation of a SiC(sub p)/Al-Li (8090) composite
[DE93-014586] p 558 N94-14121
Machining and grinding: High rate deformation in practice
[DE93-010718] p 664 N94-14457
Search for subgrid scale parameterization by projection pursuit regression p 643 N94-14749
Yield properties of tungsten and tungsten heavy alloys
[AD-A266833] p 575 N94-14878
STRAKES
Measurements of wing and fin buffeting on the standard dynamics model
[IAR-AN-76] p 526 N94-13859
STRANGE ATTRACTORS
Stability of subharmonics and escape phenomena in the twin-well potential duffing system p 775 N94-13235
STRANGENESS
Neutral strange particle production at the AGS
[DE93-014044] p 780 N94-13098
Measuring strangeness in the nucleon
[DE93-014861] p 785 N94-14471
STRATA
Dynamic soil pressures on rigid cylindrical vaults
[DE93-013930] p 676 N94-14585
STRATIFICATION
Turbulent diffusion in homogeneous shear flow with stable density stratification
[DLR-FB-92-26] p 639 N94-14443

STRATIFIED FLOW
Effects of surface thermal forcing on stratified flow past an isolated obstacle p 633 N94-13553
STRATOCUMULUS CLOUDS
Linkage of anthropogenic aerosol to clouds and climate
[DE93-016434] p 719 N94-13080
Remote sensing of low level cloud optical characteristics p 691 N94-14229
STRATOSPHERE
Project AIRSTREAM: Trace gas
[DE93-008849] p 706 N94-12904
Airborne Arctic stratospheric expedition: Ozone
[NASA-TM-109312] p 515 N94-13606
Weather forecasting support for AASE-2
[NASA-CR-194342] p 721 N94-13675
Modeling of the partitioning of reactive odd nitrogen in the lower stratosphere using aircraft measurements of NOy, NO, and other trace species
[NASA-CR-194305] p 714 N94-13707
Measurement of HO2 and other trace gases in the stratosphere using a high resolution far-infrared spectrometer at 28 km
[NASA-CR-194175] p 714 N94-13816
Space-based activities: SAM 2 and SAGE 2 p 694 N94-14252
New evidences supported the Wei hypothesis about the formation of the Antarctic ozone hole p 694 N94-14253
STREAK CAMERAS
Image motion photography
[DE93-013962] p 653 N94-14858
STREAM FUNCTIONS (FLUIDS)
Contributions to numerical solution of Navier-Stokes equations in two and three dimensional flows
[ETN-93-94395] p 647 N94-14816
STREAMLINING
Exploratory study of in-plane streamline curvature effects on a turbulent boundary layer at a Mach number of 3
[NASA-CR-193673] p 501 N94-13292
STREAMS
Tracking of change of a warm-core ring structure p 696 N94-14267
Warm streamers extended from Warm Core Rings (WCR's) and their role on fish migration and fishing ground formation p 697 N94-14270
STRESS (PHYSIOLOGY)
Cellular mechanism of turnover of the stress induced protein HSP 70
[AD-A265723] p 732 N94-13061
Physiological Anatomical Rodent Experiment (PARE) .04 Feasibility Test 1
[NASA-CR-194423] p 728 N94-13473
Variability of prediction of maximal oxygen concumption on the cycle ergometer using standard equations
[NASA-TP-3412] p 729 N94-14032
STRESS ANALYSIS
Body/cushion contact stress analysis during sitting
[ITN-93-85204] p 736 N94-13229
LUTE telescope structural design
[NASA-CR-192594] p 830 N94-13448
Autofrettage: Stress distribution under load and retained stresses after depressurization. A modified plane-strain case
[AD-A266320] p 671 N94-13579
Finite element analysis of composite plates by use of modified complementary energy principle p 672 N94-13596
Computational methods for reliable fatigue and damage tolerance dimensioning of aircraft structures
[FFA-TN-1993-05] p 515 N94-13690
Some computational tools for the analysis of through cracks in stiffened fuselage shells
[LR-701] p 673 N94-13726
Thermal gradient-induced deflection of a thick-walled cylinder with bending residual stresses
[AD-A266347] p 673 N94-13777
Contribution to comparison of methods for determining welding procedures for the avoidance of hydrogen cracking
[VTT-PUBS-107] p 674 N94-13887
Compressive buckling of curved, anisotropic panels stiffened in two directions. Part 1: Derivation of the governing equations
[LR-694] p 675 N94-13931
Stress stiffening and approximate equations in flexible multibody dynamics p 677 N94-14620
The effect of initial imperfections on shell stability: An updated review
[LR-695] p 682 N94-14692
Analysis of new composite architectures
[NASA-CR-194524] p 559 N94-14715
STRESS CONCENTRATION
Evolving surface cusps during strained-layer epitaxy
[DE93-015430] p 813 N94-14478
STRESS CORROSION
The ASCOR test: A simple automated method for stress corrosion testing of aluminium alloys
[NLR-TP-91438-U] p 570 N94-13532
STRESS CORROSION CRACKING
Interfacial precipitation, segregation and deformation in alloy 600: Implications on primary-side IGSCC
[DE93-013161] p 568 N94-13035
Radiation hardening and radiation-induced chromium depletion effects on intergranular stress corrosion cracking of austenitic stainless steels
[DE93-011602] p 572 N94-14058
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-005] p 559 N94-14575
STRESS DISTRIBUTION
Body/cushion contact stress analysis during sitting
[ITN-93-85204] p 736 N94-13229
Numerical simulations and experiments on physics of high Mach number shockwave: Turbulent flow interactions
[DE93-013424] p 631 N94-13249
Autofrettage: Stress distribution under load and retained stresses after depressurization. A modified plane-strain case
[AD-A266320] p 671 N94-13579
A process for evaluation of mechanical behavior of surface films
[W-1/92] p 579 N94-14007
Machining and grinding: High rate deformation in practice
[DE93-010718] p 664 N94-14457
STRESS FUNCTIONS
Elastic-plastic mixed-iterative finite element analysis: Implementation and performance assessment
[NASA-TM-106164] p 675 N94-13919
STRESS INTENSITY FACTORS
Finite element calculation of stress-intensity factors for thumb-nail cracks in DEN specimens
[LTR-ST-1929] p 850 N94-13548
Finite element calculation of stress-intensity factors for thru-thickness cracks in DEN specimens
[LTR-ST-1905] p 675 N94-14035
STRESS MEASUREMENT
Residual contact restraints in cryogenics
[ETN-93-94375] p 671 N94-13501
STRESS RELAXATION
Lifetime prediction of materials exposed to the natural space environment
[NASA-CR-193833] p 561 N94-12830
Evolving surface cusps during strained-layer epitaxy
[DE93-015430] p 813 N94-14478
STRESS TENSORS
Discussion of stress tensor nonuniqueness with application to nonuniform, particulate systems
[DE93-014352] p 816 N94-13206
STRESS-STRAIN RELATIONSHIPS
Autofrettage: Stress distribution under load and retained stresses after depressurization. A modified plane-strain case
[AD-A266320] p 671 N94-13579
Micromechanical damage theories for brittle solids with interacting microcracks
[AD-A266348] p 673 N94-13778
Measurement of strain in individual phases of composites before, during, and after mechanical loading
[DE93-014585] p 558 N94-14119
Elastic-plastic finite element analyses of an unidirectional, 9 vol percent tungsten fiber reinforced copper matrix composite
[NASA-TM-106304] p 559 N94-14719
STRETCHING
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-005] p 559 N94-14575
Investigation of the dilatational dissipation in compressible homogeneous shear flow p 645 N94-14758
Response of a supersonic boundary layer to a compression corner p 645 N94-14759
Vortex-induced disturbance field in a compressible shear layer p 645 N94-14760
STRING THEORY
On the symmetry algebra of the discrete states in d less than 2 closed string theory
[DE93-622903] p 769 N94-13536
A classical instability for black strings and p-branes
[DE93-014577] p 839 N94-14116
Mathematics and string theory
[DE93-017903] p 817 N94-14417
STRINGS
A classical instability for black strings and p-branes
[DE93-014577] p 839 N94-14116
STRONG INTERACTIONS (FIELD THEORY)
Top quark polarization and T-odd spin correlations as tools for testing (non) Standard Model predictions
[DE93-622956] p 778 N94-12847
STRUCTURAL ANALYSIS
Structural design/margin assessment
[NASA-TP-3410] p 669 N94-12831
A general contact detection algorithm for finite element analysis
[DE93-012846] p 742 N94-12956
Relegation for decentralized control
[AD-A265720] p 819 N94-13059
Test/analysis correlation and model updating of the STARS 1 and 2 missile systems
[DE93-013774] p 748 N94-13578
Finite element analysis of composite plates by use of modified complementary energy principle p 672 N94-13596
Boundary formulations for nonlinear design sensitivity analysis p 672 N94-13669
Some computational tools for the analysis of through cracks in stiffened fuselage shells
[LR-701] p 673 N94-13726
The development of inspection and repair methods for the C-17 aft cargo door
[LR-704] p 499 N94-13904
Hierarchical nonlinear behavior of hot composite structures
[NASA-TM-106229] p 676 N94-14041
Materials/structures testing p 506 N94-14164
Control system design for flexible structures using data models p 527 N94-14646
STRUCTURAL DESIGN
Structural design/margin assessment
[NASA-TP-3410] p 669 N94-12831
Advanced Turbine Technology Applications Project (ATTAP)
[NASA-CR-191088] p 828 N94-12931
A photovoltaic catenary-tent array for the Martian surface
[NASA-TM-106306] p 621 N94-13194
The Second Workshop on Deployment and Assembly Experiment of Large Space Structure on Orbit
[NASDA-CON-930003] p 529 N94-13268
Structural design of hexa-link truss deployable antenna p 529 N94-13269
Thermal distortion measurement of TETRUS type thermal test model of large deployable antenna for mobile communications satellite p 529 N94-13270
Development of modular cable mesh deployable antenna p 530 N94-13274
Research on inflatable structure for space use p 530 N94-13275
Helical truss beam development for large space structure p 530 N94-13276
A concept on on-orbit experiments of deployable structures utilizing JEM/HOPE p 531 N94-13279
Movement of deployable truss p 531 N94-13280
Development and application of one dimensional deployable truss p 531 N94-13281
Study of a one-dimensional deployable structure employing telescopic members p 531 N94-13282
LUTE telescope structural design
[NASA-CR-192594] p 830 N94-13448
Poling of thin polymer films in electro optic applications
[AD-A266562] p 579 N94-13584
The study on large space structure assembly technology: The study on deployable truss structure, part 1
[NASDA-TMR-930002] p 541 N94-13658
The study on large space structure assembly technology: The study on deployable truss structure, part 2 and 3
[NASDA-TMR-930003-PT-2-3] p 541 N94-13659
The study on test of docking mechanism system, part 1 and 2
[NASDA-TMR-930004-PT-1-2] p 541 N94-13660
Mathematical optimization: A tool for aircraft design
[MBB-LME-251-S-PUB-0492] p 751 N94-14006
Large space structures and systems in the space station era: A bibliography with indexes (supplement 05)
[NASA-SP-7085(05)] p 543 N94-14411
Animation of multi-flexible body systems and its use in control system design p 678 N94-14629
Flexibility and costs in the design process: A decision support model
[ISBN-9-06-814522-3] p 597 N94-14808
STRUCTURAL DESIGN CRITERIA
Development and application of a comprehensive, design-sensitive weight prediction method for wing structures of transport category aircraft
[LR-693] p 515 N94-13687
The effect of initial imperfections on shell stability: An updated review
[LR-695] p 682 N94-14692

STRUCTURAL ENGINEERING
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples, volume 1
[NASA-CR-194498] p 542 N94-14076
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples. Volume 2: Software documentation
[NASA-CR-194499] p 542 N94-14077
An improved approach for flight readiness certification: Methodology for failure risk assessment and application examples. Volume 3: Structure and listing of programs
[NASA-CR-194500] p 542 N94-14078
STRUCTURAL FAILURE
Comparison of analytic Whipple bumper shield ballistic limits with CTH simulations
[DE93-015126] p 539 N94-13006
The numerical simulation of the collapse process of axially compressed cylindrical shells with measured imperfections
[LR-705] p 674 N94-13905
MSD in fuselage lap joints: Requirements for inspection intervals for typical fuselage lap joint panels with Multiple Site Damage
[LR-697] p 675 N94-13986
The effect of initial imperfections on shell stability: An updated review
[LR-695] p 682 N94-14692
An improved approach for flight readiness certification: Probabilistic models for flaw propagation and turbine blade failure. Volume 1: Methodology and applications
[NASA-CR-194496] p 519 N94-14841
An improved approach for flight readiness certification: Probabilistic models for flaw propagation and turbine blade failure. Volume 2: Software documentation
[NASA-CR-194497] p 519 N94-14842
STRUCTURAL PROPERTIES (GEOLOGY)
The nature and origin of periodically spaced tectonic features on Mars
[NASA-CR-193821] p 842 N94-13199
STRUCTURAL STABILITY
Measuring methods for CFRP laminates' bending and torsion rigidities characteristics p 529 N94-13272
Boundary stability under nonequilibrium conditions
[DE93-016259] p 809 N94-13980
STRUCTURAL STRAIN
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-004] p 559 N94-14574
STRUCTURAL VIBRATION
On curve veering and flutter of rotating blades
[NASA-TM-106282] p 670 N94-12872
System identification for Space Station Freedom using observer/Kalman filter Markov parameters
[NASA-CR-191521] p 539 N94-12976
Active control of acoustic pressure fields using smart material technologies
[NASA-CR-191480] p 768 N94-13354
Nonlinear vibrations of thick composite plates: Higher-order shear deformation plate theory
p 556 N94-13558
Some frequency and damping measurements of laminated beryllium beams
[DE93-015909] p 676 N94-14530
STRUCTURED PROGRAMMING
Guide to the software architectural design phase
[ESA-PSS-05-04-ISSUE-1] p 753 N94-14190
Guide to the software detailed design and production phase
[ESA-PSS-05-05-ISSUE-1] p 753 N94-14191
STRUTS
Flow-field interference produced by an asymmetrical support strut
[IAR-AN-75] p 504 N94-14031
STUDENTS
Lecture notes on software process improvement
[AD-A265200] p 744 N94-13049
Workshop for coordinating South Carolina's pre-college systemic initiatives in science and mathematics
[DE93-012263] p 818 N94-13216
Characteristics of the amateur radio means of the Arsene satellite
[CNES-NT-131] p 605 N94-13950
Center of excellence in rotary wing technology
[AD-A266655] p 510 N94-14799
SUBHARMONIC GENERATORS
Stability of subharmonics and escape phenomena in the twin-well potential duffing system p 775 N94-13235
SUBMILLIMETER WAVES
Interferometric investigation methods of plasma spatial characteristics on stellarators and tokamaks in submillimeter region
[DE93-621606] p 798 N94-13507
Instability heating of the HDZP
[DE93-012641] p 798 N94-13513
Theoretical SIS mixer research
[AD-A266323] p 807 N94-13580
Submillimeter, millimeter, and microwave spectral line catalogue, revision 3
[NASA-CR-194501] p 602 N94-13813
Direct submillimeter absorptivity measurements on epitaxial Ba(1-x)K(x)BiO3 films at 2K
[DE93-013904] p 815 N94-14699
SUBROUTINES
FORTRAN graphics routines for the Macintosh
[DE93-013092] p 742 N94-12864
Splines, contours and SVD subroutines
[DE93-016088] p 757 N94-14866
SUBSONIC AIRCRAFT
Strain sensing technology for high temperature applications
[NASA-TM-4498] p 648 N94-12874
SUBSONIC FLOW
Study of possible mechanisms of instability due to heat transfer
[INPE-5448-TDI/494] p 628 N94-12966
Transition prediction and control in subsonic flow over a hump
[NASA-CR-4543] p 629 N94-13066
Development of a general purpose multigrid accelerated Navier-Stokes solver p 641 N94-14613
SUBSONIC SPEED
Performance seeking control: Program overview and future directions
[NASA-TM-4531] p 519 N94-14855
SUBSTRATES
Electrophoretic and electrolytic deposition of ceramic particles on porous substrates
[AD-A265141] p 575 N94-12812
Project proposal for partial computational physics support for Survivability of Coatings program
[DE93-013788] p 576 N94-12939
The study of structure-processing-property relations in copper oxide based high (Tc) superconductors
[DE93-015066] p 804 N94-13003
Effects of growth conditions and substrate orientation on the properties of InSb
[DE93-013766] p 812 N94-14344
Kinetics of photodeposition of superconducting films
[DE93-015511] p 812 N94-14348
Metastability of yttrium-oxides
[DE93-016548] p 813 N94-14440
Ion assisted sputter deposition of Mo-Si multilayers
[DE93-013830] p 583 N94-14693
Solution chemistry optimization of sol-gel processed PZT thin films
[DE93-013776] p 814 N94-14695
Characterization of diamond film growth in a combustion flame
[AD-A266659] p 816 N94-14839
SUCTION
The transient behavior of a boundary layer exposed to uniform suction
[ITN-93-85205] p 630 N94-13197
SUDDEN IONOSPHERIC DISTURBANCES
Solar-geophysical data number 584, April 1993. Part 1: (Prompt reports). Data for March, February 1993, and late data
[PB93-198323] p 845 N94-14560
SULFATES
Determination of trace elements in triglycine sulfate solutions
[NASA-CR-193481] p 562 N94-13048
SULFIDES
An investigation of the role of second phase particles in the design of ultra high strength steels of improved toughness
[AD-A266774] p 573 N94-14786
SULFUR COMPOUNDS
Performance effects of coal-derived contaminants on the carbonate fuel cell
[DE93-013801] p 703 N94-13693
Importance of sprays for long range transport of harmful substances in the troposphere
[MITT-81] p 711 N94-14723
SULFUR DIOXIDES
An examination of utility emissions contributions to elevated ozone concentrations in the Chicago area
[DE93-012852] p 708 N94-13495
Summary of conclusions and recommendations from a visibility science workshop
[DE93-012770] p 710 N94-14523
Promotion of geothermal energy development in 1991
[DE93-799061] p 705 N94-14679
Signal and reference wavelengths for the elimination of SO2 cross sensitivity in remote measurements of tropospheric ozone with lidar
[GKSS/92/E/24] p 617 N94-14819
The mobile lidar system ARGOS for spatial resolution remote measuring of gaseous air pollutants
[GKSS/92/E/26] p 617 N94-14820
SULFURIC ACID
Reduction and analysis of seasons 15 and 16 (1991 - 1992) Pioneer Venus radio occultation data and correlative studies with observations of the near-infrared emission of Venus
[NASA-CR-194128] p 841 N94-13083
SUM RULES
The off shell (rho)-(omega) mixing in the QCD sum rules
[DE93-014845] p 786 N94-14527
SUPERCOMPUTERS
The NAS parallel benchmarks
[NASA-TM-103863] p 740 N94-13200
Advanced computers and simulation
[DE93-014354] p 740 N94-13286
Diskless supercomputers: Scalable, reliable I/O for the Tera-Op technology base
[NASA-CR-194089] p 740 N94-13363
Analysis and effects of the number of nests of DO loops during vector supercomputing
[NAL-TR-1146] p 748 N94-13453
Computational mechanics and supercomputing at LLNL
[DE93-016453] p 754 N94-14435
An overview of parallel scientific visualization
[DE93-017105] p 755 N94-14521
SUPERCONDUCTING FILMS
Non-linear effects in vortex viscous flow in superconductors-role of finite heat removal velocity
[DE93-621785] p 618 N94-12856
High-resolution Z-contrast imaging and hole concentration mapping of YBCO thin films
[DE93-015803] p 808 N94-13930
Measurement of penetration depth lambda(T) in YBa2Cu3O(7-delta) thin film
[DE93-014587] p 810 N94-14122
Formation of textured YBCO films by laser ablation
[DE93-013131] p 581 N94-14319
Superconductivity devices: Commercial use of space
[NASA-CR-194163] p 625 N94-14324
Kinetics of photodeposition of superconducting films
[DE93-015511] p 812 N94-14348
Effects of depositon rate on Bi2Sr2CaCu2O(8+x) and Bi2Sr(1.6)La(0.4)CuO(6+x) epitaxial thin film growth by pulsed-laser ablation
[DE93-015797] p 812 N94-14362
SUPERCONDUCTING MAGNETS
Technology assessments of advanced energy storage systems for electric and hybrid vehicles
[DE93-014395] p 701 N94-12913
Heat and seed recovery technology project
[DE93-009203] p 800 N94-13913
SUPERCONDUCTING SUPER COLLIDER
Building the repositories to serve — Superconducting Super Collider information system
[DE93-014100] p 821 N94-12983
Integrating PAW, a graphical analysis interface to Sybase
[DE93-014172] p 755 N94-14581
Proton-proton scattering contribution to emittance growth
[DE93-016090] p 787 N94-14588
SUPERCONDUCTIVITY
To the theory of triplet pairing in Fermi-liquid model
[DE93-621770] p 816 N94-12855
A superconducting large-angle magnetic suspension
[NASA-CR-189735] p 596 N94-13141
Study on superconducting basic technology for space application, part 1
[NASDA-CNT-930015-PT-1] p 622 N94-13425
Theoretical SIS mixer research
[AD-A266323] p 807 N94-13580
Direct submillimeter absorptivity measurements on epitaxial Ba(1-x)K(x)BiO3 films at 2K
[DE93-013904] p 815 N94-14699
Muon spin relaxation studies of heavy fermion superconductors
[DE93-014576] p 815 N94-14773
SUPERCONDUCTORS
Study on superconducting basic technology for space application, part 1
[NASDA-CNT-930015-PT-1] p 622 N94-13425
Empirical tight-binding parameters for solid C(sub 60)
[DE93-623061] p 807 N94-13510
Casting of superconducting composite materials (M-4)
p 586 N94-13736
Combustion synthesis and engineering of nanoparticles for electronic, structural, and superconductor applications
[DE93-016286] p 809 N94-13981
Superconductivity devices: Commercial use of space
[NASA-CR-194163] p 625 N94-14324
Theoretical studies of breakdown in random media
[DE93-018107] p 558 N94-14418
Is K3C60 a line phase?
[DE93-016700] p 813 N94-14517

Muon spin relaxation studies of heavy fermion superconductors
[DE93-014576] p 815 N94-14773
SUPERCRITICAL FLOW
Droplet-turbulence interactions in sprays exposed to supercritical environmental conditions
[NASA-CR-194408] p 638 N94-14308
SUPERFLUIDITY
To the theory of triplet pairing in Fermi-liquid model
[DE93-621770] p 816 N94-12855
Sidewall thermometry perturbations to nonlinear heat transport near the (lambda) transition in He-4
[DE93-014990] p 817 N94-14453
On the statistical theory of the even-even nucleons levels' density
[DE93-623990] p 788 N94-14875
SUPERHIGH FREQUENCIES
Rain rate duration statistics derived from the Mid-Atlantic coast rain gauge network p 614 N94-14663
Tree attenuation at 20 GHz: Foliage effects p 615 N94-14672
SUPERLATTICES
Surfaces and interfaces of ceramics and metals
[DE93-014959] p 578 N94-13408
Electronic states in systems of reduced dimensionality
[DE93-014440] p 815 N94-14739
SUPERNOVAE
Cosmic physics data analysis program
[NASA-CR-194357] p 846 N94-12826
A program of correlated observations using the EGRET instrument on GRO and the IMB neutrino detector
[NASA-CR-194367] p 783 N94-13856
Charge-exchange reactions and weak interaction rates for Type 2 supernovae
[DE93-015104] p 783 N94-13893
SUPERPLASTICITY
Effect of thermal processing practices on the properties of superplastic Al-Li alloys
[NASA-CR-4548] p 574 N94-14850
SUPERPRESSURE BALLOONS
Electrodynamics of the middle atmosphere: Superpressure balloon program
[NASA-CR-193671] p 712 N94-13293
SUPERSONIC AIRCRAFT
Turbulence modeling of free shear layers for high-performance aircraft
[NASA-CR-193659] p 520 N94-12799
High flux heat exchanger
[AD-A266341] p 636 N94-13730
SUPERSONIC AIRFOILS
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 2: Locally-stationary time series analysis of nonstationary random responses
[NAL-TR-1179] p 502 N94-13345
SUPERSONIC BOUNDARY LAYERS
Exploratory study of in-plane streamline curvature effects on a turbulent boundary layer at a Mach number of 3
[NASA-CR-193673] p 501 N94-13292
A three-dimensional supersonic turbulent boundary layer generated by an isentropic compression p 503 N94-13556
Investigation of the dilatational dissipation in compressible homogeneous shear flow p 645 N94-14758
Response of a supersonic boundary layer to a compression corner p 645 N94-14759
SUPERSONIC COMBUSTION
Chemical reactions in scramjet engines: Reduced kinetic models for ignition, combustion and nozzle flow
[NAL-TR-1184] p 563 N94-13458
A technique for direct measurement of skin friction in supersonic combustion flow p 503 N94-13555
Modeling and simulation of transport and combustion phenomena in a supersonic mixing layer
[ONERA-NT-1992-11] p 565 N94-14194
SUPERSONIC COMBUSTION RAMJET ENGINES
An experimental investigation of mixing enhancement in a simulated scramjet combustor by use of swirling jets
[NASA-TM-109246] p 518 N94-13190
Chemical reactions in scramjet engines: Reduced kinetic models for ignition, combustion and nozzle flow
[NAL-TR-1184] p 563 N94-13458
A technique for direct measurement of skin friction in supersonic combustion flow p 503 N94-13555
SUPERSONIC DRAG
Aerodynamics of a sphere and an oblate spheroid for Mach numbers from 0.6 to 10.5 including some effects of test conditions
[NASA-TM-109016] p 500 N94-13172
SUPERSONIC FLIGHT
The problem of the sonic boom for future high-speed transport aircraft
[ESA-TT-1286] p 776 N94-13692
Performance seeking control: Program overview and future directions
[NASA-TM-4531] p 519 N94-14855
SUPERSONIC FLOW
An experimental investigation of mixing enhancement in a simulated scramjet combustor by use of swirling jets
[NASA-TM-109246] p 518 N94-13190
High speed transition prediction
[NASA-CR-194125] p 502 N94-13422
An experimental investigation of shock wave/vortex interaction p 634 N94-13574
Development of a general purpose multigrid accelerated Navier-Stokes solver p 641 N94-14613
Response of a supersonic boundary layer to a compression corner p 645 N94-14759
A new Lagrangian method for three-dimensional steady supersonic flows
[NASA-TM-106068] p 510 N94-14847
SUPERSONIC FLUTTER
Development of a high-speed mechanical drive system for oscillating an annular blade row in the bending mode
[NAL-TR-1170] p 502 N94-13342
SUPERSONIC JET FLOW
Mixing noise reduction for rectangular supersonic jets by nozzle shaping and induced screech mixing
[NASA-TM-106364] p 508 N94-14208
SUPERSONIC NOZZLES
Chemical reactions in scramjet engines: Reduced kinetic models for ignition, combustion and nozzle flow
[NAL-TR-1184] p 563 N94-13458
Mixing noise reduction for rectangular supersonic jets by nozzle shaping and induced screech mixing
[NASA-TM-106364] p 508 N94-14208
SUPERSONIC SPEED
A comparison of computational and experimental data for a subscale high speed propulsive nozzle at low mach numbers
[AD-A266543] p 504 N94-13705
A computational study of the base region flow field for the M865 projectile
[ARL-TR-109] p 504 N94-13795
SUPERSONIC WIND TUNNELS
CNSFV code development, virtual zone Navier-Stokes computations of oscillating control surfaces and computational support of the laminar flow supersonic wind tunnel
[NASA-CR-194259] p 504 N94-14030
SUPPORT INTERFERENCE
Flow-field interference produced by an asymmetrical support strut
[IAR-AN-75] p 504 N94-14031
SUPPORT SYSTEMS
Building the repositories to serve --- Superconducting Super Collider information system
[DE93-014100] p 821 N94-12983
An evaluation of ZIM and entity-relational models in managing databases for decision support systems
[ERB-1034] p 824 N94-14202
SURFACE ACOUSTIC WAVE DEVICES
Integrated optics technology transfer
[DSIS-93-00179] p 792 N94-13868
Portable acoustic wave sensor systems for real-time monitoring of volatile organic compounds
[DE93-013753] p 582 N94-14511
SURFACE COOLING
Excimer laser surface processing of titanium
[DE93-012633] p 570 N94-13512
Modelling of the temperature distribution in a copper roll for the design of a system of cooled rolls adapted to vertical strip casting
[IMI-93RT-21200-1436-G] p 557 N94-13866
SURFACE DEFECTS
Absorption and damage thresholds of low defect density hafnia deposited with activated oxygen
[DE93-013853] p 655 N94-13243
SURFACE DISTORTION
A benchmark bending test of a thick specimen, Part 1: Experiments
[ARL-RR-6-PT-1] p 670 N94-12927
A benchmark bending test of a thick specimen. Part 2: Surface displacement measurements
[ARL-RR-6-PT-2] p 670 N94-12928
SURFACE EMITTING LASERS
Horizontal-cavity surface-emitting lasers, superluminescent LEDs, and amplifiers, and parabolic gain unstable resonator semiconductor lasers p 656 N94-13573
SURFACE ENERGY
Measuring surface fluxes in CAPE
[NASA-CR-193664] p 711 N94-12788
SURFACE FINISHING
Impedance-power effects on plasma polymer surface finish using a helical resonator discharge
[DE93-016454] p 803 N94-14590
Electrochemical planarization for microelectronic circuits
[DE93-017214] p 627 N94-14870
SURFACE GEOMETRY
Multigrid solution of internal flows using unstructured solution adaptive meshes
[NASA-CR-194233] p 638 N94-14356
SURFACE LAYERS
Incomplete melting of the Au(100) surface
[DE93-623192] p 569 N94-13227
About the influence of inert gas ion implantation on metal corrosion stability
[DE93-620574] p 569 N94-13360
SURFACE NAVIGATION
Passive recovery of scene geometry for an unmanned ground vehicle
[AD-A266670] p 766 N94-14777
SURFACE PROPERTIES
Theoretical treatment of the bulk and surface properties of fluids containing long, flexible molecules
[DE93-015560] p 575 N94-12861
Procedures for analysis of debris relative to Space Shuttle systems
[NASA-TM-109190] p 534 N94-12900
Computer simulations for the adsorption of polymers onto surfaces
[DE93-016667] p 577 N94-13070
Surface analysis of bearings
[AD-A266800] p 661 N94-13122
Computer code for scattering from impedance bodies of revolution. Part 3: Surface impedance with s and phi variation. Analytical and numerical results
[NASA-CR-193396] p 599 N94-13264
High resolution electron energy loss studies of surface vibrations
[DE93-014441] p 781 N94-13283
Barium fluoride research and development at Lawrence Livermore National Laboratory
[DE93-014682] p 807 N94-13405
Surfaces and interfaces of ceramics and metals
[DE93-014959] p 578 N94-13408
Surface science instrumentation for the study of important catalytic and electrochemical interfaces
[DE93-015068] p 563 N94-13413
Excimer laser surface processing of titanium
[DE93-012633] p 570 N94-13512
Applications of surface science to solid lubricants
[SMC-TR-93-24] p 579 N94-13903
Analysis of microstrip patch antennas with nonzero surface resistance
[NASA-TP-3362] p 604 N94-13916
The de Haas-van Alphen studies and Fermi surface properties of organic superconductors (ET)2X
[DE93-015157] p 623 N94-13925
Kinetics of photodeposition of superconducting films
[DE93-015511] p 812 N94-14348
Ploughing on gold using a Scanning Tunneling Microscope
[DE93-012632] p 812 N94-14365
Determination of the surface cleanliness of metals by FT-IR spectroscopy
[DE93-013252] p 565 N94-14525
Ultra-soft x ray absorption spectroscopy: A bulk and surface probe of materials
[DE93-014325] p 566 N94-14582
Surface characterization of LDEF materials
[NASA-CR-194519] p 543 N94-14683
SURFACE REACTIONS
Applications of surface science to solid lubricants
[SMC-TR-93-24] p 579 N94-13903
Machining and grinding: High rate deformation in practice
[DE93-010718] p 664 N94-14457
Quantum state resolved desorption of CO from solid surfaces
[DE93-016876] p 814 N94-14597
SURFACE ROUGHNESS
Transition prediction and control in subsonic flow over a hump
[NASA-CR-4543] p 629 N94-13066
Processing and mechanical properties of silicon carbide platelet reinforced alumina composites p 556 N94-13557
Experimental measurement of local heat transfer coefficients over discrete roughened plates using infrared thermography p 635 N94-13652
Impedance-power effects on plasma polymer surface finish using a helical resonator discharge
[DE93-016454] p 803 N94-14590
Investigation of Zerodur material processing
[NASA-CR-193842] p 793 N94-14903
SURFACE ROUGHNESS EFFECTS
Two-dimensional Navier-Stokes heat transfer analysis for rough turbine blades
[NASA-TM-106008] p 629 N94-13027

Transition prediction and control in subsonic flow over a hump
[NASA-CR-4543] p 629 N94-13066

SURFACE TEMPERATURE
Measuring surface fluxes in CAPE
[NASA-CR-193664] p 711 N94-12788
Coupled thermal response of objects and participating media in fires and large combustion systems
[DE93-012848] p 561 N94-12819
Effects of surface thermal forcing on stratified flow past an isolated obstacle p 633 N94-13553
Experimental investigation of the effects of blowing ratio parameter on heat transfer to a film-cooled flat plate
[AD-A266599] p 636 N94-13780
Wear-mechanism modelling
[DE93-012311] p 579 N94-13974
The accuracy of approximating radiative heat transfer using a temperature dependent thermal conductivity
[DE93-013105] p 638 N94-14318

SURFACE TREATMENT
Excimer laser surface processing of titanium
[DE93-012633] p 570 N94-13512
Free-exciton recombination in GaAs
[DE93-009843] p 809 N94-14079

SURFACE WATER
Educational module for the Higher Agricultural Education. Part 2: Eutrophication observed by remote sensing: An educational approach to water quality monitoring
[BCRS-92-11B] p 818 N94-14462

SURFACE WAVES
Excitation of coupled waves in plasma periodic structures by relativistic electron beam and acceleration of charged particles
[DE93-621657] p 794 N94-12853

SURFACES
Calculating intersections of surfaces in screen space
[NASA-CR-191498] p 745 N94-13185

SURFACTANTS
Computer simulations for the adsorption of polymers onto surfaces
[DE93-016667] p 577 N94-13070
Surfactant studies for bench-scale operation
[NASA-CR-194097] p 701 N94-13187
Surfactant studies for bench-scale operation
[NASA-CR-194511] p 564 N94-13947

SURVEYS
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 18: A comparison of the technical communication practices of aerospace engineers and scientists in India and the United States
[NASA-TM-109006] p 821 N94-13057
Defining the performance gap: Conducting a self-assessment p 666 N94-13155
User observations on information sharing (corporate knowledge and lessons learned)
[NASA-TM-104781] p 819 N94-13400
Magic mirror on the wall, who's the fastest database of them all? A survey of database benchmarks
[AD-A266437] p 823 N94-13701
A review of robust detection
[DSIS-93-00400] p 603 N94-13829
Selected data on academic science and engineering R and D expenditures: Fiscal Year 1991
[NSF-92-329] p 819 N94-13982
Generic results of the space physics community survey
[NASA-CR-194538] p 818 N94-13984

SWEDEN
The Swedish ISY contribution p 695 N94-14256

SWELLING
An experimental study on the effect of die geometry on swell and sag in the parison extrusion stage
[IMI-93RT-42400-1476-G] p 597 N94-14070

SWEPT WINGS
Three-Dimensional Boundary-Layer program (BL3D) for swept subsonic or supersonic wings with application to laminar flow control
[NASA-CR-4531] p 629 N94-13073

SWIRLING
An experimental investigation of mixing enhancement in a simulated scramjet combustor by use of swirling jets
[NASA-TM-109246] p 518 N94-13190

SWITCHES
Development of UHF spark-switched L-C Oscillators
[DE93-015019] p 623 N94-13892

SWITCHING
Charge storage and switching phenomena with molecular assemblies of metal complexes
[AD-A266673] p 787 N94-14778

SWITCHING CIRCUITS
Evolution of high-repetition-rate induction accelerators through advancements in switching
[DE93-012599] p 654 N94-12963

SYMBOLS
Application of symbolic and algebraic manipulation software in solving applied mechanics problems
[NASA-CR-4544] p 596 N94-13798

SYMMETRY
Aspects of symmetry violation
[DE93-011003] p 779 N94-12997
Determination of channeling perspectives for complex crystal structures
[DE93-012872] p 805 N94-13009
Resonant x ray Raman scattering from atoms and molecules
[DE93-015158] p 784 N94-13896

SYNAPSES
Determining neural network connectivity using evolutionary programming
[AD-A266853] p 766 N94-14882

SYNCHRONISM
Solving integer programs from dependence and synchronization problems
[AD-A265702] p 767 N94-13284
A hardware implementation of a provably correct design of a fault-tolerant clock synchronization circuit
[NASA-TM-109001] p 759 N94-13450
Fine time uplink synchronization for frequency-hopped spread spectrum satellite communication system
[ISBN-0-315-54370-1] p 600 N94-13488
Simulation of downlink synchronization for a frequency-hopped satellite communication system
[DSIS-93-00477] p 605 N94-13941

SYNCHRONOUS MOTORS
Design and application of electromechanical actuators for deep space missions
[NASA-CR-194145] p 663 N94-14134

SYNCHROTRON RADIATION
Proceedings of the Workshop on Applications of Synchrotron Radiation to Trace Impurity Analysis for Advanced Silicon Processing
[DE93-013389] p 805 N94-13020
Measurement of the spin of a particle using undulator radiation
[DE93-014334] p 780 N94-13149
Application of synchrotron radiation in chemical dynamics
[DE93-015040] p 563 N94-13411
Applications of surface science to solid lubricants
[SMC-TR-93-24] p 579 N94-13903
Comparative study of x ray and microwave emissions during solar flares
[NASA-CR-194532] p 845 N94-14577

SYNCHROTRONS
Proceedings of the Workshop on Applications of Synchrotron Radiation to Trace Impurity Analysis for Advanced Silicon Processing
[DE93-013389] p 805 N94-13020
A new formulation of longitudinal coherent instabilities
[DE93-014288] p 789 N94-13220
The evolution of tensor polarization
[DE93-017209] p 790 N94-14897

SYNCOM 4 SATELLITE
STS-32 mission highlights resource tape
[NASA-TM-109291] p 531 N94-13631

SYNOPTIC METEOROLOGY
Storm prediction through barometric field analysis
[PUBL-SER-A-129] p 720 N94-13587
AMIP: Diagnostic subproject on the variability in the tropics: Synoptic to intraseasonal time scales
[DE93-009287] p 721 N94-13914

SYNTHESIS (CHEMISTRY)
Correlations of the growth, structure, and stress with the adhesion of diamond films on tungsten
[DE93-012855] p 576 N94-12912
Synthesis inversion of atmospheric CO2 using the GISS tracer transport model
[CSIRO-TP-29] p 709 N94-14095
Catalytic arene hydrogenation using early transition metal hydride compounds
[DE93-015500] p 573 N94-14402

SYNTHETIC APERTURE RADAR
Preparations for and first results of the calibration and interpretation of ERS-1 SAR imagery over land
[BCRS-92-13] p 684 N94-13123
A combined analogue and digital pulse compression system using large time bandwidth product signals for use in synthetic aperture radar
[ISBN-0-315-54373-6] p 600 N94-13489
Phase aligner for the Electronically Scanned Thinned Array Radiometer (ESTAR) instrument
[NASA-TM-4518] p 623 N94-13878
Feature discovery on segmented objects in SAR imagery using self-organizing neural networks
[DE93-010685] p 686 N94-14056
Testing various time-frequency distribution techniques
[DREO-TN-92-17] p 606 N94-14062
Earth Observation Center Annual Report on Research and Development, Fiscal Year 1992
[EOC-92-01-0007] p 687 N94-14091
Calibration and in-house validation results of JERS-1 data p 687 N94-14092
Results from ERS-1 and JERS-1 SAR calibration experiments and data analysis p 688 N94-14210
Geologic application of JERS-1 SAR data p 688 N94-14211
Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR p 688 N94-14212
An exact processing algorithm for wide beam spaceborne SAR data p 689 N94-14213
Survey of subsurface geophysical exploration technologies adaptable to an airborne platform
[DE93-015080] p 717 N94-14294
Ionospheric effects on a wide-bandwidth, polarimetric, space-based, synthetic-aperture radar
[DE93-015084] p 612 N94-14512
Microwave interconnection
[DE93-016580] p 625 N94-14533

SYNTHETIC FUELS
Status and future opportunities for conversion of synthesis gas to liquid energy fuels
[DE93-010025] p 584 N94-14089

SYSTEM FAILURES
STS-55 pad abort: Engine 2011 oxidizer preburner augmented spark igniter check valve leak
[NASA-CR-193830] p 533 N94-12806
Computational problems with the binomial failure rate model and incomplete common cause failure reliability data
[DE93-014346] p 669 N94-14143

SYSTEM IDENTIFICATION
System identification for Space Station Freedom using observer/Kalman filter Markov parameters
[NASA-CR-191521] p 539 N94-12976
Feasibility study of an orbiting laboratory for testing CSI technology
[NASA-CR-191524] p 540 N94-13016
An analytic modeling and system identification study of rotor/fuselage dynamics at hover p 524 N94-13312
Flight testing and frequency domain analysis for rotorcraft handling qualities characteristics p 526 N94-13324
Test/analysis correlation and model updating of the STARS 1 and 2 missile systems
[DE93-013774] p 748 N94-13578
Identification of continuous-time dynamical systems: Neural network based algorithms and parallel implementation
[DE93-014427] p 766 N94-14737

SYSTEMS ANALYSIS
Nuclear propulsion systems engineering
[DE93-010791] p 548 N94-12870
Analysis and effects of the number of nests of DO loops during vector supercomputing
[NAL-TR-1146] p 748 N94-13453
The OOA technique in information systems
[REPT-72-92] p 823 N94-13863
Heat and seed recovery technology project
[DE93-009203] p 800 N94-13913
Transformation and composition of refusal graphs: Testability analysis
[LAAS-92435] p 751 N94-13995
Optical systems integrated modeling p 547 N94-14837
Laser power beaming system analyses
[NASA-CR-193840] p 660 N94-14904

SYSTEMS ENGINEERING
Solar dynamic power system development for Space Station Freedom
[NASA-RP-1310] p 548 N94-12807
Nuclear propulsion systems engineering
[DE93-010791] p 548 N94-12870
Design, qualification and operation of nuclear rockets for safe Mars missions
[DE93-010792] p 549 N94-12996
Glossary of SSDC terms and acronyms
[DE93-013697] p 823 N94-13352
Electrical Actuation Technology Bridging
[NASA-CP-3213] p 551 N94-13417
Space and Earth sciences, computer systems, and scientific data analysis support, volume 1
[NASA-CR-194535] p 741 N94-13788
Hypersonic overview p 505 N94-14154
Integrating interface slicing into software engineering processes
[NASA-CR-192761] p 754 N94-14368
Formal functional test designs with a test representation language p 609 N94-14383
The further development and refinement of an expert-systems approach to the creative design of mechanisms and mechanical systems
[AD-A266812] p 665 N94-14901

SYSTEMS INTEGRATION
System integration and demonstration of adhesive bonded high temperature aluminum alloys for aerospace structure, phase 2
[NASA-CR-191459] p 575 N94-12792
Electric propulsion system technology
[NASA-CR-194100] p 549 N94-13055
Integration between geographic information systems and environmental simulation models
[REPT-93-004] p 823 N94-13806
Advanced Communications ESM System (ACES) testbed: Integration study
[DSIS-93-00345] p 604 N94-13939
Activities of Institute for Information Technology
[CNR-35024] p 824 N94-14069
Experimental instrumentation system for the Phased Array Mirror Extendible Large Aperture (PAMELA) test program
[NASA-CR-194421] p 705 N94-14430
Small scale adaptive optics experiment systems engineering
[NASA-CR-194419] p 793 N94-14548
Optical systems integrated modeling
p 547 N94-14837

SYSTEMS SIMULATION
Real-time dynamic simulation of the Cassini spacecraft using DARTS. Part 2: Parallel/vectorized real-time implementation p 680 N94-14639
Space Station Common Berthing Mechanism, a multi-body simulation application p 544 N94-14640

T

T TAURI STARS
Search for x ray emitting young stars outside of massive molecular clouds
[NASA-CR-193609] p 830 N94-13462

TABLES (DATA)
A benchmark bending test of a thick specimen. Part 2: Surface displacement measurements
[ARL-RR-6-PT-2] p 670 N94-12928
Royal Belgium observatory calendar: 156th year
[ETN-93-94221] p 833 N94-14811

TACTILE SENSORS (ROBOTICS)
Development of a tactile and vision integrated system, and object identification techniques for SPDM applications
[DSIS-93-00153] p 764 N94-13842
Development of a computer vision system to supplement the active tactile sensing capability in a structured environment
[DSIS-93-00072] p 764 N94-13844

TAIL ASSEMBLIES
Low-speed wind tunnel tests on four types of joined-wing aircraft models
[NAL-TR-1167] p 501 N94-13340

TANKER AIRCRAFT
Spare parts analysis of the MK.32B-751 AAR pod
[DSIS-93-00737] p 774 N94-13549

TANTALUM
Shock compression and quasielastic release in tantalum
[DE93-014566] p 811 N94-14329

TANTALUM ALLOYS
Metastability of yttrium-oxides
[DE93-016548] p 813 N94-14440

TARGET ACQUISITION
Infrared transmission and path radiance through dust and fog
[AD-A265825] p 791 N94-12979
A piloted simulation investigation of the normal load factor and longitudinal thrust required for air-to-air acquisition and tracking p 522 N94-13301

TASK PLANNING (ROBOTICS)
Robot programming, natural computation and conceptual graphs
[ITN-93-85193] p 748 N94-13539
Robot-task compliance: The energy criterion
[ITN-93-85196] p 763 N94-13568

TASKS
Work/rest schedules and performance of F/A-18 aviators during Fleet Exercise 1992
[AD-A265826] p 735 N94-12982

TEARING MODES (PLASMAS)
Nonlinear evolution of tearing modes in inhomogeneous plasmas
[PPL-133] p 798 N94-13564

TECHNOLOGIES
JPRS report: Science and technology. Central Eurasia: Space
[JPRS-USP-93-003] p 828 N94-13182
Heidegger's thinking p 736 N94-13442
Science, technology, and the federal government: National goals for a new era p 827 N94-14115

TECHNOLOGY ASSESSMENT
Where no flag has gone before: Political and technical aspects of placing a flag on the Moon
[NASA-CR-188251] p 827 N94-12800
Technology assessments of advanced energy storage systems for electric and hybrid vehicles
[DE93-014395] p 701 N94-12913
Compendium of executive summaries from the maglev system concept definition
[PB93-154938/GAR] p 661 N94-13285
Status and future opportunities for conversion of synthesis gas to liquid energy fuels
[DE93-010025] p 584 N94-14089
Optical systems integrated modeling
p 547 N94-14837
Advanced optical instruments technology
p 547 N94-14838

TECHNOLOGY TRANSFER
Catalysis and biocatalysis program
[NASA-CR-194105] p 727 N94-12793
Integrated optics technology transfer
[DSIS-93-00179] p 792 N94-13868
Center of excellence in rotary wing technology
[AD-A266655] p 510 N94-14799

TECHNOLOGY UTILIZATION
Technology Applications Team: Applications of aerospace technology
[NASA-CR-194362] p 828 N94-13104
Technology parks and the cooperation among universities and firms: The cases of Campinas, Sao Jose dos Campos e Sao Carlos
[INPE-5251-TAE/04] p 818 N94-13427
Sequestering carbon dioxide in industrial polymers: Building materials for the 21st century
[DE93-016087] p 580 N94-14297
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 38: Computer Mediated Communication (CMC) and the communication of technical information in aerospace
[NASA-TM-109330] p 826 N94-14489
Transform coding for space applications
[NASA-TM-106362] p 612 N94-14542
Workshop Proceedings: Optical Systems Technology for Space Astrophysics in the 21st Century, volume 3
[NASA-CR-194102] p 545 N94-14830

TECTONICS
The nature and origin of periodically spaced tectonic features on Mars
[NASA-CR-193821] p 842 N94-13199
The 1990 Western Pacific Geophysics meeting
[NASA-CR-193456] p 712 N94-13334
The American Geophysical Union Chapman Conference on Tectonics and Topography
[NASA-CR-193454] p 713 N94-13335
Regional tectonic analysis of Venus as part of the Pioneer Venus guest investigator project
[NASA-CR-194079] p 842 N94-13561
Overview: Gas hydrate geology and geography
[DE93-014043] p 688 N94-14151
Organic Geochemical and tectonic evolution of the Midcontinent Rift system
[DE93-015093] p 717 N94-14338

TELECOMMUNICATION
Adaptive Signal Processing Testbed
[DSIS-93-00258] p 604 N94-13869

TELEOPERATORS
Force reflecting hand controller for manipulator teleoperation
[NASA-CR-191345] p 661 N94-13129

TELEROBOTICS
Force reflecting hand controller for manipulator teleoperation
[NASA-CR-191345] p 661 N94-13129

TELESCOPES
Some flow properties of telescope enclosures estimated from water channel tests: Application of the flow visualization techniques
[NAL-TR-1178T] p 830 N94-13452
Rocket and laboratory studies in astronomy
[NASA-CR-194410] p 832 N94-13966
Telescope pointing for GOPEX p 610 N94-14389
Experimental instrumentation system for the Phased Array Mirror Extendible Large Aperture (PAMELA) test program
[NASA-CR-194421] p 705 N94-14430
Small scale adaptive optics experiment systems engineering
[NASA-CR-194419] p 793 N94-14548

TEMPERATE REGIONS
Nonlinear relationships between particulate absorption and chlorophyll: Detritus or pigment packaging?
[AD-A266806] p 731 N94-14899

TEMPERATURE CONTROL
Thermal Expert System (TEXSYS): Systems automony demonstration project, volume 1. Overview
[NASA-TM-102877] p 538 N94-13201
Miscibility of lubricants with refrigerants, phase 1
[DE93-014766-PHASE-1] p 596 N94-13407
Thermal Expert System (TEXSYS): Systems autonomy demonstration project, volume 2. Results
[NASA-TM-102877] p 538 N94-13989
Propulsion integration p 508 N94-14174
Microchannel cooled heatsinks for high average power laser diode arrays
[DE93-016533] p 658 N94-14442
Thermal design of hybrid circuits: Tools and methodology
[LAAS-92515] p 626 N94-14713
Analysis, approximation, and computation of a coupled solid/fluid temperature control problem
[NASA-TM-106351] p 771 N94-14731

TEMPERATURE DEPENDENCE
Breadboard activities for advanced protein crystal growth
[NASA-CR-193559] p 803 N94-12796
Modeling ignition chemistry
[DE93-012340] p 561 N94-12910
Temperature dependence of diffusivities, preliminary definition phase
[NASA-CR-192613] p 648 N94-13326
High temperature electromagnetic characterization of thermal protection system tile materials
[NASA-CR-189687] p 578 N94-13431
High temperature behavior of glass (M-8)
p 587 N94-13740
A circadian rhythm of conidiation in Neurospora crassa (L-12) p 593 N94-13769
The accuracy of approximating radiative heat transfer using a temperature dependent thermal conductivity
[DE93-013105] p 638 N94-14318

TEMPERATURE DISTRIBUTION
Modelling of the temperature distribution in a copper roll for the design of a system of cooled rolls adapted to vertical strip casting
[IMI-93RT-21200-1436-G] p 557 N94-13866
ROSAT observations of clusters with wide-angle tailed radio sources
[NASA-CR-193784] p 833 N94-14405

TEMPERATURE EFFECTS
Non-linear effects in vortex viscous flow in superconductors-role of finite heat removal velocity
[DE93-621785] p 618 N94-12856
Quantitative mapping of pore fraction variations in silicon nitride using an ultrasonic contact scan technique
[NASA-TP-3377] p 665 N94-13056
Thermal gradient-induced deflection of a thick-walled cylinder with bending residual stresses
[AD-A266347] p 673 N94-13777
Materials/structures testing p 506 N94-14164
Multiwavelength observations of unidentified high energy gamma ray sources
[NASA-CR-194536] p 840 N94-14688
Phases and phase transitions of polymeric liquid crystals: A high resolution x ray diffraction and light scattering study
[ITN-93-85218] p 816 N94-14826
Thermal history effects on electrical relaxation and conductivity for potassium silicate glass with low alkali concentrations
[NASA-TM-106324] p 583 N94-14845
Quenching and annealing effects on the specific heat of YBa2Cu3O(7-delta)
[DE93-016483] p 816 N94-14868
Thyroid alterations in porcine after prolonged exposure to cold or heat
[AD-A266840] p 733 N94-14879

TEMPERATURE GRADIENTS
Ceramic matrix composites by microwave assisted CVI
[DE93-012640] p 576 N94-12916
Study of bubble behavior in weightlessness (effects of thermal gradient and acoustic stationary wave) (M-16)
p 589 N94-13748
Thermal gradient-induced deflection of a thick-walled cylinder with bending residual stresses
[AD-A266347] p 673 N94-13777
The accuracy of approximating radiative heat transfer using a temperature dependent thermal conductivity
[DE93-013105] p 638 N94-14318
Thermoelastic response of metal matrix composites with large-diameter fibers subjected to thermal gradients
[NASA-TM-106344] p 560 N94-14823
Anomalous ion transport and feedback control
[DE93-018324] p 803 N94-14874

TEMPERATURE MEASUREMENT
Ohmic heating of composite candidate graphite-fiber/coating combinations
[NASA-TM-4491] p 554 N94-12871
Two temperature modeling and experimental measurements of laser sustained hydrogen plasmas
[AD-A265750] p 796 N94-13039

The corrosion behavior of 8001 Al under heat-transfer conditions in an aqueous loop system
[DE93-013450] p 569 N94-13242
Adaptive control of interface by temperature and interface profile feedback in transparent multi-zone crystal growth furnace
[NASA-CR-194140] p 762 N94-13253
An experimental investigation of the redistribution of gas stream total temperature in a high turning angle transonic planar cascade
[ISBN-0-315-60791-2] p 502 N94-13369
Experimental measurement of local heat transfer coefficients over discrete roughened plates using infrared thermography p 635 N94-13652
Recent flight-test results of optical airdata techniques
[NASA-TM-4504] p 517 N94-13791
High frame rate thermal imager for hypersonic wind tunnel applications
[ONERA-NT-1992-12] p 650 N94-14009
NASA metrology and calibration, 1993
[NASA-TM-109280] p 597 N94-14410
Two color holographic interferometry for microgravity application
[NASA-CR-194424] p 651 N94-14447
Investigation of the feasibility of optical diagnostic measurements at the exit of the SSME
[NASA-CR-193832] p 553 N94-14682
Time resolved measurement of electron temperatures of exploding foil x ray laser plasmas
[DE93-017161] p 803 N94-14894

TEMPERATURE PROFILES
Study of possible mechanisms of instability due to heat transfer
[INPE-5448-TDI/494] p 628 N94-12966

TEMPORAL DISTRIBUTION
Spatial and temporal variability of precipitation and chemistry: Case studies from the frontal boundary study
[DE93-007883] p 708 N94-13910
Chemistry and transport in a multi-dimensional model
[NASA-CR-194425] p 716 N94-13969
Potential evapotranspiration in Belgium: Spatial and temporal variability
[PUBL-SER-A-130] p 686 N94-13994

TEMPORAL RESOLUTION
High time resolution studies of binary x ray pulsars
[NASA-CR-194395] p 832 N94-13894
Supervised classification of remotely sensed images
[DLR-FB-92-07] p 700 N94-14428

TENSILE PROPERTIES
Tensile properties of LE-7 engine material with welded joint
[NAL-TR-1188] p 570 N94-13460
UK interlaboratory tensile tests on Al alloy/SiC particulate metal matrix composites
[NPL-DMM(A)-77] p 570 N94-13666
Effect of thermal processing practices on the properties of superplastic Al-Li alloys
[NASA-CR-4548] p 574 N94-14850

TENSILE STRESS
Non-uniqueness in dynamic rate-independent non-associated plasticity
[AD-A266342] p 769 N94-13731

TENSILE TESTS
UK interlaboratory tensile tests on Al alloy/SiC particulate metal matrix composites
[NPL-DMM(A)-77] p 570 N94-13666
The feasibility of producing aluminum-lithium structures for cryogenic tankage applications by laser beam welding
[NASA-CR-191527] p 595 N94-14026
Elastic-plastic finite element analyses of an unidirectional, 9 vol percent tungsten fiber reinforced copper matrix composite
[NASA-TM-106304] p 559 N94-14719

TENSOR ANALYSIS
The evolution of tensor polarization
[DE93-017209] p 790 N94-14897

TENSORS
The evolution of tensor polarization
[DE93-017209] p 790 N94-14897

TERMINAL BALLISTICS
The motion of a conical shaped liner driven by explosive load
[ITN-93-85215] p 585 N94-14507

TERMINAL FACILITIES
Airport terminals: Optimum configurations and gate position requirement
[ISBN-0-315-61722-5] p 528 N94-13544

TERMINAL VELOCITY
On the motion through a viscous fluid of a spherical particle touching a plane wall: Slip boundary conditions
[DE93-012540] p 628 N94-12961

TERMINOLOGY
Glossary of SSDC terms and acronyms
[DE93-013697] p 823 N94-13352

TERMS
Glossary of SSDC terms and acronyms
[DE93-013697] p 823 N94-13352

TERNARY ALLOYS
Electronic structure and phase stability properties in ternary substitutional alloys
[DE93-013848] p 569 N94-13137
Crystal growth of ZnSe and related ternary compound semiconductors by physical vapor transport
[NASA-CR-193834] p 807 N94-13444

TERNARY SYSTEMS
Fabrication of Si-As-Te ternary amorphous semiconductor in the microgravity environment (M-13) p 588 N94-13745

TERRAIN
Evaluation of beta-spline interpolation in digital terrain models
[INPE-5475-TDI/506] p 684 N94-13364
Net radiation mapping of mountainous terrain using Landsat-5 thematic mapper imagery and digital terrain data
[ISBN-0-315-57755-X] p 685 N94-13475

TERRAIN ANALYSIS
Spectral reflectance of soils from Sao Paulo State
[INPE-5424-PRP/172] p 684 N94-13377
Satellite imagery and exogenous data integration by neural network in automation land-cover classification
[INPE-5480-PRE/1778] p 686 N94-13729
Nonlinear aspects of data integration for land-cover classification in a neural network environment
[INPE-5479-PRE/1778] p 686 N94-13789

TEST EQUIPMENT
CFM technologies for space transportation: Multipurpose hydrogen testbed system definition and tank procurement
[NASA-CR-194355] p 539 N94-12827
The Large Area Pulsed Solar Simulator (LAPSS)
[NASA-CR-194507] p 703 N94-13940

TEST FACILITIES
Molten carbonate fuel cell product development test environmental assessment/protection plan
[DE93-000288] p 702 N94-13380
Miscibility of lubricants with refrigerants, phase 1
[DE93-014766-PHASE-1] p 596 N94-13407
Development of test techniques to simulate high-frequency mechanical shock on weapon components
[KCP-613-4998] p 675 N94-13907
Heat and seed recovery technology project
[DE93-009203] p 800 N94-13913
Advanced Communications ESM System (ACES) testbed: Integration study
[DSIS-93-00345] p 604 N94-13939
EWTEST signal excision testbed: System evaluation
[DSIS-93-00346] p 607 N94-14065
A program for the investigation of the Multibody Modeling, Verification, and Control Laboratory p 682 N94-14652
A guide to the DRA 13 ft x 9 ft Low Speed Wind Tunnel Facility
[AD-A267739] p 528 N94-14876

TEST FIRING
SSME testing at Stennis Space Center
[NASA-TM-109310] p 552 N94-13617
A computational study of the base region flow field for the M865 projectile
[ARL-TR-109] p 504 N94-13795
Technical Evaluation Motor No. 10 (TEM-10)
[NASA-CR-193846] p 554 N94-14907

TEST STANDS
Advanced Turbine Technology Applications Project (ATTAP)
[NASA-CR-191088] p 828 N94-12931

TESTS
Goddard Space Flight Center robotics demo
[NASA-TM-109302] p 662 N94-13604
Optical testing p 547 N94-14836

TETHERED SATELLITES
An experimental study of tether reel system: A laboratory model
[NAL-TR-1176T] p 539 N94-12943

TETHERING
An experimental study of tether reel system: A laboratory model
[NAL-TR-1176T] p 539 N94-12943

TETHERLINES
An experimental study of tether reel system: A laboratory model
[NAL-TR-1176T] p 539 N94-12943

TETRAGONS
Low-speed wind tunnel tests on four types of joined-wing aircraft models
[NAL-TR-1167] p 501 N94-13340
Low-speed wind tunnel tests on a joined-wing aircraft model with various upper-fin
[NAL-TR-1169] p 501 N94-13341

TEXTILES
Resin transfer molding of textile composites
[NASA-CR-191505] p 554 N94-12833
Flammability of clothing, volume 2
[DSIS-93-00036-VOL-2] p 564 N94-13819
Graphite fiber textile preform/copper matrix composites
[NASA-CR-193797] p 558 N94-14050
Analysis of new composite architectures
[NASA-CR-194524] p 559 N94-14715

TEXTS
Hypertext Compiling Tools (HCT): Developing model based applications with standard hypertext systems
[REPT-92-049] p 750 N94-13822

THAILAND
Detecting land cover changes in Chiang-Mai area in Thailand p 693 N94-14241
Land evaluation for agricultural productivity in North-East Thailand using LANDSAT TM data and geographic information p 693 N94-14242

THEMATIC MAPPERS (LANDSAT)
Dendrometric variables estimation in homogeneous forests using LANDSAT TM data
[INPE-5455-TDI/497] p 684 N94-13331

THEMATIC MAPPING
Dendrometric variables estimation in homogeneous forests using LANDSAT TM data
[INPE-5455-TDI/497] p 684 N94-13331
Net radiation mapping of mountainous terrain using Landsat-5 thematic mapper imagery and digital terrain data
[ISBN-0-315-57755-X] p 685 N94-13475
Satellite imagery and exogenous data integration by neural network in automation land-cover classification
[INPE-5480-PRE/1778] p 686 N94-13729

THEOREM PROVING
EVES: An overview
[DSIS-93-00238] p 752 N94-14088

THEOREMS
No-lost theorem for parity violating nucleon-nucleon scattering experiments
[DE93-012737] p 779 N94-12949
Fast parallel string prefix-matching
[AD-A267758] p 760 N94-13924

THEORETICAL PHYSICS
Quaternions and the heuristic role of mathematical structures in physics
[DE93-622865] p 816 N94-12844
Research in theoretical nuclear physics
[DE93-015096] p 839 N94-14330

THERMAL ANALYSIS
Lifetime prediction of materials exposed to the natural space environment
[NASA-CR-193833] p 561 N94-12830
Ohmic heating of composite candidate graphite-fiber/coating combinations
[NASA-TM-4491] p 554 N94-12871
Boundary formulations for nonlinear design sensitivity analysis p 672 N94-13669
Optimization of the processing parameters of high temperature superconducting glass-ceramics: Center Director's discretionary fund final report
[NASA-TM-108421] p 808 N94-13938
Computer program for analysis of high speed, single row, angular contact, spherical roller bearing, SASHBEAN. Volume 1: User's guide
[NASA-CR-191183] p 663 N94-14445
Computer program for analysis of high speed, single row, angular contact, spherical roller bearing, SASHBEAN. Volume 2: Mathematical formulation and analysis
[NASA-CR-191182] p 664 N94-14446

THERMAL CONDUCTIVITY
Experimental investigation of the effects of blowing ratio parameter on heat transfer to a film-cooled flat plate
[AD-A266599] p 636 N94-13780
Optical and physical properties of the LiSrAlF6:Cr laser crystal
[DE93-014657] p 808 N94-13881
Thermal conductance of pressed metallic contacts augmented with Indium foil or Apiezon-N (tm) grease at liquid helium temperatures
[NASA-TM-108779] p 776 N94-14027
Physical and structural properties of a sputtered zirconia-yttria layer used as a thermal resistance
[ONERA-NT-1992-10] p 810 N94-14193
The accuracy of approximating radiative heat transfer using a temperature dependent thermal conductivity
[DE93-013105] p 638 N94-14318
Anomalous ion transport and feedback control
[DE93-018324] p 803 N94-14874

THERMAL CONTROL COATINGS
Combustion synthesis and engineering of nanoparticles for electronic, structural, and superconductor applications
[DE93-016286] p 809 N94-13981

THERMAL DECOMPOSITION
Low temperature metal-organic chemical vapor deposition growth processes for high efficiency solar cells
[DE92-010562] p 702 N94-13386
THERMAL DEGRADATION
Effect of stabilization on the recycling of polyolefins in blow moulding
[IMI-93RT-42400-1477-G] p 596 N94-13684
THERMAL DIFFUSION
Thermodiffusion in heterogeneous elastic solids and homogenization
[REPT-14/1993] p 578 N94-13468
Implementation of manufacturing techniques for planar, single mode waveguides on lithium niobate
[DSIS-93-00101] p 792 N94-13845
The role of electric field shear stabilization of turbulence in the H-mode to VH-mode transition in D3-D
[DE93-015474] p 802 N94-14583
THERMAL DIFFUSIVITY
Small scale magnetic islands in collisionless plasmas
[PPL-131] p 799 N94-13836
Collisional effects of trapped electrons on the anomalous particle and thermal pinches
[PPL-128] p 800 N94-13853
Anomalous transport due to small scale electromagnetic and large scale electrostatic modes in tokamaks
[PPL-140] p 801 N94-14206
Numerical simulations of turbulent premixed H2/O2/N2 flames with complex chemistry p 567 N94-14765
THERMAL ENERGY
Transition of building energy consumption using multi-input, single-output dynamic model
[VTT-PUBS-116] p 597 N94-14055
THERMAL ENVIRONMENTS
Low altitude plume impingement handbook
[NASA-CR-194193] p 643 N94-14741
THERMAL EXPANSION
An advanced test technique to quantify thermomechanical fatigue damage accumulation in composite materials
[NASA-CR-191147] p 555 N94-13139
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-006] p 558 N94-14573
THERMAL INSTABILITY
Study of possible mechanisms of instability due to heat transfer
[INPE-5448-TDI/494] p 628 N94-12966
THERMAL INSULATION
Arc-heating tests of thermal protection system materials for the H-2 rocket fairing
[NAL-TR-1181] p 551 N94-13455
THERMAL MAPPING
High frame rate thermal imager for hypersonic wind tunnel applications
[ONERA-NT-1992-12] p 650 N94-14009
THERMAL NOISE
Using a focal-plane array to estimate antenna pointing errors
[NASA-CR-194502] p 602 N94-13810
THERMAL PROTECTION
High temperature electromagnetic characterization of thermal protection system tile materials
[NASA-CR-189687] p 578 N94-13431
Arc-heating tests of thermal protection system materials for the H-2 rocket fairing
[NAL-TR-1181] p 551 N94-13455
Flammability of clothing, volume 2
[DSIS-93-00036-VOL-2] p 564 N94-13819
Review of test methods for material flammability
[DSIS-93-00480] p 564 N94-13942
THERMAL REACTORS
Review of nuclear thermal propulsion carbide reactor fuel corrosion and exhibit
[DE93-016605] p 585 N94-14535
THERMAL RESISTANCE
Arc-heating tests of thermal protection system materials for the H-2 rocket fairing
[NAL-TR-11ь1] p 551 N94-13455
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-004] p 559 N94-14574
THERMAL SHOCK
Cellular mechanism of turnover of the stress induced protein HSP 70
[AD-A265723] p 732 N94-13061
Thermal shock resistance of ceramic matrix composites
[NASA-CR-189136] p 557 N94-13920
THERMAL STABILITY
Structure stability and spectroscopy of metal clusters
[DE93-016142] p 567 N94-12836
Cellular mechanism of turnover of the stress induced protein HSP 70
[AD-A265723] p 732 N94-13061
Thermal design of hybrid circuits: Tools and methodology
[LAAS-92515] p 626 N94-14713
THERMAL STRESSES
Thermal gradient-induced deflection of a thick-walled cylinder with bending residual stresses
[AD-A266347] p 673 N94-13777
Thermal shock resistance of ceramic matrix composites
[NASA-CR-189136] p 557 N94-13920
Computational strategies in the dynamic simulation of constrained flexible MBS p 679 N94-14635
THERMOCHEMICAL PROPERTIES
Closed-chamber analysis of M5 propellant lot RAD-64597
[AD-A266321] p 585 N94-14145
THERMOCHEMISTRY
Conversion of light hydrocarbon gases to metal carbides for production of liquid fuels and chemicals
[DE93-014962] p 583 N94-13002
Performance effects of coal-derived contaminants on the carbonate fuel cell
[DE93-013801] p 703 N94-13693
Thermochemistry of transition metal clusters
[DE93-016201] p 571 N94-13977
THERMOCOUPLES
Widebody cabin water spray optimization tests
[DOT/FAA/CT-TN93/29] p 511 N94-14186
THERMODYNAMIC COUPLING
Homogeneous-hetergeneous combustion: Thermal and chemical coupling
[DE93-016050] p 565 N94-14403
THERMODYNAMIC CYCLES
Combustor technology for future small gas turbine aircraft
[NASA-TM-106312] p 517 N94-13142
THERMODYNAMIC EFFICIENCY
Two temperature modeling and experimental measurements of laser sustained hydrogen plasmas
[AD-A265750] p 796 N94-13039
THERMODYNAMIC PROPERTIES
Theoretical treatment of the bulk and surface properties of fluids containing long, flexible molecules
[DE93-015560] p 575 N94-12861
A time-accurate numerical method for chemically reacting flows at all Mach numbers p 500 N94-13198
Performance effects of coal-derived contaminants on the carbonate fuel cell
[DE93-013801] p 703 N94-13693
Thermochemistry of transition metal clusters
[DE93-016201] p 571 N94-13977
Lawrence Berkeley Laboratory Chemical Sciences Division
[DE93-015260] p 851 N94-14401
Review of nuclear thermal propulsion carbide reactor fuel corrosion and exhibit
[DE93-016605] p 585 N94-14535
Yield properties of tungsten and tungsten heavy alloys
[AD-A266833] p 575 N94-14878
THERMODYNAMICS
Implementation of ADI: Schemes on MIMD parallel computers
[NASA-CR-193720] p 759 N94-13204
Thermodynamic status of static and dynamic contact angles
[ISBN-0-315-73844-8] p 817 N94-13554
Optical and physical properties of the LiSrAlF6:Cr laser crystal
[DE93-014657] p 808 N94-13881
Selective excitation, relaxation, and energy channeling in molecular systems
[DE93-018819] p 785 N94-14420
Statistical mechanical theory of liquid entropy
[DE93-016524] p 817 N94-14593
Analysis, approximation, and computation of a coupled solid/fluid temperature control problem
[NASA-TM-106351] p 771 N94-14731
Thermomechanical and isothermal fatigue behavior of a (90)sub 8 titanium matrix composite
[NASA-CR-191196] p 560 N94-14822
On the statistical theory of the even-even nucleons levels' density
[DE93-623990] p 788 N94-14875
THERMOELASTICITY
Thermoelastic response of metal matrix composites with large-diameter fibers subjected to thermal gradients
[NASA-TM-106344] p 560 N94-14823
THERMOGRAPHY
Experimental measurement of local heat transfer coefficients over discrete roughened plates using infrared thermography p 635 N94-13652
High frame rate thermal imager for hypersonic wind tunnel applications
[ONERA-NT-1992-12] p 650 N94-14009
THERMONUCLEAR REACTIONS
Nuclear fusion of protons with ions of boron
[DE93-014284] p 781 N94-13219
Charged-particle evaluation methodology at Lawrence Livermore National Laboratory
[DE93-013429] p 781 N94-13251
The status of cold fusion
[DE93-012731] p 802 N94-14567
THERMOPHYSICAL PROPERTIES
Multiphase equation of state for iron
[DE93-013956] p 568 N94-12977
THERMOPLASTICITY
Development of time-dependent orthotropic constitutive law of a thermoplastic composite material
p 556 N94-13595
THERMOSPHERE
Atomic hydrogen and nitrogen distributions from atmosphere explorer measurements
[NASA-CR-194336] p 714 N94-13825
THICK FILMS
Deposition of crystalline boron thick layers from gas phase
[DE93-620499] p 576 N94-12867
Superconductivity devices: Commercial use of space
[NASA-CR-194163] p 625 N94-14324
Solution chemistry optimization of sol-gel processed PZT thin films
[DE93-013776] p 814 N94-14695
THICK PLATES
Nonlinear vibrations of thick composite plates: Higher-order shear deformation plate theory
p 556 N94-13558
Role of microstructure on fatigue durability of aluminum aircraft alloys
[AD-A266350] p 571 N94-13697
THICKNESS
The use of polarised neutron reflection for unique density profile determination in thin films
[PB93-187136] p 579 N94-13783
BALLIST: A computer program to empirically predict the bumper thickness required to prevent perforation of the Space Station by orbital debris
[NASA-CR-193825] p 543 N94-14120
THIN FILMS
Amorphous sol-gel insulating films
[DE93-012859] p 576 N94-12866
Photovoltaic Subcontract Program
[DE93-000092] p 700 N94-12868
Recovery of materials impacted at high velocity
[DE93-014150] p 576 N94-12885
Processing, fabrication and demonstration of HTS integrated microwave circuits
[AD-A265789] p 619 N94-12892
Canted magnetic moments at the Gd(0001) surface
[DE93-014327] p 805 N94-13102
Electrocatalysis issues in polymer electrolyte fuel cells
[DE93-014450] p 702 N94-13402
Poling of thin polymer films in electro optic applications
[AD-A266562] p 579 N94-13584
Studies of momentum and energy transfer across wavy gas-liquid interfaces
[AD-A266432] p 635 N94-13699
High-resolution Z-contrast imaging and hole concentration mapping of YBCO thin films
[DE93-015803] p 808 N94-13930
Boundary stability under nonequilibrium conditions
[DE93-016259] p 809 N94-13980
Measurement of penetration depth lambda(T) in YBa2Cu3O(7-delta) thin film
[DE93-014587] p 810 N94-14122
Spin polarized photoemission studies of interfacial and thin film magnetism
[DE93-014326] p 580 N94-14142
A quartz crystal microbalance study of lithium insertion and removal into evaporated films MO(y) (M = Mo, Fe, and V)
[DSIS-93-00649] p 810 N94-14203
Prism-film coupling in anisotropic planar waveguides of epitaxial (101) rutile thin films
[DE93-012912] p 811 N94-14304
Formation of textured YBCO films by laser ablation
[DE93-013131] p 581 N94-14319
Microstructural mechanisms that enhance electromigration resistance in Al-Cu thin films
[DE93-013770] p 812 N94-14345
Effects of depositon rate on Bi2Sr2CaCu2O(8+x) and Bi2Sr(1.6)La(0.4)CuO(6+x) epitaxial thin film growth by pulsed-laser ablation
[DE93-015797] p 812 N94-14362
Ion assisted sputter deposition of Mo-Si multilayers
[DE93-013830] p 583 N94-14693
Solution chemistry optimization of sol-gel processed PZT thin films
[DE93-013776] p 814 N94-14695

Molecular simulator: A basic tool for submicron MOS processes development
[LAAS-92484] p 814 N94-14697
Direct submillimeter absorptivity measurements on epitaxial Ba(1-x)K(x)BiO3 films at 2K
[DE93-013904] p 815 N94-14699
A study of thin liquid sheet flows
[NASA-TM-106323] p 642 N94-14732

THIN PLATES
Experimental technique to simulate orbital-debris impact on space shields at impact velocities over 10 km/s
[DE93-011619] p 539 N94-12909
Role of microstructure on fatigue durability of aluminum aircraft alloys
[AD-A266350] p 571 N94-13697

THIN WALLED SHELLS
Buckling analysis of laminated thin shells in a hot environment
[NASA-TM-106302] p 683 N94-14776

THIN WALLS
Study of possible mechanisms of instability due to heat transfer
[INPE-5448-TDI/494] p 628 N94-12966

THOMSON SCATTERING
Bridging the gap between the Rayleigh and Thomson limits for various convex bodies
[DSIS-93-00613] p 607 N94-14204

THORIUM COMPOUNDS
Muon spin relaxation studies of heavy fermion superconductors
[DE93-014576] p 815 N94-14773

THREE DIMENSIONAL BOUNDARY LAYER
Numerical study of the effects of icing on viscous flow over wings
[NASA-CR-193306] p 500 N94-13180
High speed transition prediction
[NASA-CR-194125] p 502 N94-13422
A three-dimensional supersonic turbulent boundary layer generated by an isentropic compression
p 503 N94-13556

THREE DIMENSIONAL FLOW
Three-Dimensional Boundary-Layer program (BL3D) for swept subsonic or supersonic wings with application to laminar flow control
[NASA-CR-4531] p 629 N94-13073
The three-dimensional flow past a rapidly rotating circular cylinder
[NASA-CR-191512] p 630 N94-13075
Three-dimensional structure of straight and curved plane wakes
[NASA-CR-194420] p 501 N94-13266
Numerical simulation of steady three-dimensional flows in axial turbomachinery bladerows p 634 N94-13630
A control volume finite element method for three-dimensional, incompressible, viscous fluid flow
[ISBN-0-315-72019-0] p 635 N94-13683
Evolution of disturbances in stagnation point flow
[NASA-CR-191516] p 636 N94-13724
Images constructed from computed flow fields
[NASA-CR-194397] p 650 N94-13814
Numerical investigations in three-dimensional internal flows
[NASA-CR-194143] p 637 N94-13827
Multigrid solution of internal flows using unstructured solution adaptive meshes
[NASA-CR-194233] p 638 N94-14356
Least-squares finite element solutions for three-dimensional backward-facing step flow
[NASA-TM-106353] p 770 N94-14407
An experimental study of a turbulent boundary layer in the trailing edge region of a curculation-control airfoil
[NASA-CR-194522] p 508 N94-14541
Navier-Stokes simulation of transonic vortex flow over a delta wing p 640 N94-14606
A finite volume method for computation of viscous flow in complex configurations p 640 N94-14607
Behavior of streamwise rib vortices in a three-dimensional mixing layer p 644 N94-14754
A new Lagrangian method for three-dimensional steady supersonic flows
[NASA-TM-106068] p 510 N94-14847
The development of a scalable parallel 3-D CFD algorithm for turbomachinery
[NASA-CR-193604] p 664 N94-14848

THREE DIMENSIONAL MODELS
The 3-D massively parallel impact simulations using PCTH
[DE93-011593] p 670 N94-12908
Numerical simulation of hypersonic flow for the design of the H-2 orbiting plane (HOPE), part 3
[NAL-TR-1168-PT-3] p 499 N94-12948
View generated database
[NASA-CR-191397] p 822 N94-13116
Imaging microscopy with x ray lasers at Lawrence Livermore National Laboratory
[DE93-013419] p 655 N94-13258
Micromechanical damage theories for brittle solids with interacting microcracks
[AD-A266348] p 673 N94-13778
Eye-gaze and intent: Application in 3D interface control
[DE93-015210] p 738 N94-14335
Three-dimensional modeling of diesel engine intake flow, combustion and emissions-2
[NASA-CR-191189] p 519 N94-14448
Liquid and gas evanescent wave spectroscopy via tunable lasers and silver halide fibers
[ITN-93-85226] p 565 N94-14465
Statics and kinetics of phase transformations in bcc Fe-Cr
[DE93-013839] p 574 N94-14793
Nonlinear wave forces on large ocean structures
[AD-A266820] p 683 N94-14902

THRESHOLD CURRENTS
AlGaAs diode laser blue shift resulting from fast neutron irradiation
[AD-A266642] p 659 N94-14681

THRESHOLDS (PERCEPTION)
Underwater hearing: A review
[ISVR-TR-212] p 777 N94-14130

THROTTLING
Electric propulsion system technology
[NASA-CR-194100] p 549 N94-13055

THRUST CONTROL
Preliminary flight results of a fly-by-throttle emergency flight control system on an F-15 airplane
[NASA-TM-4503] p 520 N94-13254
Design criteria for integrated flight/propulsion control systems for STOVL fighter aircraft p 521 N94-13297
A piloted simulation investigation of the normal load factor and longitudinal thrust required for air-to-air acquisition and tracking p 522 N94-13301
A four-axis hand controller for helicopter flight control p 522 N94-13305

THRUST VECTOR CONTROL
Evaluation of dual flow thrust vector nozzles with exhaust stream impingement
[NASA-CR-193392] p 630 N94-13078
Advanced electric motor technology flux mapping
[NASA-CR-193824] p 621 N94-13186
Electrical Actuation Technology Bridging
[NASA-CP-3213] p 551 N94-13417
Design and evaluation of single and dual flow thrust vector nozzles with post exit vanes
[NASA-CR-193393] p 638 N94-14086
Design and application of electromechanical actuators for deep space missions
[NASA-CR-194145] p 663 N94-14134

THUNDERSTORMS
The application of VAS satellite imagery to thunderstorm forecasting at Cape Canaveral
[NASA-CR-193563] p 718 N94-12839

THYROID GLAND
Calcitonin control of calcium metabolism during weightlessness
[NASA-CR-193622] p 731 N94-12960
Thyroid alterations in porcine after prolonged exposure to cold or heat
[AD-A266840] p 733 N94-14879

TIDAL WAVES
Artificial oil pollution detection and wave observation in the sea adjacent to Japan by ERS-1 SAR
p 688 N94-14212

TIDES
Cold dark matter halos p 838 N94-13649

TILES
High temperature electromagnetic characterization of thermal protection system tile materials
[NASA-CR-189687] p 578 N94-13431

TILT ROTOR AIRCRAFT
Piloting considerations for terminal area operations of civil tiltwing and tiltrotor aircraft p 525 N94-13320
Evaluation of two cockpit display concepts for civil tiltrotor instrument operations on steep approaches
p 517 N94-13323

TILT WING AIRCRAFT
Piloting considerations for terminal area operations of civil tiltwing and tiltrotor aircraft p 525 N94-13320

TIMBER IDENTIFICATION
Mangrove afforestation monitoring using remote sensing p 695 N94-14260

TIMBER INVENTORY
Dendrometric variables estimation in homogeneous forests using LANDSAT TM data
[INPE-5455-TDI/497] p 684 N94-13331

TIME DEPENDENCE
Three dimensional time-dependent hydrodynamic and propagation modeling of x ray laser emission
[DE93-012575] p 654 N94-12962
Development of time-dependent orthotropic constitutive law of a thermoplastic composite material
p 556 N94-13595
Deconvolution for positive signals
[DE93-013044] p 773 N94-14314
Selective excitation, relaxation, and energy channeling in molecular systems
[DE93-018819] p 785 N94-14420
An adaptive projection method for the incompressible Euler equations
[DE93-016428] p 639 N94-14434
A conduction model for the vacuum arc remelting process
[NPL-DMM(A)-98] p 639 N94-14464
Multiplicative noise: Applications in cosmology and field theory
[DE93-016624] p 840 N94-14536
Time resolved measurement of electron temperatures of exploding foil x ray laser plasmas
[DE93-017161] p 803 N94-14894

TIME DIVISION MULTIPLE ACCESS
Destination-directed, packet-switched architecture for a geostationary communications satellite network
[NASA-TP-3379] p 538 N94-13111
User needs for propagation data p 613 N94-14657

TIME DIVISION MULTIPLEXING
Technical support for digital systems technology development. Task order 1: ISP contention analysis and control
[NASA-CR-190758] p 537 N94-12809
Destination-directed, packet-switched architecture for a geostationary communications satellite network
[NASA-TP-3379] p 538 N94-13111

TIME LAG
Investigation of the effects of bandwidth and time delay on helicopter roll-axis handling qualities
p 522 N94-13300
Handling qualities effects of display latency
p 517 N94-13316
Primary display latency criteria based on flying qualities and performance data p 525 N94-13318
Bounds on time delay estimation given unknown signal spectral parameters
[ITN-93-85194] p 601 N94-13566

TIME MEASUREMENT
Activities report of the National Electrotechnical Institute Galileo Ferraris
[ETN-93-94224] p 627 N94-14812
Time resolved measurement of electron temperatures of exploding foil x ray laser plasmas
[DE93-017161] p 803 N94-14894

TIME OF FLIGHT SPECTROMETERS
Construction and test of a facility for photon-stimulated field description using excimer laser and time of flight
[ETN-93-94386] p 657 N94-13996

TIME SERIES ANALYSIS
Adaptive Transfer Function Networks
[DE93-014344] p 745 N94-13151
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 2: Locally-stationary time series analysis of nonstationary random responses
[NAL-TR-1179] p 502 N94-13345
Time series photometry of faint cataclysmic variables with a CCD p 831 N94-13646
Maximum entropy spectral analysis of the geological time series of the oxygen isotope record from deep-sea cores
[INPE-5465-PRE/1773] p 725 N94-13728

TIN ALLOYS
Thermosolutal convection and macrosegregation in dendritic alloys
[NASA-CR-194039] p 567 N94-12825

TIN TELLURIDES
Growth of PbSnTe single crystal by traveling-zone method in low gravity (M-2) p 586 N94-13734

TISSUES (BIOLOGY)
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-193560] p 727 N94-12795

TITAN 4 LAUNCH VEHICLE
Real time radiography of Titan 4 booster
[DE93-012450] p 548 N94-12911

TITANATES
Small polaron conduction in Y2Ti2O7
[ITN-93-85221] p 814 N94-14557

TITANIUM
An advanced test technique to quantify thermomechanical fatigue damage accumulation in composite materials
[NASA-CR-191147] p 555 N94-13139
The structure and mechanical properties of Ru-Cu and Ru-Ti nanolayer composites
[DE93-014453] p 558 N94-14469
Thermomechanical and isothermal fatigue behavior of a (90)sub 8 titanium matrix composite
[NASA-CR-191196] p 560 N94-14822

TITANIUM ALLOYS
Electronic structure and phase stability properties in ternary substitutional alloys
[DE93-013848] p 569 N94-13137
NDE of titanium alloy MMC rings for gas turbine engines
[NASA-TM-106188] p 555 N94-13138
Excimer laser surface processing of titanium
[DE93-012633] p 570 N94-13512
The microstructural response of near gamma-TiAl+W to heat treatment
[DSIS-93-00237] p 571 N94-13840
TITANIUM COMPOUNDS
Inelastic deformation mechanisms in SCS-6/Ti 15-3 MMC lamina under compression
[NASA-CR-191170] p 555 N94-13378
TITANIUM OXIDES
Photocatalysis for the treatment of waste water: Applications involving the removal of metals
[DE93-011669] p 561 N94-12841
TOKAMAK DEVICES
A 3D gyrokinetic particle-in-cell simulation of fusion plasma microturbulence on parallel computers
[DE93-012503] p 794 N94-12846
Test apparatus for ITER blanket cooling water distribution design
[DE93-753157] p 795 N94-12944
Dimensionally similar discharges with central RF heating on the D3-D tokamak
[DE93-012776] p 795 N94-12953
Growth curve analysis for plasma profiles using smoothing splines
[DE93-015741] p 795 N94-12984
Equilibrium reconstruction of the q-profile in tokamaks from motional Stark effect data
[DE93-015815] p 796 N94-13046
Effect on antenna structure of high power RF during plasma operation
[DE93-013278] p 797 N94-13144
Interferometric investigation methods of plasma spatial characteristics on stellarators and tokamaks in submillimeter region
[DE93-621606] p 798 N94-13507
Activities of the University of Saskatchewan, Plasma Physics Laboratory
[CTN-93-60831] p 798 N94-13518
Nonlinear evolution of tearing modes in inhomogeneous plasmas
[PPL-133] p 798 N94-13564
Folded waveguide designs for tokamaks
[DE93-013274] p 798 N94-13577
Studies of non-inductive current drive in the CDX-U tokamak p 799 N94-13680
Scattering of reflectometer signals from rippled surfaces
[PPL-138] p 602 N94-13802
Experiments on the current rampdown phase in the STOR-M tokamak for AC operation
[PPL-132] p 799 N94-13835
Plasma auto-biasing during Ohmic H-mode in the STOR-M tokamak
[PPL-136] p 799 N94-13849
Semi-local kinetic analysis of the toroidal ion temperature gradient mode
[PPL-130] p 800 N94-13851
Anomalous transport due to the ion acoustic instability in tokamaks
[PPL-129] p 800 N94-13852
Dependence of beta(tau) on plasma shape in D3-D
[DE93-015473] p 800 N94-13900
Stability and confinement properties of small-aspect-ratio tokamak
[INPE-5463-PRE/1771] p 801 N94-14024
Anomalous transport due to small scale electromagnetic and large scale electrostatic modes in tokamaks
[PPL-140] p 801 N94-14206
Electrical characterization of the JET A(sub 2) antenna: Comparison of model with measurements Wade, T.
[DE93-012964] p 607 N94-14291
Direct electron heating and current drive with fast waves in D3-D
[DE93-013028] p 801 N94-14293
Variation of divertor plasma parameters with divertor depth for H-mode discharges in D3-D
[DE93-015475] p 801 N94-14347
D3-D research operations
[DE93-016729] p 802 N94-14519
Measurements of edge fluctuations by phase contrast imaging on DIII-D
[DE93-014018] p 802 N94-14579
Design of the ion cyclotron system for TPX
[DE93-012961] p 803 N94-14770
Anomalous ion transport and feedback control
[DE93-018324] p 803 N94-14874
TOMOGRAPHY
Mathematical algorithms for multidimensional inverse scattering problems in inhomogeneous medium
[AD-A266440] p 749 N94-13702
Current distribution tomography for determination of internal current density distributions
[DE93-015463] p 604 N94-13899
Electronic schematics for the Donner 600 Crystal Tomograph
[DE93-015277] p 625 N94-14336
TOPOGRAPHY
Venus gravity
[NASA-CR-194077] p 841 N94-12823
Cyclogenesis and cyclone over South America
[INPE-5400-TDI/479] p 719 N94-13175
Error analysis of real time and post processed or bit determination of GFO using GPS tracking
[NASA-CR-193646] p 512 N94-13238
The American Geophysical Union Chapman Conference on Tectonics and Topography
[NASA-CR-193454] p 713 N94-13335
TOPOLOGY
Evolution of the interplanetary magnetic field
[DE93-012631] p 836 N94-13262
Heat flows and harmonic maps with a free boundary
[DE93-622856] p 632 N94-13509
Nonrecursive formulations of multibody dynamics and concurrent multiprocessing p 679 N94-14632
TOROIDAL PLASMAS
Dimensionally similar discharges with central RF heating on the D3-D tokamak
[DE93-012776] p 795 N94-12953
Nonlinear evolution of tearing modes in inhomogeneous plasmas
[PPL-133] p 798 N94-13564
The propagation characteristics and instability properties of low-frequency electromagnetic waves in the Io plasma torus p 601 N94-13650
Studies of non-inductive current drive in the CDX-U tokamak p 799 N94-13680
Plasma auto-biasing during Ohmic H-mode in the STOR-M tokamak
[PPL-136] p 799 N94-13849
On MHD mode equations in toroidal plasmas
[PPL-139] p 800 N94-13877
Dependence of beta(tau) on plasma shape in D3-D
[DE93-015473] p 800 N94-13900
D3-D research operations
[DE93-016729] p 802 N94-14519
TOROIDS
Mutual inductance between partially wound tori and a bifilar conductor
[ETN-93-94388] p 624 N94-13998
TORQUE
On the motion through a viscous fluid of a spherical particle touching a plane wall: Slip boundary conditions
[DE93-012540] p 628 N94-12961
Design and control of a macro-micro robot for precise force applications p 682 N94-14651
TORSION
Measuring methods for CFRP laminates' bending and torsion rigidities characteristics p 529 N94-13272
TOTAL OZONE MAPPING SPECTROMETER
Effects of typhoon on TOMS data p 693 N94-14243
TOTAL QUALITY MANAGEMENT
Lecture notes on software process improvement
[AD-A265200] p 744 N94-13049
Ninth Annual NASA/Contractors Conference on Quality and Productivity. World Class Excellence: The Journey Continues. Keynote presentations
[NASA-CR-194513] p 665 N94-13148
Ninth Annual NASA/Contractors Conference on Quality and Productivity. World Class Excellence: The Journey Continues. Conference presentations
[NASA-CR-194514] p 665 N94-13153
Measuring quality progress p 666 N94-13154
Defining the performance gap: Conducting a self-assessment p 666 N94-13155
What's the bottom line payback for TQM? p 666 N94-13156
Partnership with the customer p 666 N94-13157
Strategic planning as a focus for continuous improvement. A case study p 666 N94-13158
The power of cross-functional teams in driving total quality p 666 N94-13159
Spacecraft COst REduction Team (SCORE): TQM/CI on a massive scale p 667 N94-13160
Object-oriented productivity metrics p 667 N94-13161
Kennedy Space Center's NASA/Contractor Team-Centered Total Quality Management Seminar: Results, methods, and lessons learned p 667 N94-13162
Here's the beef: A case study in organizational transformation p 667 N94-13163
Building a quality culture in the Office of Space Flight: Approach, lessons learned and implications for the future p 667 N94-13164
NASA Johnson Space Center: Total quality partnership p 668 N94-13165
Teamwork for Oversight of Processes and Systems (TOPS). Implementation guide for TOPS version 2.0, 10 August 1992 p 668 N94-13167
NASA/contractor partnership on the second TDRSS ground terminal program: Breaking barriers p 668 N94-13168
Government/contractor partnerships for continuous improvement. A Goddard Space Flight Center example p 669 N94-13169
Pollution prevention through total quality
[DE93-013814] p 707 N94-13390
George M. Low Trophy: NASA's quality and excellence award. 1992 recipients: Honeywell Clearwater, IBM Houston
[NASA-TM-109265] p 669 N94-13396
The Eighth Annual NASA/Contractors Conference and 1991 National Symposium on Quality and Productivity: Extending the boundaries of total quality management
[NASA-TM-109276] p 669 N94-14321
TOUGHNESS
Processing and testing of high toughness silicon nitride ceramics
[NASA-CR-191190] p 582 N94-14543
An investigation of the role of second phase particles in the design of ultra high strength steels of improved toughness
[AD-A266774] p 573 N94-14786
TOWNSEND DISCHARGE
High counting rate resistive-plate chamber
[DE93-014928] p 651 N94-14452
TOXIC HAZARDS
Estimation of the concentration versus the time profile of zinc chloride particles in smoke clouds generated by the Raufoss A/S instantaneous smoke RA-90 and DM-45 HC smoke generator
[FFI-93/6001] p 708 N94-13821
Toxic Substances Control Act (TSCA) chemical substances inventory: Revised inventory synonym and preferred name file, Jan. 1993 documentation
[PB93-155166] p 710 N94-14508
TOXICITY
Biomass production chamber air analysis of wheat study (BWT931)
[NASA-CR-194092] p 737 N94-13712
Synthetic lubricants and high-performance functional fluids: Phosphazenes
[ARL-TR-45] p 580 N94-14126
Toxic Substances Control Act (TSCA) chemical substances inventory: Revised inventory synonym and preferred name file, Jan. 1993 documentation
[PB93-155166] p 710 N94-14508
TOXICITY AND SAFETY HAZARD
Toxic Substances Control Act (TSCA) chemical substances inventory: Revised inventory synonym and preferred name file, Jan. 1993 documentation
[PB93-155166] p 710 N94-14508
TRACE CONTAMINANTS
Project AIRSTREAM: Trace gas
[DE93-008849] p 706 N94-12904
Performance effects of coal-derived contaminants on the carbonate fuel cell
[DE93-013801] p 703 N94-13693
Destruction of problematic airborne contaminants by hydrogen reduction using a Catalytically Active, Regenerable Sorbent (CARS)
[NASA-CR-194354] p 709 N94-14103
Importance of sprays for long range transport of harmful substances in the troposphere
[MITT-81] p 711 N94-14723
TRACE ELEMENTS
Project AIRSTREAM: Trace gas
[DE93-008849] p 706 N94-12904
Determination of trace elements in triglycine sulfate solutions
[NASA-CR-193481] p 562 N94-13048
Modeling of the partitioning of reactive odd nitrogen in the lower stratosphere using aircraft measurements of NOy, NO, and other trace species
[NASA-CR-194305] p 714 N94-13707
Measurement of HO2 and other trace gases in the stratosphere using a high resolution far-infrared spectrometer at 28 km
[NASA-CR-194175] p 714 N94-13816
TRACKING RADAR
Cancellation of multipath for monopulse radars
[ITN-93-85191] p 600 N94-13538
TRACKING STATIONS
Use of global positioning system measurements to determine geocentric coordinates and variations in Earth orientation p 514 N94-14372

TRAILING EDGES
An experimental study of a turbulent boundary layer in the trailing edge region of a curculation-control airfoil
[NASA-CR-194522] p 508 N94-14541
TRAJECTORIES
Parachute system design, analysis, and simulation tool
[DE93-013755] p 501 N94-13260
Inverse dynamics: Simultaneous trajectory tracking and vibration reduction with distributed actuators
p 678 N94-14624
TRAJECTORY MEASUREMENT
Photogrammetric methods for trajectory measurements
[NLR-TP-91166-U] p 650 N94-13527
TRAJECTORY OPTIMIZATION
Trajectory optimization for the national aerospace plane
[NASA-CR-194146] p 516 N94-14104
Optimizing interplanetary trajectories with deep space maneuvers
[NASA-CR-4546] p 532 N94-14851
TRAJECTORY PLANNING
Implementation and experimentation with a motion planning system
[ITN-93-85213] p 755 N94-14505
TRANSCENDENTAL FUNCTIONS
Applications of computer algebra to distributed parameter systems p 677 N94-14623
TRANSDUCERS
Liquid metal drop ejection
[NASA-CR-193718] p 572 N94-14133
A description of the computer program CALDK38 which controls instrumentation set-up and data acquisition during deadweight calibration using an HBM DK 38 S6 digital measuring unit
[LTR-ST-1935] p 754 N94-14496
TRANSFER FUNCTIONS
Adaptive Transfer Function Networks
[DE93-014344] p 745 N94-13151
Exploiting structure: Introduction and motivation
[NASA-CR-194199] p 750 N94-13828
Water-vapour, total water and rainrate from passive microwave satellite data over ocean
[DLR-FB-92-37] p 723 N94-14189
Selective excitation, relaxation, and energy channeling in molecular systems
[DE93-018819] p 785 N94-14420
TRANSFER ORBITS
Two temperature modeling and experimental measurements of laser sustained hydrogen plasmas
[AD-A265750] p 796 N94-13039
TRANSFORMATIONS (MATHEMATICS)
Analytical framework for modeling scale-related variabilities in remote sensing p 685 N94-13592
Transform coding for space applications
[NASA-TM-106362] p 612 N94-14542
TRANSIENT OSCILLATIONS
The soft x ray transient Cen X-4 in quiescence
[NASA-CR-194033] p 833 N94-14406
TRANSIENT PRESSURES
NASA metrology and calibration, 1993
[NASA-TM-109280] p 597 N94-14410
TRANSIENT RESPONSE
The transient behavior of a boundary layer exposed to uniform suction
[ITN-93-85205] p 630 N94-13197
Some aspects of sheet forming simulation using explicit finite element techniques
[DE93-012479] p 663 N94-13975
TRANSISTOR AMPLIFIERS
A cryogenic seven-element HEMT front end for DSS 13 p 608 N94-14375
TRANSISTORS
Design and optimization of high voltage lateral DMOS devices using RESURF technology
[LAAS-92511] p 626 N94-14711
TRANSITION FLIGHT
Design criteria for integrated flight/propulsion control systems for STOVL fighter aircraft p 521 N94-13297
TRANSITION FLOW
Large-eddy simulation of laminar-turbulent breakdown at high speeds with dynamic subgrid-scale modeling
[NASA-CR-4533] p 629 N94-13064
Transition prediction and control in subsonic flow over a hump
[NASA-CR-4543] p 629 N94-13066
High speed transition prediction
[NASA-CR-194125] p 502 N94-13422
Effects of surface thermal forcing on stratified flow past an isolated obstacle p 633 N94-13553
TRANSITION METALS
Determination of trace elements in triglycine sulfate solutions
[NASA-CR-193481] p 562 N94-13048
Thermochemistry of transition metal clusters
[DE93-016201] p 571 N94-13977
Reactor studies of metal ions associated with chromatographic silica
[AD-A266675] p 573 N94-14779
TRANSITION POINTS
Transition prediction and control in subsonic flow over a hump
[NASA-CR-4543] p 629 N94-13066
TRANSITION TEMPERATURE
Room temperature degradation of YBa2Cu3O(7-x) superconductors in varying relative humidity environments
[NASA-TP-3368] p 813 N94-14409
Muon spin relaxation studies of heavy fermion superconductors
[DE93-014576] p 815 N94-14773
TRANSLATING
On the motion through a viscous fluid of a spherical particle touching a plane wall: Slip boundary conditions
[DE93-012540] p 628 N94-12961
TRANSLATIONAL MOTION
Implementation and experimentation with a motion planning system
[ITN-93-85213] p 755 N94-14505
TRANSMISSION
Laser CO2 beam transmission through hollow metallic waveguide coated by a thin internal dielectric layer
[ITN-93-85201] p 656 N94-13571
TRANSMISSION ELECTRON MICROSCOPY
Flux-pinning related defect structures in melt-processed YBa2Cu3O(7-x)
[DE93-012759] p 804 N94-12818
Changes in electrical device characteristics during the formation of dislocations in situ in the TEM
[DE93-013910] p 808 N94-13694
The effect of crystal tilt on high resolution micrographs of small metal particles
[DE93-013915] p 574 N94-14795
TRANSMISSION LINES
Locally non-uniform finite-difference time domain with application to stealth, crosstalk, and narrow apertures
[DE93-013958] p 601 N94-13696
The developments of satellite communications of China p 618 N94-14282
The current situation, trends, international cooperation of space communication technological development in the Republic of Korea p 699 N94-14283
Joint experiments using ETS-5 p 618 N94-14284
Space communications technology research in CRL
p 618 N94-14285
NTT's activities in satellite communications technology development p 618 N94-14286
Future outlook on international satellite communications in Asia Pacific region p 618 N94-14287
Utilization of boundary element method for extraction of frequency dependent conductivity parameters of lossy intra-chip transmission lines
[ETN-93-94385] p 771 N94-14807
TRANSMISSION LOSS
Infrared transmission and path radiance through dust and fog
[AD-A265825] p 791 N94-12979
Measurement of wave propagation for VHF/UHF and a comparison between measured and predicted values
[FFI/RAPPORT-92/7024] p 605 N94-13968
TRANSMISSIONS (MACHINE ELEMENTS)
Roller-gear drives for robotic manipulators design, fabrication and test
[NASA-CR-194248] p 660 N94-12802
TRANSMITTER RECEIVERS
Development of an on-board aircraft optical fiber data bus system
[NAL-TR-1163] p 514 N94-13338
TRANSMITTERS
Development of UHF spark-switched L-C Oscillators
[DE93-015019] p 623 N94-13892
TRANSONIC COMPRESSORS
The 3D pneumatic and 2D dynamic probes: Their development and subsequent use in a transonic fan
[RAE-TM-AERO/PROP-22] p 653 N94-14827
TRANSONIC FLIGHT
The problem of the sonic boom for future high-speed transport aircraft
[ESA-TT-1286] p 776 N94-13692
TRANSONIC FLOW
Fundamental study of shock wave/turbulent boundary layer interactions with passive control in transonic flows
[ESA-TT-1278] p 630 N94-13117
An experimental investigation of the redistribution of gas stream total temperature in a high turning angle transonic planar cascade
[ISBN-0-315-60791-2] p 502 N94-13369
Analysis of the Harrier forebody/inlet design using computational techniques
[NASA-CR-193616] p 503 N94-13463
Clebsch variable model for unsteady, transonic flow; application to 2D airfoils
[NLR-TP-91387-U] p 503 N94-13530
A robust quasi-simultaneous interaction method for a full potential flow with a boundary layer with application to wing/body configurations
[NLR-TP-91397-U] p 503 N94-13531
Development of full-potential codes in the decade 1983-1993 p 639 N94-14600
Navier-Stokes simulation of transonic vortex flow over a delta wing p 640 N94-14606
Development of a general purpose multigrid accelerated Navier-Stokes solver p 641 N94-14613
Intra-blade quantitative transonic flow measurements at the DRA Pyestock Isentropic Light Piston Facility using PIV (Particle Image Velocimetry)
[RAE-TM-AERO/PROP-21] p 509 N94-14706
TRANSONIC SPEED
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot Transonic wind tunnel (IA613A), volume 1
[NASA-CR-185696] p 534 N94-13191
TRANSPARENCE
Optimization of transparent and reflecting electrodes for amorphous silicon solar cells
[DE93-010009] p 704 N94-14110
TRANSPONDERS
Preliminary design and implementation of the baseline digital baseband architecture for advanced deep space transponders p 611 N94-14393
TRANSPORT AIRCRAFT
Evaluation of two cockpit display concepts for civil tiltrotor instrument operations on steep approaches
p 517 N94-13323
TRANSPORT PROPERTIES
Modeling ignition chemistry
[DE93-012340] p 561 N94-12910
Equilibrium reconstruction of the q-profile in tokamaks from motional Stark effect data
[DE93-015815] p 796 N94-13046
Research on chemical vapor deposition processes for advanced ceramic coatings
[NASA-CR-193613] p 577 N94-13089
Transport properties of disordered porous media from the microstructure
[DE93-016065] p 806 N94-13152
A time-accurate numerical method for chemically reacting flows at all Mach numbers p 500 N94-13198
Measurements on two-dimensional arrays of mesoscopic Josephson junctions
[AD-A265129] p 807 N94-13359
On energy transport equations for turbulent magnetized plasma
[PPL-135] p 800 N94-13850
Direct determination of alpha particle transport coefficients
[DE93-013488] p 787 N94-14691
TRANSPORT THEORY
Study of multicomponent diffusion and transport phenomena
[DE93-015095] p 804 N94-13005
Variance reduction unique to coupled electron/photon Monte Carlo transport
[DE93-014999] p 782 N94-13409
Dynamical model for the distribution of geomagnetically trapped anomalous-component ions
[ATR-91(9558)-6] p 784 N94-13936
A transport equation for eddy viscosity
p 646 N94-14762
Toward a quasi-linear closure for compressible turbulence
[DE93-017185] p 647 N94-14895
TRANSPORTATION
Activities of Bombardier, Inc.
[ISBN-2-921393-11-5] p 499 N94-13520
A verification of the Euroguidance: A guidance forecast for transportation and tourism
[KNMI-TR-145] p 722 N94-13993
TRANSPORTATION ENERGY
Low pressure storage of natural gas on activated carbon
[DE93-014053] p 660 N94-12851
TRAPPED PARTICLES
Energetic neutral atoms: Imaging the magnetospheric ring current
[NASA-CR-194339] p 715 N94-13826
Collisional effects of trapped electrons on the anomalous particle and thermal pinches
[PPL-128] p 800 N94-13853
Studies on equatorial shock formation during plasmaspheric refilling
[NASA-CR-194392] p 715 N94-13954
TRAPPING
EBIT Trapping Program
[DE93-014422] p 788 N94-13208

TRAVELING WAVE TUBES
A millimeter-wave tunneladder TWT
[NASA-CR-182183] p 620 N94-13106
Low-current traveling wave tube for use in the microwave power module
[NASA-TP-3344] p 620 N94-13110
TREES (MATHEMATICS)
Tree reconstruction from partial orders
[DE93-009841] p 743 N94-12991
TRELLIS CODING
Trellis coding with Continuous Phase Modulation (CPM) for satellite-based land-mobile communications
[NASA-CR-191325] p 604 N94-13909
TRIANGULATION
Approaches to high aspect ratio triangulations
[NASA-TM-107684] p 739 N94-12886
Parallel implementation of an algorithm for Delaunay triangulation
[NASA-TM-103951] p 740 N94-12973
TRIBOLOGY
A vacuum four-ball tribometer to evaluate liquid lubricants for space applications
[NASA-TM-106264] p 575 N94-12842
Applications of surface science to solid lubricants
[SMC-TR-93-24] p 579 N94-13903
TRIGGER CIRCUITS
Results from a water-Cerenkov array
[DE93-012715] p 849 N94-14461
TRIGONOMETRIC FUNCTIONS
Mathematic methods and algorithms for real-time applications
[AD-A266776] p 771 N94-14789
TRITIUM
Charged-particle evaluation methodology at Lawrence Livermore National Laboratory
[DE93-013429] p 781 N94-13251
Materials compatibility of hydride storage materials with austenitic stainless steels
[DE93-013688] p 703 N94-13691
A study of hydrogen effects on fracture behavior of radioactive waste storage tanks
[DE93-018171] p 574 N94-14873
TROPICAL REGIONS
The application of VAS satellite imagery to thunderstorm forecasting at Cape Canaveral
[NASA-CR-193563] p 718 N94-12839
Bibliography of urban climate in tropical/subtropical areas, 1981-1991
[WCASP-25] p 718 N94-12918
Spectral reflectance of soils from Sao Paulo State
[INPE-5424-PRP/172] p 684 N94-13377
Spatial variability of throughfall chemistry in a tropical rainforest (Central Amazonia, Brazil)
[INPE-5431-PRE/1765] p 720 N94-13429
AMIP: Diagnostic subproject on the variability in the tropics: Synoptic to intraseasonal time scales
[DE93-009287] p 721 N94-13914
TRMM system overview and status in the United States p 690 N94-14221
TRMM Project in Japan: Overview and status p 690 N94-14222
Clouds and the Earth's Radiant Energy System (CERES) on the Tropical Rainfall Measuring Mission (TRMM) p 690 N94-14223
TRMM precipitation radar algorithm p 690 N94-14224
Estimate of sampling errors of TRMM rainfall observation by using radar-AMeDAS composite data p 690 N94-14225
Future TRMM follow-on mission p 691 N94-14228
Nonlinear relationships between particulate absorption and chlorophyll: Detritus or pigment packaging?
[AD-A266806] p 731 N94-14899
TROPOSPHERE
Project AIRSTREAM: Trace gas
[DE93-008849] p 706 N94-12904
Description of the EURAD chemistry-transport model. Version 2 (CTM2)
[REPT-83] p 720 N94-13589
AMIP: Diagnostic subproject on the variability in the tropics: Synoptic to intraseasonal time scales
[DE93-009287] p 721 N94-13914
Radio metric errors due to mismatch and offset between a DSN antenna beam and the beam of a troposphere calibration instrument p 607 N94-14370
Importance of sprays for long range transport of harmful substances in the troposphere
[MITT-81] p 711 N94-14723
Signal and reference wavelengths for the elimination of SO2 cross sensitivity in remote measurements of tropospheric ozone with lidar
[GKSS/92/E/24] p 617 N94-14819
TROPOSPHERIC SCATTERING
Results from a study of scintillation behavior at 12, 20, and 30 GHz using the results from the Virginia Tech Olympus receivers p 613 N94-14659
TRUSSES
Feasibility study of an orbiting laboratory for testing CSI technology
[NASA-CR-191524] p 540 N94-13016
The Second Workshop on Deployment and Assembly Experiment of Large Space Structure on Orbit
[NASDA-CON-930003] p 529 N94-13268
Helical truss beam development for large space structure p 530 N94-13276
Movement of deployable truss p 531 N94-13280
Development and application of one dimensional deployable truss p 531 N94-13281
Study of a one-dimensional deployable structure employing telescopic members p 531 N94-13282
TRYPSIN
Quasi-elastic neutron scattering studies of protein dynamics
[DE93-015074] p 782 N94-13414
TUBE HEAT EXCHANGERS
Study of possible mechanisms of instability due to heat transfer
[INPE-5448-TDI/494] p 628 N94-12966
TUMBLING MOTION
Predicting the vibrations of a spinning inflated membrane
[DE93-010690] p 676 N94-14456
TUNABLE LASERS
Gathering and exchange information on atmospheric chemistry and polluted atmospheres
[DE93-009940] p 705 N94-12869
Novel Co:MgF2 lidar for aerosol profiler
[NASA-CR-191525] p 654 N94-13091
Predicted performance of a dc beam driven FEM oscillator designed for fusion applications at 200-250 GHz
[DE93-013414] p 655 N94-13145
Tetravalent chromium (Cr(4+)) as laser-active ion for tunable solid-state lasers
[NASA-CR-194527] p 659 N94-14576
AlGaAs diode laser blue shift resulting from fast neutron irradiation
[AD-A266642] p 659 N94-14681
TUNGSTEN
Correlations of the growth, structure, and stress with the adhesion of diamond films on tungsten
[DE93-012855] p 576 N94-12912
TUNGSTEN ALLOYS
Metastability of yttrium-oxides
[DE93-016548] p 813 N94-14440
Yield properties of tungsten and tungsten heavy alloys
[AD-A266833] p 575 N94-14878
TUNGSTEN COMPOUNDS
Dry film lubricant evaluation
[DE93-013114] p 578 N94-13118
TUNGSTEN OXIDES
A quartz crystal microbalance study of lithium insertion and removal into evaporated films MO(y) (M = Mo, Fe, and V)
[DSIS-93-00649] p 810 N94-14203
TUNING
Self tuning and adaptive control: Evaluations and improvements of algorithms
[ITN-93-85192] p 762 N94-13329
Tuning of Gaussian stochastic control systems
[CWI-BS-R9223] p 765 N94-14018
Computational issues in optimal tuning and placement of passive dampers p 681 N94-14647
TUNNEL JUNCTIONS
Theoretical SIS mixer research
[AD-A266323] p 807 N94-13580
TURBINE BLADES
Two-dimensional Navier-Stokes heat transfer analysis for rough turbine blades
[NASA-TM-106008] p 629 N94-13027
Numerical simulations of unsteady flows in turbomachines p 633 N94-13569
Numerical simulation of steady three-dimensional flows in axial turbomachinery bladerows p 634 N94-13630
Multigrid solution of internal flows using unstructured solution adaptive meshes
[NASA-CR-194233] p 638 N94-14356
Inflow characteristics associated with high-blade-loading events in a wind farm
[DE93-010042] p 704 N94-14423
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-006] p 558 N94-14573
TURBINE ENGINES
Turbulent particle dispersion in confined swirling flows
[DLR-FB-92-32] p 637 N94-14045
TURBINE WHEELS
JPRS report: Science and technology. Central Eurasia: Materials science
[JPRS-UMS-93-006] p 558 N94-14573
TURBOFAN ENGINES
Analysis of gas turbine engines using water and oxygen injection to achieve high Mach numbers and high thrust
[NASA-TM-106270] p 518 N94-13143
Noise levels from a model turbofan engine with simulated noise control measures applied
[NASA-TM-106318] p 518 N94-14036
TURBOJET ENGINES
Analysis of gas turbine engines using water and oxygen injection to achieve high Mach numbers and high thrust
[NASA-TM-106270] p 518 N94-13143
Development of a high-speed mechanical drive system for oscillating an annular blade row in the bending mode
[NAL-TR-1170] p 502 N94-13342
A hot dynamic seal rig for measuring hypersonic engine seal durability and flow performance
[NASA-TM-106294] p 664 N94-14727
TURBOMACHINERY
Averaging techniques for steady and unsteady calculations of a transonic fan stage
[NASA-TM-106231] p 499 N94-13108
Residual contact restraints in cryogenics
[ETN-93-94375] p 671 N94-13501
Numerical simulations of unsteady flows in turbomachines p 633 N94-13569
Passage-averaged approximation of turbomachinery flows using vorticity-potential method
[ISBN-0-315-72716-0] p 634 N94-13598
The development of a scalable parallel 3-D CFD algorithm for turbomachinery
[NASA-CR-193604] p 664 N94-14848
TURBOPROP ENGINES
Futurepath 2
[NASA-TM-109285] p 518 N94-13623
TURBORAMJET ENGINES
Hypersonic propulsion characterization p 505 N94-14156
TURBULENCE
Sites of fine-scale electron density turbulence in the interstellar medium
[NASA-CR-193708] p 839 N94-13864
An experimental study of a turbulent boundary layer in the trailing edge region of a curculation-control airfoil
[NASA-CR-194522] p 508 N94-14541
Studying Turbulence Using Numerical Simulation Databases. 4: Proceedings of the 1992 Summer Program
[NASA-CR-194556] p 643 N94-14745
A small-scale turbulence model p 643 N94-14746
Triad interactions in the dissipation range p 644 N94-14750
Isotropy of small scale turbulence p 644 N94-14752
Estimation of the vortex length scale and intensity from two-dimensional samples p 645 N94-14756
Toward a quasi-linear closure for compressible turbulence
[DE93-017185] p 647 N94-14895
TURBULENCE EFFECTS
High freestream turbulence effects on the transport of heat and momentum p 633 N94-13559
Numerical studies of spray combustion in liquid-fueled engines p 564 N94-13685
TURBULENCE MODELS
Force-free magnetic fields, curl eigenfunctions, and the sphere in transform space, with applications to fluid dynamics and electromagnetic theory
[AD-A265805] p 834 N94-12971
Two-dimensional Navier-Stokes heat transfer analysis for rough turbine blades
[NASA-TM-106008] p 629 N94-13027
Averaging techniques for steady and unsteady calculations of a transonic fan stage
[NASA-TM-106231] p 499 N94-13108
A multiple-scale turbulence model for incompressible flow
[NASA-TM-106113] p 631 N94-13385
Numerical simulation of steady three-dimensional flows in axial turbomachinery bladerows p 634 N94-13630
A control volume finite element method for three-dimensional, incompressible, viscous fluid flow
[ISBN-0-315-72019-0] p 635 N94-13683
Development of a recursion RNG-based turbulence model
[NASA-CR-191511] p 636 N94-13718
Analysis of reacting flowfields in low-thrust rocket engines and plumes p 552 N94-14491
Studying Turbulence Using Numerical Simulation Databases. 4: Proceedings of the 1992 Summer Program
[NASA-CR-194556] p 643 N94-14745
A small-scale turbulence model p 643 N94-14746
On the local nature of the energy cascade p 643 N94-14748
Search for subgrid scale parameterization by projection pursuit regression p 643 N94-14749

Triad interactions in the dissipation range
p 644 N94-14750
Rapid distortion analysis and direct simulation of compressible homogeneous turbulence at finite Mach number p 645 N94-14757
Investigation of the dilatational dissipation in compressible homogeneous shear flow
p 645 N94-14758
The evolution equation for the flame surface density in turbulent premixed combustion p 567 N94-14764
Numerical simulations of turbulent premixed H2/O2/N2 flames with complex chemistry p 567 N94-14765
Structure of turbulent non-premixed flames modeled with two-step chemistry p 567 N94-14767

TURBULENT BOUNDARY LAYER
The transient behavior of a boundary layer exposed to uniform suction
[ITN-93-85205] p 630 N94-13197
Three-dimensional structure of straight and curved plane wakes
[NASA-CR-194420] p 501 N94-13266
Exploratory study of in-plane streamline curvature effects on a turbulent boundary layer at a Mach number of 3
[NASA-CR-193673] p 501 N94-13292
A technique for direct measurement of skin friction in supersonic combustion flow p 503 N94-13555
A three-dimensional supersonic turbulent boundary layer generated by an isentropic compression
p 503 N94-13556
High freestream turbulence effects on the transport of heat and momentum p 633 N94-13559
An experimental study of a turbulent boundary layer in the trailing edge region of a curculation-control airfoil
[NASA-CR-194522] p 508 N94-14541
Direct simulation of polymer drag reduction in free shear flows and vortex dipoles p 644 N94-14755
Response of a supersonic boundary layer to a compression corner p 645 N94-14759
A transport equation for eddy viscosity
p 646 N94-14762
Interaction of two glancing, crossing shock waves with a turbulent boundary-layer at various Mach numbers
[NASA-TM-103740] p 509 N94-14780

TURBULENT COMBUSTION
A coherent flame model of premixed turbulent combustion in a counterflow geometry
[CUED/A-THERMO/TR.60] p 562 N94-13085
Analysis of reacting flowfields in low-thrust rocket engines and plumes p 552 N94-14491
Studying Turbulence Using Numerical Simulation Databases. 4: Proceedings of the 1992 Summer Program
[NASA-CR-194556] p 643 N94-14745
The evolution equation for the flame surface density in turbulent premixed combustion p 567 N94-14764
Numerical simulations of turbulent premixed H2/O2/N2 flames with complex chemistry p 567 N94-14765
Structure of turbulent non-premixed flames modeled with two-step chemistry p 567 N94-14767

TURBULENT DIFFUSION
Sub-grid scale modeling for large eddy simulations in analysis of shock-turbulence interactions
[DE93-013425] p 631 N94-13250
Turbulent diffusion in homogeneous shear flow with stable density stratification
[DLR-FB-92-26] p 639 N94-14443
Structure of turbulent non-premixed flames modeled with two-step chemistry p 567 N94-14767

TURBULENT FLOW
Transition prediction and control in subsonic flow over a hump
[NASA-CR-4543] p 629 N94-13066
Numerical simulations and experiments on physics of high Mach number shockwave: Turbulent flow interactions
[DE93-013424] p 631 N94-13249
Sub-grid scale modeling for large eddy simulations in analysis of shock-turbulence interactions
[DE93-013425] p 631 N94-13250
Fully developed turbulent flow in rectangular interrupted-plate ducts
[ISBN-0-315-63594-0] p 632 N94-13474
An experimental investigation of shock wave/vortex interaction p 634 N94-13574
Numerical simulation of steady three-dimensional flows in axial turbomachinery bladerows p 634 N94-13630
A solution algorithm for the prediction of compressible laminar and turbulent shear flows p 634 N94-13635
Studies of turbulent shear flows and their control
[NASA-CR-194114] p 635 N94-13676
Numerical studies of spray combustion in liquid-fueled engines p 564 N94-13685
Development of a recursion RNG-based turbulence model
[NASA-CR-191511] p 636 N94-13718
Experimental investigation of the effects of blowing ratio parameter on heat transfer to a film-cooled flat plate
[AD-A266599] p 636 N94-13780
Turbulent particle dispersion in confined swirling flows
[DLR-FB-92-32] p 637 N94-14045
Droplet-turbulence interactions in sprays exposed to supercritical environmental conditions
[NASA-CR-194408] p 638 N94-14308
Inflow characteristics associated with high-blade-loading events in a wind farm
[DE93-010042] p 704 N94-14423
Interactions among convection, magnetic fields and p-mode oscillations in the sun
[NASA-CR-194477] p 845 N94-14479
An implicit finite volume nodal point scheme for the solution of two-dimensional compressible Navier-Stokes equations p 640 N94-14603
Development of an explicit multiblock/multigrid flow solver for viscous flows in complex geometries
[NASA-TM-106356] p 642 N94-14728
Studying Turbulence Using Numerical Simulation Databases. 4: Proceedings of the 1992 Summer Program
[NASA-CR-194556] p 643 N94-14745
A small-scale turbulence model p 643 N94-14746
The structure of intense vorticity in homogeneous isotropic turbulence p 643 N94-14747
On the local nature of the energy cascade
p 643 N94-14748
Search for subgrid scale parameterization by projection pursuit regression p 643 N94-14749
Triad interactions in the dissipation range
p 644 N94-14750
A study of the fine scale motions of incompressible time-developing mixing layers p 644 N94-14751
Isotropy of small scale turbulence
p 644 N94-14752
LES versus DNS: A comparative study
p 644 N94-14753
Behavior of streamwise rib vortices in a three-dimensional mixing layer p 644 N94-14754
Direct simulation of polymer drag reduction in free shear flows and vortex dipoles p 644 N94-14755
Estimation of the vortex length scale and intensity from two-dimensional samples p 645 N94-14756
Investigation of the dilatational dissipation in compressible homogeneous shear flow
p 645 N94-14758
A transport equation for eddy viscosity
p 646 N94-14762
DNS and modeling of the interaction between turbulent premixed flames and walls p 646 N94-14763
The evolution equation for the flame surface density in turbulent premixed combustion p 567 N94-14764
Structure of turbulent non-premixed flames modeled with two-step chemistry p 567 N94-14767
Stochastic modeling of turbulent reacting flows
p 647 N94-14768
Development of experimental demonstration processes for laminar-turbulent flow states at wing profiles in free flight
[ILR-MITT-280(1993)] p 510 N94-14800
Toward a quasi-linear closure for compressible turbulence
[DE93-017185] p 647 N94-14895

TURBULENT HEAT TRANSFER
Two-dimensional Navier-Stokes heat transfer analysis for rough turbine blades
[NASA-TM-106008] p 629 N94-13027
High freestream turbulence effects on the transport of heat and momentum p 633 N94-13559

TURBULENT MIXING
Radar imaging of sub-mesoscale ocean phenomena
[AD-A266339] p 725 N94-13581
Modeling and simulation of transport and combustion phenomena in a supersonic mixing layer
[ONERA-NT-1992-11] p 565 N94-14194
Turbulent diffusion in homogeneous shear flow with stable density stratification
[DLR-FB-92-26] p 639 N94-14443
Analysis of reacting flowfields in low-thrust rocket engines and plumes p 552 N94-14491
Stochastic modeling of turbulent reacting flows
p 647 N94-14768

TVD SCHEMES
Numerical simulation of dynamic stall of NACA0012 airfoil oscillating near static stall angle using the Navier-Stokes equations
[DE93-767970] p 505 N94-14061
Hypersonic viscous flow computations
p 510 N94-14612

TWINNING
Deposition of crystalline boron thick layers from gas phase
[DE93-620499] p 576 N94-12867
Atomic structure of the 310 twin in niobium: Theoretical predictions and comparison with experimental observation
[DE93-013421] p 806 N94-13136

TWO DIMENSIONAL FLOW
Transition prediction and control in subsonic flow over a hump
[NASA-CR-4543] p 629 N94-13066
Clebsch variable model for unsteady, transonic flow; application to 2D airfoils
[NLR-TP-91387-U] p 503 N94-13530
Images constructed from computed flow fields
[NASA-CR-194397] p 650 N94-13814
Stability of spatially developing boundary layers
p 640 N94-14605
Development of a general purpose multigrid accelerated Navier-Stokes solver p 641 N94-14613
A small-scale turbulence model p 643 N94-14746

TWO DIMENSIONAL MODELS
Two-dimensional simulations of foil implosion experiments on the Los Alamos capacitor bank
[DE93-012676] p 794 N94-12814
Body/cushion contact stress analysis during sitting
[ITN-93-85204] p 736 N94-13229
Dilaton quantum cosmology in two dimensions
[DE93-621377] p 836 N94-13361
Chemistry and transport in a multi-dimensional model
[NASA-CR-194425] p 716 N94-13969
The motion of a conical shaped liner driven by explosive load
[ITN-93-85215] p 585 N94-14507
An implicit finite volume nodal point scheme for the solution of two-dimensional compressible Navier-Stokes equations p 640 N94-14603
Time resolved measurement of electron temperatures of exploding foil x ray laser plasmas
[DE93-017161] p 803 N94-14894

TWO PHASE FLOW
Thermal gravitational modelling and scaling of two-phase heat transport systems: Similarity considerations and useful equations predictions versus experimental results
[NLR-TP-91477-U] p 632 N94-13533
Studies of momentum and energy transfer across wavy gas-liquid interfaces
[AD-A266432] p 635 N94-13699
Stability of oscillatory two phase Couette flow
[NASA-CR-191501] p 636 N94-13817
Turbulent particle dispersion in confined swirling flows
[DLR-FB-92-32] p 637 N94-14045
Review of mathematical and physical basis of two-phase flow modeling
[KFK-4759] p 642 N94-14708

TYPHOONS
Effects of typhoon on TOMS data
p 693 N94-14243

U

U.S.S.R.
Gas core nuclear thermal rocket engine research and development in the former USSR
[DE93-012165] p 552 N94-14013

U.S.S.R. SPACE PROGRAM
JPRS report: Science and technology. Central Eurasia: Space
[JPRS-USP-93-003] p 828 N94-13182

U-2 AIRCRAFT
Weather forecasting support for AASE-2
[NASA-CR-194342] p 721 N94-13675
Modis-N airborne simulator
[NASA-CR-194364] p 792 N94-13719

UBV SPECTRA
Polarization and variability of active galaxies and quasars p 837 N94-13550

UH-60A HELICOPTER
Preliminary design features of the RASCAL: A NASA /Army rotorcraft in-flight simulator p 526 N94-13325

ULTRAHIGH FREQUENCIES
Development of UHF spark-switched L-C Oscillators
[DE93-015019] p 623 N94-13892
Effects of the equatorial ionosphere on L-band Earth-space transmissions p 615 N94-14671
Tree attenuation at 20 GHz: Foliage effects
p 615 N94-14672

ULTRAHIGH VACUUM
Scanning tunneling microscopy studies of diamond films and optoelectronic materials
[NASA-CR-194363] p 578 N94-13246

ULTRASHORT PULSED LASERS
Tetravalent chromium (Cr(4+)) as laser-active ion for tunable solid-state lasers
[NASA-CR-194527] p 659 N94-14576

ULTRASONIC FLAW DETECTION
Resin transfer molding of textile composites
[NASA-CR-191505] p 554 N94-12833
Quantitative mapping of pore fraction variations in silicon nitride using an ultrasonic contact scan technique
[NASA-TP-3377] p 665 N94-13056
Enhanced NDE systems
[NASA-CR-192603] p 669 N94-14101
ULTRASONIC RADIATION
Study of chemical reactions under the influence of ultrasound
[DE93-016458] p 778 N94-14867
ULTRASONIC SCANNERS
Quantitative mapping of pore fraction variations in silicon nitride using an ultrasonic contact scan technique
[NASA-TP-3377] p 665 N94-13056
ULTRASONICS
Study of chemical reactions under the influence of ultrasound
[DE93-016458] p 778 N94-14867
ULTRAVIOLET ABSORPTION
Gathering and exchange information on atmospheric chemistry and polluted atmospheres
[DE93-009940] p 705 N94-12869
ULTRAVIOLET ASTRONOMY
UV extinction properties of carina nebular dust
[NASA-CR-193424] p 835 N94-13233
Physical properties of gas disks around shell stars with and without dust
[NASA-CR-193655] p 835 N94-13239
Radiative transfer in the dynamic atmospheres of Mira-type variables
[NASA-CR-193324] p 829 N94-13287
Analysis of the IUE spectra of the strongly interacting binary beta Lyrae
[NASA-CR-194118] p 833 N94-14493
The next century astrophysics program
p 546 N94-14832
ULTRAVIOLET LASERS
UV and IR laser ablation for inductively coupled plasma mass spectrometry
[DE93-017124] p 658 N94-14415
ULTRAVIOLET RADIATION
UV extinction properties of carina nebular dust
[NASA-CR-193424] p 835 N94-13233
Advances in low energy neutral atom imaging techniques
[DE93-012745] p 782 N94-13492
ULTRAVIOLET SPECTRA
The evidence for clumpy accretion in the Herbig Ae star HR 5999
[NASA-TM-108257] p 828 N94-12915
UV extinction properties of carina nebular dust
[NASA-CR-193424] p 835 N94-13233
Ultraviolet observations of NGC 4395, the least luminous and nearest known Seyfert 1 nucleus
[NASA-CR-194304] p 831 N94-13679
Spectra of late type dwarf stars of known abundance for stellar population models
[NASA-CR-194301] p 831 N94-13681
The distance to the high velocity clouds of neutral hydrogen
[NASA-CR-194343] p 838 N94-13716
Optical properties of CO2 ice and CO2 snow in the ultraviolet, visible, and infrared
[NASA-CR-194110] p 686 N94-14081
Analysis of the IUE spectra of the strongly interacting binary beta Lyrae
[NASA-CR-194118] p 833 N94-14493
ULTRAVIOLET TELESCOPES
LUTE telescope structural design
[NASA-CR-192594] p 830 N94-13448
UNDERGROUND EXPLOSIONS
Atmospheric acoustic modeling
[DE93-016727] p 718 N94-14518
UNDERGROUND STRUCTURES
Promotion of geothermal energy development in 1991
[DE93-799058] p 701 N94-13215
UNDERWATER ACOUSTICS
Mathematical algorithms for multidimensional inverse scattering problems in inhomogeneous medium
[AD-A266440] p 749 N94-13702
Underwater hearing: A review
[ISVR-TR-212] p 777 N94-14130
FLATDAN beamformer enhancements and testing
[DSIS-93-00287] p 777 N94-14360
UNIFORM FLOW
The three-dimensional flow past a rapidly rotating circular cylinder
[NASA-CR-191512] p 630 N94-13075
UNIQUENESS
Non-uniqueness in dynamic rate-independent non-associated plasticity
[AD-A266342] p 769 N94-13731
UNITED STATES
NASA/DOD Aerospace Knowledge Diffusion Research Project. Report 18: A comparison of the technical communication practices of aerospace engineers and scientists in India and the United States
[NASA-TM-109006] p 821 N94-13057
Science, technology, and the federal government: National goals for a new era p 827 N94-14115
NASA/DOD Aerospace Knowledge Diffusion Research Project. Paper 37: The impact of political control on technical communications: A comparative study of Russian and US aerospace engineers and scientists
[NASA-TM-109329] p 826 N94-14488
UNIVERSE
Rare attributes in finite universe: Hypotheses testing specification and exact randomized upper confidence bounds
[DE93-012783] p 775 N94-12955
Redshift distortions of galaxy correlation functions
[DE93-014007] p 834 N94-12980
Inflation after COBE: Lectures on inflationary cosmology
[DE93-014008] p 834 N94-13096
Dilaton quantum cosmology in two dimensions
[DE93-621377] p 836 N94-13361
Radiation perturbation theory in gravity and quantum universe as a hydrogen atom
[DE93-626621] p 849 N94-14889
UNIVERSITIES
Technology parks and the cooperation among universities and firms: The cases of Campinas, Sao Jose dos Campos e Sao Carlos
[INPE-5251-TAE/04] p 818 N94-13427
Selected data on academic science and engineering R and D expenditures: Fiscal Year 1991
[NSF-92-329] p 819 N94-13982
UNIVERSITY PROGRAM
Weather forecasting support for AASE-2
[NASA-CR-194342] p 721 N94-13675
UNIX (OPERATING SYSTEM)
Kerberos: A UNIX-TCP/IP network authentication system
[DE93-011677] p 760 N94-14011
Uniform user and group IDs on a large network
[DE93-013047] p 760 N94-14315
UNMANNED SPACECRAFT
NASA images 11
[NASA-TM-109287] p 842 N94-13626
Contributions of winged re-entry vehicle to space activities p 537 N94-14278
Mission scenario of HOPE p 537 N94-14279
The status of the HOPE concept study
p 537 N94-14280
UNSTEADY AERODYNAMICS
A method of predicting quasi-steady aerodynamics for flutter analysis of high speed vehicles using steady CFD calculations
[NASA-TM-109009] p 514 N94-12850
Actuator and aerodynamic modeling for high-angle-of-attack aeroservoelasticity
[NASA-TM-4493] p 520 N94-13255
Numerical simulation of dynamic stall of NACA0012 airfoil oscillating near static stall angle using the Navier-Stokes equations
[DE93-767970] p 505 N94-14061
Domain connectivity among systems of overset grids
[NASA-CR-193390] p 508 N94-14326
UNSTEADY FLOW
Averaging techniques for steady and unsteady calculations of a transonic fan stage
[NASA-TM-106231] p 499 N94-13108
Clebsch variable model for unsteady, transonic flow; application to 2D airfoils
[NLR-TP-91387-U] p 503 N94-13530
Numerical simulations of unsteady flows in turbomachines p 633 N94-13569
A comparison of computational and experimental data for a subscale high speed propulsive nozzle at low mach numbers
[AD-A266543] p 504 N94-13705
Numerical simulation of a powered-lift landing, tracking flow features using overset grids, and simulation of high lift devices on a fighter-lift-and-control wing
[NASA-CR-194260] p 527 N94-14322
A vortex method for viscous unsteady flows
p 640 N94-14602
An implicit finite volume nodal point scheme for the solution of two-dimensional compressible Navier-Stokes equations p 640 N94-14603
UPLINKING
Sequential ranging: How it works
[NASA-CR-194508] p 532 N94-13796
Stability measurements of the radio science system at the 34-m high-efficiency antennas p 609 N94-14381
An overview of the Galileo Optical Experiment (GOPEX) p 610 N94-14386
Data analysis for GOPEX image frames
p 610 N94-14388
Galileo Optical Experiment (GOPEX) optical train: Design and validation at the Table Mountain Facility
p 610 N94-14390
GOPEX at the Starfire Optical Range
p 611 N94-14392
UPPER SURFACE BLOWING
Flight path control for the approach and landing of the quiet STOL experimental aircraft ASKA
[NAL-TR-1183] p 513 N94-13457
UPSTREAM
Evolution of the shock front and turbulence structures in the shock/turbulence interaction p 645 N94-14761
UPWIND SCHEMES (MATHEMATICS)
Hypersonic viscous flow computations
p 510 N94-14612
URANIUM COMPOUNDS
Muon spin relaxation studies of heavy fermion superconductors
[DE93-014576] p 815 N94-14773
URBAN RESEARCH
Bibliography of urban climate in tropical/subtropical areas, 1981-1991
[WCASP-25] p 718 N94-12918
USER MANUALS (COMPUTER PROGRAMS)
PACT user's guide
[DE93-013093] p 742 N94-12840
Vendor information system for innovative treatment technologies. User manual (VISITT version 2.0). Number 2
[PB93-196640] p 821 N94-12936
Archiving of HEAO-1 data products and the creation of a general user's guide to the archive
[NASA-CR-193415] p 822 N94-13062
ULTRA 2 user's manual for ULTRA 2 revision 3.0
[DE93-015970] p 744 N94-13120
SCORE user's manual
[DE93-015987] p 822 N94-13121
VIEWCACHE: An incremental pointer-base access method for distributed databases. Part 1: The universal index system design document. Part 2: The universal index system low-level design document. Part 3: User's guide. Part 4: Reference manual. Part 5: UIMS test suite
[NASA-CR-191788] p 822 N94-13126
The DREO Elint Browser Utility (DEBU) reference manual
[DSIS-92-03900] p 603 N94-13837
VMEC30 programming library: Reference manual
[DSIS-93-00350] p 750 N94-13858
HELSCAM V2.0: Development and application guide
[DSIS-93-00137] p 515 N94-13867
VMEC30 software development: Tutorial manual
[DSIS-93-00351] p 750 N94-13944
CMAPP user's manual, part 2
[DSIS-93-00858-PT-2] p 751 N94-14017
Adaptive Signal Processing Testbed signal excision software: User's manual
[DSIS-93-00260] p 606 N94-14037
Adaptive Signal Processing Testbed application software: User's manual
[DSIS-93-00261] p 606 N94-14038
VMEC30 SUN software development utilities: User's manual
[DSIS-93-00348] p 752 N94-14051
VMEC30 SUN device drivers: User's manual
[DSIS-93-00349] p 752 N94-14052
Payload/GSE/data system interface: Users guide for the VPF (Vertical Processing Facility)
[NASA-CR-194385] p 532 N94-14148
FLATDAN beamformer enhancements and testing
[DSIS-93-00287] p 777 N94-14360
USER REQUIREMENTS
Advanced display object selection methods for enhancing user-computer productivity
[AD-A265806] p 743 N94-12974
Information requirements of self-managing teams
[DE93-010319] p 824 N94-14048
UTILITIES
An examination of utility emissions contributions to elevated ozone concentrations in the Chicago area
[DE93-012852] p 708 N94-13495

V

V-22 AIRCRAFT
Handling qualities effects of display latency
p 517 N94-13316
VACUUM
Compatibility testing of vacuum seal materials
[DE93-014366] p 663 N94-14113
A study of thin liquid sheet flows
[NASA-TM-106323] p 642 N94-14732

VACUUM CHAMBERS
Scanning tunneling microscopy studies of diamond films and optoelectronic materials
[NASA-CR-194363] p 578 N94-13246
VACUUM DEPOSITION
Implementation of manufacturing techniques for planar, single mode waveguides on lithium niobate
[DSIS-93-00101] p 792 N94-13845
VACUUM MELTING
A conduction model for the vacuum arc remelting process
[NPL-DMM(A)-98] p 639 N94-14464
VACUUM SYSTEMS
Compatibility testing of vacuum seal materials
[DE93-014366] p 663 N94-14113
BAKEOUT: A computer program for predicting diffusive outgassing from stainless steel
[DE93-012613] p 573 N94-14364
VACUUM TESTS
A vacuum four-ball tribometer to evaluate liquid lubricants for space applications
[NASA-TM-106264] p 575 N94-12842
Ohmic heating of composite candidate graphite-fiber/coating combinations
[NASA-TM-4491] p 554 N94-12871
VALVES
STS-55 pad abort: Engine 2011 oxidizer preburner augmented spark igniter check valve leak
[NASA-CR-193830] p 533 N94-12806
VANADIUM
Fracture behavior of vanadium/vanadium silicide in-situ composites
[DE93-013422] p 556 N94-13389
VANADIUM ALLOYS
Electronic structure and phase stability properties in ternary substitutional alloys
[DE93-013848] p 569 N94-13137
Fracture behavior of vanadium/vanadium silicide in-situ composites
[DE93-013422] p 556 N94-13389
VANADIUM OXIDES
A quartz crystal microbalance study of lithium insertion and removal into evaporated films MO(y) (M = Mo, Fe, and V)
[DSIS-93-00649] p 810 N94-14203
VANES
Multigrid solution of internal flows using unstructured solution adaptive meshes
[NASA-CR-194233] p 638 N94-14356
VAPOR DEPOSITION
Deposition of crystalline boron thick layers from gas phase
[DE93-620499] p 576 N94-12867
Research on chemical vapor deposition processes for advanced ceramic coatings
[NASA-CR-193613] p 577 N94-13089
Scanning tunneling microscopy studies of diamond films and optoelectronic materials
[NASA-CR-194363] p 578 N94-13246
Effects of growth conditions and substrate orientation on the properties of InSb
[DE93-013766] p 812 N94-14344
Electrochemical planarization for microelectronic circuits
[DE93-017214] p 627 N94-14870
VAPOR PHASES
Multiphase equation of state for iron
[DE93-013956] p 568 N94-12977
Research on chemical vapor deposition processes for advanced ceramic coatings
[NASA-CR-193613] p 577 N94-13089
Hydrogen peroxide safety issues
[DE93-013895] p 565 N94-14346
VAPOR PRESSURE
Measuring surface fluxes in CAPE
[NASA-CR-193664] p 711 N94-12788
Binary homogeneous nucleation: Temperature and relative humidity fluctuations and non-linearity
[DE93-007884] p 709 N94-13911
VAPORIZING
Gas-evaporation in low-gravity field (cogelation mechanism of metal vapors) (M-14) p 588 N94-13746
Impact melting and vaporization in planetary regoliths p 843 N94-14299
VAPORS
Deposition of impact-generated vapors in the lunar regolith p 843 N94-14302
VARIABILITY
Spatial variability of throughfall chemistry in a tropical rainforest (Central Amazonia, Brazil)
[INPE-5431-PRE/1765] p 720 N94-13429
Polarization and variability of active galaxies and quasars p 837 N94-13550
Analytical framework for modeling scale-related variabilities in remote sensing p 685 N94-13592
Spatial and temporal variability of precipitation and chemistry: Case studies from the frontal boundary study
[DE93-007883] p 708 N94-13910
VARIABLE STARS
A photometric study of massive x-ray binaries
[ITN-93-85207] p 829 N94-13231
Analysis of the IUE spectra of the strongly interacting binary beta Lyrae
[NASA-CR-194118] p 833 N94-14493
VARIANCE (STATISTICS)
Robust estimators and tests in one-sample location problem with particular consideration on modified maximum likelihood process
[ETN-93-94391] p 774 N94-14703
VARIATIONAL PRINCIPLES
Variational approach to probabilistic finite elements
[NASA-CR-187179] p 674 N94-13873
VARISTORS
Metal oxide varistor feasibility study
[DE93-012921] p 620 N94-13031
VECTOR PROCESSING (COMPUTERS)
A path-oriented matrix-based knowledge representation system
[NASA-CR-4539] p 744 N94-13065
Advanced computers and simulation
[DE93-014354] p 740 N94-13286
Analysis and effects of the number of nests of DO loops during vector supercomputing
[NAL-TR-1146] p 748 N94-13453
Obstacle detection by recognizing binary expansion patterns
[NASA-CR-194415] p 514 N94-14495
An overview of parallel scientific visualization
[DE93-017105] p 755 N94-14521
VECTOR QUANTIZATION
Image coding using entropy-constrained residual vector quantization
[NASA-CR-193728] p 744 N94-13113
Speaker independent recognition of isolated words using vector quantization and neural networks
[ETN-93-94390] p 616 N94-14724
VECTOR SPACES
Numerical simulation of hypersonic flow for the design of the H-2 orbiting plane (HOPE), part 3
[NAL-TR-1168-PT-3] p 499 N94-12948
On the symmetry algebra of the discrete states in d less than 2 closed string theory
[DE93-622903] p 769 N94-13536
VECTORS (MATHEMATICS)
On relations between Schmidt pairs arising in robust control
[CWI-BS-R9225] p 764 N94-14000
On the Schmidt pairs of multivariable Hankel operators and robust control
[CWI-BS-R9226] p 765 N94-14001
An efficient parallel algorithm for matrix-vector multiplication
[DE93-015125] p 754 N94-14399
Some experiences with Krylov vectors and Lanczos vectors p 677 N94-14621
VEGETATION
Wind erosion in semiarid landscapes: Predictive models and remote sensing methods for the influence of vegetation
[NASA-CR-194029] p 715 N94-13956
Meteorological data, new series A monographs. Volume 6, no. 4: Modelization of heat fluxes at Earth ground with consideration of vegetation
[ETN-93-94169] p 723 N94-14546
VEGETATION GROWTH
Biomass production chamber air analysis of wheat study (BWT931)
[NASA-CR-194092] p 737 N94-13712
VEGETATIVE INDEX
Vegetation mapping of Indo-China Peninsula using MOS-1 MESSR and NOAA AVHRR p 695 N94-14257
Estimation of vegetation damage due to ash fall in Mt. Pinatubo area using MOS-1 data p 695 N94-14259
VELOCITY
The motion of a conical shaped liner driven by explosive load
[ITN-93-85215] p 585 N94-14507
VELOCITY DISTRIBUTION
On the theory of the decaying developed turbulence with spontaneous parity violation
[DE93-623190] p 632 N94-13511
Cold dark matter halos p 838 N94-13649
Least-squares finite element solutions for three-dimensional backward-facing step flow
[NASA-TM-106353] p 770 N94-14407
The motion of a conical shaped liner driven by explosive load
[ITN-93-85215] p 585 N94-14507
Vortex-induced disturbance field in a compressible shear layer p 645 N94-14760
VELOCITY MEASUREMENT
Quantitative mapping of pore fraction variations in silicon nitride using an ultrasonic contact scan technique
[NASA-TP-3377] p 665 N94-13056
A three-dimensional supersonic turbulent boundary layer generated by an isentropic compression p 503 N94-13556
High freestream turbulence effects on the transport of heat and momentum p 633 N94-13559
Droplet-turbulence interactions in sprays exposed to supercritical environmental conditions
[NASA-CR-194408] p 638 N94-14308
Calibration of a magnetic induction system for measurement of hypervelocities
[DE93-013949] p 652 N94-14578
Investigation of the feasibility of optical diagnostic measurements at the exit of the SSME
[NASA-CR-193832] p 553 N94-14682
Intra-blade quantitative transonic flow measurements at the DRA Pyestock Isentropic Light Piston Facility using PIV (Particle Image Velocimetry)
[RAE-TM-AERO/PROP-21] p 509 N94-14706
VENTILATION
Some flow properties of telescope enclosures estimated from water channel tests: Application of the flow visualization techniques
[NAL-TR-1178T] p 830 N94-13452
VENUS (PLANET)
Venus gravity
[NASA-CR-194077] p 841 N94-12823
Regional tectonic analysis of Venus as part of the Pioneer Venus guest investigator project
[NASA-CR-194079] p 842 N94-13561
VENUS ATMOSPHERE
Reduction and analysis of seasons 15 and 16 (1991 - 1992) Pioneer Venus radio occultation data and correlative studies with observations of the near-infrared emission of Venus
[NASA-CR-194128] p 841 N94-13083
VENUS CLOUDS
Reduction and analysis of seasons 15 and 16 (1991 - 1992) Pioneer Venus radio occultation data and correlative studies with observations of the near-infrared emission of Venus
[NASA-CR-194128] p 841 N94-13083
VENUS SURFACE
Regional tectonic analysis of Venus as part of the Pioneer Venus guest investigator project
[NASA-CR-194079] p 842 N94-13561
VERSATILITY
Flexibility and costs in the design process: A decision support model
[ISBN-9-06-814522-3] p 597 N94-14808
VERTICAL AIR CURRENTS
Linkage of anthropogenic aerosol to clouds and climate
[DE93-016434] p 719 N94-13080
Modeling of biosphere-atmosphere interaction for forest and pastureland in the Amazon
[INPE-5454-TDI/496] p 707 N94-13330
VERTICAL DISTRIBUTION
On the vertical structure of seasonal, interannual and intraseasonal flows
[AD-A265346] p 719 N94-12992
Fluxes of heat and water vapour in a convective mixed layer during EFEDA
[DLR-FB-92-21] p 716 N94-14132
Meteorological data, new series A monographs. Volume 6, no. 3: Estimation of influence of high clouds in the radiation field and the climat by analysis of NOAA AVHRR data
[ETN-93-94170] p 723 N94-14707
VERTICAL FLIGHT
Piloting Vertical Flight Aircraft: A Conference on Flying Qualities and Human Factors
[NASA-CP-3220] p 521 N94-13294
Design criteria for integrated flight/propulsion control systems for STOVL fighter aircraft p 521 N94-13297
VERTICAL LANDING
MIL-H-8501B: Application to shipboard terminal operations p 521 N94-13296
Evaluation of two cockpit display concepts for civil tiltrotor instrument operations on steep approaches p 517 N94-13323
VERTICAL MOTION SIMULATORS
Vertical motion simulator familiarization guide
[NASA-TM-103923] p 527 N94-13008
Effects of simulator motion and visual characteristics on rotorcraft handling qualities evaluations p 524 N94-13317
VERTICAL TAKEOFF AIRCRAFT
Piloting Vertical Flight Aircraft: A Conference on Flying Qualities and Human Factors
[NASA-CP-3220] p 521 N94-13294

VERY LARGE SCALE INTEGRATION
Design automation tools for testable VLSI circuits
[ISBN-0-315-61461-7] p 621 N94-13333
NASA Space Engineering Research Center for VLSI systems design
[NASA-CR-194035] p 625 N94-14325
VERY LONG BASE INTERFEROMETRY
J2000.0 modelling of GEOAIM in the analysis of VLBI data from the NASA crustal dynamics project
[ISBN-0-315-59463-2] p 684 N94-13368
Theory of post-block 2 VLBI observable extraction
[NASA-CR-194543] p 686 N94-13872
VIBRATION
High resolution electron energy loss studies of surface vibrations
[DE93-014441] p 781 N94-13283
Predicting the vibrations of a spinning inflated membrane
[DE93-010690] p 676 N94-14456
Applications of computer algebra to distributed parameter systems p 677 N94-14623
Free-wake computation of helicopter rotor flowfield for general flight regimes
[AD-A266692] p 509 N94-14781
VIBRATION DAMPING
Nonlinear damping model for flexible structures
[NASA-CR-193711] p 539 N94-12790
Kinematics and constraints associated with swashplate blade pitch control
[NASA-TM-102265] p 520 N94-12820
On curve veering and flutter of rotating blades
[NASA-TM-106282] p 670 N94-12872
Development and application of one dimensional deployable truss p 531 N94-13281
Some frequency and damping measurements of laminated beryllium beams
[DE93-015909] p 676 N94-14530
Inverse dynamics: Simultaneous trajectory tracking and vibration reduction with distributed actuators p 678 N94-14624
VIBRATION EFFECTS
Machinery dynamics activities in Canadian industries
[IME-MET-TR-006] p 663 N94-14147
VIBRATION ISOLATORS
Feasibility study of an orbiting laboratory for testing CSI technology
[NASA-CR-191524] p 540 N94-13016
VIBRATION MEASUREMENT
Transcript of workshop on machinery health monitoring
[IME-MET-TR-005] p 733 N94-13847
Machinery dynamics activities in Canadian industries
[IME-MET-TR-006] p 663 N94-14147
VIBRATION MODE
On curve veering and flutter of rotating blades
[NASA-TM-106282] p 670 N94-12872
A component modes projection and assembly model reduction methodology for articulated, multi-flexible body structures p 677 N94-14622
VIBRATION TESTS
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 2: Locally-stationary time series analysis of nonstationary random responses
[NAL-TR-1179] p 502 N94-13345
Canadian Target Assembly (CTA) to Airborne Support Equipment (ASE) vibration test report
[IME-AMT-TR-001] p 663 N94-14195
VIBRATIONAL SPECTRA
Infrared spectroscopy of organic free radicals related to combustion processes
[DE93-017086] p 562 N94-13222
First-principles studies of phase stability and the structural and dynamical properties of hydrogen-metal systems
[DE93-016129] p 570 N94-13374
Dynamic Jahn-Teller effect: Calculation of fine structure spectrum, isotope shift and Zeeman behavior at deep center Ni2+ in CdS
[ETN-93-94394] p 815 N94-14705
VIRTUAL MEMORY SYSTEMS
Execution methods, and parallel virtual machines for distributed implementation of the LCS parallel programming language
[LAAS-93032] p 761 N94-14716
VIRTUAL REALITY
USRA/RIACS
[NASA-CR-194334] p 750 N94-13932
VIRUSES
PC viruses: How do they do that?
[DE93-012581] p 753 N94-14289
VISCOELASTICITY
Characterization of composite materials for aerospace structures
[ESA-TT-1260] p 557 N94-13804
Predicting the vibrations of a spinning inflated membrane
[DE93-010690] p 676 N94-14456
Dynamic soil pressures on rigid cylindrical vaults
[DE93-013930] p 676 N94-14585
VISCOSITY
Stability of oscillatory two phase Couette flow
[NASA-CR-191501] p 636 N94-13817
The spectral viscosity method applied to simulation of waves in a stratified atmosphere
[FFI-92/7047] p 637 N94-14040
VISCOUS DAMPING
Computational issues in optimal tuning and placement of passive dampers p 681 N94-14647
VISCOUS DRAG
Experimental studies of vortex flaps and vortex plates. Part 1: 0.53 m span 60 deg delta wing
[DE93-767969] p 505 N94-14059
VISCOUS FLOW
Non-linear effects in vortex viscous flow in superconductors-role of finite heat removal velocity
[DE93-621785] p 618 N94-12856
Approaches to high aspect ratio triangulations
[NASA-TM-107684] p 739 N94-12886
Integration of viscous effects into inviscid computational methods
[NASA-CR-193677] p 629 N94-13007
Numerical study of the effects of icing on viscous flow over wings
[NASA-CR-193306] p 500 N94-13180
A robust quasi-simultaneous interaction method for a full potential flow with a boundary layer with application to wing/body configurations
[NLR-TP-91397-U] p 503 N94-13531
Numerical simulations of unsteady flows in turbomachines p 633 N94-13569
Passage-averaged approximation of turbomachinery flows using vorticity-potential method
[ISBN-0-315-72716-0] p 634 N94-13598
A control volume finite element method for three-dimensional, incompressible, viscous fluid flow
[ISBN-0-315-72019-0] p 635 N94-13683
Hypersonic flow phenomenology p 505 N94-14155
Extrapolation of ground test data to flight p 507 N94-14170
Least-squares finite element solutions for three-dimensional backward-facing step flow
[NASA-TM-106353] p 770 N94-14407
A vortex method for viscous unsteady flows p 640 N94-14602
A finite volume method for computation of viscous flow in complex configurations p 640 N94-14607
Hypersonic viscous flow computations p 510 N94-14612
Development of an explicit multiblock/multigrid flow solver for viscous flows in complex geometries
[NASA-TM-106356] p 642 N94-14728
Analytical description of the breakup of liquid jets in air
[NASA-CR-191503] p 647 N94-14849
VISCOUS FLUIDS
On the motion through a viscous fluid of a spherical particle touching a plane wall: Slip boundary conditions
[DE93-012540] p 628 N94-12961
Stability of oscillatory two phase Couette flow
[NASA-CR-191501] p 636 N94-13817
VISIBILITY
Hardware design for the Autonomous Visibility Monitoring (AVM) observatory p 533 N94-14394
Summary of conclusions and recommendations from a visibility science workshop
[DE93-012770] p 710 N94-14523
VISIBLE SPECTRUM
Optical properties of CO2 ice and CO2 snow in the ultraviolet, visible, and infrared
[NASA-CR-194110] p 686 N94-14081
VISUAL AIDS
Visual cueing aids for rotorcraft landings p 524 N94-13313
VISUAL CONTROL
Compatibility of information and mode of control: The case for natural control systems p 523 N94-13307
Visual information for judging temporal range p 524 N94-13314
Visual cueing considerations in Nap-of-the-Earth helicopter flight head-slaved helmet-mounted displays p 524 N94-13315
Primary display latency criteria based on flying qualities and performance data p 525 N94-13318
VISUAL FIELDS
Visual cueing considerations in Nap-of-the-Earth helicopter flight head-slaved helmet-mounted displays p 524 N94-13315
Effects of simulator motion and visual characteristics on rotorcraft handling qualities evaluations p 524 N94-13317
VISUAL PERCEPTION
Comparative measurement of visual stability in Earth and cosmic space (L-4) p 592 N94-13761
Validity of FAA-approved color vision tests for class 2 and class 3 aeromedical screening
[DOT/FAA/AM-93/17] p 735 N94-14846
Validation of an inexpensive illuminant for aeromedical color vision screening
[DOT/FAA/AM-93/16] p 736 N94-14854
VISUAL STIMULI
Visual information for judging temporal range p 524 N94-13314
Primary display latency criteria based on flying qualities and performance data p 525 N94-13318
VISUAL TASKS
Validity of FAA-approved color vision tests for class 2 and class 3 aeromedical screening
[DOT/FAA/AM-93/17] p 735 N94-14846
VITERBI DECODERS
Coding performance of the Probe-Orbiter-Earth communication link p 608 N94-14377
VITRIFICATION
Relationship between borosilicate glass composition, structure, and durability test response (SRS)
[DE93-013578] p 581 N94-14343
VOICE COMMUNICATION
Analysis of fundamental frequency pattern in speech p 618 N94-13440
Propagation considerations in the American Mobile Satellite system design p 614 N94-14668
VOIDS
Structure and stability of microvoids in A-Si:H
[DE93-016625] p 813 N94-14413
VOLATILITY
Regional tectonic analysis of Venus as part of the Pioneer Venus guest investigator project
[NASA-CR-194079] p 842 N94-13561
VOLCANOES
Estimation of vegetation damage due to ash fall in Mt. Pinatubo area using MOS-1 data p 695 N94-14259
VOLT-AMPERE CHARACTERISTICS
Screening of solar cells
[NASA-TM-106298] p 620 N94-13134
The 1.00 MeV proton radiation resistance studies of amorphous silicon-based alloy solar cells p 703 N94-13639
VOLTAGE CONVERTERS (DC TO DC)
Power converters for the 120 V bus supply control
[CNES-NT-134] p 622 N94-13552
Operation of high power converters in parallel
[NASA-CR-191096] p 622 N94-13786
VOLTAGE REGULATORS
Operation of high power converters in parallel
[NASA-CR-191096] p 622 N94-13786
Multi-output flyback converter with ultrafast current protection
[CNES-NT-133] p 625 N94-14138
VORTEX AVOIDANCE
Optimal lateral escape maneuvers for microburst encounters during final approach
[LR-691] p 511 N94-13534
VORTEX BREAKDOWN
The effect of crossflow on Taylor vortices: A model problem
[NASA-CR-191487] p 630 N94-13128
The phenomenon of vortex breakdown p 510 N94-14609
Behavior of streamwise rib vortices in a three-dimensional mixing layer p 644 N94-14754
VORTEX FILAMENTS
New vortex dynamics methods for rotor free wake analysis
[AD-A266656] p 509 N94-14774
VORTEX FLAPS
Experimental studies of vortex flaps and vortex plates. Part 2: 1.15m span 60 deg delta wing
[NAL-TR-1180T-PT-2] p 502 N94-13454
Experimental studies of vortex flaps and vortex plates. Part 1: 0.53 m span 60 deg delta wing
[DE93-767969] p 505 N94-14059
VORTEX GENERATORS
Experimental studies of vortex flaps and vortex plates. Part 2: 1.15m span 60 deg delta wing
[NAL-TR-1180T-PT-2] p 502 N94-13454
VORTICES
Non-linear effects in vortex viscous flow in superconductors-role of finite heat removal velocity
[DE93-621785] p 618 N94-12856
Sub-grid scale modeling for large eddy simulations in analysis of shock-turbulence interactions
[DE93-013425] p 631 N94-13250
An experimental investigation of shock wave/vortex interaction p 634 N94-13574
On the secondary instability of the most dangerous Goertler vortex
[NASA-CR-191504] p 636 N94-13785

Flight validation of a pulsed smoke flow visualization system
[NASA-CR-186026] p 516 N94-14106
A vortex method for viscous unsteady flows
p 640 N94-14602
Navier-Stokes simulation of transonic vortex flow over a delta wing p 640 N94-14606
The phenomenon of vortex breakdown
p 510 N94-14609
Linear instability of curved free shear layers
[NASA-TM-106290] p 642 N94-14729
A small-scale turbulence model p 643 N94-14746
The structure of intense vorticity in homogeneous isotropic turbulence p 643 N94-14747
On the local nature of the energy cascade
p 643 N94-14748
Behavior of streamwise rib vortices in a three-dimensional mixing layer p 644 N94-14754
Direct simulation of polymer drag reduction in free shear flows and vortex dipoles p 644 N94-14755
Estimation of the vortex length scale and intensity from two-dimensional samples p 645 N94-14756
Vortex-induced disturbance field in a compressible shear layer p 645 N94-14760
Evolution of the shock front and turbulence structures in the shock/turbulence interaction p 645 N94-14761
New vortex dynamics methods for rotor free wake analysis
[AD-A266656] p 509 N94-14774
Free-wake computation of helicopter rotor flowfield for general flight regimes
[AD-A266692] p 509 N94-14781

VORTICITY
Passage-averaged approximation of turbomachinery flows using vorticity-potential method
[ISBN-0-315-72716-0] p 634 N94-13598
A vortex method for viscous unsteady flows
p 640 N94-14602
A small-scale turbulence model p 643 N94-14746
The structure of intense vorticity in homogeneous isotropic turbulence p 643 N94-14747
Search for subgrid scale parameterization by projection pursuit regression p 643 N94-14749
Isotropy of small scale turbulence
p 644 N94-14752
Vortex-induced disturbance field in a compressible shear layer p 645 N94-14760
Evolution of the shock front and turbulence structures in the shock/turbulence interaction p 645 N94-14761
Free-wake computation of helicopter rotor flowfield for general flight regimes
[AD-A266692] p 509 N94-14781

VORTICITY EQUATIONS
Free-wake computation of helicopter rotor flowfield for general flight regimes
[AD-A266692] p 509 N94-14781

VOYAGER PROJECT
NASA images 11
[NASA-TM-109287] p 842 N94-13626

W

WAFERS
Field emitter array RF amplifier development project. Phase 1: Cathode technology development
[AD-A266346] p 622 N94-13776

WAKES
Three-dimensional structure of straight and curved plane wakes
[NASA-CR-194420] p 501 N94-13266
Laboratory simulation of spacecraft charging in the plasma wake region
[FFI-93-7007] p 542 N94-14107
An experimental study of a turbulent boundary layer in the trailing edge region of a curculation-control airfoil
[NASA-CR-194522] p 508 N94-14541
Wake-field and space charge effects on high brightness beams calculations and measured results for the laser driven photoelectrons at BNL-ATF
[DE93-015787] p 659 N94-14572

WALL FLOW
A wall interference assessment/correction system
[NASA-CR-194174] p 500 N94-13076
An experimental study of a turbulent boundary layer in the trailing edge region of a curculation-control airfoil
[NASA-CR-194522] p 508 N94-14541
Analysis, approximation, and computation of a coupled solid/fluid temperature control problem
[NASA-TM-106351] p 771 N94-14731
A transport equation for eddy viscosity
p 646 N94-14762
DNS and modeling of the interaction between turbulent premixed flames and walls p 646 N94-14763

WALL PRESSURE
Autofrettage: Stress distribution under load and retained stresses after depressurization. A modified plane-strain case
[AD-A266320] p 671 N94-13579

WALLOPS ISLAND
Birds of Wallops Island, Virginia, 1970 - 1992
[NASA-TM-104589] p 850 N94-13923

WALLS
On the motion through a viscous fluid of a spherical particle touching a plane wall: Slip boundary conditions
[DE93-012540] p 628 N94-12961
An assessment of the potential for neck injury due to padding of aircraft interior walls for head impact protection
[DOT/FAA/AM-93/14] p 738 N94-13972

WARNING SYSTEMS
A tentative plan on China and Asian-Pacific satellite system for disaster reduction p 693 N94-14247

WARPAGE
Polymer infiltration studies
[NASA-CR-194521] p 582 N94-14539

WASTE DISPOSAL
Environmental awareness
[DE93-014192] p 707 N94-13218
A laser-based technique to continuously monitor metal aerosol emissions
[DE93-012836] p 710 N94-14183
Survey of subsurface geophysical exploration technologies adaptable to an airborne platform
[DE93-015080] p 717 N94-14294
STS-35 crew trash compactor briefing
[NASA-TM-109487] p 533 N94-14735
A study of hydrogen effects on fracture behavior of radioactive waste storage tanks
[DE93-018171] p 574 N94-14873

WASTE TREATMENT
Photocatalysis for the treatment of waste water: Applications involving the removal of metals
[DE93-011669] p 561 N94-12841
A laser-based technique to continuously monitor metal aerosol emissions
[DE93-012836] p 710 N94-14183
Survey of subsurface geophysical exploration technologies adaptable to an airborne platform
[DE93-015080] p 717 N94-14294
Relationship between borosilicate glass composition, structure, and durability test response (SRS)
[DE93-013578] p 581 N94-14343

WASTE WATER
Photocatalysis for the treatment of waste water: Applications involving the removal of metals
[DE93-011669] p 561 N94-12841

WATER
Alternate cleaning methods for LCCAs
[KCP-613-5045] p 624 N94-13937
Widebody cabin water spray optimization tests
[DOT/FAA/CT-TN93/29] p 511 N94-14186
Room temperature degradation of YBa2Cu3O(7-x) superconductors in varying relative humidity environments
[NASA-TP-3368] p 813 N94-14409
Modeling surface area to volume effects on borosilicate glass dissolution
[DE93-011891] p 581 N94-14432
Moisture meter evaluation
[DE93-016581] p 652 N94-14534

WATER COOLED REACTORS
Test apparatus for ITER blanket cooling water distribution design
[DE93-753157] p 795 N94-12944
Nuclear thermal propulsion engine based on particle bed reactor using light water steam as a propellant
[DE93-014336] p 552 N94-14111

WATER DEPRIVATION
Soil erosion rates caused by wind and saltating sand stresses in a wind tunnel
[DE93-009154] p 706 N94-12905

WATER EROSION
Coastal scour problems and methods for prediction of maximum scour
[AD-A266658] p 726 N94-14775

WATER HEATING
Development of a nonazeotropic heat pump for crew hygiene water heating
[NASA-CR-194189] p 737 N94-13674
Colorado State University program for developing, testing, evaluating, and optimizing solar heating and cooling systems
[DE93-016018] p 705 N94-14504
Promotion of geothermal energy development in 1991
[DE93-799061] p 705 N94-14679

WATER INJECTION
Analysis of gas turbine engines using water and oxygen injection to achieve high Mach numbers and high thrust
[NASA-TM-106270] p 518 N94-13143
BOAST 2 for the IBM 3090 and RISC 6000
[DE93-000138] p 638 N94-14351

WATER MODERATED REACTORS
MCNP benchmark analyses of critical experiments for the Space Nuclear Thermal Propulsion program
[DE93-014046] p 548 N94-12981

WATER POLLUTION
Laser-induced fluorescence over optical fibers for real time in situ measurement of petroleum hydrocarbons in seawater
[AD-A265106] p 790 N94-12863

WATER QUALITY
Snow cover models in operational watershed forecasting
[DE93-778332] p 718 N94-12837
Activities report of the Netherlands Remote Sensing Board
[ETN-93-93880] p 686 N94-14073
Educational module for the Higher Agricultural Education. Part 2: Eutrophication observed by remote sensing: An educational approach to water quality monitoring
[BCRS-92-11B] p 818 N94-14462

WATER RECLAMATION
Evaluation for membrane components of water recycling system
[NAL-TM-646] p 737 N94-13388

WATER TREATMENT
Photocatalysis for the treatment of waste water: Applications involving the removal of metals
[DE93-011669] p 561 N94-12841
Evaluation for membrane components of water recycling system
[NAL-TM-646] p 737 N94-13388
Survey and study on Environmental Control and Life Support (ECLS) technologies, part 2
[NASDA-CNT-930012-PT-2] p 737 N94-13472

WATER TUNNEL TESTS
Some flow properties of telescope enclosures estimated from water channel tests: Application of the flow visualization techniques
[NAL-TR-1178T] p 830 N94-13452

WATER VAPOR
A parameterization of cloud droplet nucleation
[DE93-007998] p 718 N94-12903
DMSP F11 SSM/T-2 calibration and validation
[AD-A265817] p 719 N94-12978
Binary homogeneous nucleation: Temperature and relative humidity fluctuations and non-linearity
[DE93-007884] p 709 N94-13911
Water-vapour, total water and rainrate from passive microwave satellite data over ocean
[DLR-FB-92-37] p 723 N94-14189
The development and implementation of an interactive retrieval/analysis/forecast algorithm
p 692 N94-14234
Atmospheric correction for sea surface temperature by application of microwave dual-channel technique to VTIR data p 697 N94-14271

WATER WAVES
Radar imaging of sub-mesoscale ocean phenomena
[AD-A266339] p 725 N94-13581
Nonlinear wave forces on large ocean structures
[AD-A266820] p 683 N94-14902

WATERSHEDS
Snow cover models in operational watershed forecasting
[DE93-778332] p 718 N94-12837
Pattern and Process in Landscape Ecology: Eighth Annual US Landscape Ecology Symposium
[DE93-014032] p 711 N94-14859

WAVE ATTENUATION
Portable acoustic wave sensor systems for real-time monitoring of volatile organic compounds
[DE93-013753] p 582 N94-14511

WAVE DISPERSION
Electrodynamics of helical plasma structures
[DE93-620981] p 797 N94-13240
Ionospheric effects on a wide-bandwidth, polarimetric, space-based, synthetic-aperture radar
[DE93-015084] p 612 N94-14512
The off shell (rho)-(omega) mixing in the QCD sum rules
[DE93-014845] p 786 N94-14527
On transport of energy, momentum, orbital angular momentum and self-angular momentum of electromagnetic wave in dispersal media
[DE93-624179] p 617 N94-14883

WAVE EQUATIONS
Radar imaging of sub-mesoscale ocean phenomena
[AD-A266339] p 725 N94-13581

WAVE FRONTS
Laser beam control and diagnostic systems for the copper-pumped dye laser system at Lawrence Livermore National Laboratory
[DE93-016529] p 658 N94-14437

Wavefront sensing, control, and pointing p 546 N94-14833

WAVE FUNCTIONS
Multiple Schroedinger cats from multilevel atoms [DE93-013412] p 786 N94-14526
The fractional quantum Hall effect and the spherical shell model [DE93-014553] p 818 N94-14740
Radiation perturbation theory in gravity and quantum universe as a hydrogen atom [DE93-626621] p 849 N94-14889
A hydrogen atom in the curved space: Orthogonality of radial wave functions with respect to the critical momentum [DE93-626623] p 788 N94-14891

WAVE GENERATION
Investigation of plasma instabilities in the Polar cusp [NASA-CR-194283] p 796 N94-13084

WAVE INTERACTION
MHD shocks in coronal mass ejections [NASA-CR-193418] p 828 N94-12970
A millimeter-wave tunneladder TWT [NASA-CR-182183] p 620 N94-13106
Radar imaging of sub-mesoscale ocean phenomena [AD-A266339] p 725 N94-13581

WAVE PACKETS
On transport of energy, momentum, orbital angular momentum and self-angular momentum of electromagnetic wave in dispersal media [DE93-624179] p 617 N94-14883

WAVE PROPAGATION
Ocean acoustic processing: A model-based approach [DE93-011902] p 725 N94-12876
The 3-D massively parallel impact simulations using PCTH [DE93-011593] p 670 N94-12908
Modeling the impact behavior of AD85 ceramic under multi-axial loading [AD-A265877] p 576 N94-12932
Numerical simulations and experiments on physics of high Mach number shockwave: Turbulent flow interactions [DE93-013424] p 631 N94-13249
The propagation characteristics and instability properties of low-frequency electromagnetic waves in the Io plasma torus p 601 N94-13650
Locally non-uniform finite-difference time domain with application to stealth, crosstalk, and narrow apertures [DE93-013958] p 601 N94-13696
Non-uniqueness in dynamic rate-independent non-associated plasticity [AD-A266342] p 769 N94-13731
High order hybrid numerical simulations of two dimensional detonation waves [NASA-CR-191506] p 769 N94-13792
Measurement of wave propagation for VHF/UHF and a comparison between measured and predicted values [FFI/RAPPORT-92/7024] p 605 N94-13968
Nonlinear wave predictions in ceramics [DE93-016516] p 582 N94-14436
Ionospheric effects on a wide-bandwidth, polarimetric, space-based, synthetic-aperture radar [DE93-015084] p 612 N94-14512
Atmospheric acoustic modeling [DE93-016727] p 718 N94-14518
Kinetic simulations of ultra-intense laser plasma interactions [DE93-014419] p 802 N94-14564
Proceedings of the Seventeenth NASA Propagation Experimenters Meeting (NAPEX 17) and the Advanced Communications Technology Satellite (ACTS) Propagation Studies Miniworkshop [NASA-CR-194096] p 612 N94-14654
Opening remarks: Current and future activities p 612 N94-14655
New challenges in propagation research in the US p 612 N94-14656
User needs for propagation data p 613 N94-14657
Statistical results from the Virginia Tech propagation experiment using the Olympus 12, 20, and 30 GHz satellite beacons p 613 N94-14658
Radiometric observations of atmospheric attenuation at 20.6 and 31.65 GHz: The Wave Propagation Laboratory data base p 613 N94-14660
Long duration measurements of fading on a low elevation angle, 11-GHz satellite path p 613 N94-14661
A database for propagation models p 614 N94-14665
Propagation issues for emerging mobile and portable communications: A systems perspective p 614 N94-14667
Propagation considerations in the American Mobile Satellite system design p 614 N94-14668
The ACTS propagation terminal delivery and support p 615 N94-14674
ACTS propagation experiment discussion: Ka-band propagation measurements using the ACTS propagation terminal and the CSU-CHILL and Space Communications Technology Center Florida propagation program p 616 N94-14678

WAVE SCATTERING
Sites of fine-scale electron density turbulence in the interstellar medium [NASA-CR-193708] p 839 N94-13864

WAVE-PARTICLE INTERACTIONS
Studies on equatorial shock formation during plasmaspheric refilling [NASA-CR-194392] p 715 N94-13954

WAVEFORMS
Lower bounds on time of arrival estimation of pulse compression waveforms [ITN-93-85189] p 599 N94-13196
DATAA: Data acquisition made easy [DE93-014683] p 823 N94-13406
Center of trace algorithms for extracting digitized waveforms from two-dimensional images [DE93-015082] p 753 N94-14295

WAVEGUIDE ANTENNAS
Folded waveguide designs for tokamaks [DE93-013274] p 798 N94-13577
HRMS sky survey wideband feed system design for DSS 24 beam waveguide antenna p 611 N94-14397

WAVEGUIDE LASERS
Study of speckle reduction when using a CO2 waveguide laser close to its threshold state [DSIS-93-00250] p 657 N94-14067

WAVEGUIDES
Analysis and characterizations of planar transmission structures and components for superconducting and monolithic integrated circuits [NASA-CR-193675] p 619 N94-13026
A millimeter-wave tunneladder TWT [NASA-CR-182183] p 620 N94-13106
Laser CO2 beam transmission through hollow metallic waveguide coated by a thin internal dielectric layer [ITN-93-85201] p 656 N94-13571
Folded waveguide designs for tokamaks [DE93-013274] p 798 N94-13577
Prism-film coupling in anisotropic planar waveguides of epitaxial (101) rutile thin films [DE93-012912] p 811 N94-14304

WAVELENGTH DIVISION MULTIPLEXING
Application of new electro-optic technology to Space Station Freedom data management system [NASA-CR-177622] p 538 N94-13257

WAVELENGTHS
Impact of shorter wavelengths on optical quality for laws [NASA-CR-193433] p 792 N94-14473

WAVELET ANALYSIS
Recursive time-varying filter banks for subband image coding [NASA-CR-193726] p 598 N94-12920

WAVERIDERS
Numerical investigations in three-dimensional internal flows [NASA-CR-194143] p 637 N94-13827

WEAK INTERACTIONS (FIELD THEORY)
Radiative corrections in the strongly interacting limit of the standard electroweak model [DE93-013906] p 780 N94-13018
Study of electroweak interactions [DE93-015067] p 782 N94-13412
Effects of additional isoscalar vector bosons in e(sup +)e)(sup -)(yields)ff-bar processes at the TRISTAN and LEP energies [DE93-621451] p 783 N94-13506
The (mu)(+) yields e(+)gamma [DE93-012750] p 785 N94-14181
Comparing the Z(sup 0) mass and inclusive widths to the standard electroweak theory [PREPRINT-731] p 787 N94-14721

WEAR
Wear-mechanism modelling [DE93-012311] p 579 N94-13974
Machining aspects of nickel-phosphorus coatings [DE93-013037] p 580 N94-14311

WEAR RESISTANCE
The effect of TiN coatings on the rolling contact fatique behavior of M50 bearing steel [ARL-TR-40] p 662 N94-13794

WEAR TESTS
Dry film lubricant evaluation [DE93-013114] p 578 N94-13118
Surface analysis of bearings [AD-A266800] p 661 N94-13122
Wear-mechanism modelling [DE93-012311] p 579 N94-13974
Canadian Target Assembly (CTA) to Airborne Support Equipment (ASE) vibration test report [IME-AMT-TR-001] p 663 N94-14195

WEATHER
Preliminary meteorological results for 1992 West Coast Scotland Experiment [DE93-014677] p 720 N94-13404
Weather forecasting support for AASE-2 [NASA-CR-194342] p 721 N94-13675

WEATHER FORECASTING
The application of VAS satellite imagery to thunderstorm forecasting at Cape Canaveral [NASA-CR-193563] p 718 N94-12839
Storm prediction through barometric field analysis [PUBL-SER-A-129] p 720 N94-13587
Weather forecasting support for AASE-2 [NASA-CR-194342] p 721 N94-13675

WEATHER STATIONS
CCl working group on climate data and its rapporteurs [WCDMP-21] p 723 N94-14118

WEATHERING
Extrapolation of space weathering processes to other small solar system bodies p 843 N94-14300

WEDGES
Capillary surfaces in a wedge: Differing contact angles [DE93-013903] p 631 N94-13244

WEIBULL DENSITY FUNCTIONS
Constant False Alarm Rate (CFAR) detection in Weibull clutter [ITN-93-85190] p 600 N94-13537

WEIGHT (MASS)
Development and application of a comprehensive, design-sensitive weight prediction method for wing structures of transport category aircraft [LR-693] p 515 N94-13687

WEIGHT ANALYSIS
Development and application of a comprehensive, design-sensitive weight prediction method for wing structures of transport category aircraft [LR-693] p 515 N94-13687

WEIGHTLESSNESS
Calcitonin control of calcium metabolism during weightlessness [NASA-CR-193622] p 731 N94-12960
Capillary surfaces in a wedge: Differing contact angles [DE93-013903] p 631 N94-13244
Spacelab J experiment descriptions [NASA-TM-4517] p 586 N94-13732
Drop dynamics in space and interference with acoustic field (M-15) p 588 N94-13747
Study of bubble behavior in weightlessness (effects of thermal gradient and acoustic stationary wave) (M-16) p 589 N94-13748
Endocrine and metabolic changes in payload specialist (L-1) p 591 N94-13758
Separation of biogenic materials by electrophoresis under zero gravity (L-3) p 592 N94-13760
Manual control in space research on perceptual-motor functions under zero gravity conditions (L-10) p 593 N94-13767
Bone culture research p 595 N94-13773

WEIGHTLESSNESS SIMULATION
Gravity as a probe for understanding pattern specification [NASA-CR-194142] p 713 N94-13418
STS-30 Magellan IUS/EVA training in WETF [NASA-TM-109300] p 737 N94-13601
Circadian rhythms during simulation of the D2-spaceflight [DLR-FB-92-27] p 733 N94-14043
STS-35 EVA payload training in WETF [NASA-TM-109492] p 739 N94-14790

WELD STRENGTH
Contribution to comparison of methods for determining welding procedures for the avoidance of hydrogen cracking [VTT-PUBS-107] p 674 N94-13887

WELD TESTS
Dry film lubricant evaluation [DE93-013114] p 578 N94-13118

WELDED JOINTS
Tensile properties of LE-7 engine material with welded joint [NAL-TR-1188] p 570 N94-13460
Fatigue design curves for 6061-T6 aluminum [DE93-011849] p 571 N94-14021
Estimation of strain in 1-kW primary containment vessels by microstructural examination [DE93-013053] p 573 N94-14316

WELDING
Recent results from material processing studies on new generation lasers [DE93-013841] p 653 N94-12898

WELLS
Promotion of geothermal energy development in 1991 [DE93-799057] p 701 N94-13214
Promotion of geothermal energy development in 1991 [DE93-799058] p 701 N94-13215

WETLANDS
Pattern and Process in Landscape Ecology: Eighth Annual US Landscape Ecology Symposium
[DE93-014032] p 711 N94-14859
WETTABILITY
Incomplete melting of the Au(100) surface
[DE93-623192] p 569 N94-13227
WETTING
An analytical investigation of transient effects on rewetting of heated thin flat plates
[NASA-TM-106120] p 628 N94-12968
WHEAT
Gordon Research Conference on Chronobiology, 1991
[AD-A266354] p 728 N94-13698
Biomass production chamber air analysis of wheat study (BWT931)
[NASA-CR-194092] p 737 N94-13712
Validated environmental and physiological data from the CELSS Breadboard Projects Biomass Production Chamber. BWT931 (Wheat cv. Yecora Rojo)
[NASA-TM-109272] p 738 N94-13979
WHISKERS (CRYSTALS)
Processing and testing of high toughness silicon nitride ceramics
[NASA-CR-191190] p 582 N94-14543
WHITE DWARF STARS
ROSAT guest investigator program (AO-1). On a search for coronal x ray emissions from white dwarfs
[NASA-CR-193654] p 835 N94-13171
Monte Carlo simulation of the OCP freezing transition
[DE93-013039] p 811 N94-14313
WIDE ANGLE LENSES
Rover imaging system for the Mars rover/sample return mission
[NASA-CR-193413] p 649 N94-13464
WIGGLER MAGNETS
Microwave generation for magnetic fusion energy applications
[DE93-013864] p 654 N94-13058
Predicted performance of a dc beam driven FEM oscillator designed for fusion applications at 200-250 GHz
[DE93-013414] p 655 N94-13145
Measurement of the spin of a particle using undulator radiation
[DE93-014334] p 780 N94-13149
Multi-bunch beam-break-up studies for a SWFEL/TBA
[DE93-016973] p 658 N94-14414
WIND (METEOROLOGY)
Atmospheric soundings during the Washita 1992 campaign
[NASA-CR-194383] p 712 N94-13212
Coherent Doppler lidar signal covariance including wind shear and wind turbulence
[NASA-CR-194492] p 721 N94-13723
Boundary layer structure over areas of heterogeneous heat fluxes
[DE93-007887] p 715 N94-13912
The nocturnal wind maximum: An interactive forecast method
[KNMI-TR-142] p 722 N94-13985
WIND DIRECTION
Preliminary meteorological results for 1992 West Coast Scotland Experiment
[DE93-014677] p 720 N94-13404
WIND EROSION
Soil erosion rates caused by wind and saltating sand stresses in a wind tunnel
[DE93-009154] p 706 N94-12905
Wind erosion in semiarid landscapes: Predictive models and remote sensing methods for the influence of vegetation
[NASA-CR-194029] p 715 N94-13956
WIND PROFILES
Development of a global backscatter model for NASA's laser atmospheric wind sounder
[NASA-CR-192581] p 718 N94-12957
On the vertical structure of seasonal, interannual and intraseasonal flows
[AD-A265346] p 719 N94-12992
WIND SHEAR
Flight crew interface aspects of forward-looking airborne windshear detection systems
[NASA-CR-191437] p 516 N94-12829
Coherent Doppler lidar signal covariance including wind shear and wind turbulence
[NASA-CR-194492] p 721 N94-13723
WIND TUNNEL APPARATUS
Identifying the NAL spaceplane aerodynamic model using dynamic wind tunnel tests
[NAL-TR-1171] p 500 N94-12951
Control system design of a cable-mounted model used for dynamic wind tunnel testing
[NAL-TR-1161] p 528 N94-13337
WIND TUNNEL MODELS
Results of experimental investigations to determine external tank protuberance loads using a 0.03-scale model of the Space Shuttle launch configuration (model 47-OTS) in the NASA/ARC unitary plan wind tunnel, volume 1
[NASA-CR-167690] p 534 N94-12810
Propulsion simulator for magnetically-suspended wind tunnel models
[NASA-CR-189560] p 527 N94-13127
Control system design of a cable-mounted model used for dynamic wind tunnel testing
[NAL-TR-1161] p 528 N94-13337
Aerodynamic and aerothermal facilities 1: Hypersonic wind tunnels p 506 N94-14158
WIND TUNNEL NOZZLES
Method of characteristics design of a supersonic wind tunnel nozzle with square cross-section, supplement 3
[NASA-CR-194359] p 527 N94-12824
WIND TUNNEL STABILITY TESTS
Estimation of critical values and vibration characteristics on supersonic delta wings. Part 2: Locally-stationary time series analysis of nonstationary random responses
[NAL-TR-1179] p 502 N94-13345
WIND TUNNEL TESTS
Soil erosion rates caused by wind and saltating sand stresses in a wind tunnel
[DE93-009154] p 706 N94-12905
Identifying the NAL spaceplane aerodynamic model using dynamic wind tunnel tests
[NAL-TR-1171] p 500 N94-12951
Propulsion simulator for magnetically-suspended wind tunnel models
[NASA-CR-189560] p 527 N94-13127
Aerodynamics of a sphere and an oblate spheroid for Mach numbers from 0.6 to 10.5 including some effects of test conditions
[NASA-TM-109016] p 500 N94-13172
Results of wind tunnel tests of an ASRM configured 0.03 scale Space Shuttle integrated vehicle model (47-OTS) in the AEDC 16-foot Transonic wind tunnel (IA613A), volume 1
[NASA-CR-185696] p 534 N94-13191
Exploratory study of in-plane streamline curvature effects on a turbulent boundary layer at a Mach number of 3
[NASA-CR-193673] p 501 N94-13292
Low-speed wind tunnel tests on four types of joined-wing aircraft models
[NAL-TR-1167] p 501 N94-13340
Low-speed wind tunnel tests on a joined-wing aircraft model with various upper-fin
[NAL-TR-1169] p 501 N94-13341
Rolling moment control in the NAL 10 cm x 10 cm magnetic suspension and balance system
[NAL-TR-1164] p 526 N94-13347
Experimental studies of vortex flaps and vortex plates. Part 2: 1.15m span 60 deg delta wing
[NAL-TR-1180T-PT-2] p 502 N94-13454
Hypersonic aerodynamic characteristics of SSTO-type aerospace planes. Part 1: The NAL 0-th configuration
[NAL-TR-1186] p 514 N94-13459
An experimental investigation of shock wave/vortex interaction p 634 N94-13574
Measurements of wing and fin buffeting on the standard dynamics model
[IAR-AN-76] p 526 N94-13859
Flow-field interference produced by an asymmetrical support strut
[IAR-AN-75] p 504 N94-14031
Noise levels from a model turbofan engine with simulated noise control measures applied
[NASA-TM-106318] p 518 N94-14036
Results of experimental investigations to determine external tank protuberance loads using a 0.03-scale model of the Space Shuttle launch configuration (Model 47-OTS) in the NASA/ARC unitary plan wind tunnel, volume 2
[NASA-CR-167691] p 536 N94-14047
Experimental studies of vortex flaps and vortex plates. Part 1: 0.53 m span 60 deg delta wing
[DE93-767969] p 505 N94-14059
Aerodynamic and aerothermal facilities 1: Hypersonic wind tunnels p 506 N94-14158
Computational techniques and capabilities p 506 N94-14162
An experimental study of a turbulent boundary layer in the trailing edge region of a curculation-control airfoil
[NASA-CR-194522] p 508 N94-14541
Optical fibre Fabry-Perot interferometers for calorimetric heat transfer gauges
[RAE-TM-AERO/PROP-20] p 653 N94-14701
WIND TUNNEL WALLS
A wall interference assessment/correction system
[NASA-CR-194174] p 500 N94-13076
Wall interference studies: Revisited p 640 N94-14604
WIND TUNNELS
Soil erosion rates caused by wind and saltating sand stresses in a wind tunnel
[DE93-009154] p 706 N94-12905
Propulsion simulator for magnetically-suspended wind tunnel models
[NASA-CR-189560] p 527 N94-13127
WIND TURBINES
The 1992 JSEE/JWEA Joint Conference
[DE93-793955] p 700 N94-12822
Inflow characteristics associated with high-blade-loading events in a wind farm
[DE93-010042] p 704 N94-14423
WIND VANES
Preliminary meteorological results for 1992 West Coast Scotland Experiment
[DE93-014677] p 720 N94-13404
WIND VELOCITY
Atmospheric soundings during the Washita 1992 campaign
[NASA-CR-194383] p 712 N94-13212
Preliminary meteorological results for 1992 West Coast Scotland Experiment
[DE93-014677] p 720 N94-13404
WINDOWS (APERTURES)
Simulating the daylight performance of fenestration systems and spaces of arbitrary complexity: The IDC method
[DE93-015177] p 704 N94-14333
WINDOWS (COMPUTER PROGRAMS)
EGS (underscore) windows 2: An enhanced graphical interface to EGS
[DE93-010447] p 746 N94-13382
ANNS: An X Window based version of the AFIT neural network simulator
[AD-A266540] p 764 N94-13704
ORGBUG: A Windows-based combinatorial geometry debugger
[DE93-016640] p 755 N94-14515
WINDPOWERED GENERATORS
Inflow characteristics associated with high-blade-loading events in a wind farm
[DE93-010042] p 704 N94-14423
WING FLAPS
Numerical simulation of a powered-lift landing, tracking flow features using overset grids, and simulation of high lift devices on a fighter-lift-and-control wing
[NASA-CR-194260] p 527 N94-14322
WING PROFILES
Development and application of a comprehensive, design-sensitive weight prediction method for wing structures of transport category aircraft
[LR-693] p 515 N94-13687
Development of experimental demonstration processes for laminar-turbulent flow states at wing profiles in free flight
[ILR-MITT-280(1993)] p 510 N94-14800
WING SPAN
Low-speed wind tunnel tests on four types of joined-wing aircraft models
[NAL-TR-1167] p 501 N94-13340
WINGS
A method of predicting quasi-steady aerodynamics for flutter analysis of high speed vehicles using steady CFD calculations
[NASA-TM-109009] p 514 N94-12850
Numerical study of the effects of icing on viscous flow over wings
[NASA-CR-193306] p 500 N94-13180
WIRE
Casting of superconducting composite materials (M-4) p 586 N94-13736
WIRING
Rigid-flexible printed wiring boards
[DE93-013938] p 620 N94-13094
Electronic schematics for the Donner 600 Crystal Tomograph
[DE93-015277] p 625 N94-14336
WOOD
Moisture meter evaluation
[DE93-016581] p 652 N94-14534
WORDS (LANGUAGE)
Computational Russian morphological generation on Prolog: Noun, pronoun, and adjective p 747 N94-13436
WORK FUNCTIONS
Low energy neutral atom imaging techniques
[DE93-012744] p 779 N94-12950
WORKLOADS (PSYCHOPHYSIOLOGY)
A perspective on the FAA approval process: Integrating rotorcraft displays, controls and workload p 521 N94-13298
Functional categories for future flight deck designs
[NASA-TM-109005] p 517 N94-13710

The influence of ATC message length and timing on pilot communication
[NASA-CR-177621] p 512 N94-14744
WORKSTATIONS
EOS workstation
[NASA-CR-191326] p 736 N94-13132
Advanced computers and simulation
[DE93-014354] p 740 N94-13286
A data distributed parallel algorithm for ray-traced volume rendering
[NASA-CR-191520] p 749 N94-13721
Kerberos: A UNIX-TCP/IP network authentication system
[DE93-011677] p 760 N94-14011
A widget based operations simulator for a planetary camera: A model for the high resolution stereo camera on Mars 94
[DLR-FB-92-30] p 651 N94-14044
Oak Ridge Environmental Information System (ORIES) site workstation information packet for OREIS 6.2
[DE93-010761] p 825 N94-14458
Integrating PAW, a graphical analysis interface to Sybase
[DE93-014172] p 755 N94-14581
Computational Controls Workstation: Algorithms and hardware p 678 N94-14626
Computational Control Workstation: Users' perspectives p 681 N94-14648
WORLD METEOROLOGICAL ORGANIZATION
Manual on the global data-processing system. Volume 1: (Annex 4 to the WMO regulations) global aspects (1992 edition)
[WMO-485-VOL-1] p 721 N94-13686
Manual on the global data-processing system. Volume 2: Regional aspects (1992 edition)
[WMO-485-VOL-2] p 722 N94-14071
WOVEN COMPOSITES
Micromechanical modeling of laminated composites with interfaces and woven composites using the boundary element method
[NASA-TM-106280] p 670 N94-13053
Analysis of new composite architectures
[NASA-CR-194524] p 559 N94-14715
WROUGHT ALLOYS
Microstructural evolution of NARloy-Z at elevated temperatures
[NASA-TM-108419] p 571 N94-13715

X

X RAY ABSORPTION
The x ray dichroism experiments using circular polarization
[DE93-013195] p 568 N94-13036
Recent developments in multiple-scattering calculations of XAFS and XANES
[DE93-010999] p 563 N94-13477
A long-term space astrophysics research program: The evolution of the quasar continuum
[NASA-CR-193714] p 839 N94-14404
Ultra-soft x ray absorption spectroscopy: A bulk and surface probe of materials
[DE93-014325] p 566 N94-14582
X RAY ANALYSIS
Real time radiography of Titan 4 booster
[DE93-012450] p 548 N94-12911
Project proposal for partial computational physics support for Survivability of Coatings program
[DE93-013788] p 576 N94-12939
High spatial resolution x ray microanalysis: Comparison of experiment and incoherent scattering calculations
[DE93-011685] p 648 N94-13044
X RAY ASTRONOMY
Search for UHE point-source emission over various time scales
[DE93-012718] p 846 N94-12922
ROSAT guest investigator program (AO-1). On a search for coronal x ray emissions from white dwarfs
[NASA-CR-193654] p 835 N94-13171
ROSAT: X ray survey of compact groups
[NASA-CR-193297] p 829 N94-13181
X ray emission from dynamical shock models in hot-star winds
[NASA-CR-194093] p 847 N94-13288
Search for x ray emitting young stars outside of massive molecular clouds
[NASA-CR-193609] p 830 N94-13462
ROSAT observations of the binary Be-star/radio pulsar PSR1259-63
[NASA-CR-194394] p 832 N94-14357
A long-term space astrophysics research program: The evolution of the quasar continuum
[NASA-CR-193714] p 839 N94-14404
ROSAT observations of clusters with wide-angle tailed radio sources
[NASA-CR-193784] p 833 N94-14405
The soft x ray transient Cen X-4 in quiescence
[NASA-CR-194033] p 833 N94-14406
X RAY ASTROPHYSICS FACILITY
The four great observatories
[NASA-TM-109311] p 830 N94-13605
AXAF FITS standard for ray trace interchange
[NASA-CR-194025] p 832 N94-14305
X RAY BINARIES
A photometric study of massive x-ray binaries
[ITN-93-85207] p 829 N94-13231
High time resolution studies of binary x ray pulsars
[NASA-CR-194395] p 832 N94-13894
ROSAT observations of the binary Be-star/radio pulsar PSR1259-63
[NASA-CR-194394] p 832 N94-14357
The soft x ray transient Cen X-4 in quiescence
[NASA-CR-194033] p 833 N94-14406
X RAY DETECTORS
Metal-semiconductor, composite radiation detectors
[DE93-013313] p 619 N94-12994
An x ray detector using superconducting aluminum tunnel junctions
[DE93-015103] p 811 N94-14332
Absolute detection efficiency of a micro-channel plate detector to x rays in the 1-100 KeV energy range
[DE93-012592] p 789 N94-14460
X RAY DIFFRACTION
Analysis of samples of reflector materials which are multicoated and metal samples with oxide coatings which have been exposed the space environment in LDEF testing
[NASA-CR-193647] p 575 N94-12789
Crystallographic and metallurgical characterization of radiation detector grade cadmium telluride materials
[DE93-014335] p 806 N94-13150
Room temperature degradation of YBa2Cu3O(7-x) superconductors in varying relative humidity environments
[NASA-TP-3368] p 813 N94-14409
Is K3C60 a line phase?
[DE93-016700] p 813 N94-14517
X RAY FLUORESCENCE
ROSAT observations of clusters with wide-angle tailed radio sources
[NASA-CR-193784] p 833 N94-14405
Measurements of the spatial structure and directivity of 100 KeV photon sources in solar flares using PVO and ISEE-3 spacecraft
[NASA-CR-194080] p 845 N94-14492
Comparative study of x ray and microwave emissions during solar flares
[NASA-CR-194532] p 845 N94-14577
X RAY IMAGERY
The development of the TiMAX project: A hard x ray imaging telescope
[INPE-5474-TDI/505] p 829 N94-13245
Adaptive control of interface by temperature and interface profile feedback in transparent multi-zone crystal growth furnace
[NASA-CR-194140] p 762 N94-13253
The x ray lasers as sources for x ray microscopy
[DE93-013420] p 655 N94-13259
X ray observations of late-type stars using the ROSAT all-sky survey
[NASA-CR-193716] p 832 N94-14146
Image reconstruction for x ray holographic microscopy
[DE93-013094] p 653 N94-14772
X RAY IRRADIATION
Design and testing of planar magnetic micromotors fabricated by deep x ray lithography and electroplating
[DE93-012856] p 618 N94-12821
X RAY LASERS
Three dimensional time-dependent hydrodynamic and propagation modeling of x ray laser emission
[DE93-012575] p 654 N94-12962
Imaging microscopy with x ray lasers at Lawrence Livermore National Laboratory
[DE93-013419] p 655 N94-13258
The x ray lasers as sources for x ray microscopy
[DE93-013420] p 655 N94-13259
Oscillator-amplifier experiments in neon-like yttrium
[DE93-012577] p 657 N94-13976
The Livermore x ray laser program
[DE93-014118] p 658 N94-14152
Selenium x ray laser line profile measurements
[DE93-012580] p 658 N94-14175
Experimental measurements of selenium x-ray laser spectral line profiles
[DE93-016543] p 659 N94-14595
Optimization study of x ray laser coherence in Ni-like Ta
[DE93-016419] p 660 N94-14888
Time resolved measurement of electron temperatures of exploding foil x ray laser plasmas
[DE93-017161] p 803 N94-14894
X RAY SCATTERING
Resonant x ray Raman scattering from atoms and molecules
[DE93-015158] p 784 N94-13896
Structure and stability of microvoids in A-Si:H
[DE93-016625] p 813 N94-14413
X RAY SOURCES
Search for UHE point-source emission over various time scales
[DE93-012718] p 846 N94-12922
Studies of gas in cooling flow clusters
[NASA-CR-193597] p 628 N94-12959
The x ray lasers as sources for x ray microscopy
[DE93-013420] p 655 N94-13259
The onset of galactic winds in early-type galaxies
[NASA-CR-193640] p 836 N94-13446
X ray observations of late-type stars using the ROSAT all-sky survey
[NASA-CR-193716] p 832 N94-14146
An x ray detector using superconducting aluminum tunnel junctions
[DE93-015103] p 811 N94-14332
The 8 to 11 keV x ray sources for imaging and absorption experiments
[DE93-015973] p 803 N94-14865
X RAY SPECTRA
Studies of gas in cooling flow clusters
[NASA-CR-193597] p 628 N94-12959
ROSAT guest investigator program (AO-1). On a search for coronal x ray emissions from white dwarfs
[NASA-CR-193654] p 835 N94-13171
Selenium x ray laser line profile measurements
[DE93-012580] p 658 N94-14175
A long-term space astrophysics research program: The evolution of the quasar continuum
[NASA-CR-193714] p 839 N94-14404
X RAY SPECTROSCOPY
Analysis of samples of reflector materials which are multicoated and metal samples with oxide coatings which have been exposed the space environment in LDEF testing
[NASA-CR-193647] p 575 N94-12789
Surface science instrumentation for the study of important catalytic and electrochemical interfaces
[DE93-015068] p 563 N94-13413
Recent developments in multiple-scattering calculations of XAFS and XANES
[DE93-010999] p 563 N94-13477
Many-body corrections in XAFS
[DE93-011002] p 563 N94-13478
Applications of surface science to solid lubricants
[SMC-TR-93-24] p 579 N94-13903
Hard x ray/microwave spectroscopy of solar flares
[NASA-CR-194399] p 844 N94-13958
Ultra-soft x ray absorption spectroscopy: A bulk and surface probe of materials
[DE93-014325] p 566 N94-14582
X RAY STARS
ROSAT guest investigator program (AO-1). On a search for coronal x ray emissions from white dwarfs
[NASA-CR-193654] p 835 N94-13171
Search for x ray emitting young stars outside of massive molecular clouds
[NASA-CR-193609] p 830 N94-13462
X RAY TELESCOPES
The development of the TIMAX project: A hard x ray imaging telescope
[INPE-5474-TDI/505] p 829 N94-13245
X RAYS
Two-dimensional simulations of foil implosion experiments on the Los Alamos capacitor bank
[DE93-012676] p 794 N94-12814
Detection of hot muonic hydrogen atoms emitted in vacuum using x-rays
[DE93-010253] p 778 N94-12860
Absolute detection efficiency of a micro-channel plate detector to x rays in the 1-100 KeV energy range
[DE93-012592] p 789 N94-14460
XENON
Kinetic studies following state-selective laser excitation
[DE93-012970] p 654 N94-13013

Y

YAG LASERS
Tetravalent chromium (Cr(4+)) as laser-active ion for tunable solid-state lasers
[NASA-CR-194527] p 659 N94-14576

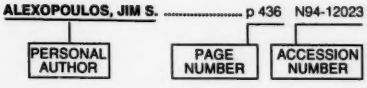
YAW
The 3D pneumatic and 2D dynamic probes: Their development and subsequent use in a transonic fan
[RAE-TM-AERO/PROP-22] p 653 N94-14827
YBCO SUPERCONDUCTORS
Flux-pinning related defect structures in melt-processed YBa2Cu3O(7-x)
[DE93-012759] p 804 N94-12818
The study of structure-processing-property relations in copper oxide based high (Tc) superconductors
[DE93-015066] p 804 N94-13003
Measurement of residual strain in composites by means of time-of-flight neutron diffraction
[DE93-012939] p 555 N94-13248
Measurement of penetration depth lambda(T) in YBa2Cu3O(7-delta) thin film
[DE93-014587] p 810 N94-14122
Formation of textured YBCO films by laser ablation
[DE93-013131] p 581 N94-14319
Superconductivity devices: Commercial use of space
[NASA-CR-194163] p 625 N94-14324
Room temperature degradation of YBa2Cu3O(7-x) superconductors in varying relative humidity environments
[NASA-TP-3368] p 813 N94-14409
Quenching and annealing effects on the specific heat of YBa2Cu3O(7-delta)
[DE93-016483] p 816 N94-14868
YIELD POINT
Absorption and damage thresholds of low defect density hafnia deposited with activated oxygen
[DE93-013853] p 655 N94-13243
YIELD STRENGTH
Radiation hardening and radiation-induced chromium depletion effects on intergranular stress corrosion cracking of austenitic stainless steels
[DE93-011602] p 572 N94-14058
Yield properties of tungsten and tungsten heavy alloys
[AD-A266833] p 575 N94-14878
YTTERBIUM
Laser and spectroscopic properties of Yb-doped apatite crystals
[DE93-014656] p 810 N94-14125
YTTRIUM
First-principles studies of phase stability and the structural and dynamical properties of hydrogen-metal systems
[DE93-016129] p 570 N94-13374
Oscillator-amplifier experiments in neon-like yttrium
[DE93-012577] p 657 N94-13976
YTTRIUM COMPOUNDS
Small polaron conduction in Y2Ti2O7
[ITN-93-85221] p 814 N94-14557
YTTRIUM OXIDES
Combustion synthesis and engineering of nanoparticles for electronic, structural, and superconductor applications
[DE93-016286] p 809 N94-13981
Physical and structural properties of a sputtered zirconia-yttria layer used as a thermal resistance
[ONERA-NT-1992-10] p 810 N94-14193
Metastability of yttrium-oxides
[DE93-016548] p 813 N94-14440

Z

ZEEMAN EFFECT
Dynamic Jahn-Teller effect: Calculation of fine structure spectrum, isotope shift and Zeeman behavior at deep center Ni2+ in CdS
[ETN-93-94394] p 815 N94-14705
ZEOLITES
Anchoring strategies for bimetallic species in zeolites
[DE93-015622] p 567 N94-12834
Experimental and kinetic modeling of acid/base and redox reactions over oxide catalysts
[DE93-016203] p 563 N94-13375
ZETA PINCH
Two-dimensional simulations of foil implosion experiments on the Los Alamos capacitor bank
[DE93-012676] p 794 N94-12814
Advanced magnetic flux compression generator development issues: A comparison of coaxial and disk generators
[DE93-014025] p 794 N94-12849
Instability heating of the HDZP
[DE93-012641] p 798 N94-13513
Review of the Procyon explosive pulsed power system
[DE93-016562] p 802 N94-14532
ZINC ALLOYS
Crystal growth of ZnSe and related ternary compound semiconductors by physical vapor transport
[NASA-CR-193834] p 807 N94-13444
ZINC CHLORIDES
Estimation of the concentration versus the time profile of zinc chloride particles in smoke clouds generated by the Raufoss A/S instantaneous smoke RA-90 and DM-45 HC smoke generator
[FFI-93/6001] p 708 N94-13821
ZIRCONIUM OXIDES
Combustion synthesis and engineering of nanoparticles for electronic, structural, and superconductor applications
[DE93-016286] p 809 N94-13981
Physical and structural properties of a sputtered zirconia-yttria layer used as a thermal resistance
[ONERA-NT-1992-10] p 810 N94-14193
ZONE MELTING
Growth of semiconductor compound single crystal InSb by floating zone method (M-3) p 586 N94-13735

PERSONAL AUTHOR INDEX

Typical Personal Author Index Listing



Listings in this index are arranged alphabetically by personal author. The page number helps you locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

A

AAQUIST, ORLA BOJE ..... p 829 N94-13371
ABASHIAN, A. ..... p 782 N94-13412
ABBATE, S. F. ..... p 609 N94-14381
ABBOTT, TERENCE S. ..... p 517 N94-13710
ABBOTT, TIMOTHY MARK CAMERON ..... p 831 N94-13646
ABDULAZIZ, SALMAN SAIB ..... p 703 N94-13639
ABEL, PHILLIP B. ..... p 554 N94-12871

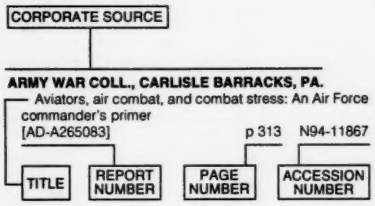
Typical Corporate Source Index Listing



Listings in this index are arranged alphabetically by corporate source. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document cited (e.g., NASA report, translation, NASA contractor report). The accession number denotes the number by which the citation is identified. The page number helps you locate the citation in the abstract section. The titles are arranged under each corporate source in ascending accession number order.

A

ABACUS TECHNOLOGY CORP., CHEVY CHASE, MD.
Technology assessments of advanced energy storage systems for electric and hybrid vehicles
[DE93-014395] p 701 N94-12913

ACADEMIA SINICA, BEIJING (CHINA).
China's devotion to space science and applications p 532 N94-14273

ACADEMY OF SCIENCES OF THE UKRAINE, KHARKOV.
Non-linear effects in vortex viscous flow in superconductors-role of finite heat removal velocity
[DE93-621785] p 618 N94-12856
Deposition of crystalline boron thick layers from gas phase
[DE93-620499] p 576 N94-12867
Electrodynamics of helical plasma structures
[DE93-620981] p 797 N94-13240
About the influence of inert gas ion implantation on metal corrosion stability
[DE93-620574] p 569 N94-13360
Interferometric investigation methods of plasma spatial characteristics on stellarators and tokamaks in submillimeter region
[DE93-621606] p 798 N94-13507
On transport of energy, momentum, orbital angular momentum and self-angular momentum of electromagnetic wave in dispersal media
[DE93-624179] p 617 N94-14883

ACADEMY OF SCIENCES OF THE UKRAINE, KIEV.
Multiplicity spectrometry on neutron filtered beams
[DE93-617529] p 790 N94-14843
On the statistical theory of the even-even nucleons levels' density
[DE93-623990] p 788 N94-14875
The space-time and energy parameters of deuterium braking by the central collision with atoms
[DE93-624144] p 788 N94-14881

ACADEMY OF SCIENCES (USSR), LENINGRAD.
On the neutron EDM search in the Laue diffraction by the crystal without a centre of symmetry
[DE93-622971] p 804 N94-12828

ADVANCED AVIATION CONCEPTS, JUPITER, FL.
Determination of Loran-C/GPS human factors issues
[PB93-199693] p 514 N94-14563

ADVANCED COMMUNICATIONS TECHNOLOGY, INC., SILVER SPRING, MD.
VIEWCACHE: An incremental pointer-base access method for distributed databases. Part 1: The universal index system design document. Part 2: The universal index system low-level design document. Part 3: User's guide. Part 4: Reference manual. Part 5: UIMS test suite
[NASA-CR-191788] p 822 N94-13126

AERONAUTICAL RESEARCH INST. OF SWEDEN, STOCKHOLM.
Simulator study of uncoupled control functions. Use of manual pointing modes when aiming at ground targets and oncoming airborne target
[FFA-TN-1992-18] p 528 N94-13588
An 8-node axisymmetric acoustic finite element for non-axisymmetric fluid-structure interaction analysis
[FFA-TN-1993-03] p 673 N94-13689
Computational methods for reliable fatigue and damage tolerance dimensioning of aircraft structures
[FFA-TN-1993-05] p 515 N94-13690

AERONAUTICAL RESEARCH LABS., MELBOURNE (AUSTRALIA).
A benchmark bending test of a thick specimen, Part 1: Experiments
[ARL-RR-6-PT-1] p 670 N94-12927
A benchmark bending test of a thick specimen. Part 2: Surface displacement measurements
[ARL-RR-6-PT-2] p 670 N94-12928
Behavior of streamwise rib vortices in a three-dimensional mixing layer p 644 N94-14754

AEROSPACE CORP., EL SEGUNDO, CA.
Surface analysis of bearings
[AD-A266800] p 661 N94-13122
Stormtime transport of ring current and radiation belt ions
[NASA-CR-194416] p 714 N94-13793
Applications of surface science to solid lubricants
[SMC-TR-93-24] p 579 N94-13903
Dynamical model for the distribution of geomagnetically trapped anomalous-component ions
[ATR-91(9558)-6] p 784 N94-13936
AlGaAs diode laser blue shift resulting from fast neutron irradiation
[AD-A266642] p 659 N94-14681
Double inlet pulse tube cryocooler theory
[AD-A266832] p 597 N94-14877

AEROSPACE MEDICAL RESEARCH LABS., BROOKS AFB, TX.
The identification of ability requirements and selection instruments for fighter pilot training
[AD-A266340] p 735 N94-13582

AGENCY OF INDUSTRIAL SCIENCE AND TECHNOLOGY, TSUKUBA (JAPAN).
Growth experiment of organic metal crystal in low gravity (M-21) p 590 N94-13753

AIR-CONDITIONING AND REFRIGERATION TECHNOLOGY INST., INC., ARLINGTON, VA.
ARTI Refrigerant Database
[DE93-014774] p 595 N94-13021
Miscibility of lubricants with refrigerants, phase 1
[DE93-014766-PHASE-1] p 596 N94-13407
Compatibility of refrigerants and lubricants with motor materials
[DE93-014768] p 583 N94-14801

AIR FORCE ACADEMY, CO.
The use of linked lists in the simulation of controller-structure interaction p 679 N94-14630

AIR FORCE INST. OF TECH., WRIGHT-PATTERSON AFB, OH.
The effects of evaluation and production blocking on the performance of brainstorming groups
[AD-A265495] p 734 N94-12929
On the vertical structure of seasonal, interannual and intraseasonal flows
[AD-A265346] p 719 N94-12992
Magic mirror on the wall, who's the fastest database of them all? A survey of database benchmarks
[AD-A266437] p 823 N94-13701
ANNS: An X Window based version of the AFIT neural network simulator
[AD-A266540] p 764 N94-13704
A comparison of computational and experimental data for a subscale high speed propulsive nozzle at low mach numbers
[AD-A266543] p 504 N94-13705
Experimental and analytical analysis of the response of a smart beam to rate feedback
[AD-A266544] p 557 N94-13706
Experimental investigation of the effects of blowing ratio parameter on heat transfer to a film-cooled flat plate
[AD-A266599] p 636 N94-13780

AKRON UNIV., OH.
Adaptive control of interface by temperature and interface profile feedback in transparent multi-zone crystal growth furnace
[NASA-CR-194140] p 762 N94-13253

ALABAMA A & M UNIV., NORMAL.
Determination of trace elements in triglycine sulfate solutions
[NASA-CR-193481] p 562 N94-13048
Characterization of Spirulina biomass for CELSS diet potential
[NASA-CR-194123] p 729 N94-14097

ALABAMA UNIV., BIRMINGHAM.
Protein crystal growth p 591 N94-13756
Immiscible phase incorporation during directional solidification of hypermonotectics
[NASA-CR-194412] p 565 N94-14480

ALABAMA UNIV., HUNTSVILLE.
Breadboard activities for advanced protein crystal growth
[NASA-CR-193559] p 803 N94-12796
Reduce fluid experiment system flight data from IML-1
[NASA-CR-193835] p 804 N94-12873
Development of a global backscatter model for NASA's laser atmospheric wind sounder
[NASA-CR-192581] p 718 N94-12957
ROSAT guest investigator program (AO-1). On a search for coronal x ray emissions from white dwarfs
[NASA-CR-193654] p 835 N94-13171
Advanced electric motor technology flux mapping
[NASA-CR-193824] p 621 N94-13186
Temperature dependence of diffusivities, preliminary definition phase
[NASA-CR-192613] p 648 N94-13326
Numerical studies of spray combustion in liquid-fueled engines p 584 N94-13685
Develop research plan for use of atlas data
[NASA-CR-194338] p 714 N94-13709
Studies on equatorial shock formation during plasmaspheric refilling
[NASA-CR-194392] p 715 N94-13954
Sloshing dynamics on rotating helium dewar tank
[NASA-CR-194403] p 637 N94-13959
The role of ionospheric plasma in the magnetosphere
[NASA-CR-194404] p 716 N94-13967
Partial analysis of LDEF experiment A-0114
[NASA-CR-193826] p 564 N94-14025
BALLIST: A computer program to empirically predict the bumper thickness required to prevent perforation of the Space Station by orbital debris
[NASA-CR-193825] p 543 N94-14120
Earth science and application
[NASA-CR-184381] p 683 N94-14484
Cellular responses to low-gravity: Pilot studies on suborbital rockets and orbiting spacecraft
[NASA-CR-194402] p 729 N94-14494
Investigation of Zerodur material processing
[NASA-CR-193842] p 793 N94-14903
Atomic research
[NASA-CR-193843] p 788 N94-14905

ALABAMA UNIV., TUSCALOOSA.
Adaptively resizing populations: Algorithm, analysis, and first results
[NASA-CR-194277] p 742 N94-12806

Design and application of electromechanical actuators for deep space missions
[NASA-CR-194145] p 663 N94-14134

ALBERTA UNIV., EDMONTON.
Remote identification of rain and hail with a polarization diversity radar
[ISBN-0-315-55623-4] p 720 N94-13516
Characteristics of semiconductor lasers with optical feedback
[ISBN-0-315-55435-5] p 656 N94-13522
Flammability of clothing, volume 2
[DSIS-93-00036-VOL-2] p 564 N94-13819
improving physical performance by chemical stimulation
[DSIS-92-03763] p 728 N94-13823
Transcript of workshop on machinery health monitoring
[IME-MET-TR-005] p 733 N94-13847

ALLIED-SIGNAL AEROSPACE CANADA, TORONTO (ONTARIO).
The power of cross-functional teams in driving total quality p 666 N94-13159

ALLIED-SIGNAL AEROSPACE CO., KANSAS CITY, MO.
Knowledge base technology for CT-DIMS: Report 1
[DE93-013118] p 743 N94-13014
Rigid-flexible printed wiring boards
[DE93-013938] p 620 N94-13094
Dry film lubricant evaluation
[DE93-013114] p 578 N94-13118
Pollution prevention through total quality
[DE93-013814] p 707 N94-13390
Rapid intelligent inspection process definition for dimensional measurement in advanced manufacturing
[DE93-011271] p 748 N94-13480
Development of test techniques to simulate high-frequency mechanical shock on weapon components
[KCP-613-4998] p 675 N94-13907
Miniature mechanism assembly
[DE93-015595] p 624 N94-13928
Alternate cleaning methods for LCCAs
[KCP-613-5045] p 624 N94-13937
Microwave interconnection
[DE93-016580] p 625 N94-14533
Moisture meter evaluation
[DE93-016581] p 652 N94-14534

ALLIED-SIGNAL AEROSPACE CO., PHOENIX, AZ.
Advanced Turbine Technology Applications Project (ATTAP)
[NASA-CR-191088] p 828 N94-12931

ALUMINUM CO. OF AMERICA, ALCOA CENTER, PA.
Role of microstructure on fatigue durability of aluminum aircraft alloys
[AD-A265627] p 568 N94-12993
Role of microstructure on fatigue durability of aluminum aircraft alloys
[AD-A266350] p 571 N94-13697

AMERICAN GEOPHYSICAL UNION, WASHINGTON, DC.
The 1990 Western Pacific Geophysics meeting
[NASA-CR-193456] p 712 N94-13334
The American Geophysical Union Chapman Conference on Tectonics and Topography
[NASA-CR-193454] p 713 N94-13335

AMERICAN MOBILE SATELLITE CORP., WASHINGTON, DC.
Propagation considerations in the American Mobile Satellite system design p 614 N94-14668

AMERICAN PRODUCTIVITY AND AIR QUALITY CENTER, HOUSTON, TX.
Measuring quality progress p 666 N94-13154

AMERICAN UNIV., WASHINGTON, DC.
Solid state laser systems for space application
[NASA-CR-194133] p 656 N94-13420

AMES LAB., IA.
Gas atomized Er3Ni powder for cryocooler applications
[DE93-011564] p 568 N94-13000

ANALYTICAL SERVICES AND MATERIALS, INC., HAMPTON, VA.
Large-eddy simulation of laminar-turbulent breakdown at high speeds with dynamic subgrid-scale modeling
[NASA-CR-4533] p 629 N94-13064
Effect of thermal processing practices on the properties of superplastic Al-Li alloys
[NASA-CR-4548] p 574 N94-14850

APD CRYOGENICS, INC., ALLENTOWN, PA.
Three-stage linear, split-Stirling cryocooler for 1 to 2K magnetic cold stage
[NASA-CR-4538] p 776 N94-13897

APPLIED RESEARCH, INC., HUNTSVILLE, AL.
Enhanced NDE systems
[NASA-CR-192603] p 669 N94-14101

APPLIED RESEARCH CORP., LANDOVER, MD.
UV extinction properties of carina nebular dust
[NASA-CR-193424] p 835 N94-13233

APPLIED SILICON, INC., OTTAWA (ONTARIO).
VMEC30 programming library: Reference manual
[DSIS-93-00350] p 750 N94-13858
Adaptive Signal Processing Testbed
[DSIS-93-00258] p 604 N94-13869
Adaptive Signal Processing Testbed: Software design specification
[DSIS-93-00259] p 604 N94-13870
Advanced Communications ESM System (ACES) testbed: Integration study
[DSIS-93-00345] p 604 N94-13939
VMEC30 software development: Tutorial manual
[DSIS-93-00351] p 750 N94-13944
Demonstration and acceptance test plan for real-time excision software on the Adaptive Signal Processing Testbed
[DSIS-93-00275] p 751 N94-13990
ASPT software source code: SUN driver package
[DSIS-93-00262] p 751 N94-14014
Adaptive Signal Processing Testbed: VME-based DSP board market survey
[DSIS-93-00274] p 605 N94-14015
ASPT software source code: Development system package, VME-C30 component
[DSIS-93-00276] p 751 N94-14016
Adaptive Signal Processing Testbed signal excision software: User's manual
[DSIS-93-00260] p 606 N94-14037
Adaptive Signal Processing Testbed application software: User's manual

[DSIS-93-00348] p 752 N94-14051
VMEC30 SUN device drivers: User's manual
[DSIS-93-00349] p 752 N94-14052
EWTEST signal excision testbed: System evaluation
[DSIS-93-00346] p 607 N94-14065
DSP software development environments for the Adaptive Signal Processing Testbed
[DSIS-93-00347] p 607 N94-14066
ASPT software source code: Host development system package
[DSIS-93-00277] p 753 N94-14197

ARGONNE NATIONAL LAB., IL.
Integrated, flexible, and rapid geophysical surveying
[DE93-009989] p 712 N94-12906
Development of nondestructive evaluation methods and prediction of effects of flaws on the fracture behavior of structural ceramics
[DE93-012942] p 577 N94-13032
Measurement of residual strain in composites by means of time-of-flight neutron diffraction
[DE93-012939] p 555 N94-13248
AQUIS: A PC-based source information manager
[DE93-012893] p 707 N94-13383
Simplification-driven automated partial evaluation
[DE93-012890] p 768 N94-13391
A positron annihilation radiation telescope using Laue diffraction in a crystal lens
[DE93-012905] p 848 N94-13483
Ultrafast photoinduced electron transfer reactions in supramolecular arrays: Studies of electronic coupling and solvation
[DE93-012910] p 782 N94-13484
An examination of utility emissions contributions to elevated ozone concentrations in the Chicago area
[DE93-012852] p 708 N94-13495
Are there atmospheric neutrino oscillations?
[DE93-015550] p 783 N94-13890
Resonant x ray Raman scattering from atoms and molecules
[DE93-015158] p 784 N94-13896
Heat and seed recovery technology project
[DE93-009203] p 800 N94-13913
The de Haas-van Alphen studies and Fermi surface properties of organic superconductors (ET)2X
[DE93-015157] p 623 N94-13925
Wear-mechanism modelling
[DE93-012311] p 579 N94-13974
Battery testing at Argonne National Laboratory
[DE93-011761] p 624 N94-14012
On the hardening and softening of nanocrystalline materials
[DE93-012901] p 810 N94-14185
Prism-film coupling in anisotropic planar waveguides of epitaxial (101) rutile thin films
[DE93-012912] p 811 N94-14304
Evolution of the lower planetary boundary layer over strongly contrasting surfaces
[DE93-010667] p 717 N94-14424
Procurement and execution of PCB analyses: Customer-analyst interactions
[DE93-009964] p 566 N94-14694
Toward a verifiable approach to the design of concurrent computations
[DE93-012908] p 756 N94-14844

ARIZONA STATE UNIV., TEMPE.
Surfaces and interfaces of ceramics and metals
[DE93-014959] p 578 N94-13408
Regional tectonic analysis of Venus as part of the Pioneer Venus guest investigator project
[NASA-CR-194079] p 842 N94-13561
Antenna pattern control using impedance surfaces
[NASA-CR-194517] p 602 N94-13799
The soft x ray transient Cen X-4 in quiescence
[NASA-CR-194033] p 833 N94-14406

ARIZONA UNIV., TUCSON.
Thermosolutal convection and macrosegregation in dendritic alloys
[NASA-CR-194039] p 567 N94-12825
Tree reconstruction from partial orders
[DE93-009841] p 743 N94-12991
Optical systems integrated modeling
p 547 N94-14837

ARMY ARMAMENT RESEARCH, DEVELOPMENT AND ENGINEERING CENTER, PICATINNY ARSENAL, NJ.
Solderability of surface mount devices
[AD-A265751] p 620 N94-13040

ARMY ARMAMENT RESEARCH, DEVELOPMENT AND ENGINEERING CENTER, WATERVLIET, NY.
Autofrettage: Stress distribution under load and retained stresses after depressurization. A modified plane-strain case
[AD-A266320] p 671 N94-13579
Thermal gradient-induced deflection of a thick-walled cylinder with bending residual stresses
[AD-A266347] p 673 N94-13777

ARMY AVIATION SYSTEMS COMMAND, MOFFETT FIELD, CA.
Some lessons learned in three years with ADS-33C
p 521 N94-13299
A piloted simulation investigation of the normal load factor and longitudinal thrust required for air-to-air acquisition and tracking p 522 N94-13301

ARMY AVIATION TECHNICAL TEST CENTER, FORT RUCKER, AL.
Flight testing and frequency domain analysis for rotorcraft handling qualities characteristics
p 526 N94-13324

ARMY RESEARCH LAB., ABERDEEN PROVING GROUND, MD.
Infrared transmission and path radiance through dust and fog
[AD-A265825] p 791 N94-12979
Flamespreading in granular solid propellant: Design of an experiment
[AD-A266009] p 583 N94-12987
A computational study of the base region flow field for the M865 projectile
[ARL-TR-109] p 504 N94-13795
Closed-chamber analysis of M5 propellant lot RAD-64597
[AD-A266321] p 585 N94-14145

ARMY RESEARCH LAB., CLEVELAND, OH.
Two-dimensional Navier-Stokes heat transfer analysis for rough turbine blades
[NASA-TM-106008] p 629 N94-13027

ARMY RESEARCH LAB., WATERTOWN, MA.
Modeling the impact behavior of AD85 ceramic under multi-axial loading
[AD-A265877] p 576 N94-12932
The effect of TiN coatings on the rolling contact fatique behavior of M50 bearing steel
[ARL-TR-40] p 662 N94-13794
Synthetic lubricants and high-performance functional fluids: Phosphazenes
[ARL-TR-45] p 580 N94-14126
Yield properties of tungsten and tungsten heavy alloys
[AD-A266833] p 575 N94-14878

ARNOLD ENGINEERING DEVELOPMENT CENTER, ARNOLD AFS, TN.
Hypersonic overview p 505 N94-14154
Hypersonic flow phenomenology p 505 N94-14155
Characterization of flow fields in hypersonic ground test facilities p 505 N94-14157
Aerodynamic and aerothermal facilities 1: Hypersonic wind tunnels p 506 N94-14158
Aerodynamic and aerothermal facilities 2. Part 1: Short-duration, high-enthalpy facilities
p 506 N94-14159
Aeropropulsion facilities p 506 N94-14161
Computational techniques and capabilities
p 506 N94-14162
Test and evaluation methods p 506 N94-14163
Materials/structures testing p 506 N94-14164
Aeropropulsion test and evaluation methods
p 506 N94-14165
Hypersonic flow field measurements: Intrusive
p 507 N94-14166

Hypersonic flow-field measurements: Nonintrusive
p 507 N94-14167
Hypersonic flight test. Part 1: Propulsion flight testing
p 507 N94-14168
Hypersonic flight testing. Part 2: Aerothermal flight testing
p 507 N94-14169
Extrapolation of ground test data to flight
p 507 N94-14170
Boundary-layer transition
p 507 N94-14171
Shock/boundary-layer/shock interactions
p 507 N94-14172
Electromagnetic wave test
p 508 N94-14173

ASIAN INST. OF TECH., BANGKOK (THAILAND).
Detecting land cover changes in Chiang-Mai area in Thailand
p 693 N94-14241

ASSISTANT SECRETARY OF DEFENSE (COMMUNICATIONS COMMAND CONTROL AND INTELLIGENCE), WASHINGTON, DC.
Defense information infrastructure: Rationale for defense management report decision 918
[AD-A266014] p 821 N94-12958

Flight crew interface aspects of forward-looking airborne windshear detection systems
[NASA-CR-191437] p 516 N94-12829

BOEING DEFENSE AND SPACE GROUP, PHILADELPHIA, PA.
Handling qualities effects of display latency
p 517 N94-13316

BOEING DEFENSE AND SPACE GROUP, SEATTLE, WA.
System integration and demonstration of adhesive bonded high temperature aluminum alloys for aerospace structure, phase 2
[NASA-CR-191459] p 575 N94-12792
Resin transfer molding of textile composites
[NASA-CR-191505] p 554 N94-12833
Animation of multi-flexible body systems and its use in control system design
p 678 N94-14629
Space Station Common Berthing Mechanism, a multi-body simulation application
p 544 N94-14640

BOMBARDIER, INC., MONTREAL (QUEBEC).
Activities of Bombardier, Inc.
[ISBN-2-921393-11-5] p 499 N94-13520

BRITISH BROADCASTING CORP., KINGSWOOD (ENGLAND).
Digital sound: The selection of critical programme material and preparation of recordings for CCIR tests on low bit-rate codecs
[BBC-RD-1993/1] p 598 N94-12925
Digital sound: Subjective tests on commentary-quality codecs
[BBC-RD-1993/2] p 598 N94-12926
Coverage aspects of a single frequency network designed for digital audio broadcasting
[BBC-RD-1993/3] p 616 N94-14742

BRITISH COLUMBIA UNIV., VANCOUVER.
A photometric and morphological study of compact groups of galaxies and their environments
[ISBN-0-315-59601-5] p 829 N94-13370
The international regulation of air transport: Changing regimes and price effects
[ISBN-0-315-55958-6] p 511 N94-13543

BROOKHAVEN NATIONAL LAB., UPTON, NY.
Low pressure storage of natural gas on activated carbon
[DE93-014053] p 660 N94-12851
Gathering and exchange information on atmospheric chemistry and polluted atmospheres
[DE93-009940] p 705 N94-12869
MCNP benchmark analyses of critical experiments for the Space Nuclear Thermal Propulsion program
[DE93-014046] p 548 N94-12981
Generation of neutronic thermal data in support of space nuclear propulsion
[DE93-013148] p 549 N94-13034
Fifteenth Combustion Research Conference
[DE93-015758] p 562 N94-13045
The North Atlantic Regional Experiment (NARE)
[DE93-010126] p 706 N94-13054
HIJET with AGS physics and N(sup *)'s
[DE93-014022] p 780 N94-13097
Neutral strange particle production at the AGS
[DE93-014044] p 780 N94-13098
Polarization and color transparency
[DE93-014319] p 780 N94-13101
Canted magnetic moments at the Gd(0001) surface
[DE93-014327] p 805 N94-13102
Measurement of the spin of a particle using undulator radiation
[DE93-014334] p 780 N94-13149
Crystallographic and metallurgical characterization of radiation detector grade cadmium telluride materials
[DE93-014335] p 806 N94-13150
Nuclear fusion of protons with ions of boron
[DE93-014284] p 781 N94-13219
A new formulation of longitudinal coherent instabilities
[DE93-014288] p 789 N94-13220
Stripping efficiencies for 277 MeV/amu gold beam on copper foils
[DE93-014306] p 569 N94-13221
A search for strong-field direct two electron ionization using coincidence spectroscopy
[DE93-013435] p 781 N94-13241
Nuclear thermal propulsion engine based on particle bed reactor using light water steam as a propellant
[DE93-014336] p 552 N94-14111
Spin polarized photoemission studies of interfacial and thin film magnetism
[DE93-014326] p 580 N94-14142
Resonances in the Sigma NN system
[DE93-014353] p 785 N94-14144
Self organized criticality
[DE93-013182] p 773 N94-14320
The E2 N(yields)(Delta) transition from polarized Compton scattering
[DE93-012522] p 785 N94-14363
Is K3C60 a line phase?
[DE93-016700] p 813 N94-14517
Radiation effects on optoelectronic analog link for particle detectors
[DE93-015794] p 793 N94-14529
Wake-field and space charge effects on high brightness beams calculations and measured results for the laser driven photoelectrons at BNL-ATF
[DE93-015787] p 659 N94-14572
Early baryon and meson spectroscopy culminating in the discovery of the Omega minus SU(3) and quarks
[DE93-014321] p 787 N94-14580
Dynamic soil pressures on rigid cylindrical vaults
[DE93-013930] p 676 N94-14585
Space reactor fuel element testing in upgraded TREAT
[DE93-012524] p 554 N94-14806
Construction of the Courant-Snyder invariants for the non-linear equations of motion under presence of the linear coupling
[DE93-017565] p 788 N94-14872

BROWN UNIV., PROVIDENCE, RI.
Studies of turbulent shear flows and their control
[NASA-CR-194114] p 635 N94-13676
Multi-dimensional high order essentially non-oscillatory finite difference methods in generalized coordinates
[NASA-CR-194031] p 770 N94-14429

BUNDESANSTALT FUER FLUGSICHERUNG, FRANKFURT AM MAIN (GERMANY).
Activities report of the Federal Administration for Flight Safety (Germany)
[ETN-93-94208] p 511 N94-14008

BUREAU OF MINES, NORRIS, TN.
Early detection of insulation failure in electric motors
[PB93-198208] p 626 N94-14686

BYELORUSSIAN SCIENTIFIC AND TECHNICAL CENTRE OF ENVIRONMENT REMOTE DIAGNOSTICS, MINSK.
Study of the consequences of the Chernobyl accident and technogenic activity in the Republic Belarus using aerospace methods
p 693 N94-14246

C

CALGARY UNIV. (ALBERTA).
A survey of compact planetary nebulae at radio wavelengths
[ISBN-0-315-61950-3] p 829 N94-13371
Airport terminals: Optimum configurations and gate position requirement
[ISBN-0-315-61722-5] p 528 N94-13544

CALIAN COMMUNICATIONS, KANATA (ONTARIO).
Acousto-optical post-processor time-integrating correlator updates
[DSIS-93-00314] p 777 N94-13831

CALIFORNIA INST. OF TECH., PASADENA.
Research in cosmic and gamma ray astrophysics: Cosmic physics portion
[NASA-CR-194127] p 847 N94-13211
Surface science instrumentation for the study of important catalytic and electrochemical interfaces

CASE WESTERN RESERVE UNIV., CLEVELAND, OH.
Processing and testing of high toughness silicon nitride ceramics
[NASA-CR-191190] p 582 N94-14543

CATHOLIC UNIV. OF AMERICA, WASHINGTON, DC.
Physical properties of gas disks around shell stars with and without dust
[NASA-CR-193655] p 835 N94-13239
A capaciflector-based robotic system
[NASA-CR-193783] p 833 N94-14359

CENTER FOR MATHEMATICS AND COMPUTER SCIENCE, AMSTERDAM (NETHERLANDS).
The silent step in time
[CWI-CS-R9221] p 768 N94-13496
On the occur-check free PROLOG programs
[CWI-CS-R9238] p 748 N94-13524
Hashing and rehashing in emulated shared memory
[CWI-CS-R9240] p 740 N94-13525
On the foundations of final semantics: Non-standard sets, metric spaces, partial orders
[CWI-CS-R9241] p 768 N94-13526
Stochastic realization of finite-valued processes and primes in the positive matrices
[CWI-BS-R9222] p 773 N94-13677
Fast parallel string prefix-matching
[AD-A267758] p 760 N94-13924
On some results by Fuhrmann on Hankel operators
[CWI-BS-R9224] p 764 N94-13999
On relations between Schmidt pairs arising in robust control
[CWI-BS-R9225] p 764 N94-14000
On the Schmidt pairs of multivariable Hankel operators and robust control
[CWI-BS-R9226] p 765 N94-14001
On the geometry of external spectral factors and the Riccati inequality
[CWI-BS-R9227] p 770 N94-14002
On the differential structure of matrix-valued rational inner functions
[CWI-BS-R9228] p 770 N94-14003
Three, four, five, six or the complexity of scheduling with communication delays
[CWI-BS-R9229] p 751 N94-14004
Stochastic scheduling games with Markov decision arrival processes
[CWI-BS-R9231] p 773 N94-14005
Tuning of Gaussian stochastic control systems
[CWI-BS-R9223] p 765 N94-14018
Stochastic bounds for a polling system
[CWI-BS-R9230] p 765 N94-14361

CENTRE NATIONAL D'ETUDES SPATIALES, TOULOUSE (FRANCE).
Power converters for the 120 V bus supply control
[CNES-NT-134] p 622 N94-13552
Characteristics of the amateur radio means of the Arsene satellite
[CNES-NT-131] p 605 N94-13950
Study of the intermateability of Cannon and Souriau subminiature connectors
[CNES-NT-132] p 624 N94-13951
Multi-output flyback converter with ultrafast current protection
[CNES-NT-133] p 625 N94-14138

CHIBA INST. OF TECH., NARASHINO (JAPAN).
Solidification of eutectic system alloys in space (M-19)
p 589 N94-13751

Hypersonic propulsion characterization
p 505 N94-14156
Aerodynamic and aerothermal facilities 2: Continuous flow high enthalpy facilities p 506 N94-14160
Propulsion integration p 508 N94-14174
Identification and interpretation of patterns in rocket engine data
[NASA-CR-194534] p 552 N94-14309
An integrated knowledge system for the Space Shuttle hazardous gas detection system
[NASA-CR-194533] p 536 N94-14310

TEXAS A&M UNIV., COLLEGE STATION.
Rotordynamic and leakage characteristics of a 4-stage brush seal
[AD-A266012] p 660 N94-12988
Knowledge-based processing for aircraft flight control
[NASA-CR-194074] p 526 N94-13469
Evaluation of the Shuttle remote manipulator
[NASA-CR-194351] p 662 N94-13800
Techniques for estimating Space Station aerodynamic characteristics
[NASA-CR-193394] p 541 N94-13955
Flight validation of a pulsed smoke flow visualization system
[NASA-CR-186026] p 516 N94-14106
Fourteenth National Industrial Energy Technology Conference: Proceedings
[DE93-016698] p 710 N94-14516
Nonrecursive formulations of multibody dynamics and concurrent multiprocessing p 679 N94-14632
Analysis of new composite architectures
[NASA-CR-194524] p 559 N94-14715
Mathematic methods and algorithms for real-time applications
[AD-A266776] p 771 N94-14789

TEXAS UNIV., ARLINGTON.
Functional differential equations with piecewise continuous argument
[AD-A266660] p 772 N94-14840

TEXAS UNIV., AUSTIN.
Kinetic studies following state-selective laser excitation
[DE93-012970] p 654 N94-13013
Meteoroid environment near the Earth-Moon system
[NASA-CR-193670] p 835 N94-13203
Analysis of interstellar cloud structure based on IRAS images
[NASA-CR-194341] p 836 N94-13332
The geometric phase in quantum physics
[DE93-011121] p 817 N94-13479
High freestream turbulence effects on the transport of heat and momentum p 633 N94-13559
Investigation of criteria for ductile fracture under fully-plastic conditions p 672 N94-13593
Time series photometry of faint cataclysmic variables with a CCD p 831 N94-13646
The reionization of the intergalactic medium
p 838 N94-13651
Experimental measurement of local heat transfer coefficients over discrete roughened plates using infrared thermography p 635 N94-13652
The spectroscopic evolution of novae in the bulge of M31 and a search for their possible origin in the M31 globular cluster system p 831 N94-13668
The determination of crustal motions using laser ranging to Lageos-2 and Lageos-1
[NASA-CR-193787] p 717 N94-14306
Long duration measurements of fading on a low elevation angle, 11-GHz satellite path p 613 N94-14661
Large-scale rainfall diversity for ACTS
p 613 N94-14662
Tree attenuation at 20 GHz: Foliage effects
p 615 N94-14672
ACTS data center p 616 N94-14677
Splines, contours and SVD subroutines
[DE93-016088] p 757 N94-14866

TEXAS UNIV., BROWNSVILLE.
Robust stability of diamond families of polynomials with complex coefficients
[NASA-CR-194132] p 768 N94-13421
Exploiting structure: Introduction and motivation
[NASA-CR-194199] p 750 N94-13828

TEXAS UNIV., SAN ANTONIO.
Monoclonal antibodies directed against surface molecules of multicell spheroids
[NASA-CR-193560] p 727 N94-12795

TEXAS UNIV. AT DALLAS, RICHARDSON.
Atomic hydrogen and nitrogen distributions from atmosphere explorer measurements
[NASA-CR-194336] p 714 N94-13825

THERMACORE, INC., LANCASTER, PA.
Insoluble coatings for Stirling engine heat pipe condenser surfaces
[NASA-CR-191188] p 554 N94-14771

THIOKOL CORP., BRIGHAM CITY, UT.
Qualification test of the Ross Double Planetary Mixer
[NASA-CR-192600] p 652 N94-14497
Technical Evaluation Motor No. 10 (TEM-10)
[NASA-CR-193846] p 554 N94-14907

TOHOKU REGIONAL FISHERIES RESEARCH LAB., MIYAGI (JAPAN).
Tracking of change of a warm-core ring structure
p 696 N94-14267

TOKYO INST. OF TECH. (JAPAN).
Study on solidification of immisible alloys (M-10)
p 588 N94-13742
Fabrication of very-low-density, high-stiffness carbon fiber/aluminum hybridized composite with ultra-low density and high stiffness (M-11) p 588 N94-13743

TOKYO MEDICAL AND DENTAL UNIV. (JAPAN).
Studies on the effects of microgravity on the ultrastructure and functions of cultured mammalian cells (L-6) p 592 N94-13763

TOKYO SCIENCE UNIV. (JAPAN).
Present status of JEM utilization projects
p 530 N94-13273

TOKYO UNIV. (JAPAN).
Growth of Si spherical crystals and the surface oxidation (M-9) p 587 N94-13741
Study on the mechanism of liquid phase sintering (M-12) p 588 N94-13744
Estimate of sampling errors of TRMM rainfall observation by using radar-AMeDAS composite data
p 690 N94-14225
Remote sensing of low level cloud optical characteristics p 691 N94-14229
The effects of anthropogenic aerosols on optical thickness and particle size of clouds. Part 1: Retrieval algorithm p 691 N94-14230
Application of satellite remote sensing technology in disaster mitigation: A case study of Bangladesh
p 692 N94-14238
Global assessment of human activities
p 695 N94-14255
Vegetation mapping of Indo-China Peninsula using MOS-1 MESSR and NOAA AVHRR p 695 N94-14257
Outline of ISY Kuroshio observation experiment
p 697 N94-14268

TOKYO UNIV., SAGAMIHARA (JAPAN).
Asia-Pacific ISY Conference, volume 2
[NASDA-CM-199-VOL-2] p 688 N94-14209
Research and development of space transportation systems in ISAS p 537 N94-14277

TOLEDO UNIV., OH.
Measurements of scattering processes in negative ion-atom collisions
[DE93-013863] p 779 N94-12940

TORONTO UNIV. (ONTARIO).
Thermodynamic status of static and dynamic contact angles
[ISBN-0-315-73844-8] p 817 N94-13554
Cold dark matter halos p 838 N94-13649
Flow limitation and flutter in membrane walled collapsible tubes: A model for expiratory wheezing
[ISBN-0-315-73875-8] p 635 N94-13662
Implementation of manufacturing techniques for planar, single mode waveguides on lithium niobate
[DSIS-93-00101] p 792 N94-13845
A neural-network approach to robotic control
p 679 N94-14634

TOSHIBA CORP., TOKYO (JAPAN).
Flight evaluations of approach/landing navigation sensor systems: Summary of 1990 flight experiments
[NAL-TR-1175] p 513 N94-13344

TRANE CO., LACROSSE, WI.
Compatibility of refrigerants and lubricants with motor materials
[DE93-014768] p 583 N94-14801

UNIVERSITY OF ELECTRO-COMMUNICATIONS, TOKYO (JAPAN).
Bulletin of the University of Electro-Communications, volume 6, no. 1, serial no. 11 p 746 N94-13432
Fabrication of AlGaAs/GaAs-light-emitting devices by selective MOCVD using dialkylmetalchloride
p 627 N94-13433

Student's works and power supplies in electronic circuit laboratory p 627 N94-13434
On the construction and decoding of hyperelliptic codes p 747 N94-13435
Computational Russian morphological generation cn Prolog: Noun, pronoun, and adjective p 747 N94-13436
Designing and generating a GUI module using GUI p 747 N94-13437
Codes from an N-dimensional torus simplicially or cellularly decomposed p 747 N94-13438
Study of computer system as a musical instrument p 747 N94-13439
Analysis of fundamental frequency pattern in speech p 618 N94-13440
Reconsideration of the autonomous view of language p 618 N94-13441
Heidegger's thinking p 736 N94-13442

UNIVERSITY OF NORTH TEXAS, DENTON.
Scanning tunneling microscopy studies of diamond films and optoelectronic materials
[NASA-CR-194363] p 578 N94-13246

UNIVERSITY OF SOUTHERN CALIFORNIA, LOS ANGELES.
Office of Naval Research/DARPA publications: Composite materials with improved properties in compression
[AD-A265509] p 560 N94-14794

UNIVERSITY OF SOUTHERN CALIFORNIA, MARINA DEL REY.
Common lisp framework
[AD-A265878] p 742 N94-12933

UNIVERSITY OF SOUTHERN ILLINOIS, CARBONDALE.
Development of time-dependent orthotropic constitutive law of a thermoplastic composite material p 556 N94-13595

UNIVERSITY OF SOUTHERN MISSISSIPPI, HATTIESBURG.
Characterization of 1:1 random copolymers obtained from 6-, 7-, 11-, and 12-carbon amino acids
[AD-A265827] p 577 N94-12985
Unexpectedly rapid hydrosilation polymerization of the diallyl derivative of bisphenol A and 2,6-diallylphenol
[AD-A265832] p 577 N94-12986

UNIVERSITY OF WESTERN ONTARIO, LONDON.
Meteor forward scatter studies
[DSIS-93-00382] p 602 N94-13801
A study of meteor scatter communications
[DSIS-93-00151] p 603 N94-13841

UTAH STATE UNIV., LOGAN.
Newton iterative methods for large scale nonlinear systems
[DE93-015357] p 767 N94-13025

UTAH UNIV., SALT LAKE CITY.
Thermochemistry of transition metal clusters
[DE93-016201] p 571 N94-13977

V

VANDERBILT UNIV., NASHVILLE, TN.
The influence of a microgravity environment on the dendritic morphology during directional solidification of hypoeutectic Al-Si alloys
[NASA-CR-194139] p 571 N94-13891

VARIAN ASSOCIATES, PALO ALTO, CA.
A millimeter-wave tunneladder TWT
[NASA-CR-182183] p 620 N94-13106
Long-pulse operation of a gyrotron with beam/RF separation
[DE93-015007] p 649 N94-13410

VEXCEL CORP., BOULDER, CO.
EOS workstation
[NASA-CR-191326] p 736 N94-13132

VICTORIA UNIV. (BRITISH COLUMBIA).
Geometric stiffening in multibody dynamics formulations p 677 N94-14619
Modelling robotic systems with DADS p 678 N94-14625

VIGYAN RESEARCH ASSOCIATES, INC., HAMPTON, VA.
Three-Dimensional Boundary-Layer program (BL3D) for swept subsonic or supersonic wings with application to laminar flow control
[NASA-CR-4531] p 629 N94-13073

VIKING INSTRUMENTS CORP., RESTON, VA.
Development of an advanced spacecraft tandem mass spectrometer
[NASA-CR-194195] p 545 N94-13953

VIRGINIA COMMONWEALTH UNIV., RICHMOND.
Structure stability and spectroscopy of metal clusters
[DE93-016142] p 567 N94-12836

VIRGINIA POLYTECHNIC INST., BLACKSBURG.
Probabilistic micromechanics for high-temperature composites
[NASA-CR-191150] p 676 N94-14408

VIRGINIA POLYTECHNIC INST. AND STATE UNIV., BLACKSBURG.
Design and application of a quasistatic crush test fixture for investigating scale effects in energy absorbing composite plates
[NASA-CR-4526] p 670 N94-13063
Optical fiber sensors for materials and structures characterization
[NASA-CR-194090] p 791 N94-13353
Study of electroweak interactions
[DE93-015067] p 782 N94-13412
A technique for direct measurement of skin friction in supersonic combustion flow p 503 N94-13555
Topics on spatially high-order accurate methods and pre-conditioning for the Navier-Stokes equations with finite-rate chemistry p 633 N94-13572
Calculation of hypersonic shock structure using flux-split algorithms
[NASA-CR-194296] p 504 N94-13607
Sites of fine-scale electron density turbulence in the interstellar medium
[NASA-CR-193708] p 839 N94-13864
Information requirements of self-managing teams
[DE93-010319] p 824 N94-14048
Feasibility study of a synthesis procedure for array feeds to improve radiation performance of large distorted reflector antennas
[NASA-CR-194491] p 612 N94-14501
Statistical results from the Virginia Tech propagation experiment using the Olympus 12, 20, and 30 GHz satellite beacons p 613 N94-14658
Results from a study of scintillation behavior at 12, 20, and 30 GHz using the results from the Virginia Tech Olympus receivers p 613 N94-14659
The ACTS propagation terminal delivery and support p 615 N94-14674
Data collection with the ACTS propagation terminal p 615 N94-14675
Preprocessing data collected with the ACTS propagation terminal p 616 N94-14676
Surface characterization of LDEF materials
[NASA-CR-194519] p 543 N94-14683

VIRGINIA UNIV., CHARLOTTESVILLE.
Spectra of late type dwarf stars of known abundance for stellar population models
[NASA-CR-194301] p 831 N94-13681

VON KARMAN INST. FOR FLUID DYNAMICS, RHODE-SAINT-GENESE (BELGIUM).
Methodology of Hypersonic Testing
[VKI-LS-1993-03] p 505 N94-14153

W

WASHINGTON UNIV., SEATTLE.
Cosmic physics data analysis program
[NASA-CR-194357] p 846 N94-12826
Aspects of symmetry violation
[DE93-011003] p 779 N94-12997
Electrodynamics of the middle atmosphere: Superpressure balloon program
[NASA-CR-193671] p 712 N94-13293
Theoretical support for the Airborne Antarctic Ozone Experiment

YALE UNIV., NEW HAVEN, CT.
Research on chemical vapor deposition processes for advanced ceramic coatings
[NASA-CR-193613] p 577 N94-13089
Minimal modeling of the bimodality of extratropical atmospheric planetary waves p 713 N94-13622
The first steps of chlorophyli synthesis: RNA involvement and regulation
[DE93-014398] p 730 N94-14509

Typical Contract Number Index Listing

AF PROJ. 2306 ..... p 92 N94-11866

CONTRACT NUMBER | PAGE NUMBER | ACCESSION NUMBER

Listings in this index are arranged alphanumerically by contract number. Under each contract number the accession numbers denoting documents that have been produced as a result of research done under that contract are arranged in ascending order. The page number helps to locate the citation in the abstract section. The accession number denotes the number by which the citation is identified.

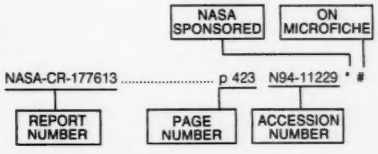
REPORT NUMBER INDEX

Typical Report Number Index Listing



Listings in this index are arranged alphanumerically by report number. The accession number denotes the number by which the citation is identified. The page number helps to locate the citation in the abstract section. An asterisk (*) indicates that the item is a NASA report. A pound sign (#) indicates that the item is available on microfiche.

APPENDIX

NASA SCIENTIFIC AND TECHNICAL INFORMATION PROGRAM PRODUCTS AND SERVICES

The NASA Scientific and Technical Information (STI) Program provides for the collection and announcement of aerospace-related reports and literature obtained worldwide through agreements and exchanges. The result of the collection is the comprehensive NASA STI Database that covers aeronautics, space, and supporting disciplines.

The STI Database, documents generated or obtained by NASA, and products and services derived from or supporting the database are made available to the NASA research community and to the public. Descriptions and sources of these items are presented in the following pages.

Scientific and Technical Aerospace Reports (STAR) is an abstract journal, listing citations with abstracts for aerospace-related reports obtained from worldwide sources. *STAR* is issued on the first of each month, and announces current documents that have been entered into the NASA STI Database during the previous month. The reports are of the following types:

- NASA, NASA contractor, and NASA grantee reports;
- Reports issued by other U.S. Government agencies, domestic and foreign institutions, universities, and private firms;
- Translations in report form;
- NASA-owned patents and patent applications
- Other U.S. Government agency and foreign patents and patent applications
- Domestic and foreign dissertations and theses.

Journal, book, and conference literature, journal translations, and certain foreign dissertations having the same subject scope as *STAR* are announced in a companion journal, *International Aerospace Abstracts (IAA). IAA* is issued on the 1st and 15th of each month and is available from the American Institute of Aeronautics and Astronautics, Technical Information Service, 555 West 57th Street, 12th Floor, New York, NY 10019.

ELIGIBILITY AND REGISTRATION FOR NASA STI PRODUCTS AND SERVICES

Organizations of the type listed below that have registered with NASA can receive products and services.

- NASA offices and installations, contractors, subcontractors, grantees, and consultants;
- Other U.S. Government agencies and their contractors;
- Libraries in the United States that have arrangements with NASA to maintain collections of NASA documents for public reference;
- Other organizations in the United States having a need for NASA documents in work related to aeronautics and space research;
- Organizations abroad that have established reciprocal documents exchange arrangements with NASA.

The central service points—central points of document acquisition and control within qualified organizations—or individuals are eligible to register for NASA STI products and services. Domestic organizations or individuals may be eligible to receive various classes of NASA publications and services and should address their requests for registration or further information to:

National Aeronautics and Space Administration
Scientific and Technical Information Program (JTT)
International STI Program
Washington, DC 20546-0001
USA
703-271-5640

SUBJECT SCOPE

The subject scope of *STAR* and *IAA* includes all aspects of aeronautics and space research and development, supporting basic and applied research, and applications. Aerospace aspects of Earth resources, energy development, conservation, oceanography, environmental protection, urban transportation, and other topics of high national priority are also covered.

HOW TO USE *STAR* SUBJECT CATEGORIES

Abstracts in *STAR* are categorized by 10 major subject divisions that are divided further into 76 specific subject categories. The subject divisions and categories are listed in the Table of Contents together with a note for each that defines its scope and provides any cross-references. For example:

16 SPACE TRANSPORTATION

Includes passenger and cargo space transportation, e.g., shuttle operations; and space rescue techniques. For related information see also *03 Air Transportation and Safety* and *18 Spacecraft Design, Testing and Performance.* For space suits see *54 Man/System Technology and Life Support.*

CROSS-REFERENCES

Individual *STAR* abstracts are not ordinarily cross-referenced, except for certain conference reports or book translations that have had separate abstracts written for their component papers or chapters. Citations and abstracts of the components follow immediately after those of the parent document. When the subject content of a component differs sufficiently from the general content of the parent, a cross-reference citation also is printed at the end of the category to which it normally would have been assigned if it were independent.

DOCUMENTS ON MICROFICHE

Documents available on microfiche are designated by a pound sign (#) following the accession number.

LIMITED REPRODUCIBILITY

A note of limited reproducibility appears in the citation, if there are factors affecting the reproducibility of more than 20% of the document. These factors include faint or broken type, color photographs, black and white photographs, foldouts, dot matrix print, or some other factor that limits the reproducibility of the document. This notation also appears on the microfiche header.

COLOR COPIES

An increasing number of NASA scientific and technical reports are being produced with color graphs, charts, illustrations, and photographs. An indication that a document has color pages follows the source and pricing (SAP) information in the *STAR* citation.

Registered users of the NASA Scientific and Technical Information Program will receive ordered documents with color at no additional cost, as long as stock copies of the document are available. Otherwise, an additional fee of $2.00 per color page will be charged. The NASA Center for AeroSpace Information staff will contact registered users to determine individual user's needs.

NASA PATENTS AND PATENT APPLICATIONS

Patents and patent applications owned by NASA are announced in *STAR* under appropriate subject categories and are referenced in the *STAR* indexes. In the Report Number Index, patents are indexed by the NASA Case Number, and the U.S. Patent Class. Patent applications are indexed by the NASA Case Number and the U.S. Patent Application Serial Number.

Printed copies of patents (which are not microfiched) are available for purchase from the U.S. Patent and Trademark Office.

When ordering patents, the U.S. Patent Number should be used, and payment must be remitted in advance, by money order or check payable to the Commissioner of Patents and Trademarks. Prepaid purchase coupons for ordering are also available from the U.S. Patent and Trademark Office.

NASA patent application specifications are sold in both paper copy and microfiche by the NASA Center for AeroSpace Information (CASI). The N accession number should be used in ordering either paper copy or microfiche from CASI.

The patents and patent applications announced in *STAR* are owned by NASA and are available for royalty-free licensing. Requests for licensing terms and further information should be addressed to:

National Aeronautics and Space Administration
Associate General Counsel for Intellectual Property
Code GP
Washington, DC 20546-0001

SOURCES FOR DOCUMENTS

One or more sources from which a document announced in *STAR* is available to the public is ordinarily given on the last line of the citation. The most commonly indicated sources and their acronyms or abbreviations are listed below, and their addresses are listed on page A-6. If the publication is available from a source other than those listed, the publisher and his address will be displayed on the availability line or in combination with the corporate source line.

Avail: CASI. Sold by the NASA Center for AeroSpace Information. Prices for hard copy (HC) and microfiche (MF) are indicated by a price code following the letters HC or MF in the *STAR* citation. Current values for the price codes are given in the tables on page A-7.

NOTE ON ORDERING DOCUMENTS: When ordering publications from CASI, use the N accession number or other report number. It is also advisable to cite the title and other bibliographic identification.

Avail: SOD (or GPO). Sold by the Superintendent of Documents, U.S. Government Printing Office, in hard copy.

Avail: BLL (formerly NLL): British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England. Photocopies available from this organization at the price shown. (If none is given, inquiry should be addressed to the BLL.)

Avail: DOE Depository Libraries. Organizations in U.S. cities and abroad that maintain collections of Department of Energy reports, usually in microfiche form, are listed in *Energy Research Abstracts*. Services available from the DOE and its depositories are described in a booklet, *DOE Technical Information Center - Its Functions and Services* (TID-4660), which may be obtained without charge from the DOE Technical Information Center.

Avail: ESDU. Pricing information on specific data, computer programs, and details on Engineering Sciences Data Unit (ESDU) topic categories can be obtained from ESDU International Ltd. Requesters in North America should use the Virginia address while all other requesters should use the London address, both of which are on page A-6.

Avail: Fachinformationszentrum, Karlsruhe. Gesellschaft für wissenschaftlich-technische Information mbH 7514 Eggenstein-Leopoldshafen 2, Germany.

Avail: HMSO. Publications of Her Majesty's Stationery Office are sold in the U.S. by Pendragon House, Inc. (PHI), Redwood City, CA. The U.S. price (including a service and mailing charge) is given, or a conversion table may be obtained from PHI.

Avail: Issuing Activity, or Corporate Author, or no indication of availability. Inquiries as to the availability of these documents should be addressed to the organization shown in the citation as the corporate author of the document.

Avail: NASA Public Document Rooms. Documents so indicated may be examined at or purchased from the National Aeronautics and Space Administration (JBD-4), Public Documents Room (Room 1H23), Washington, DC 20546-0001, or public document rooms located at NASA installations, and the NASA Pasadena Office at the Jet Propulsion Laboratory.

Avail: NTIS. Sold by the National Technical Information Service. Initially distributed microfiche under the NTIS SRIM (Selected Research in Microfiche) are available. For information concerning this service, consult the NTIS Subscription Section, Springfield, VA 22161.

Avail: Univ. Microfilms. Documents so indicated are dissertations selected from *Dissertation Abstracts* and are sold by University Microfilms as xerographic copy (HC) and microfilm. All requests should cite the author and the Order Number as they appear in the citation.

Avail: US Patent and Trademark Office. Sold by Commissioner of Patents and Trademarks, U.S. Patent and Trademark Office, at the standard price of $1.50 each, postage free. (See discussion of NASA patents and patent applications on page A-3.)

Avail: (US Sales Only). These foreign documents are available to users within the United States from the National Technical Information Service (NTIS). They are available to users outside the United States through the International Nuclear Information Service (INIS) representative in their country, or by applying directly to the issuing organization.

Avail: USGS. Originals of many reports from the U.S. Geological Survey, which may contain color illustrations, or otherwise may not have the quality of illustrations preserved in the microfiche or facsimile reproduction, may be examined by the public at the libraries of the USGS field offices whose addresses are listed on page A-6. The libraries may be queried concerning the availability of specific documents and the possible utilization of local copying services, such as color reproduction.

FEDERAL DEPOSITORY LIBRARY PROGRAM

In order to provide the general public with greater access to U.S. Government publications, Congress established the Federal Depository Library Program under the Government Printing Office (GPO), with 53 regional depositories responsible for permanent retention of material, inter-library loan, and reference services. At least one copy of nearly every NASA and NASA-sponsored publication, either in printed or microfiche format, is received and retained by the 53 regional depositories. A list of the regional GPO libraries, arranged alphabetically by state, appears on page A-8. These libraries are *not* sales outlets. A local library can contact a regional depository to help locate specific reports, or direct contact may be made by an individual.

PUBLIC COLLECTION OF NASA DOCUMENTS

An extensive collection of NASA and NASA-sponsored publications is maintained by the British Library Lending Division, Boston Spa, Wetherby, Yorkshire, England for public access. The British Library Lending Division also has available many of the non-NASA publications cited in *STAR*. European requesters may purchase facsimile copy or microfiche of NASA and NASA-sponsored documents, those identified by both the symbols # and * from ESA — Information Retrieval Service European Space Agency, 8-10 rue Mario-Nikis, 75738 CEDEX 15, France.

SUBMITTING DOCUMENTS

All users of this abstract service are urged to forward reports to be considered for announcement in *STAR*. This will aid NASA in its efforts to provide the fullest possible coverage of all scientific and technical publications that might support aeronautics and space research and development. If you have prepared relevant reports (other than those you will transmit to NASA, DOD, or DOE through the usual contract- or grant-reporting channels), please send them for consideration to the NASA Center for AeroSpace Information, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.

Reprints of journal articles, book chapters, and conference papers are also welcome. These will be considered for announcement in *STAR's* companion journal, *IAA*.

You may specify a particular source to be included in a report announcement if you wish; otherwise the report will be placed on a public sale at the NASA Center for AeroSpace Information. Copyrighted publications will be announced but not distributed or sold.

PURCHASE OF *STAR*

STAR is publicly available on annual subscription from the NASA Center for AeroSpace Information (CASI) at $94.00/domestic, $117.00/foreign. Single copy prices: $33.00/domestic, $41.00/foreign.

An annual, cumulative *STAR Index* is also available at $54.00/domestic, $65.00/foreign.

STAR is available to registered users on annual subscription from the NASA Center for AeroSpace Information, ATTN: Registration Services, 800 Elkridge Landing Road, Linthicum Heights, MD 21090-2934.
